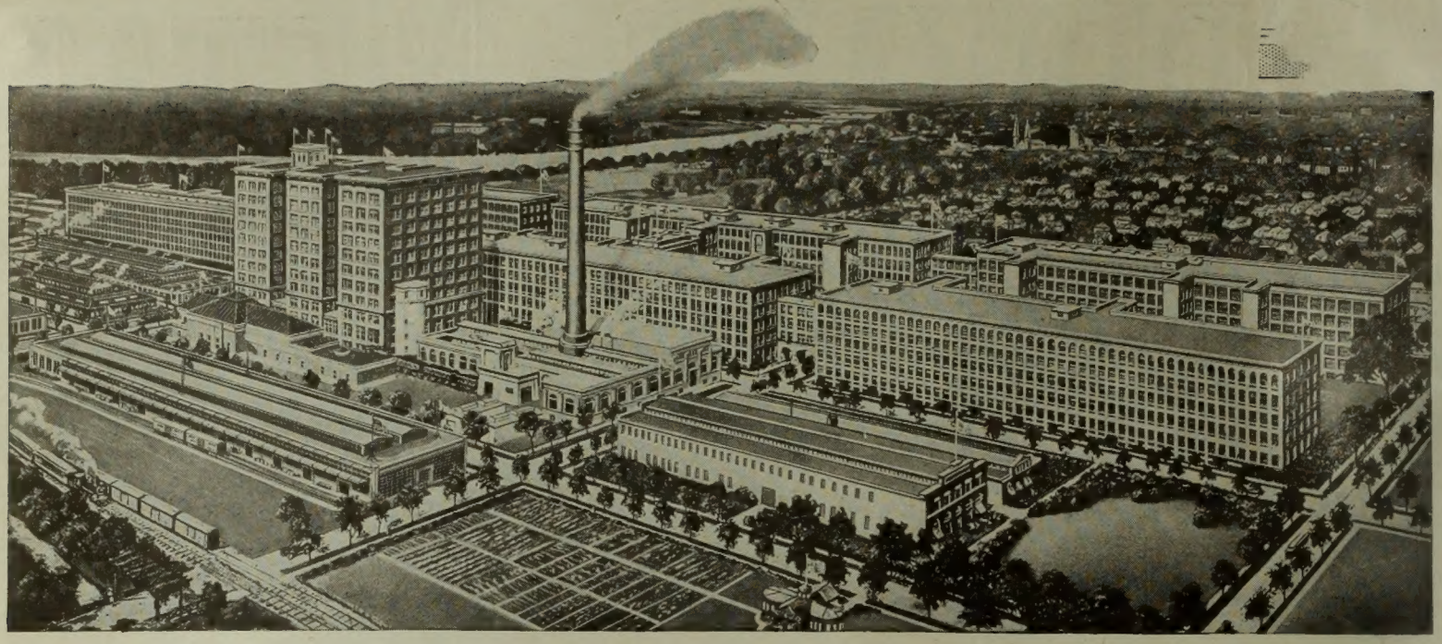
Digs into skin after cutting whisker

Glides over skin after cutting whisker

This Double Bevel Blade Makes Your Face Feel Fine!

IN every community there are men who are anxious to buy a better means of shaving than they are now using.

You can render these men a distinctive service at the same time creating a sale and profit for yourself.



Penn Adjustable Razors and Double-bevel Blades are well advertised in the leading publications. The advertising is *your* advertising to the extent to which you identify it with your store.

We guarantee Penn Adjustable Razors to give shaving satisfaction to the majority of men; we back up this guarantee by authorizing you to loan Penn Adjustable Razors for a trial period, with the understanding that if any razors are returned they will be replaced with new razors.

A. C. PENN, INC., NEW YORK — MENZIES & CO., LTD., TORONTO

Penn ADJUSTABLE Razor

With the Double Bevel Blades $5 to $10

We make over 275 National Cash Registers every day

The National Cash Register is a modern, labor-saving machine that helps merchants, clerks, and their customers.

It protects profits by stopping leaks and losses, temptation, and mistakes.

It adds, records and classifies many kinds of transactions.

It saves time and money because it does 15 things in 3 seconds.

It enables the merchant to give quick, accurate service.

It more than pays for itself out of what it saves.

It helps merchants make more money, with less expense.

This big plant makes nothing but National Cash Registers

The Sign of Successful Merchandising

You would do well to have a stock of Neolin Half-Soles prominently displayed.

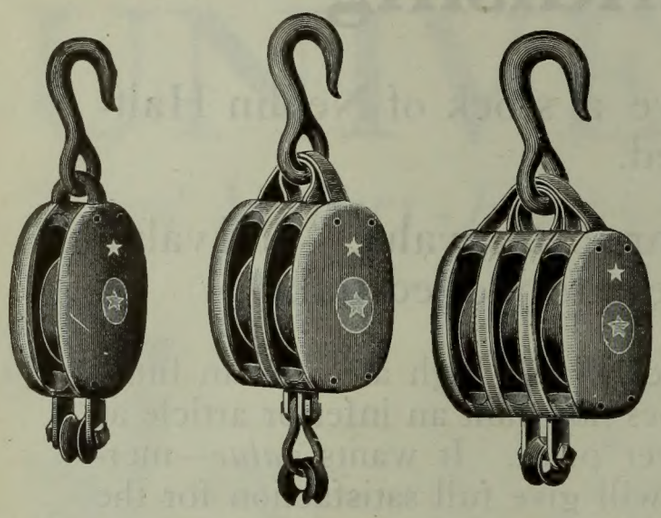
Because Neolin Half-Soles are better value---and value is the basis on which articles are judged today.

Prices have become so high as to mean little. The public does not want an inferior article at a slightly lower price. It wants *value*—merchandise that will give full satisfaction for the money expended.

Neōlin Half-Soles are better value. For they have Neōlin's qualities. They are harder wearing—flexible—retain all the comfort of the old shoes.

By the purchase of many millions of pairs, the public has signified its approval of the value of Neōlin Soles. In Neōlin Half-Soles they recognize the same value-giving product.

Display Neōlin Half-Soles prominently in your window—on the counter. They will stamp you as a sincere merchant—one who offers his customers better value.



Neōlin Half-Soles come in a handsome display carton of assorted sizes. To be sure of Neōlin's value—see that the word "Neōlin" is stamped on every pair. Order from your wholesaler.

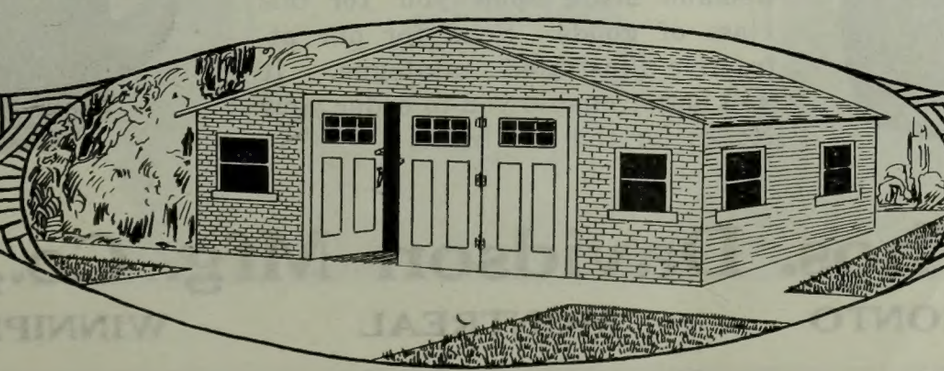
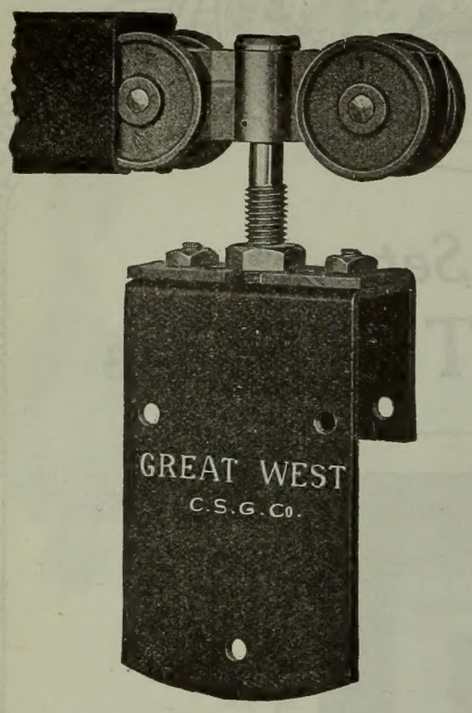
National Garage Sets

Appearance Starts The Sales



These Winning Features Close Them



The neat appearance is due to the designing of all structural features on the inside. The doors slide and fold along the inside wall, economizing space. The mechanical arrangement provides sure operation regardless of ice and snow. One door opens independently. All open at a push; close at a pull. The price is right.

Set No. 806 includes: No. 27 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4 x 4 inch Jap. No. 505 T. P. Butts; 1 only, No. 820 Chain Bolt; 1 only, No. 830 Foot Bolt; 1 only, No. 5 Pull; 1 only, 4½ inch No. 30 Safety Hasp. All necessary bolts and screws. Comes packed in the **"Unusual National Way."** Japan finished. Write for prices, etc.

National Manufacturing Company, Sterling Ill.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

PLYMOUTH ROPE

A Big Winner

In 1916 the Plymouth Rope-by-the-foot plan was first given to the trade in practical form as a profitable selling suggestion, enabling dealers to successfully conduct their retail rope sales over the counter on a price per foot basis. This Plymouth-devised Automatic Selling Chart is in use today with several thousand dealers throughout the United States and Canada, and the following letter is typical of many that are received daily from the trade:

"I have your plan for selling Plymouth Rope-by-the-foot, and saying that the dealer likes it because it offers him a greater profit, and that the customer likes it because he knows in advance just what his rope is going to cost, is putting the whole thing in a nut shell. It is just what I have wanted for years. When I received a lot of rope I did not have time to sit down and figure it out for myself. Many thanks to the good fellow who got this schedule out. I could not do without it now."

F. L. Vorce,
Weyerhauser, Wis.

The Signing of Peace

WILL result in an immediate return to building activities, and consequent large demands for all lines of hardware, building supplies and tools. During the war period, stocks of these goods have been allowed to run low, and will need sorting up in preparation for the increased trade.

Manufacturers have already reduced their prices, wherever the cost of material and labor would permit, so that present quotations may be expected to stand firm in most of these lines for some time.

The range of LOCKS, KNOBS, DOOR SETS, etc., illustrated in our General Hardware Catalogue, consisting of the most staple patterns of the leading manufacturers, will be found to meet the requirements of nearly every customer.

We also have an attractive assortment of miscellaneous hardware, such as Hat and Coat Hooks, Sash Lifts, Sash Fasteners, Push Plates, Door Bells, Butts and Hinges and Sliding Door Hangers, in fact everything required to finish a building of any kind.

Our stock of Heavy Hardware consists of the most favorably known lines on the market.

"COLLINGWOOD" Rubber Roofing is made specially for our trade and is fully warranted.

"BEAVER BOARD," undoubtedly the best Wall-board money can buy.

"TIGER," Hydrated Lime, "BEAVER" Hard Wall Plater, and "HAMMER" Brand Plaster Paris are recognized by all contractors as the leading brands.

"CANADA" Portland Cement, the most favorably known, and best advertised cement on the Canadian market.

"EMPIRE" Paint is manufactured for us and guaranteed by Benjamin Moore & Co., Ltd. Our large purchases of Empire Paint enable us to sell it at a price surprisingly low for a paint of such high quality.

The mention of these representative lines will give the dealer an idea of the high quality of our stock, and the complete range which we carry. We will be pleased to figure with you on any contracts you may have under consideration, or to render any assistance we can to help our dealers get their share of the PEACE BUILDING BUSINESS.

WILLIAMS'
"Vulcan" Safety
Lathe Dogs

WE HAVE embodied in these "Stout-hearts," built for a lifetime of strenuous service, the experience gained in the design and production of *Superior* Drop-Forged Machinists' Tools during nearly half a century. It is not too much to say that the automatic safety feature first introduced by Williams' "Vulcan" *Safety* Lathe Dogs has revolutionized the general design of this type of lathe tool. Like many improvements originated by us in other lines of Drop-Forged Tools, the safety feature of Williams' "Vulcan" *Safety* Lathe Dogs has since been adopted as *Standard*—a fitting recognition of efficiency and usefulness.

Many shops regularly specify Williams' "Vulcan" Dogs. Take advantage of this good will; add it to your own prestige.

They are in stock in Bent and Straight Tail Patterns, with 1 or 2 screws, 16 sizes of 3/8 to 6 inches maximum capacities.

Machinists' Tools Booklets with your imprint, if desired.

Sterling Spark Plugs

The Only Plug Built *by* Gas Engine Makers

A Size and Style for Every Car

THE Sterling Spark Plug is the only spark plug on the market to-day designed and built by a manufacturer of gas engines.

Sterling Plugs were developed by a firm whose wide experience in the manufacture of motors has furnished practical information on spark plug requirements. As a result, Sterling makers know the tremendous importance of spark plug quality combined with careful manufacturing methods.

The center electrode, in every Sterling Plug, is made from high grade nickel alloy Monel metal, a non-corrosive heat resisting material that is proof against corrosion, warping or disintegration. It is doubly thick to insure rigidity and to keep it in positive alignment, thereby always giving the same steady, even spark.

Note the large diameter of the Sterling porcelain core. This gives great strength, defeats easy breakage by heat or accidental shocks, and offers great insulating surface inside the combustion chamber—not troubled so readily from carbon deposits.

Remember, too, Sterling plugs are so designed that they can be taken apart and easily cleaned. Simply unscrew the gland nut, take out the porcelain core and wipe off the carbon. Then you know that the Sterling plug is positively cleaned all over.

These little features in Sterling construction make the Sterling plug a truly great plug. Sterling plugs are unqualifiedly guaranteed and sold by progressive garage and supply dealers everywhere.

Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner

To-day is a better day than to-morrow—write.

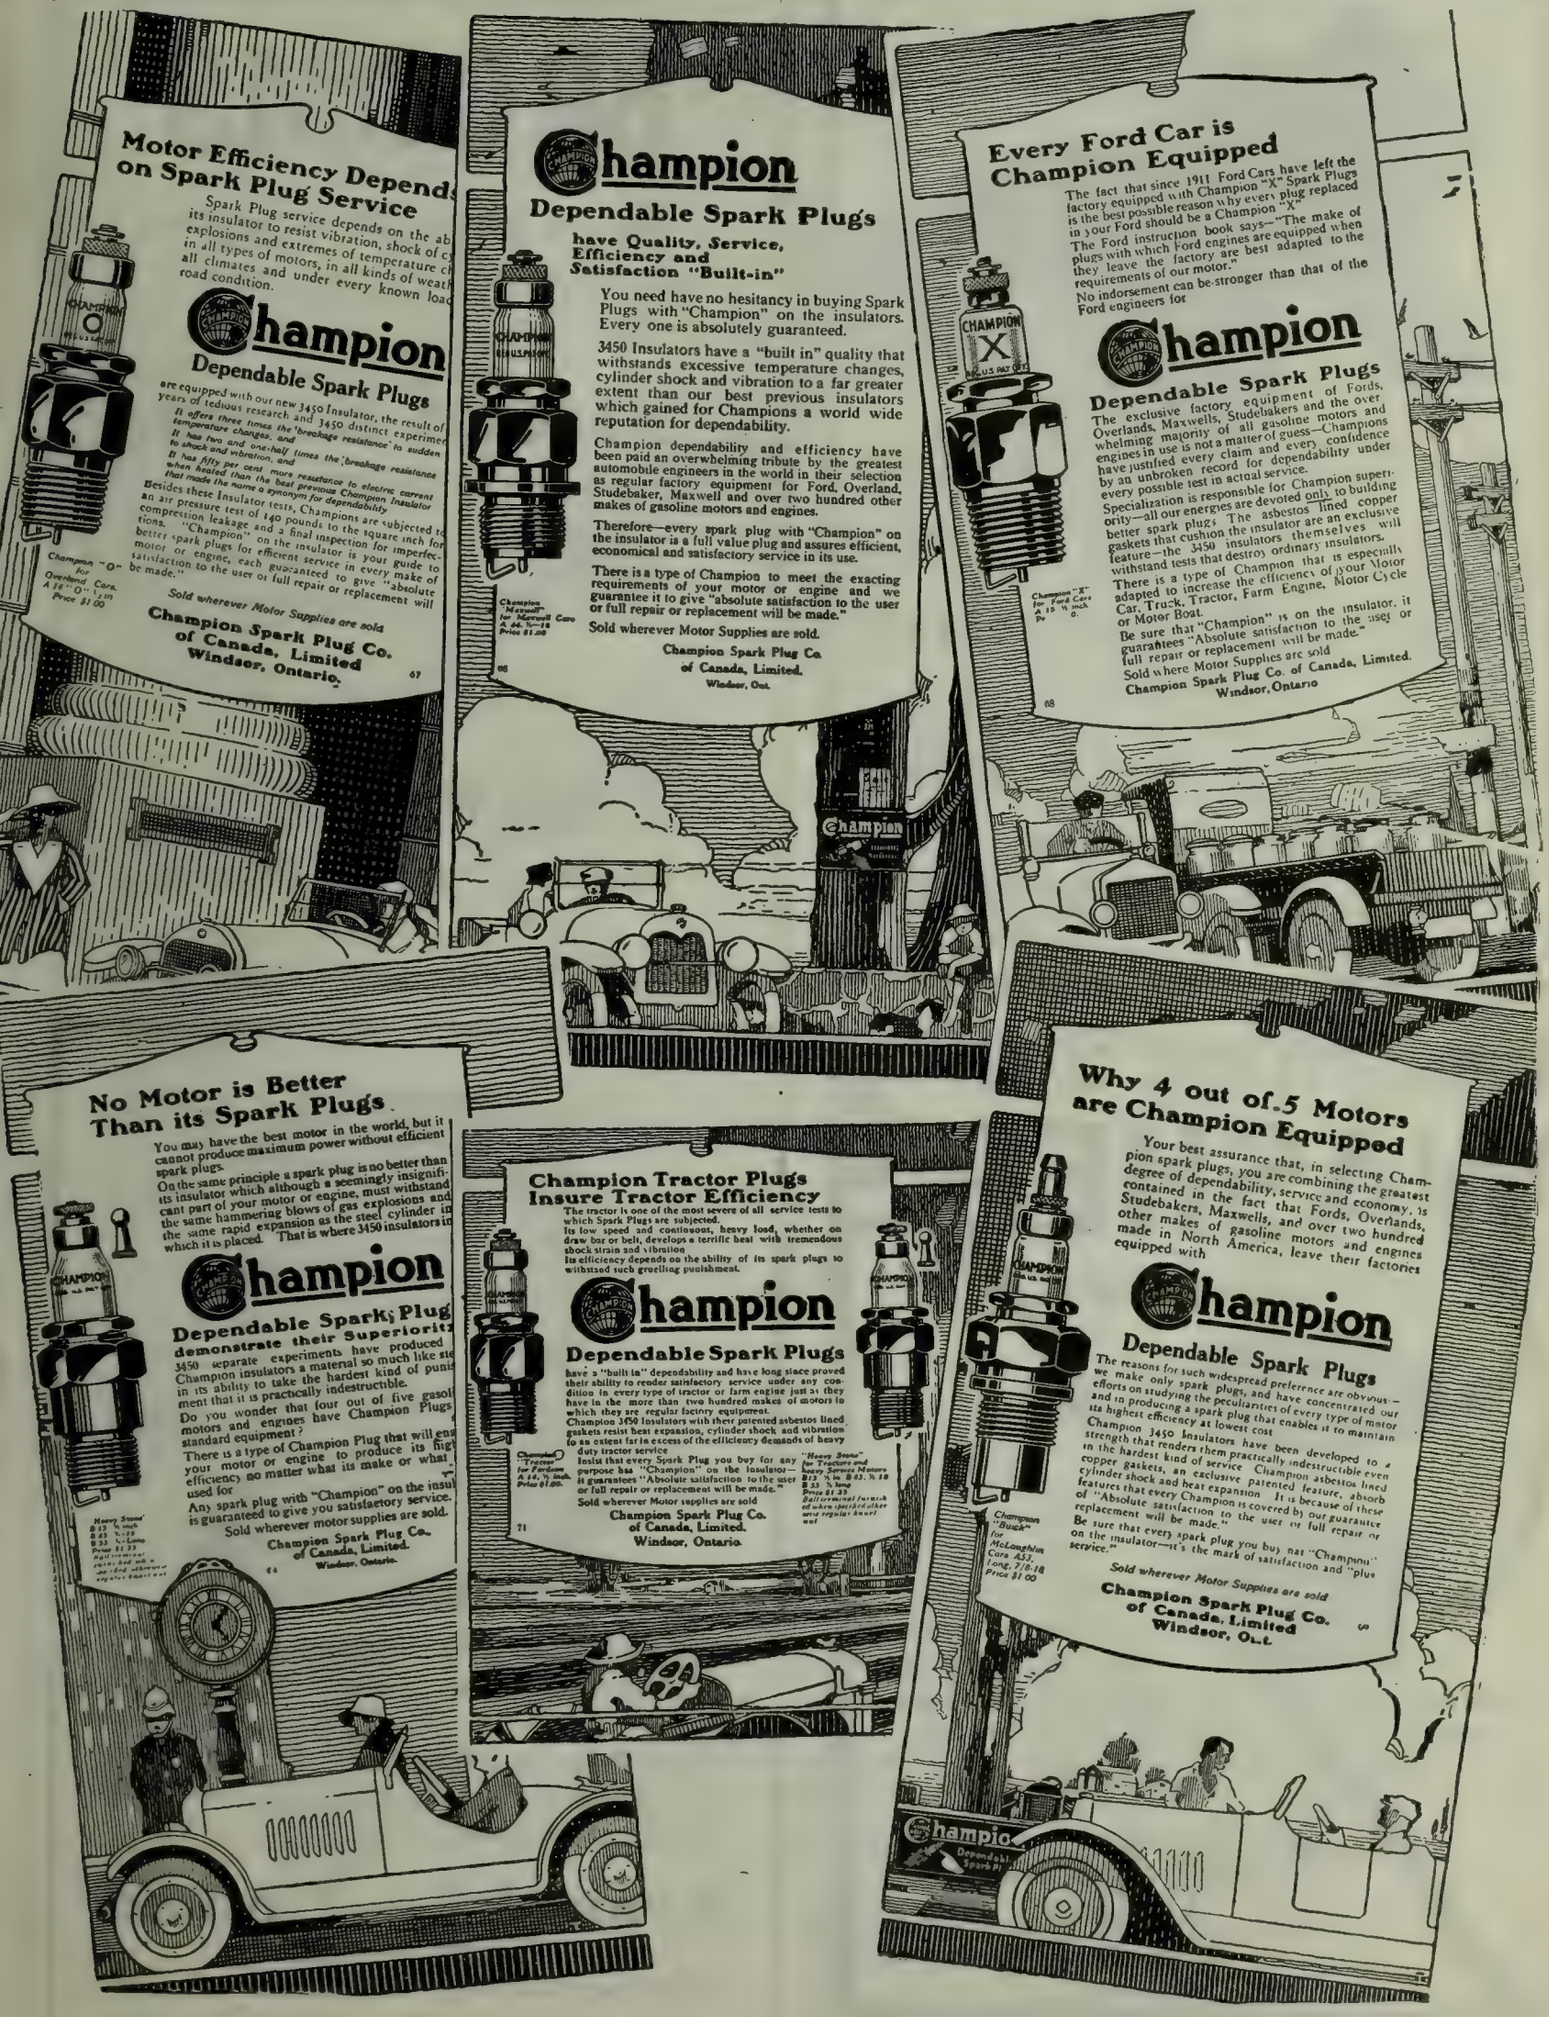
Dependable Spark Plugs

Every reader of these advertisements is a prospective customer of the dealer who carries the full line of Champion Dependable Spark Plugs.

More than 35,000,000 Champion advertisements will carry the story of Champion Dependability to owners of automobiles, trucks, tractors, farm engines, motorcycles and motor boats from coast to coast.



There is a Champion Spark Plug for every type and make of gasoline motor or engine each one equipped with our 3450 Insulators—each has our patented gasket construction and each is guaranteed to give "absolute satisfaction to the user, or full repair or replacement will be made."

Can you afford not to sell Champions? Get your stock into shape and receive the full benefit of our big sales promotion effort as shown in this excellent series of advertisements.

They are business builders and profit makers.

Order from your jobber.

Champion Spark Plug Co., of Canada, Limited
WINDSOR, ONTARIO

Motor Efficiency Depends on Spark Plug Service

Spark Plug service depends on the ab its insulator to resist vibration, shock of c explosions and extremes of temperature ci in all types of motors, in all kinds of weath all climates and under every known load road condition.

Champion

Dependable Spark Plugs

are equipped with our new 3450 Insulator, the result of years of tedious research and 3450 distinct experimen

It offers three times the 'breakage resistance' to sudden temperature changes, and

It has two and one-half times the 'breakage resistance to shock and vibration, and

It has fifty per cent more resistance to electric current when heated than the best previous Champion Insulator that made the name a synonym for dependability

Besides these Insulator tests, Champions are subjected to an air pressure test of 140 pounds to the square inch for compression leakage and a final inspection for imperfections. "Champion" on the insulator is your guide to better spark plugs for efficient service in every make of motor or engine, each guaranteed to give "absolute satisfaction to the user or full repair or replacement will be made."

Champion "O" for Overland Cars. A 14" "O" Long Price $1.00

Sold wherever Motor Supplies are sold

Champion Spark Plug Co. of Canada, Limited Windsor, Ontario.

67

Champion

Dependable Spark Plugs

have Quality, Service, Efficiency and Satisfaction "Built-in"

You need have no hesitancy in buying Spark Plugs with "Champion" on the insulators. Every one is absolutely guaranteed.

3450 Insulators have a "built in" quality that withstands excessive temperature changes, cylinder shock and vibration to a far greater extent than our best previous insulators which gained for Champions a world wide reputation for dependability.

Champion dependability and efficiency have been paid an overwhelming tribute by the greatest automobile engineers in the world in their selection as regular factory equipment for Ford, Overland, Studebaker, Maxwell and over two hundred other makes of gasoline motors and engines.

Therefore—every spark plug with "Champion" on the insulator is a full value plug and assures efficient, economical and satisfactory service in its use.

There is a type of Champion to meet the exacting requirements of your motor or engine and we guarantee it to give "absolute satisfaction to the user or full repair or replacement will be made."

Sold wherever Motor Supplies are sold.

Champion Spark Plug Co. of Canada, Limited. Windsor, Ont.

Champion "Maxwell" for Maxwell Cars A. 66. 14—18 Price $1.00

68

Every Ford Car is Champion Equipped

The fact that since 1911 Ford Cars have left the factory equipped with Champion "X" Spark Plugs is the best possible reason why every plug replaced in your Ford should be a Champion "X".

The Ford instruction book says—"The make of plugs with which Ford engines are equipped when they leave the factory are best adapted to the requirements of our motor."

No indorsement can be stronger than that of the Ford engineers for

Champion

Dependable Spark Plugs

The exclusive factory equipment of Fords, Overlands, Maxwells, Studebakers and the overwhelming majority of all gasoline motors and engines in use is not a matter of guess—Champions have justified every claim and every confidence by an unbroken record for dependability under every possible test in actual service.

Specialization is responsible for Champion superiority—all our energies are devoted only to building better spark plugs. The asbestos lined copper gaskets that cushion the insulator are an exclusive feature—the 3450 insulators themselves will withstand tests that destroy ordinary insulators.

There is a type of Champion that is especially adapted to increase the efficiency of your Motor Car, Truck, Tractor, Farm Engine, Motor Cycle or Motor Boat.

Be sure that "Champion" is on the insulator. it guarantees "Absolute satisfaction to the user or full repair or replacement will be made."

Sold where Motor Supplies are sold

Champion Spark Plug Co. of Canada, Limited. Windsor, Ontario

Champion "X" for Ford Cars A 18 inch Dy O

No Motor is Better Than its Spark Plugs

You may have the best motor in the world, but it cannot produce maximum power without efficient spark plugs.

On the same principle a spark plug is no better than its insulator which although a seemingly insignificant part of your motor or engine, must withstand the same hammering blows of gas explosions and the same rapid expansion as the steel cylinder in which it is placed. That is where 3450 insulators in

Champion

Dependable Spark Plugs demonstrate their Superiority

3450 separate experiments have produced Champion insulators a material so much like st in its ability to take the hardest kind of punis ment that it is practically indestructible.

Do you wonder that four out of five gasol motors and engines have Champion Plugs standard equipment?

There is a type of Champion Plug that will en your motor or engine to produce its hig efficiency no matter what its make or what used for.

Any spark plug with "Champion" on the insul is guaranteed to give you satisfactory service.

Sold wherever motor supplies are sold.

Champion Spark Plug Co., of Canada, Limited. Windsor, Ontario.

64

Champion Tractor Plugs Insure Tractor Efficiency

The tractor is one of the most severe of all service tests to which Spark Plugs are subjected.

Its low speed and continuous, heavy load, whether on draw bar or belt, develops a terrific heat with tremendous shock strain and vibration

Its efficiency depends on the ability of its spark plugs to withstand such gruelling punishment.

Champion

Dependable Spark Plugs

have a "built in" dependability and have long since proved their ability to render satisfactory service under any condition in every type of tractor or farm engine just as they have in the more than two hundred makes of motors to which they are regular factory equipment.

Champion 3450 Insulators with their patented asbestos lined gaskets resist heat expansion, cylinder shock and vibration to an extent far in excess of the efficiency demands of heavy duty tractor service

Insist that every Spark Plug you buy for any purpose has "Champion" on the insulator—it guarantees "Absolute satisfaction to the user or full repair or replacement will be made."

Sold wherever Motor supplies are sold

Champion Spark Plug Co. of Canada, Limited. Windsor, Ontario.

71

Why 4 out of 5 Motors are Champion Equipped

Your best assurance that, in selecting Champion spark plugs, you are combining the greatest degree of dependability, service and economy, is contained in the fact that Fords, Overlands, Studebakers, Maxwells, and over two hundred other makes of gasoline motors and engines made in North America, leave their factories equipped with

Champion

Dependable Spark Plugs

The reasons for such widespread preference are obvious:—we make only spark plugs, and have concentrated our efforts on studying the peculiarities of every type of motor and in producing a spark plug that enables it to maintain its highest efficiency at lowest cost

Champion 3450 Insulators have been developed to a strength that renders them practically indestructible even in the hardest kind of service Champion asbestos lined copper gaskets, an exclusive patented feature, absorb cylinder shock and heat expansion It is because of these features that every Champion is covered by our guarantee of "Absolute satisfaction to the user or full repair or replacement will be made."

Be sure that your spark plug you buy has "Champion" on the insulator—it's the mark of satisfaction and "plus service."

"YANKEE" TOOLS

PUSH DRILL No. 44

Saves Time at Every Turn

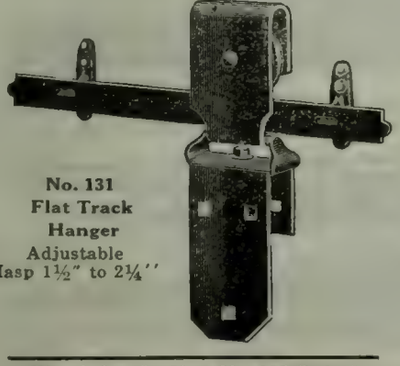
Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.

A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.

Your Jobber Can Supply

NORTH BROS. MFG. CO.

PHILADELPHIA, PA.



? ? *Preparedness* ? ?

ASK YOURSELF THIS QUESTION

Mr. DEALER. Are you prepared to supply the demand of the building trade for 1919 with the ALLITH LINE of Door Hangers and Track?

No. 130 Flat Track Hanger

No. 131 Flat Track Hanger Adjustable Hasp 1½" to 2¼"

Watch for the New No. 135 Swivel

Look over your stock to-day and order at once. Be prepared to supply the demand in your territory. No stock in many cases means no sale. Mark X on the lines interested in and mail to-day for circulars and prices.

[ ] Sliding Garage Door Sets. A real money-maker; every car owner wants one of these sets for his garage (packed one set complete in box).

[ ] ALLITH Flat Track Hangers, Nos. 130, 131, 135. The sensible hanger for all uses.

[ ] ALLITH Flush Door Hangers. The factory man's friend, for weather-proof doors.

[ ] ALLITH Square Trolley Track Hangers, for barn, warehouse or garage doors.

[ ] ALLITH Round Trolley Track Hangers, for barn, warehouse or garage doors.

[ ] ALLITH Garage and Barn Door Latches, with padlock attachment.

[ ] ALLITH Fire Door Fixtures. Get after the factory buildings in your territory.

[ ] RELIABLE Parlor and Barn Door Hangers and Store Ladders.

The Cannon Ball Barn Door

MEHASCO

Hanger was the first Hanger made to run inside its track. The wheels are hollow steel Balls—frictionless, noiseless, tandem, flexible and roller bearing — and absolutely protected from snow, rain and sleet.

For a strong, serviceable Hanger to run outside we heartily recommend the 20th Century. Both these tracks can be conveniently carried under the counter in a hardware store as the Cannon Ball is put up in three-foot ends and the 20th Century in two-foot. This makes it very convenient for the customer to take home in an automobile, buggy, or democrat.

Merchants Hardware Specialties, Ltd.
CALGARY

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Canada's New Bankruptcy Act

First Uniform Legislation for Dominion in Forty Years—Will Lessen Expense, Make Proceedings More Speedy, Abolish Unfair Preferential Treatment, Provide Honorable Discharge—Retailers' Wishes Recognized.

Hon. Hugh Guthrie, Solicitor-General, before Montreal Merchants' Association

THE new Dominion Bankruptcy Act is due to the fact that for the past forty years there has been no proper Bankruptcy Act covering the whole Dominion. Russia and China, along with Canada, have no general Bankruptcy Act, but all other civilized countries have. There has been no Dominion law since 1878, and in the interval the various provinces have passed insolvency laws, but the trouble was that these were not uniform. Men who did a national business experienced difficulty through the variety of insolvency laws, while exporters in Great Britain said they could not secure uniformity in their claims with the preferences and priorities that were allowed in the various provinces. The demand for a Dominion Act came from the Boards of Trade, the wholesale and retail houses, the Bankers' Association, and many other bodies all over the country. Under the old Dominion Act, which lasted only for five years, the machinery for winding up an insolvent estate was very cumbersome and slow, the expense was too great, and the difficulty was that the assignees were not a class of men that would make good trustees, and very often no dividend was declared on the estate. The matter of expense as well as lack of uniformity was one of the difficulties with the Provincial Act, and one instance was given of a case in British Columbia where an estate of $730,000 brought only $3,000 for distribution to the creditors.

Voluntary and Involuntary

The Act as it is being passed by the Commons and Senate provides for two kinds of bankruptcy:

1. A voluntary one, for any man may make an assignment to a trustee under the Act.

2. An involuntary one, where the man is placed in bankruptcy against his own will. This applies to all except wage earners with less than $1,500 a year, and to farmers, who cannot be put in bankruptcy against their will.

There was an effort made to limit the application to traders, such as is the case in France, and was the case under the old Canadian Act, but experience has shown that this should be broadened and the Act in Great Britain applies even to farmers. The retail merchants declared that such a limitation to traders would be unfair to them, and that there should be a very general application. They told us that doctors and lawyers, professional men generally, preachers and university men were the biggest debtors so far as far as they were concerned. Thus the Act was broadened. So far as the farmer was concerned it was argued that he might be the victim of hard luck one year; he might be hailed out, and if he were compelled to give up his farm and stock he would have no chance to right himself, so he was exempted.

Where Debt Exceeds $500

The bill, as it went through the Commons, applied where indebtedness was $200 or over, but the Senate increased this to $500, and the Commons is agreeing to this; that is where a man owes $500 or over and refuses to pay.

Jurisdiction is vested in the Superior Courts of each province, and a few cases of appeal are allowed.

Choosing Trustees

Trustee—Anyone may apply to the Secretary of State for Canada, and the appointments are made by the Governor-General-in-council. Many chartered accountants have made application, and these will be assigned to districts, but all property, no matter where it is located, will be vested in the trustee. Each one must give a permanent security for $10,000. In the case of an individual estate the creditors may compel him to give an added security for the value of the estate.

The Act provides whereby an honest debtor may receive a discharge where he has not been guilty of impropriety, where he has kept a proper set of books, where he has given up all his assets and in fact has acted honestly, he is entitled to a discharge by a court which would be good against the world.

The procedure—The petition is presented to a court, which will have it served on the debtor, and in eight days the judge appoints a trustee who takes charge, under the supervision of the creditors and inspectors. The trustee must report to the court, and his security is not given up until the whole case is discharged.

Fees Are Limited

Payment to trustee—The trustee may be given the creditor's vote or he may be limited to an amount under the Act which will not exceed five per cent. of the estate that is in his hands.

Lawyer's fees are likewise limited by the bill so that the estate will not be "gobbled up." The inspectors are allowed only their disbursements. In the case of lawyers where an estate is over $5,000 they are allowed 5 per cent., where it is under $5,000 not more than 10 per cent., and only the 10 per cent. if the inspectors agree.

(Continued on page 57.)

ITS MERITS

The analysis of the new Canadian Bankruptcy Act by Hon. Hugh Guthrie was given at a meeting of the Merchants' Association of Canada, held in Montreal, at which a staff member of HARDWARE AND METAL *was present. Mr. Guthrie declared that the new act would grant uniformity, secure speedy, cheap and reliable proceedings; abolish preferential or priority creditor abuses; grant an honorable discharge to a deserving debtor, and work out beneficially to the commercial and financial interests of Canada.*

From the point of view of merchants it is gratifying to note that they won out in their protests against the limitation of the act to "traders"; now it includes the "professional" classes as well, many of whom they described as their "worst creditors."

Keep People Interested in Your Store

Turnbull & Cutcliffe Aim to be Able Always to Show Prospective Buyers a Complete Stock—Find That Saturday Advertising is Equal to That of Any Other "Two" Days in the Week

Based on an Interview by C. E. PARSONS of HARDWARE AND METAL with R. H. BUTTERWORTH of TURNBULL and CUTCLIFFE, Brantford, Ont.

KEEPING a stock which will give buyers ample selection is one of the plans which Turnbull and Cutcliffe of Brantford, Ont., have found to produce excellent results. If anything new comes out, they aim to have at least one sample to show to buyers, and as they are so located that in most cases they can get shipments quickly from the manufacturers and jobbers, there is no trouble in looking after all the requirements of customers. This policy of having a wide range of goods to show is carried out wherever possible and is featured especially in the enamelware department and in the stove section. These are two departments in which an especially large volume of business is done.

An Important Section

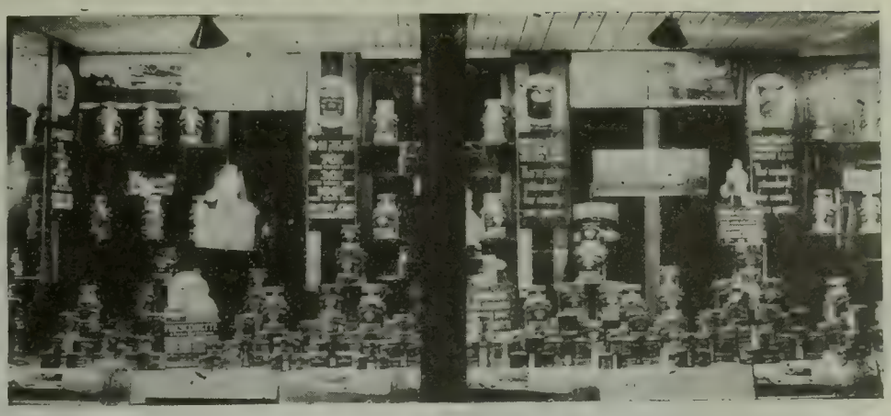
The front half of the second floor is devoted entirely to the display of enamelware and tinware. As will be seen from the accompanying illustration prospective buyers find themselves looking over a stock that offers endless variety. If a woman wants a large saucepan or a small one, or an intermediate size, there is one right out on the display tables for her to look at. Right alongside of it is another size or another style, while perhaps on a table somewhere close by she will find half a dozen other lines in which she is interested. This idea of keeping the goods right out before people where they can be quickly seen is one that has proved a big factor in keeping the stock moving. Besides the display tables a lot of goods are displayed on shelving and a lot of other lines, especially adapted because of their size to making a good window display for the windows on the second floor, are arranged where they can be readily seen.

Keep It Up-to-Date

"We have had most satisfactory results in every way from the display tables," said Reg. Butterworth, of Turnbull & Cutcliffe's to HARDWARE AND METAL. "Because we are located within close shipping distance of many of the manufacturers we do not have to carry a large stock. We aim, though, to keep it complete. Customers like to be able to look over a lot of stock and compare sizes and shapes and prices. Some women think they would like a white coffee pot, but when they see a blue one decide they would like that better. We aim to have both kinds for them to choose from. If there is anything new in any of the lines we want to be able to show it to them in the store. They like this sort of service and it helps maintain and also build up for the store good will. It not only brings the people back themselves when they want other goods, but they talk about our stock and our service to their friends. No matter what you sell, if people are satisfied they will talk about it, and this sort of advertising is most valuable."

Make Their Own

The tinshop business of Turnbull and Cutcliffe has grown to such an extent that it was found necessary to secure



Here is an illustration of the very fine display of stoves and ranges on exhibition in the Turnbull & Cutcliffe store, Brantford, Ont. This firm find the stove department one of the largest and best paying in the store and always endeavor to keep the stoves looking their best. A small corner of the paint department is also shown and towards the back will be seen a very neat arrangement of harvest and garden tools.

special premises for it. Here the firm makes a great many garbage cans, wash boilers, tubs and other lines. By keeping their lines well displayed, not only in the store, but in the windows also, the sales have grown splendidly. In one day as many as seventy-five copper boilers have been sold. On an average 400 garbage cans are turned over each year.

Sell Many Stoves

Stoves are another big line with Turnbull and Cutcliffe, and sales will average about 300 each season in addition to from 200 to 300 oil heaters. The stove department is located in the rear of the store on the main floor. Every stove is kept in perfect condition, free of dust and all nickelled work shining. In this department also a feature is made of having a wide range of goods for prospective buyers to select from. The stove salesmen are posted on every point about every stove and can give all the information required and answer every question. This is an important matter, and taken in connection with the splendid stock from which selection may be made is a big factor in closing sales. If a buyer wants a stove with fancy trimmings he can see one immediately. If he would like one with or without a reservoir, both styles are there for him to see. The salesmen have all the talking points about what each will do and why, and can give a lot of information and suggestions that are appreciated by the buying public.

Turnbull & Cutcliffe, Brantford, Ont., are firm believers in the value of the window display. This is a display of paints which brought them in excellent results.

As will be seen from the illustration the stove department is splendidly lighted. This enhances the effects produced upon prospective buyers by the large and well-arranged stock of shining stoves. People, especially women buyers, like to shop in a store that is kept clean and where the goods are kept looking as if they received some care. This is a point that is never lost sight of in the store of Turnbull and Cutcliffe. While a lot of goods is shown there is no confusion or mussy effect about either the stock or the store.

The front part of the main floor is kept for display of seasonable lines. These are frequently changed around. One of the things usually prominent in the showing is a nice washing machine. The firm has been doing a good trade in these and sales some times run as high as 200 a year. Another good line is refrigerators. These are shown in all sizes. The firm also competes with the furniture stores in the sale of kitchen cabinets. Another line in which sales have been showing an increase is electric ranges.

Good Window Displays

The store of Turnbull and Cutcliffe is located on a corner and this gives the firm some splendid opportunities for window displays. Good use is made of the chances afforded, not only on the main floor, but on the second floor as well. The main display windows are dressed with great care every week and produce splendid results. The paint window reproduced in connection with

One view of the main floor of the store of Turnbull & Cutcliffe, Brantford, Ont. In the immediate foreground is shown a show case and also wall case, with silver and nickel plated goods, brass ware and kindred lines. Following is a neat arrangement of shelving, holding drawers in which are the many shelf lines found in the modern hardware store.

Here is one of the neatest and brightest house-furnishing departments it is possible to find in any hardware store. The entire arrangement is good, from the merchandise on the shelves to that arranged on tables within easy reach of every customer. This is another department in the Turnbull & Cutcliffe store, Brantford, Ont., which is showing rapid growth. The metal ceiling adds to the appearance of this department materially.

this article shows the attention the main windows receive. The firm has had a splendid season with paints and part of the success is attributed to the window displays that were used. The idea of service is fully carried out in the paint section. When a party comes in to talk about paint the matter is gone into carefully with him and the salesman finds out all about what is to be done. He is in a position to suggest this or that paint and tell why it should be used if the best results are to be obtained and he always finds out if there is an opening for selling one or more brushes.

Increased a Third

This season the firm did some special advertising with the object of boosting paint sales. As a general rule a space two columns wide and six inches deep is used in the local daily paper every Tuesday, Thursday and Saturday. Attractive electros are always used in connection with these advertisements. The results in all lines as a result of this advertising have been most satisfactory and as far as paint sales were concerned the business showed an increase of one-third.

The firm has kept close check on the results it obtains from its advertising and decided that advertising on Tuesdays, Thursdays and Saturdays was productive of the best value. Another interesting discovery that was made was that advertisements inserted on Saturday were quite equal in the results produced to any other "two" days in the week. The reason for this apparently is that many people read the paper on Sunday. Very often also the man of the house is home, and reads the ads. and talks things over and definite conclusions are arrived at as to what shall be purchased and then the buying is done promptly.

May Make British Goods in Canada

British Manufacturer Looks Toward Canada With New Vision — Changes Will Assist in Greater Production — War Creates Broader Views, Says Steel Company Officers

MR. BEVERLEY ROBINSON, president, and Mr. Hugh Kearns, managing director, of B. & S. H. Thompson & Co., Ltd., Montreal, have just returned from a four months' business trip in Europe. They visited the British Isles, France, Italy, Sicily, Switzerland, etc.

During an interview with HARDWARE AND METAL, Mr. Kearns stated that the attitude of the British manufacturers has undergone a very great change with regard to Canadian business. They realize now that they must be prepared to meet the conditions of the trade in this country, the unwillingness to do so in the past having diverted a very great proportion of the Canadian trade to Germany.

Labor—New Equipment

"British manufacturers freely admit that labor in the past did not get the share of profits which they should have, but this condition is largely accounted for by the competition which grew up among themselves. It is recognized that cheap labor in the past will not be available now, and to offset this many of the progressive manufacturers are installing new and up-to-date equipment in plants which had become obsolete.

The labor troubles have been serious, but Mr. Robinson and Mr. Kearns were told by a gentleman who had been on one of the Government committees which negotiated with organized labor during the war, that the labor leaders in England, contrary to the general idea, are extremely reasonable and patriotic men. Difficulty is experienced by these labor leaders in controlling their people at all times, but with this class of men directing labor, and the common sense of the British people, the labor situation would undoubtedly be straightened out.

May Build in Canada

A number of British manufacturers intimated their intention to manufacture in Canada in order to secure their share of our trade, and a great many people in the various walks of life, whom Mr. Robinson and Mr. Kearns met, intimated their intention of migrating to this country.

Great Britain is recovering much more quickly than the other countries which Mr. Robinson and Mr. Kearns visited. On the continent there is an extreme shortage of coal which is greatly hampering the return of commercial activity, and, of course, conditions there have been much more upset by the war than in Great Britain, because of their closer proximity to it.

Now that peace is definitely settled, an era of prosperity should be confidently looked for, our having become better known in Europe through Canada's wonderful record during the war will contribute to this.

WELSH TIN-PLATE WORKS CHANGE HANDS

Announcement was made at Swansea, Wales, recently, that a big tin-plate deal had just been arranged, the Grovesend Steel & Tinplate Co. having purchased the works of the Bryngwyn Steel & Tinplate Co., W. Lewis & Co., and the Cambria Tinplate Co. The purchase price for all three works is stated to approximate $1,250,000. This is considered to be the most important Welsh steel and tin-plate deal of recent years.

The Necessity and Importance of the Retail Distributor and his Relationship to all Other Industries

An Address Delivered by E. M. Trowern, Secretary of the Dominion Board of The Retail Merchants' Association of Canada, Before the Royal Commission on Industrial Relations, Appointed by the Dominion Government to Enquire Into Industrial Conditions, Which Met at Ottawa in June, 1919

ALTHOUGH the question of the increased cost of merchandise and the cost of distribution at retail may not be considered by your committee to properly come under the public enquiry that has been allotted to you to report upon, yet we feel that it is so closely related to the subject you have under consideration that we are taking the liberty of presenting to you a few facts on the subject of retail distribution as we see them, standing, as we do, between the producer, the manufacturer and the workman on the one hand, and the consumer on the other. So much has been said about the conditions of the producer and the manufacturer, and what is termed, for the sake of a better classification, the "working classes," and so little has been said about what is known as the distributing classes, that the whole subject has become confused and misunderstood.

Millions Invested

It is not generally known that there are many more millions of dollars invested in distribution than there are in either manufacture or production. It could not but be otherwise; merchandise must always be manufactured ahead of the immediate demand. Goods produced or manufactured in Vancouver are of no value to people residing in Halifax unless they are transported to the latter point. To do this, it requiries negotiation, purchase, transportation, warehouse facilities, retail facilities, etc., and final delivery to the ultimate purchaser in single items. A host of transactions take place before the goods are finally delivered. All these separate transactions cost money, and take time and intelligence, in addition to "capital," which cannot be regarded in any other light than "accumulated industry."

Present System Natural Development

We are quite aware that arguments have been put forth for centuries striving to discover some plan whereby goods produced or manufactured can be handed direct to the consumer, and to have the middleman—which means either the wholesaler or the retailer—removed. All efforts in this direction have been failures, and they always will be failures, because the present system has been a natural development that has grown out of actual necessity.

Prunes or raisins grown in South America or in Egypt are of no value to consumers in Ottawa unless they are brought directly to their tables here. No consumer would think of ordering such things direct, or having them shipped in small quantities; they must come in bulk. When they arrive they must be cared for, protected against weather and other conditions, sold to the retail trade, and distributed by them to their customers.

Property Value High

The value of the land and buildings upon which retail stores are situated, together with the value of the wholesale properties, exceeds in value and is more highly assessed than any other property in any municipality. Add the value of all the retail property in Canada together, couple with it the value of the stocks which are held waiting, ready and near at hand for the convenience of those who want the goods, and then add the value of all the wholesale property and merchandise to the retail property, and you have a volume of wealth that far exceeds the value of all our farming and manufacturing industries. This costly and expensive system exists because it is required and because there is no other legitimate system that can take the place of it. It has been found to be the most economic, convenient and elastic system that can be provided, and it has developed through necessity and experience. There is no practical proposal or scheme in sight that can take the place of our present system of distribution. It requires adjusting here and trimming there, but the underlying principles cannot be abolished. We are anxious to go on and develop it and make it more complete and convenient. This can only be attempted by those who practically understand the principles which guide and direct it. No improvement can come from any other source.

Retailers perhaps take their position in the economic scheme of things too much for granted. The campaign instituted by some of the daily newspapers to discredit their standing in the community is one which should awaken in the mind of the retailers a realization of their importance in the successful merchandising of goods. It is high time the retailers were organized into a body by which recognition of their just claims could be secured and opposition to any proposed legislation which would hamper their successful functioning be systematically opposed. Co-operation is seen in labor circles, in farmers' clubs, but the retailers sit calmly by and have to stand abuse at the hands of those who know not whereof they speak. The retailers cannot be successfully displaced, but their operations can be curtailed to a point where they cannot operate successfully. It is to fight against any such legislation that the retailers should be organized—the organization should be effected now.—EDITOR'S NOTE.

The Co-operative Society

All attempts that have been made by those who operate "Co-operative Societies" in any part of the world have proved to be nothing more than the old scheme of one merchant endeavoring to outwit his competitor by trying to tell the public that his goods and his system are far superior to those of his neighbor, whereas the so-called Co-operative Society system is clumsy in its operations, inferior in its service, and its methods of handing back so-called dividends or bribes to its customers have all the deceptive elements of the trading stamp scheme.

To those who are not acquainted with the problem of retail merchandising, and from the manner in which some of these co-operative societies advertise themselves, and their supposed superior methods, it is not surprising that those who are unfamiliar with the "tricks of trade" see some virtue in their proposals, but those who are thoroughly familiar with trade, and who are anxious to have all trade transactions based upon a sound, healthy, moral basis know full well that any system of merchandising that is based upon the placing of a higher price on any article to a customer, and then handing the increased price back as a bonus or a dividend or a bribe to secure and hold the trade, by or through any pretext whatsoever, is wrong in principle and commercially unsound, and it is for this reason that reputable and honorable retail merchants will have nothing to do with business methods of that character.

Not on Sound Basis

If the claims put forth by these so-called Co-operative Societies were true, and the principles upon which they are founded were correct, everyone conducting a retail store would adopt the same system, but the co-operative system is not adopted because the principles upon which they are founded are commercially unsound, and their methods can never appeal to those retail merchants who want to see the retail trade of Canada placed upon a higher plane.

An Important Duty

Believing, therefore, that we, as retail distributors, are an absolute necessity, and that our services cannot be dispensed with, w feel that we have an important duty to perform in every community throughout Canada, and we further believe that owi to our financial position, our absolute necessity, and our numerical strength in every city, town and village throughout Canada, that no question affecting what is termed the "working classes" or the "manufacturers" or "producers" can be intelligently considered without taking the great problem of distribution into consideration as well.

Circle is Complete

Retail merchants stand in a very unique position in every community. They reach out and take the goods from the producer

and manufacturer and hand them to the consumer. Every increase that is made to any article, whether it is through increased wages, the increased cost of raw materials, increased transportation, increased rent or the increased overhead expenses of every class through whose hands any product passes, is collected again by the retail merchant from the consumer. The higher wages go the higher will go the prices of the articles created by the wage earners. The circle is complete and no system of reasoning can alter this truth. The law of supply and demand is the basic law upon which everything is founded. The dearer goods are the less profit the retail merchant makes, as the demand is lessened, and his business turnover is, therefore, less.

High Wages—High Merchandise

In order that workmen can be able to purchase all those things that are necessary for their actual comfort, they must receive a salary more than equal to the value of the actual things required so as to enable them to lay aside sufficient for old age, etc. If wages keep climbing up, merchandise will go on climbing up, and there is no scheme that can be proposed that will prevent it. If wages climb higher on one class of goods than they do on others, the workmen will be limited to fewer classes of goods and their comfort will be affected thereby. If, for instance, a working man received twenty-five dollars a week, and with that sum he could pay his rent, buy groceries, meat, fuel, light, clothing, boots and other actual necessities, and his rent was doubled, he would be compelled to forego purchasing some of the other articles of necessity, and, having to do without these necessities, he would immediately become discontented. On the other hand, whatever necessities he economized on it would injure the retail merchant who handed those lines, and he in turn would have to undergo the same weeding out process as that undertaken by the wage earner.

Community Affairs Inter-Related

These simple illustrations are made for the purpose of showing how closely the affairs of every community are interrelated, and whenever one class is affected all classes are affected.

Our purpose in submitting these brief views on the problem of retail distribution, which is one of the most difficult problems for those who have had no practical experience in it to understand, is to point out that there is more capital invested, and more people employed in distribution than there is in production and manufacture combined, and that, in our opinion, no plan, no scheme and no device that can be suggested can ever alter it unless we turn our plan of civilization backward and all begin again to be tillers of the soil and makers of the things we use and require. No one would be satisfied to go back again to the simple life of making our own candles, and using flint instead of matches, and using a spinning wheel to make clothing out of sheep's wool. We have experienced life's comforts and we want them, and if we want them and must have them, we must pay for them. A meal provided in a million dollar hotel will always cost more than a meal provided in a tent. There is a price ticket on everything. The best things cost the most, and if we wesire them we must be prepared to pay for them or go without them.

An Advanced Age

To properly consider the subject we have before us we must take conditions as we find them to-day, and not as they were a century or two ago. To-day we have public school systems all over the world. Boys and girls, and men and women, have been educated to try and think. In every sphere of activity we see development. We find improved machinery in all lines of manufacture and production. We have labor-saving devices and we have transportation facilities that are unequalled in any age of the world. We have new devices for transportation, such as automobiles, automobile trucks, aeroplanes, bicycles, etc. In electric power and electrical devices we are in advance of anything in the history of the world. In telephones, telegraphs and cables, our advances are phenomenal, and all this with the many other new inventions such as gramophones, etc., which can produce the human voice, all these things have been brought about by those who have been educated to think, to diagnose, to investigate and to study.

While the thousands who have been giving their attention to the above commercial improvements have succeeded, another class has been thinking along other lines, but their thinking has produced different results.

What Lack of Commercial Training Reveals

It is said that a little learning is a dangerous thing. In many cases this has proven to be true. Not having had practical experience and an opportunity of giving any study to the great problem of distribution, the rock upon which thousands upon thousands of persons engaged in other walks of life become shipwrecked is where they venture out upon its dangerous surface. These persons who have not had a proper commercial training advocate among other things the following:

1. The abolition of the middleman.
2. Direct purchase and sale between producers and consumers.
3. Municipal trading in coal, wood, milk and other articles of common use.
4. Public retail markets to enter into competition with tax-paying retail merchants who carry vegetables all the year round, whereas consumers cannot buy vegetables in the market when the temperature is below freezing point.
5. Without knowing the unsound, commercial basis upon which so-called "Co-operative Societies" are established, they advocate their adoption.

Wrong Thinking at Root of Trouble

In our opinion, it is wrong thinking of this character that lies at the root of our present troubles and unrest to-day. The remedy for this false thinking lies at the door of the retail merchants themselves. Believing, as we do, that no intelligent system on earth can be devised to abolish the retail merchant, or whereby all means of retail distribution can be operated entirely by the State, and that all men must have the right to develop their own lives as they deem best for themselves, without injury or interference with the rights of others, it is our duty to make our claims known.

Retailers Here to Stay

We wish, therefore, to repeat again that the most difficult problem of all problems for the average student of political economy to understand is that of the distribution of merchandise at retail. It has puzzled wise men before corn was sold in Egypt, and it will puzzle wise men and social economists until the crack of doom. Retail merchants have been on earth for centuries, and they will be here for all time. You can devise no plan that will abolish them because they are an important and essential part of every community. They comprise the active, independent and free men of every municipality. Their chief desire is to be allowed to do their business on a sound, business basis and their chief enemy is municipal and legislative restrictions that are proposed to be placed upon them by those who do not understand the simplest principles of buying and selling.

Few Labor Troubles

As to the labor troubles of retail merchants, they have very few. Most of their clerks are their friends. A young man who enters behind the counter of the average retail merchant's store must take an interest in the business. He must be pleasant and agreeable with the customers of the store. The proprietor knows his habits, knows his Christian name; he calls him Bill or Bob and he interests himself in his work, and encourages him to develop his character. It has often been said, and we have never heard it disputed, that the best business college in the world for a young man to enter is behind the counter of an honest retail merchant.

Influence for Good

A retail merchant who places his name over his door and who is always before the public, has a stake in the community, and his influence is for good and not for evil. Strikes, lock-outs and hold-ups are never heard of in ninety-seven per cent. of the retail stores in Canada, nor will they ever be heard of, because each store has its own plan of paying wages or giving commissions on profits, or giving bonuses or increasing salaries according to the ability of the clerk to earn. No system of paying all clerks the same salary, even in the same class of trade, could ever be adopted, because the clerks themselves would object to it. The principle that exists, and which always will exist, is to pay clerks according to their worth to the firm. This is the only fair system and the only one that will give them an incentive and an ambition to some day become their own masters. In Canada to-day every young man who is ambitious and who is willing to devote his time and thought to the business of his employer in the retail trade can find an opportunity of advancing to the highest position in the store, or becoming a partner, or eventually entering into business for himself. The first thing, however, that must be done, and for this reason, chiefly, we are submitting this article, is to impress upon the public mind that the man behind the counter is performing equally as useful and important work in the community as the man behind the lathe or the man behind the plough.

Occupy Most Important Position

As retail merchants, in the past we have been too docile and too unconscious of our own importance in the community, and we have allowed all sorts of reports to be circulated by those who know nothing about the problem of distribution, being of the opinion that the public would not believe the statements made. In the future we hope to remedy this condition by taking our proper place in the community and insisting upon equal recognition with all other kinds of useful employment. As stated before, we occupy the most important position in the life of every well ordered community. We are here because we are required, and we will be here for all time, and there is no other system of distribution that can supplant us.

For this reason, if for none other, the Dominion Government must recognize that it is essential that no unfair or discriminatory legislation should be passed that will hamper our progress or interfere with our rights as free citizens. At the present time we welcome the opportunity to be able to lay before the special committee of the House of Commons, which has been appointed to investigate the cost of living, all the facts concerning the retail trade that we have in our possession, as we feel that the more we make our condition public the more the public will respect and appreciate us.

JAPANESE STEEL INDUSTRY

Japan is determined to become independent in its steel supply, and among the concerns already engaged in this industry, the Oriental Steel Co., which is incorporated for $25,000,000, began turning out its products in April. The works, which cover an area of 260 acres, are located at Tobata, one of the principal industrial centres of Japan, on the northern coast of Kyushu.

Making Tool Department Pay Its Way

Get the Goods Before the People Within the Store and in Windows — Make Every Sale Carry Its Own Profit—Montreal Hardware Man Sold Nearly 300 Adzes

"GET a profit on every article you sell," was the terse but forceful remark of H. A. Bernier, proprietor of the Bernier Hardware Co., 126 St. Lawrence Street, Montreal to HARDWARE AND METAL, whose Montreal editor called to discuss tool-selling problems.

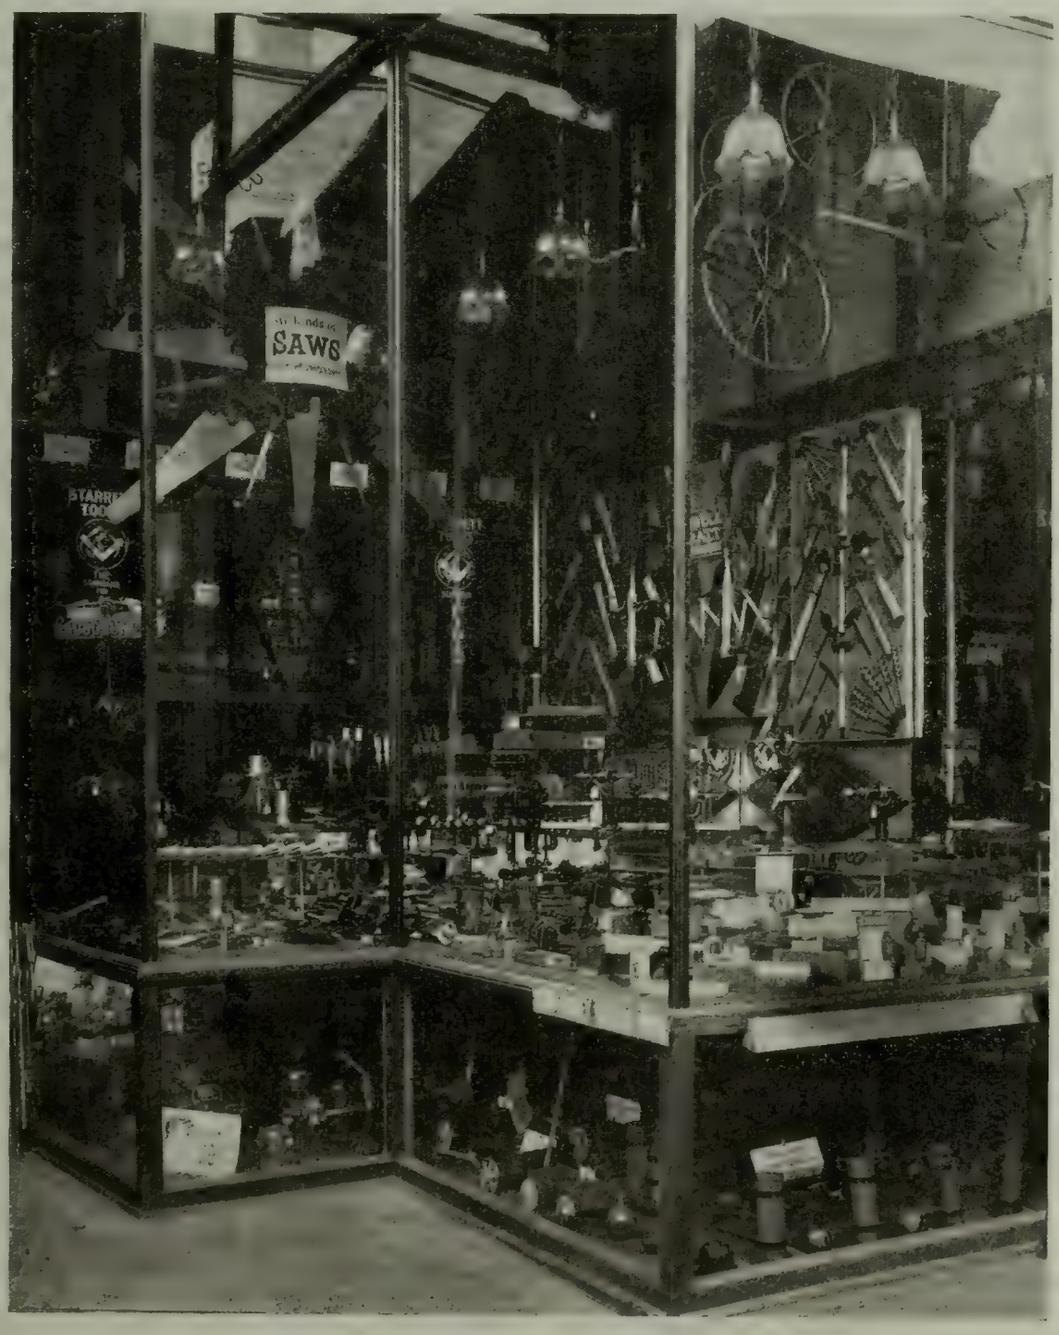
The Bernier tool stock is a comprehensive one and its owner is an enthusiastic retailer himself, closely attending to the service he aims to give the buying public by supervising the selling. And in assuming a natural pride in tool-selling, Mr. Bernier has aimed to select good stock, a grade of tools that would carry satisfaction to the user and a "come-back" that all good merchants like to look forward to. Adherence to his various plans has convinced Mr. Bernier that it pays to map out a campaign, and then stick to it.

Meet All Comers

With regard to stock, it might be cited that the Bernier Company aims to meet all demands. This is done, as above referred to, by carrying a stock that will cover the real or anticipated needs of the trade. Machinists, carpenters, draughtsmen, and various other mechanics are catered to and the variety of tools which they are able to secure has served to make many permanent customers.

"Help and goods are two big factors," said Mr. Bernier. This implies that the hardware merchant has had trying times to face in securing and maintaining a permanent staff. Mr. Bernier had difficulties of this nature during the war, but, as with many others, these have now become less.

Tools, of course, were very difficult to obtain during the war, and while The Bernier Hardware Co. had its difficulties, it maintained a good stock and held its trade well, it was pointed out.



Not Under a Bushel

The accompanying photograph will serve to convey to the reader an excellent idea as to the advantage of display. Mr. Bernier dresses his own windows. He is, as a matter of fact, a prize winner at this art. That he has well-defined ideas will not be denied. The writer has passed his store frequently, and never on any occasion have these displays been poor or the arrangement neglected.

"The only time I can dress my windows is at night," said Mr. Bernier. "The best way is to decide the kind of goods one wants to show, have them cleaned and tagged, and then there is little loss of time and no delay in picking out what is wanted. Have everything ready beforehand, and this work can be done more quickly, and it is better in every way."

And so, in the store itself as well as within the windows, the tool stock is not hidden away but is displayed before the customer in the most appealing manner. Sales are traceable in many instances to having the goods placed well so that they will meet the gaze of every prospect. Drawers are sampled in the shelving, neatly and effectively. Larger tools, tool chests, circular saw machines, etc., are placed on the floor, on cases, or elsewhere as the need may be. The idea is that of placing the tools where they will be most likely to create a good impression. This done, the sale is the more readily made.

Referring to the intensive use made of the windows, Mr. Bernier has always made every nook and corner work night and day. To this end the space beneath the main windows is used and displays are made there regularly. These are frequently changed and

One of the universally excellent window displays of tools of the Bernier Hardware Co., Montreal. Not only is the window proper taken advantage of but the space under the floor of the regular window is also utilised to advantage. "Good goods and get a profit," this hardware merchant says—there's something in it too.

through the arrangement of small incandescent lamps, the night effect draws attention of the passersby. Suitable covering of the floor of the window is made, staging of various heights being used and when completed, each window is very attractive and earns its own share of the rental.

Big Sale of Adzes

In referring to definite sales, Mr. Bernier spoke of the class of goods that had been in brisk demand during the war. Some lines were naturally in light demand, but, in accordance with the speed-up ship-building program of the Canadian Merchant Marine, ship-builders' tools had been very active in point of sales.

"We sold about two gross of ship adzes," said Mr. Bernier, "and they were the very best we could buy. The pattern we secured was just what the ship carpenters wanted—they would have no other, in fact, and the greatest difficulty was that of getting enough of them. They were quite willing to pay the price, but wanted this particular make and pattern."

Of course, now that ship construction has somewhat declined, this business will not be so brisk. But it does serve to show that the aggressiveness of the Bernier Hardware Company resulted in securing a large amount of business that was profitable and most acceptable while other tools were inactive as sellers.

Buying and Selling

Mr. Bernier approves of the principle of right buying. For instance, he stated his ideas regarding payment for merchandise bought.

"Paying cash is a good policy. It results in more careful buying; it also keeps me in closer touch with my stock. A man will know whether he has a stock of a certain item before he buys more if he is paying cash for it. Then, too, it gives him a better name and if a better price is obtainable on a line of goods he is more likely to be offered it by the house he is dealing with."

As stated at the beginning, Mr. Bernier believes that the merchant should get a profit on every article sold. To ensure this, he adds the selling expense to the cost of a given article before the same is marked. This is ascertained by referring to the records of expense for a previous period, the year just finished. For instance, through the working of this plan there was no guesswork. A profit was always assured.

"We turn our stock about five times in the year, in normal times," continued Mr. Bernier. This has kept up pretty well although tool sales have dropped somewhat." As a general thing, it was pointed out that tool sales, in normal seasons, would total about thirty per cent. of the total hardware sales. During the war period, much of the business in tools was done with men working on munitions. Calipers, micrometers, gauges, etc., were all big sellers.

Summing up, Mr. Bernier concluded—"There is no reason why a retail hardware man should fail to make money these days. I know of several cases where large net profits have been made the past year."

Says China Offers Great Possibilities for Export Trade

Commissioner Ross Tells of Hardware Lines Needed and Says That Canadian Goods Will be Given Every Consideration, But Must Meet British and American Competition

"IF Canadian firms go after business and are prepared to meet keen competition from British and American houses, there is a lot of business to be had in China in all lines of hardware, and especially in the cheaper lines," stated Dr. J. W. Ross, Canadian Trade Commissioner in China, in an address given before the staffs of the various Maclean publications outlining the situation existing in the Celestial Empire today.

Mr. Ross pointed out that China with a population of more than 400,000,000 people offers tremendous possibilities for export trade. He predicted that within 25 years the nations of the world will be tumbling over one another in an effort to get China's business. Canadian products, he stated, will be given as favorable consideration as those of any other nation, but Canadian firms must be prepared to face keen British and American competition.

Want Cheaper Goods

Many of the lines of Canadian hardware goods, he stated, are too well made to be sold in China. Many of them contain more metal than is required, or are more highly finished than is necessary for the Eastern market. Mr. Ross stated that there are two classes of buyers in China. The average man who makes at the outside not more than forty cents a day and those behind the large public and Government works such as new docks, railways, etc. One of the drawbacks commercially in China at present is the lack of railways. One of the largest and richest provinces with a population of 60,000,000 people is situated 600 miles in the interior, and as yet has no railway connection. Each year, Mr. Ross said, sees improvement in conditions and the Chinese are adopting Western ideas more and more. There is any amount of rich country, both agricultural and mineral, which will be developed in the years to come. At the present time British firms are supreme in the field in mining and engineering operations.

Study Conditions

Mr. Ross urged all those who are contemplating doing business in China to make a close study not only of the requirements of the markets but of the methods of doing business there. There is room, he said, for great improvement in methods and a splendid opening for any firm that will carry a stock from which the needs of the buying public can be quickly supplied. At present, he stated, a great deal of business is lost because dealers carry only small stocks and if anyone comes in and asks for a quantity of goods they have to cable for them. Chinese firms, Mr. Ross stated, will take an agency for anything, and many of them sell any number of different lines. If anyone specialized in hardware lines and put in a complete stock of the kind of goods that will sell in China, there was, he said, good business to be done. Many of the firms have been selling largely from catalogue, not even bothering to carry the stock. Mr. Ross stated, however, that the time for this kind of business is past.

Lines in Demand

Very light, cheap stoves, corrugated iron roofing, very light, cheap enamelware, and hardware lines suitable for building should sell well, Mr. Ross said. To meet the average man's purse they must be inexpensive. Here, he said, the Germans before the war were making great progress as they turned out an enormous variety of cheaply made goods that found a ready market. The Japanese are endeavoring to get into the Chinese market, but so far their goods have not been of sufficient quality and have not been well received. There should be a good demand for such lines as steel bars, corrugated sheets, galvanized sheets, tin plates, galvanized wire, wire nails, locks, bolts, and hinges. Horse nails, he stated, are not required.

Form Combinations

Mr. Ross thought good results might come if Canadian firms were to go after business collectively, form combinations and send a representative to China who would go into trade matters personally.

"Canadian firms," he said, "cannot expect to stay 10,000 miles away and dangle the goods at the Chinese and expect to get business, especially when the British and American firms are going keenly after it. This question has not been taken seriously enough. It is a big one, and one which offers great possibilities. The European needs at best are going to be only temporary. In China is one of the greatest markets in the world and it will be permanent. It is worth going after and Canada should get her share of the business."

What Hardwaremen Are Doing

How Dealers From Coast to Coast Are Going After Trade

Hendershot Hardware, Mount Forest, Ont., are urging customers to save money by buying coal oil for 21 cents in barrel lots instead of paying 25 cents per single gallon. An illustration is shown in the ad. of a steel oil barrel. Alongside of it under the heading of "Automobile Accessories" is shown a cut of a repair outfit and in connection with accessories the firm says: "This department of our store has had phenomenal growth because we know what the auto owner needs promptly at prices that carry with them considerable savings." In closing the ad. is the following: "Speaking of courteousness we have never had to dismiss a single salesperson from our store because of the lack of it. Each person that waits on you is made to feel so interested in our business—and yours—that the resultant courteous treatment you receive is a pleasant part of our service which has been widely commented upon."

* * *

B. O. Parker & Co., Strathroy, Ont., under the caption, "Snaps in Summer Supplies"—show an illustration of a refrigerator and announce a special "Two only, to clear at $15 and $18." The ad. reads further: "Now that the preserving season is on no doubt you will require some extra kettles, sauce dishes, etc. Our CASH SYSTEM has proven to be such a success we have decided for the next two weeks to give 10 PER CENT. OFF on all cash purchases of graniteware. Now is your chance to get a supply of these goods. Below is listed half a dozen leading lines with sizes and prices given. The ad. also says: "We have on hand a good stock of hay-making tools at reasonable prices." Several lines are listed also, pure powder arsenate of lead at 50 cents a pound and Paris Green at 65 cents. In display type, the bottom line of the ad. reads: "We give 2 per cent. off on all spot cash purchases. Book accounts three months net."

* * *

Silvester Bros., Stouffville, Ont., in a double column ad. six inches deep, show two illustrations, one of a man admiring a nice lawn mower, and another of an individual taking it very easy in a hammock. The ad. reads: "A neat lawn adds a great deal to the appearance of your premises and to the pleasure of your farmily. We have large wheel, easy running, self-sharpening lawn mowers with which to make a good job." "Take It Easy" once in a while in one of our comfortable hammocks, $3.50 to $8.00.

* * *

McPherson Bros., Medicine Hat, Alta., announce in large display type: "It will cost you nothing to try the —— hand vacuum cleaner in your own home. We claim it will do better work than any other cleaner on the market —hand or electric—regardless of price. GIVE US A CHANCE TO PROVE IT. Price $15.50." An attractive illustration showing a woman operating one of the cleaners accompanies the ad., which is two columns wide and set with a neat border around it.

* * *

O. B. Henry & Co., Drayton, Ont., use a double column ad. nine inches deep to announce: "Our Annual Summer Sale ending July 12." Binder twine and rope are featured with prices given in large figures and the comment: "Don't compare this rope with the rope that is sold by the ordinary hardware man—investigate. You will find that we can save you money. Farm fence is also mentioned with the comment: "Further stock of this has just been received. Just read an article on the tariff this morning. You may look for higher prices very soon." Don't delay your purchases. Club bags, trunks, suit cases, a wide assortment of prices. No trouble to show goods. In the heat of summer don't forget to varnish your linoleum. Ask for —— varnish."

* * *

Box Bros., Belmont, Manitoba, in a three column ad. nine inches deep, state that their store is headquarters for automobile supplies, also that they sell water tanks in all sizes. Wire cloth for screen doors and windows and poultry netting is also featured, also screen doors and windows, prices being given in large figures of all sizes. Pumps for every purpose are offered including lift pumps for house use, double-acting force pumps for deep wells, stock pumps for wells up to fifty feet, and cistern pumps.

* * *

Ashdown's, Calgary, Alta., in an ad. three columns wide and 18 inches deep, list: "Ashdown's Half-Day Bargains for Wednesday." "Better grade refrigerators at very low prices" leads with a cut of a refrigerator shown and prices given in display type. A special offer with each refrigerator is a strong drip pan free of charge. The ad. is profusely illustrated and includes such bargains as vacuum carpet sweepers at $6.89, a 30-pound home scale special at $5.89 per set, smokers' ash trays at 13 cents, string bags for shoppers, table oil cloth, canning season supplies, ready roofing for chicken houses, barns and outbuildings, 50 feet of ½-inch hose at $7.50, galvanized water pails at 57 cents, copper bottom wash boilers at $4.70 and pulley line outfits.

* * *

J. E. Clipsham & Sons, Limited, Gravenhurst, Ont., feature fishing tackle under the caption: "Our fishing tackle is the kind you want." The ad. says: "Did you ever break a hook or line when Mr. Big Fish was on? You will not 'lose your religion' if you go fishing equipped with our 'A1' tackle, for when a big one tackles your bait, our hooks, lines and poles won't break. Our tackle's the best, it stands the test."

* * *

Lames, Walker Hardware Co., Limited, Montreal, under the heading "Vacations and cameras should go together," list a number of sizes of cameras giving prices in each instance. An illustration of a camera ready for work accompanies the reading matter.

* * *

I. N. Allen, Glace Bay, Nova Scotia, in a single column ad. six inches deep, which contains an illustration of a kitchen range, announces: "Just Received a Carload of New Stoves, $58.00. Why worry when you can get a new stove on your own terms?"

* * *

R. L. McNaughton, Craik, Sask., in a double column ad. six and a half inches deep, says: "It is better to be safe than sorry. Protect your buildings with the —— system of lightning arresters, the system that the insurance companies indorse. We back the guarantee with the company that makes the goods. Ask for our prices. They are lower than usual."

* * *

Geo. Stirrett & Son, Toronto, are sending out to the people in their district this week a folder in which is listed a large number of everyday articles needed in every home. Each article is illustrated and the price given in plain figures beneath. On the opposite side are listed water power washers, solid rubber roll wringers, lawn mowers and garden hose, also screen doors and furniture polish.

EDITORIAL COMMENT

DASTARDLY PLOTS

THE startling revelations of proposed "revolutionary plots" now being unearthed by the Dominion Police and Northwest Police, and which will no doubt be made public at a later date, will bring the Canadian people to a stern realization of the state of affairs existing in some centres of Canada. Perhaps some of the uninformed scoffers who for months pooh-poohed the warnings which appeared in various MacLean publications will now realize that the MacLean papers had the facts and were not printing fairy tales. Many of the former critics of articles in the MacLean papers, realizing now the true situation, have become our warm friends and supporters.

THE SERVICE THEY PERFORM

IN commenting on the operations into the cost of living now being conducted, the *Financial Post* says:

The investigation into the cost of living seems to be devolving into a contest where one faction endeavors to place the blame on another. The convicted profiteers in the last analysis are likely to be those who have the least number of friends, no matter how little justification there may be in fact. As a class, however, wholesalers and jobbers seem likely to suffer more than retailers or manufacturers because they have difficulty is justifying in the public mind their existence. The manufacturers may be charged with making excessive profits and the retail system criticized for the large margins involved, but they both render a service which the consumer understands. It is different with the wholesalers and the jobbers.

And yet as a matter of fact the wholesaler and the jobber are just as much a part of our present system of production and distribution as the maker or the final seller. The best proof of the necessity for their existence, after all, is that they do exist. The person who will make the statement recklessly that they merely increase the price to the consumer by the extent of an additional profit—or words to that effect—has no conception of modern merchandising machinery and no understanding of the spirit of competition. If the average wholesaler or jobber did no more than many people think he does then many of us would soon be wholesalers or jobbers.

The usual argument against the middleman is that the manufacturer and the retailer could get along without him. Experience has proven the contrary. The average manufacturer finds it more efficient and less expensive to work with middlemen than to perform the services for himself—and he knows. He would have to organize and manage a sales force for his single or several lines. A wholesaler or jobber handles hundreds of lines at a much less comparative expense. At the same time there is a much better service for the retailer, who can secure from the middleman small lot orders which would be expensive for the manufacture himself to handle.

When the middleman is also an importer the added service rendered is not hard to understand. In this connection we note from a recent bulletin of the Department of Trade and Commerce at Ottawa the following statement by Henry B. Thomson, now in England, for the benefit of Canadian manufacturing exporters:

> "It is far better and cheaper for a Canadian manufacturer to sell to a big distributor in Great Britain who covers the country by his own agents and who has his own connections than for him to take a large number of small orders direct. The big distributors are responsible people and will push the business."

The argument will be raised that the mail-order houses are doing much to eliminate the middlemen. Yes, they are doing something. And when some other equally efficient system is evolved more will be accomplished in the same connection. But until everybody wants to buy by mail or some other more efficient machinery is invented the wholesaler and the jobber will continue to justify themselves as adjuncts of the manufacturer just as the retailers are doing.

NECESSITY OF RETAIL DISTRIBUTION

ELSEWHERE in this issue will be found an article dealing with the necessity and importance of the retail distributor and his relationship to all other industries. It is one all retailers should read carefully and which should suggest the necessity of getting together to put forth the concerted action that may be essential to maintaining the retailer in his rightful place in the scheme of merchandising.

The Cost of Living Committee investigation is "passing the buck" to manufacturer, jobber and retailer and giving no single one a fair chance to

explain his position in the sphere of commerce. The "middleman" is coming in for criticism from the daily papers, which display an almost unbelievable sense of ignorance and prejudice in the handling of the subject of merchandising.

Concerted action, then, on the part of the retailer is essential to forestall legislation which may set the merchants back for many years to come. United effort can be made to place the position of the retailer clearly before the people. The retail merchant has nothing to fear in a free exposition of the place he should and does occupy in the life of any community, unless it be in his too-easy-going methods of catering to the consumer. We would say to all retailers—get together and do it now!

SOME SPLENDID SALES

THE past five weeks of unusually warm weather have resulted in hardware men doing a splendid business in electrical goods. Sales in electrical utilities for wedding presents are reported unusually numerous and as a result of the flights the mercury has been taking new records have been made in many stores in sales of electric fans. The hardware men have been going after the electrical business with their usual vim as a result have cashed in on it. As a result in some quarters wails may be heard from electrical dealers who do not think the hardware men should have invaded their field. Remarks of this kind are not troubling the aggressive dealers. On the contrary they are going after the business harder than ever. There is a big and ever widening field for the hardwaremen in all lines of electrical goods. Significant reports come from many of the manufacturers of electrical washing machines. They state that sales are showing a tremendous increase. Some of the American firms are so rushed with orders for electrical washers that they cannot begin to make shipments in anything like reasonable time. Those who are watching the development of the electrical washer trade in Canada predict that it will not be very long before there will be a washer in every home because women will look upon them as of as much a necessity as a sewing machine. Speaking generally there is not the slightest doubt that electricity is here to stay and that in the years to come it will be used far more extensively than it ever has been. All this opens up a most promising vista to the hardware dealer. Many of them who have been seeing what is coming have been busy with the result that they have laid the foundation for splendid business.

BUILDING WILL BE BRISK

BUILDING returns from all over the Dominion show a steady expansion that is perhaps one of the best indications of what is to come. Those who are closest to the building trades predicted that there would not be any tremendous rush of building at the close of the war, but rather a gradual resumption of activities. Those who took an opposite view were inclined to believe that those who were going to build would try to cram all the work that has been held back for the past four years into this summer. The first view is proving the correct one. Labor conditions and high prices as well as difficulties in securing many materials have caused many to go slow. This year will, however, see a lot of building. The statistics show a steady increase in the amount of construction that is actually under way. The normal building stride, however, will not be reached until 1920, according to those who have been studying the situation. By next spring they look for an activity that will be as great as that of the days before the war and after next year they are looking for continued activity and perhaps the making of new building records. All this means a lot of good business for the hardware men and the development is already well under way.

WHAT A BILLION MEANS

THE majority of Canadian merchants can remember when almost all figuring was done in hundreds and thousands of dollars. When the word million was mentioned it was generally in connection with some big deal or some very wealthy person like John D. Rockefeller. This is not so very long ago, and business men could usually visualize and get a pretty fair general idea of the amounts in which they were talking. The last five years, however, has changed this whole situation. With the war the mention of "billions of dollars" became as common almost as "thousands" was before and one of the results has been that the great majority of people has lost all idea as to the vast amounts of money represented. They know that a billion is a lot of money and that when it is stated that Germany must pay so many billions indemnity or that the war cost the Allies so many billions it runs into huge figures. Some small idea of just what one billion means, not to say anything about billions, may be gained when it is understood that if a merchant had one billion dollars he could employ 1,000 clerks and pay each one $5 a day for a little over 542 years. Machine guns fire five hundred shots a minute. If a person had a billion dollars and shot them through the machine gun at that rate he could fire night and day for three years, nine months and twenty-five days. Or if you had one billion one dollar bills and fastened them all end to end you would have a strip almost 118,500 miles long or more than four and a half times around the earth. Try and figure this out and then think over how you would like to have to pay Germany's war debts.

Salespeople of To-day and To-morrow

Some Facts on Sales and Salespeople, and on What Salesmanship Means—The Vital Points in Handling Customers

Hardware and Metal's special report of the third lecture by FRANK STOCKDALE

THIS is the third of the addresses delivered by Frank Stockdale, the noted business expert, in connection with the Saskatchewan R.M.A. Convention, as reported by the special representative of HARDWARE AND METAL.

The concluding address on "Meeting To-Day's Competition," which will appear next week, deals with some interesting points. The flypaper stage of business is passed, is Mr. Stockdale's contention in this lecture, customers no longer light and stick. He examines the nature of the competition and points out that it is not all from the Mail Order House. The need of studying conditions and evolving new methods. Limit the stock, but give the assortment. Our competitors are winning out because they are giving thought to the business, and the remedy is obvious.

THIS is a very important subject because the sales people are the front line forces of the retail business. They occupy the front line trenches between the counter and the shelves, and if they have not got the morale they require they will not "go over the top." If your store disappoints the customer he or she will be disappointed with your whole institution to a greater or less degree. We must realize that one of the most important things is to look after the front line trenches. The war has proved that no discovery during war time took the place of infantrymen who went over the top. The need was for man-power. Your store cannot battle successfully to-day with the competition it has to face unless it is equipped with the right kind of man-power, and that is the power of the salespeople behind your counters."

"It takes a lot of preparation to fit the soldier for modern battle. Modern warfare is not so far ahead of modern business. Soldiers must be put through months of training, even then they are not equipped, for years of training are required. The evolution of business is such that if you are eventually going to compete you will have to have your salespeople trained. Salespeople of to-day and to-morrow will be trained salespeople. It is not a waste of money to train salespeople, and very few are born salesmen.

The Imperative Need of Training

"If soldiers were going into battle against soldiers who were not trained they would not need to be trained, but your salespeople are in direct competition with the best in the country. The customers who come into your store are coming direct from dealings with trained salespeople in other stores, and they compare your salesmen with the trained and the best ones who have waited on them. You are being compared with the best, that is the reason the customer is particular. Some say customers are getting very particular and harder to please. Some merchants say salespeople are not as good as they used to be. I believe salespeople are better than they were, but their job is a great deal bigger because their competition with trained people is so great. You perhaps lose more customers because of the service your salespeople render than from any other two causes.

"Salesmanship is a big job. If an electrician makes a mistake he blames it on anything which is not understood generally; if the doctor makes a mistake the customer dies, and the blame is laid at the door of some unknown disease, but if the salesman makes a mistake he is the big loser."

A definition of salesmanship, given at this point, was as follows: "Salesmanship consists in acquiring a psychological ascendency over the mind of your customer."

When a Sale Happens

Mr. Stockdale stated that one merchant had remarked that he would like to know "when a sale happens." The reply from another merchant was as follows: "A sale happens in my store when a customer leaves the store after having bought more goods or better goods than he or she intended to buy. Otherwise the customer has just been "waited on."

"Negative salesmanship is where the salesman does not sell as much to a customer as he or she intended to buy when entering the store," continued Mr. Stockdale. "The people who work in retail stores are divided into two classes, store waiters and salespeople.

"Clerks, waiters and bar-tenders were listed together as non-essential occupations for the purposes of the draft system in raising the United States army. While this classification is in part insulting to the retailers, yet it is unfortunately only too true, in a great many cases."

Mr. Stockdale spoke of the type of merchant who thinks he is performing a great feat of salesmanship when, owing to his failure to stock a particular line of goods for which the customer asks, he is able to sell other goods to the customer in their place. Regarding this practice Mr. Stockdale pointed to the dangers of substitution.

"What is the thing you sell in your store?" asked Mr. Stockdale. The correct answer was "service." "The thing the customer wants to have is satisfaction. Service is necessary to satisfaction. You may render service but if it is not of the right kind there will not be satisfaction.

Viewing Transactions From Both Sides of the Counter

"Our mail order houses in the United States are big and powerful as yours are. The head of one of the large mail order firms was asked the reason for the success of that particular business. His business has exceeded the record of $1,000,000 of orders in one day. His answer was as follows: "The success of this institution is built on the fact that we endeavor always to view the transaction from both sides of the counter."

"Your customer lays down his money on your counter for satisfaction," added Mr. Stockdale. "The home plate of every sale is satisfactin, and if your service does not take you around to the home plate you will be left on the bases and will not score. Satisfaction consists in bringing the right goods and the right people together. You must know the goods and know the people. The first job of a salesman is to know the goods, but after that he must study the people."

At this point Mr. Stockdale referred to the point, "The customer is always right," and issued a warning that if the customers were not always right they soon became other merchants' customers. "We have to acknowledge that some of them tell the plainest lies. If you will look for honest people you will find however, that the proportion of dishonest people is very small and very few will come back time after time and try to get the better of you. Give this class of customer plenty of rope and he will be shamed.

The Folly of Argument

"Don't argue with your customers. You will never sell anything through argument. Real salesmanship avoids arguments. Do not try to convince the customer or a controversy is bound to ensue. The salesman who starts in to contradict the customer makes a big mistake. I have observed a lot of salesmen who get overconfident in sizing up a customer, and I find that many of this type are missing many sales. It is difficult to sell one article after having

gone the limit in sales talk on another article, and this is the danger if you make a mistake in sizing up what the customer wants before you know."

"When you try to sell a customer something they do not want they forget to come back to your store again. Be careful of over-insistence. Lead the customer instead of trying to drive. We are apt to size the customer up according to our standards instead of according to their standards.

In referring to the customer who comes into the store and says that he or she is "just looking," Mr. Stockdale gave the following illustration:

"A Woodstock, Ont., merchant told of a lady who came into his store to look at certain goods which she was thinking of buying in the Fall—some few months later. The salesman explained that they would have some better lines in at that time, and suggested that she delay looking until the Fall, and then visit the store. The lady in question went to another store in town, and by the exertion of salesmanship was induced to buy goods on the spot.

Mr. Stockdale gave another illustration of how some merchants take much for granted and make a mistake in sizing up customers. He referred to the travelling salesman, who often makes purchases from merchants whom he usually visits in a business way. The point was emphasized that many merchants mistake good customers for salesmen, and do not give them even usual attention.

"The merchant who will not pay the greatest attention to the travelling salesman reaps his own reward," added Mr. Stockdale.

People Learning to Shop

"Merchants should also give customers the same attention when they do not buy as when they do make a purchase." The 5, 10 and 15c store is teaching the people to shop. We are developing a nation of looker-shoppers. It is there they are getting their education.

"The customer who comes in to buy a 10c article should be given the same attention as the one who comes in to buy a $10 article. Take care of the people who come in to look. Don't let any lookers come in to your store, as far as your treatment is concerned.

"The attention you give to Mrs. Brown has a greater influence on your store than you imagine. Mrs. Brown takes a lot of your time and buys very little, and she is hard to wait on. When you take this attitude towards customers you are making the mistake of your merchandising life. You may call this customer what you please, but Mrs. Brown corresponds to the baseball fan. She is the store fan—what would baseball be without the fan? Mrs. Brown knows more about the merchandise than the clerk behind the counter. She asks questions which are hard to answer. Mrs. Brown belongs to all the clubs in the town and attends them regularly. Don't forget the stores are well discussed at these meetings. The reputation of your store is made or marred right there. Mrs. Brown is sending customers to your store or away from it. Get Mrs. Brown boosting for your store.

"A satisfied customer" is the greatest advertisement. Mrs. Brown is satisfied or is a dissatisfied customer who gives much of her time giving word of mouth advertising.

"Whenever you think of salesmanship you think of certain clerks who are born and not trained. If you have the right foundation salesmen can be developed through experience, and if you do not have the right foundation you cannot develop a salesman. The study of the science of salesmanship is a good thing.

"The person who stands behind the counter to-day and succeeds is the person who really wants to serve the customer, the salesman who has the spirit of service. How many can say that their customers feel you like to serve them? If they feel that way they will come back to your store, but you must have the service spirit in your salesmanship.

"Don't forget the Biblical quotation: "He who would be the greatest among you let him be the most willing servant."

Fine Shelf Hardware Display

One side of the spacious hardware store operated by Box Bros., in Souris, Man. One of the strongest features of this store, which is one of the finest in Western Canada, is its 42-foot cabinet, shown in the background of this picture for the reception and display of small hardware. All of the hardware samples are enclosed behind glass, which gives an exceptionally trim appearance, and at the same time preserves the stock always fresh, shining and attractive. Moreover, the stock samples are thrown prominently into view by this method, and present a constant lure for customers. A display of electrical appliances is made in the showcase in the foreground.

PROPOSED BIG BRITISH MOTOR COMBINE

Arrangements have been completed for an amalgamation of interests between the Armstrong Whitworth Co. and the Siddeley-Deasy Motor Car Co., of Coventry, England, according to the United States trade commissioner, but whether this will be in the nature of a complete absorption or merely a controlling interest is not yet stated. Particulars of the financial and other details are expected within a fortnight.

The Siddeley-Deasy factory covers a area of twenty-five acres and employs between 5,000 and 6,000 hands. During the war it produced the engine known as the Siddeley "Puma," which was adopted by the British Royal Air Force as the standard vertical 6-cylinder water-cooled engine and is in daily use in the air service. It is understood that the greater part of the Siddeley Works is now to be devoted to the production of large quantities of a new 6-cylinder motor-car, to be known as the Siddeley Six.

The "London Times" states that the Armstrong Whitworth Development Co. was formed primarily for the purpose of securing commercial engineering works, as distinguished from armament works, in which it had specialized particularly with a view to linking up allied concerns for reconstructional development; and the effect of the proposed combine will be to consolidate its various interests, thus enabling the Armstrong Co. to carry out the work in all branches of engineering.

EVENTS IN THE TRADE

Business Changes

Leamington, Ont.—Lenden & Cook have succeeded H. Lenden.

Mount Dennis, Ont.—W. F. Moon has purchased the hardware business of J. G. Marshall & Son.

Obituaries

The death occurred in the Western Hospital, at Toronto, of John Moffatt, aged 81, for many years a traveller for Clare Bros., of Preston, Ont. Mr. Moffatt was a native of Galt, Ont., but resided in Kitchener for 40 years. Recently he had resided in Toronto, where he was engaged in manufacturing a smoke consumer and fuel saver which he invented.

Following an operation in a hospital at Rochester, Minnesota, the death occurred of L. T. Hunt, of Thorold, Ont. Mr. Hunt was for many years in business at Alvinston, Ont. Ten years ago he went to Thorold, and with his son, W. H. Hunt, took over the hardware and plumbing business of the late C. N. Stevenson. Mr. Hunt had been in poor health for the past two years.

Personals

W. V. Gillespie, London, Ont., representative of Brandram-Henderson, Ltd., is spending a few days in Toronto.

R. T. Kerr, accountant at the Toronto branch of Brandram-Henderson, Ltd., spent the holiday at Lake of Bays.

A. S. Hadden, who returned recently after serving overseas, has resumed his duties in the hardware department of the Cowichan Merchants, Ltd., at Duncan, B.C.

R. M. Mowat, who has carried on a hardware business in Trenton for the past thirty-eight years, has decided to retire. Mr. Mowat came to Trenton from Kingston in 1881. Mr. and Mrs. Mowat will make their future home in British Columbia.

John D. Duncan, secretary-treasurer of the Renfrew Machinery Co., Ltd., Renfrew, Ont., has sailed for Scotland and will remain there until October. His duties are being filled by Mr. Dean Dewey.

Trade Notes

The Levis File Co., Ltd., Levis, Quebec, has been granted a charter.

The Quebec Asbestos Products Co., has been registered at Quebec City.

The Liberty Pressed Metal Company, of Kokomo, Indiana, has absorbed the Conron McNeal Company, manufacturers of roller and ice skates.

The Percival Plow and Stove Co., of Merrickville, Ont., plans to enlarge its plant.

A winding-up order has been granted for the Graphite Products, Ltd., Montreal.

Work has been commenced at Oshawa, Ont., on a new factory for the Spring and Axle Products Co.

The Electric Tin Products Company has been granted a Dominion charter and will locate a new plant for smelting tin at Brantford, Ont.

J. Wiss & Sons Canadian office and warehouse is now located at 62 Temperance St., Toronto, the firm having moved to larger quarters from Spadina Avenue.

Owing to delays caused by labor troubles it is stated that the big plant which is being erected at Granville Island, Vancouver, for the Morrison Steel Co., may not be in operation before August 1.

Montreal News

Mr. McCrae, of the American Pencil Co., New York, was in Montreal last week.

T. F. Shurley, of the T. F. Shurley Co., Lt., St. Catharines, spent a few days in Montreal last week.

W. S. McLennan, general sales manager, Brandram-Henderson, Ltd., Montreal, spent a few days' holidays in the Laurentian district.

John Richardson, of Richardson and Bureau, manufacturers' representatives, Montreal, is away to the Maritimes this week. Mr. Richardson will be away for a couple of weeks.

Chester A. Holkesvig, superintendent of the dry color department of McArthur, Irwin, Ltd., Montreal, spent several weeks in Montana and Dakota territory, returning last week to Montreal.

C. M. Ayres, of F. H. Ayres, Limited, makers of indoor and outdoor games, etc., 111 Aldersgate, London, England, called on the Montreal trade last week.

Colonel Robert Starke returned to Montreal after a ten-day holiday at Metis Beach, Lower St. Lawrence.

M. W. Shyne, representing the Peterborough Lock Co., was in Montreal this week.

Max Hill, of James Walker Hardware Co., Ltd., is away on holidays to his summer haunt at Grand Isle, Lake Champlain. Mr. Hill will be absent about a month.

Harry Hanson has assumed a position this week with Lewis Bros., Limited. Mr. Hanson comes from Peterborough and represented Hyslop Co., of Toronto, in Central Ontario territory for several years. He will continue to cover this field for Lewis Bros., Ltd., selling Auto Accessories and Equipment.

Andrew Dunn Sr., an old resident of Montreal, died in New York at the residence of his son. The late Mr. Dunn was for many years connected with the Consumers Cordage Company at Montreal, and was a superintendent with them. Some years ago he left to enter business on his own account. His widow, four sons and three daughters, survive.

Winnipeg News

T. P. Hessian, former sales manager for Merrick, Anderson Co., has just returned from overseas, where he has been serving in the artillery. Mr. Hessian spent a month's holidays in his old home town, Halifax, on his return journey.

W. Siddle, formerly with Miller, Morse Co., and Merrick, Anderson Co., has just returned from overseas and will resume his position with the latter firm. "Bill" is still able to pitch his usual stellar game of ball and won his first game in the senior league last week.

Incorporations

The Niagara Wire Weaving Co., Ltd., capital $220,000, head office Niagara Falls, Ont., plans to draw wire, weave and manufacture wire cloth, and manufacture steel and metal products.

Independent Concrete Pipe Co., Ltd., head office Woodstock, Ont., capital $200,000, plans to manufacture and deal in terra cotta, drain and sewer pipes, cement, lime, slate, etc.

The Lang Manufacturing Co., Ltd., capital $40,000, head office Guelph, Ont., plans to manufacture and deal in iron and steel products.

The Standard Computing Scale Co. of Canada, Ltd., capital $10,000, head office, Windsor, Ont., plans to manufacture and deal in weigh scales.

The Interprovincial Chemical Co., Ltd., head office Montreal, capital $99,000, plans to manufacture and deal in oil, leather goods, celluloid goods, and to manufacture and deal in bricks, stone, cement and concrete products.

Vimoline Co., Ltd., capital $40,000, head office Welland, Ont., plans to manufacture and deal in a liquid product

to be mixed with gasoline for gasoline motors.

North Star Oil and Refining Co., Ltd., capital $1,500,000, head office Winnipeg, plans to prospect for, refine and deal in petroleum products of all kinds.

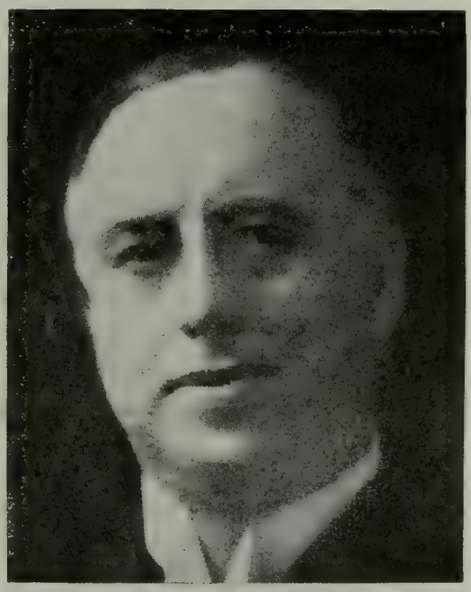
National Standard Co. of Canada, Ltd., head office Guelph, Ont., capital $30,000, plans to manufacture and deal in wire, wire nails, cable, lightning rods, etc.

MAJOR J. H. PORTER DIES AT COLLINGWOOD

Following a long illness which resulted from hardships suffered while serving overseas, Major J. H. Porter died at his home in Collingwood, Ont.

Major Porter was connected with the 10th Regiment, Royal Grenadiers of Canada, for about twenty-five years previous to the war. The 10th regiment went overseas late in 1914, and Major Porter was left in Canada to train the new units that were rapidly being organized. He was then ordered to England with certain units and given more intensive training, and finally was reunited with his old regiment, which was then known as the 20th Battalion, and had several months of front line trench work. He was finally made town commandant, or "town major," and filled that position so acceptably that in a few months he was made district commandant in charge of a larger area close up to the front lines with several town majors under him. He was gassed several times, bombed on numerous occasions, and had several close calls from machine gun bullets, finding several in his cot on one occasion after a Hun raid.

Had he not been a genuine patriot as well as a true soldier, he might have sought refuge from war through his age, as he was over fifty, but as soon as Canada became involved he resigned his position with the Bissell Co., and offered his services.



For over twenty-five years he was the Canadian representative of the Bissell Carpet Sweeper Co.

BUSINESS OUTLOOK AT COAST BRIGHTER

Mr. Geo. Mather, formerly of Martin, Finlayson & Mather Ltd., of Vancouver, B.C., and now representing Canada Foundry and Forgings Ltd., of Brockville and Welland, in British Columbia, is returning to Vancouver, after having spent the last few weeks in Toronto, Montreal, New York, and other manufacturing points in Eastern Canada and the United States. Mr. Mather states that business at the coast is improving, and whereas they have had their ups and downs, the outlook is optimistic at the present time. Shipbuilding has helped business, and the outlook is for it to continue. Prospects for lumber export seem brighter, representatives having been in British Columbia from Great Britain, who have placed some good orders. Indications point for an increased trade with China, Japan, Australia and New Zealand. Greater strides are also expected in mining as a result of incoming United States and British capital.

TOWN BAND CO-OPERATES WITH MERCHANTS IN ADVERTISING DIGBY, N. S.

The town band at Digby, Nova Scotia, is co-operating with the town merchants in a somewhat novel scheme which is bringing good results and may easily be adopted by other towns. An excursion is made once each month, usually about the middle, by the band. Different routes are taken on each occasion, and at each town or village at which the band stops on its itinerary a special newspaper called *"The Bandsman,"* is distributed. The band makes the impression and the paper does the rest. It is filled with seasonable advertisements inserted by the merchants of Digby, and as the band in its trips plans to cover the entire county the merchants are enabled to get in touch with a large number of buyers.

FRANK J. B. RUSSILL
Of the Russill Hardware Co., who has been elected a Director of the Home Bank of Canada.

TRADE OF CANADA AND NEWFOUNDLAND

Fred W. Field, trade commissioner at Toronto, has prepared a report on "The Trade of Canada and Newfoundland," together with a detailed report on the trade of the province of Ontario for 1918. In his report Mr. Field outlines the great increase in the capacity and volume of Canadian factories, and states that financial conditions in the country are excellent. The reputation of United Kingdom goods in Canadian markets, he points out, is excellent and it now remains for British manufacturers and traders to give the same vigorous attention to advertising and selling as is given by their chief competitors. Mention is made also of the increase of mining in Canada.

In discussing Ontario Mr. Field points out that this province is now responsible for one-half of the manufacturing output of Canada and about one-third of the agricultural production; as well as 46 per cent. of the mineral production and thirty per cent. of the wool clip. About 55 per cent. of the Canadian imports come to Ontario. United Kingdom manufacturers, he says, are not doing anything like the business they might do in Ontario, which he says is a great market and will continue to grow. He urges that British firms secure proper representation. Another important matter, he says, is for British firms which have been doing little advertising to take a lesson from American firms which are large advertisers and do a large business. Mr. Field urges British firms to visit Canada and Ontario, and go carefully into the market requirements.

Inland Trade Commission Favored

R.M.A. Secretary Advocates It Before Cost of Living Enquiry

Ottawa, July 3. (Special.) — Among those who gave evidence before the Cost of Living Committee at Ottawa the past week were E. M. Trowern, secretary of the Dominion Retail Merchants' Association. He said that he had been in this position for 25 years, consulting with 55 different sections of the retail trade. He said the trade had been badly handicapped because the retailer is not familiar with the wholesale and manufacturing end, and finds it hard to get the facts. This often causes dissatisfaction. He said the retailers had been asking the Government for the past ten years to create some sort of an Inland Trade Commission, modelled after the Federal Trades Commission of the United States, but, taking into consideration the difference in our laws. Mr. Trowern read to the Commission a paper on this subject. He thought the policy of the Government should be to see that everyone, from the consumer to the wholesaler, got a square deal.

He would advocate giving such a commission as he proposed all the power now given under the criminal code, which cannot now be operated. The man who wanted to fix prices should come before the board and make his case. Suppose the retailer has the suspicion that he has been paying too much for some article, he can get no explanation, but suspects the manufacturer is taking advantage of the market. That would be a matter for the Inland Trade Commission to take up. The retailers would lay the evidence before them and they would call the party concerned before them and find out if advantage were being taken of the market. Then an order could be passed saying that profits were excessive, and a price could be fixed fair to all. If it is found out that the profits are not excessive, the public mind is relieved. The whole question of the tariff and everything else relating to the question might come under the proposed commission.—T.M.F.

Western Canada Industrial Congress

Industrial Matters and Questions Pertaining to Development of the Western Markets Will be Discussed

WESTERN Canada is to have an industrial congress from August 11 to 16, to which manufacturers and industrial leaders of the continent, as well as those of the United Kingdom, are being invited. The purpose is educational to a large extent along industrial lines, though one of the intentions is to promote and increase the friendly relationships between the United States and Canada and to create a greater unity as between Eastern and Western Canada.

Discuss Markets

Subjects up for discussion are Western markets, Western industry, Pacific trade and transportation routes, Oriental commerce, the future alignment as between East and West in so far as manufacturing is concerned, and the great question of building up the Pacific regions and the adjacent inland territory.

The congress is assuming international importance, and thousands of American manufacturers as well as those of the eastern part of Canada as well as England will be on hand. The discussions are to be made by men foremost in industry and science as applied to industry on this continent.

The Speakers

Among those who will speak are Sir Robert Borden, Prime Minister of Canada; Henry Ford; Harold McCormick, head of the International Harvester Co.; E. W. Beatty, president of the Canadian Pacific Railway; Robert Dollar, head of the Dollar Steamship lines, and many others.

All interested in industrial development in the West or in Western markets are invited to attend. The movement is accompanied by a propaganda to the effect that Eastern factories which sell to Western markets in bulk should build branches in the West.

The Itinerary

The congress dates are August 13 and 14 at Calgary, Alta., though a trip through the territory and including other western cities will commence at Medicine Hat, Alta., August 11, and conclude at Edmonton, the capital city, where the Premier and Government members will entertain the guests. A side trip will be made to Canadian Rocky Mountain resorts.

Congress headquarters are open at the Palliser Hotel, Calgary.

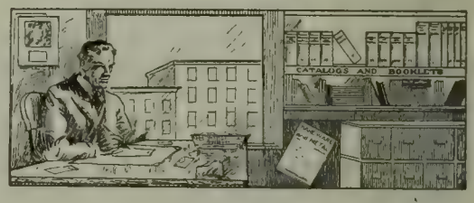
RELATIVE PRICE OF HEMP AND SISAL

The relative price of Manila hemp is usually from 20 to 30 per cent. higher than that of Mexican sisal. This is accounted for by the fact that 1 pound of sisal is required to make 500 feet of binding twine, while 1 pound of Manila fibre will make 650 feet of twine.

BRAZIL POSSIBLE CANADIAN CUSTOMER

South America promises many trade opportunities for Canadian manufacturers in the opinion of John E. Riley, who returned to Montreal this week after a trip to Brazil, where he interested himself surveying commercial possibilities. Mr. Riley, who is a brother of Lt.-Col. J. J. Riley, has been away for nearly four years.

Mr. Riley stated that he had been informed by a large firm of merchants in Santos that Brazil this year would undoubtedly import more than two hundred million dollars' worth of goods, largely manufactured. This merchant thought Canada could supply Brazil with a large quantity of goods, naming steel goods, rails, tractors, agricultural implements, including plows, steam locomotives, wooden goods, such as furniture, including office furniture, filing cabinets, etc., timber for building purposes; coal, of which large quantities are imported, and a great variety of other articles, such as axes, hammers, saws, nickle-plated knives and forks, cement, and wallpaper.



H. A. MAGUIRE

For the past six months connected with the Toronto office of the MacLean Publishing Company, has been transferred to the Chicago office of the company and will have charge of work on two of the MacLean papers, Hardware and Metal and Sanitary Engineer in the Chicago territory. Before joining the MacLean Publishing Company staff, Mr. Maguire spent 11 years in the hardware business. For several years he was on the traveling staff of D. H. Howden & Co., wholesale hardware, London, Ont.

EXPORT BUSINESS IN FIBRES

The Dutch East Indies expect to increase greatly its export business in fibres through the sale of Aren fibre. This material is obtained from the Aren palm (Arenga saccaharifera, Labill.). It is in the form of long, heavy fibres, which remain on the palm after the fall of the old leaf stems. It has a great water resistance, and is said to be suited for the covering of submarine cables. The natives use it for the repairing of canoes, thatching, rope making, and also in the manufacture of small, stiff brooms.

GILL MANUFACTURING COMPANY

The Gill Manufacturing Company, 351 West 59th St., Chicago, has just issued a piston ring size directory which, it is stated, is one of the most complete and up-to-date directories of the kind ever published. A section of the directory is devoted to the Gill Piston Ring and its development. The directory contains fifty-six pages and gives a large amount of valuable data. Copies of the directory will be sent free to dealers.

G. A. McMurtry Co., St. Thomas, Ont. —Kindly give us names of manufacturers of fireplaces suitable for coal burning.

These are manufactured by the Barton Netting Co., Windsor, Ont., and the Enterprise Foundry Co., Sackville, N.B.

BALDWINS, LTD., TO HAVE TIN PLATE MILL AT TORONTO

Baldwins, Ltd., of Swansea, Wales, is negotiating with the Imperial Munitions Board and the Harbor Commissioners of Toronto to purchase the plant of the British Forgings Co., at Toronto, Baldwins, Ltd., plans to establish a large tin plate mill and would use the electric furnace of the forgings plant in making steel ingots. The plant has a capacity of about 450 tons of steel per day. It would be adaptable to the manufacture of tin plate with few changes so far as the electric plant is concerned, but considerable additions would be required for the rolling and dipping of the plate.

Good Interior Display Has Real Value

Attractive Arrangement Can be Made a Big Factor in Increasing Sales — Always Keep the Goods Looking Their Best — Display Tables Always Help to Make Turnover Faster

A STORE interior that presents a clean, well arranged, attractive appearance to customers is one of the best sales stimulators that any hardware merchant can have. If a display of this kind backs a well-dressed window, or two of them for that matter, and both store and window are behind "punchy" advertising matter, a combination is created that cannot be beaten.

But aside from the others the interior arrangement is most important in itself. Everyone who enters a store likes to see it well kept. The man who thinks that people do not take note of the appearance of his store and how he displays his stock would very soon change his views if he could get out into the thousand and one homes all over his territory and hear the people talk.

IS FREE ADVERTISING

A very large percentage of people talk to others about what they see in stores. If they see a lot of stock, nicely displayed and in good condition, it involuntarily creates in them a favorable impression about the dealer and his store. In a great many cases it arouses also the desire to buy. Any number of merchants will tell you that they have made a great many sales by putting out the goods where people could see them. In many cases the customer came down town, went into the store to buy something else and had forgotten until he saw the goods right in front of him that he needed it. In numerous other instances people have bought because they saw something that they knew right away was good value and would give them good service in their home. It is important always to let the people who come into your store know what the prices are and in many of the stores where the greatest turnovers are made every article is plainly marked.

KEEP STOCK CLEAN

Keeping the stock clean and looking its best is a big factor in boosting sales. People do not like to buy goods they think are shop worn or that have been on the shelves for a long time. If they see goods that are covered with dust or fingermarked they are not favorably impressed, but a stock that is looking spotless and is well displayed will turn over steadily. No merchant has such chances as the hardware dealer to make an attractive interior display or one that will carry such a broad general appeal to so many actual buyers. This is because no other class of merchants come so closely and so directly into personal touch with the homemakers, and also because so much of the stock carried lends itself to making an attractive showing if a little care is exercised.

An interior display such as is shown above has a real sales value. The wall display, the silent salesmen right up at the front and the general attractive arrangement of the stock all combine to not only create a favorable impression of the store but the desire to buy. This is only one section of a store that is clean, bright and well ordered.

THE CLERKS DEPARTMENT

A Clerk's Capacity—Financial Thought

What is the Selling Capacity of a Clerk is Discussed — Pile Up Business Insurance Now—Set Aside a Definite Amount Each Month

ONE whose experience points to large sales per clerk writes interestingly, but without sufficient data, as follows:

Ontario, May 31, 1919.

Dear Sir,—I noticed some time ago your article on how much a clerk can sell. You are decidedly short for this section. I am running a little cash business which has been in operation less than seven months, and I sold in July just a little short of $3,500, and I do not call myself a fast man by any means.

In the store in which I was employed before starting for myself, we sold as high as $14,500 per month of general merchandise with a force of three men all told; one girl on the dry goods side, and one woman selling books. I have a girl to help this last six weeks, working the eight-hour day. She keeps the books. I do a cash business and load practically everything that goes out of the store on to the wagons, receive all the incoming goods, and deliver some stuff around town by hand.

I see no reason to doubt that if I had a girl with me long enough to train her to the work, we could turn out $4,500 per month in groceries, with some men's and women's furnishings, shoes, etc. I do not see where I am making any great big bunch of money at this game, but I am my own boss for the first time in years, and certainly that is worth something. We have chain store competition close by, so we have to go some.

I do business on a small margin and price my goods pretty much as nearly as I can on the speed with which I turn them. I am inclined to think that if you could induce John M. Sawyer of Eastern Montana to tell just how much his men sell, it would seem almost incredible, and he is supposed to operate on 10 per cent. gross. I do not see why any active man cannot sell $3,000 per month where he has nothing to do but sell, and the business is there for him to handle.

Yours very truly,

Got Premises Slightly Wrong

Perhaps it will be as well to wait for other comments on this important subject. But my friend has mistaken part of the premises. It is not a case of a clerk having nothing to do but sell. The former discussion covered average sales per employee, and in getting those statistics I included everybody—the proprietor himself, and in one instance the manager during a time when he was absent from his business for a month.

The man who reported sales of $1,206 per employee included himself, his cashier, his delivery man—everybody around his shop—to answer my question:

What are Your Sales Per Employee?

All the stores I examined were straight grocery stores of all kinds. I do not know whether the inclusion of other merchandise would make it easier or harder to run up the individual sales. I know that in the days before the war high-grade clerks in fine grocery stores used to consider their turnover pretty creditable when it reached $30,000 to $35,000 a year, or $100 a day, though of course many surpassed such records. Today, in those same stores, it might be easier to pile up sales, considering the high range of values; and it might be harder, because of the greater care with which people buy.

I shall be glad to have further information and suggestion from any quarter.

Business Insurance

Business insurance is the accumulation of a surplus in such form that it can be made available immediately. Money in the bank is the most available business insurance. It is also the easiest to understand. Every man knows that if he has money on hand beyond his needs, he is in a stronger position to meet unforeseen contingencies than if every cent is locked up in stock, accounts, fixtures and real estate, and he is weaker for every cent he does not offset by convertible assets.

But money in the bank earns nothing. The good business way is to have a surplus where you can get at it, and yet have it earn the maximum interest consistent with safety and availability.

The most difficult thing is to make the beginning. It is so hard just to lay aside the beginning of a surplus. But, if you once get started saving and laying aside your savings, that habit becomes fixed, too, and it clings with almost the persistence of a bad habit. So why not make the start?

Investment of Surplus

The usual way to start saving is through a plain, everyday, savings bank account. Every man should have one. Everyone should set out with a well-defined plan to set aside just so much each week, and then stick to the plan. Let nothing whatever turn you aside. Let that obligation be the first one fulfilled every week, no matter whether your bills are paid or not.

Of course, as I said last week, saving is made easy now, for we all are getting used to setting aside something regularly for Uncle Sam's loans. We have a way of saying that we are doing so much for our Government when we buy stamps and Liberty bonds; but, of course, what we really are doing is setting aside a surplus for ourselves in the future—getting well paid for providing our own business insurance.

Well, the habit grows. Pretty soon we find that we can put aside more than we think we need for Liberty bonds. Then a good way to figure is like this: "I have paid for my bonds, so now I'll pile up a little reserve to be ready for the next loan." Then when the next loan comes along you find you can handle it without breaking in on your reserve—and then you may feel that you have really learned how to save.

Invest With Greatest Care

When it comes to investing your surplus, two points come up for most careful consideration—what to do and what not to do. Let your thoughts dwell emphatically on the not.

Next, remember this tremendously important truth: There are more disasters in business as a result of going too fast than too slow, and this other truth: Very little money would be lost if men could only realize that one of the best ways to make money is to keep it. So just let your surplus lie in the savings account drawing its 3 to 4 per cent. while you decide how it can be invested to better advantage.

Another thing: Surplus should be divided into two sections. There must be the first line trenches, the first line of defence, made up of the strongest kind of securities, such as can be turned into money at once, with little or no shrinkage. Then there is to be the line of reserves —funds which earn a little more income but can be brought into service somewhat more slowly. To-day the first line is filled with Liberty bonds and war stamps, for those can be cashed at once with little loss, or can be borrowed against without a second's delay.

For the reserve forces there are plenty of good securities to be had nowadays which yield 6 per cent. or more with such features of soundness and convertibility as make them very attractive to a conservative investor, and that is all you want to be in handling your business insurance. It is well, therefore, to consult your banker as to what you may wisely do with your funds.

Bankers' Ways

To have a heart-to-heart talk with a banker on such a subject for the first time is a mighty interesting experience. Your first impression is apt to be one of disappointment, for you will find him so cautious, so doubtful of many things which to you seem so promising, he will seem so stuck on things which yield only 4½ to 5 per cent., that you will think there is just no use in trying to get good interest and security.

Then remember that the banker knows through long experience that not everything which promises well turns out well. He is used to being the guardian of others' funds, he feels his responsibility, he wants not to see you lose money. He knows that it is bad to fish for high interest and swallow the bait. So you will do well to be guided by what he says.

Then, as you go onward, accumulate more all the time and study investments and many things will be offered to you. Some of them will look very attractive, yield good interest, and yet seem secure. When such a thing tempts you, take it to your banker. He may know something of it not printed in the circular, or he may approve. In any event he will be able to guide you and save you from loss—the most discouraging thing that can come to an investor.

Well, think about this. Ask questions if you want to, but save some money from your business. It is almost perfectly safe to say that no merchant ever made any real money from his business until he learned to draw money out of it and put it to work outside.

Hardware Clerks of St. John, N.B., Now Issuing Monthly Bulletin

ANOTHER illustration has been furnished of the enterprise of the hardware clerks of St. John, N.B. The hardware clerks have taken the lead in many local movements, and recently they took a step forward by forming an association to aid in promoting their aims and ideas. So far as is known this is the first association of its kind in Canada in the trade. It is not a trades union but an association intended to develop co-operation between the clerks and employers.

Monthly Bulletin Issued

As one means of promulgating their ideas a monthly bulletin was suggested, and from this suggestion grew a larger plan. This scheme took form when the "Clerk," a monthly magazine devoted to the interests of all clerks, wholesale and retail, office and store, in all lines of business, was established. The new magazine is edited and published by H. P. Butler, a hardware clerk in the office staff of W. H. Thorne & Co., Ltd., and it has been made the official journal of the Hardware Clerks' Association, with its columns open also to the St. John Clerks' Association.

Shows Increase

The first number for June contained thirty-two pages, and the July number was increased by four pages to contain the increased volume of reading matter and advertising. The contents contain interesting articles by both clerks and merchants, and the last issue contains a page of appreciative comments by employers. The business men of the city also have shown their approval by substantial advertising support. The object of the magazine, according to editorial announcement, is to create a feeling of good fellowship between employer and employee.

It may be no more than a coincidence that the hardware clerks, who have shown themselves to be perhaps the most enterprising lot of clerks in St. John, are the keenest readers of trade journals, and a canvass of the recently formed association showed that practically all the members are regular students of the pages of HARDWARE AND METAL.

CANADA'S BANKRUPTCY ACT

Continued from page 39

Stringent provisions are made against preferential settlements or cases where fraud exists. The clauses are based largely on the English Act, and vary greatly compared with Ontario and Quebec Acts. Speaking generally, all cases of fraud or attempts to delay or any preference that is given one creditor over another are set aside, and if the money has been paid it may be reclaimed. Everything has been done in order to assure that the full benefit of the assets may be divided share and share alike, without preference or priority.

In regard to joint stock companies, the banks, railways, trust companies, and insurance companies, for which there is special legislation, are excepted. One of the difficulties under the present Act dealing with joint stock companies, is that it is difficult to settle the list of contributories. The new Act provides a very simple means; the trustee takes the books and settles the list of contributories himself. In the case, for instance, of John Brown, who has paid $60 each on his shares, he is called on to pay the remaining $40, and if he does not he can be sued in court within 30 days, and no new defence is allowed that was not in the original plea. This method is much more expeditious and less expensive than under the present procedure.

Priorities

The priorities allowed are as follows:

1. Expenses of trustees as a first charge.
2. Costs in obtaining judgment are allowed to the first man who has secured execution against the company.
3. Three months' preference only to wage earners.
4. Taxes due to provincial or Dominion Governments which are declared a lien on the property and must be paid.

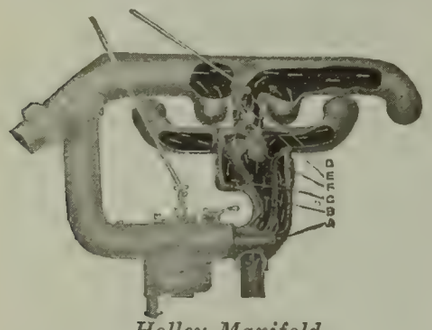
Landlords Three Months Only

In regard to landlords—A change has been made in the law as it is in the Province of Quebec regarding landlords. As a result a criticism has been brought up that we are too hard on the landlords, while on the other hand the claim is made that they should rank as ordinary creditors. We have decided to allow the landlords three months' preference only on their claims. Again the criticism is raised that as soon as the law takes effect you will see all rents payable in advance. But that is not a hardship and as a matter of fact, in New York this is the custom in force. If more than three months rent are due him he will be treated as an ordinary creditor and obtain his dividend with the rest.

The main objects that will be obtained by this Act are thus:

1. It will grant uniformity in bankruptcy acts for all the provinces.
2. The proceedings will be as speedy, as cheap and as reliable as possible.
3. It will abolish preferential or priority creditor abuses.
4. It will provide for the honorable discharge of an honest bankrupt.
5. The whole Act will work out to the financial and commercial interests of Canada.

It may be six months or more before the Act is put into actual operation. The consensus of opinion is that a reasonable time should be allowed to pass before it comes into effect. Practice forms must be drawn up, rules of practice approved of, trustees chosen, etc., but in six or eight months the bill will be proclaimed as law and come into force.

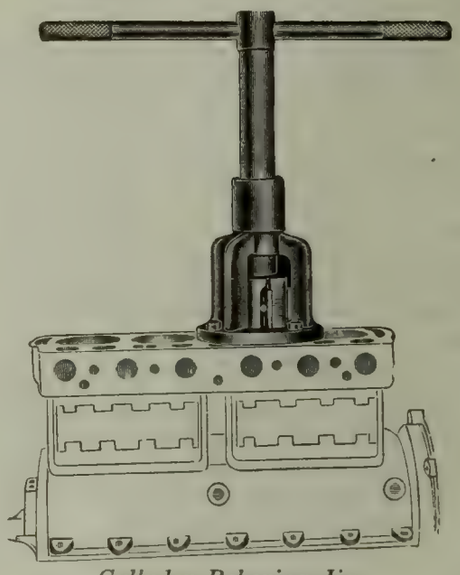


It is announced from Sarnia, Ont., that the next annual meeting of the National Committee on Lubrication will be held there. This will be the first time the society has met outside of the United States. The meeting will be held on September 22.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

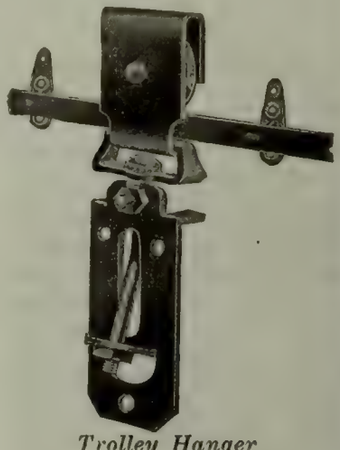
MANIFOLD



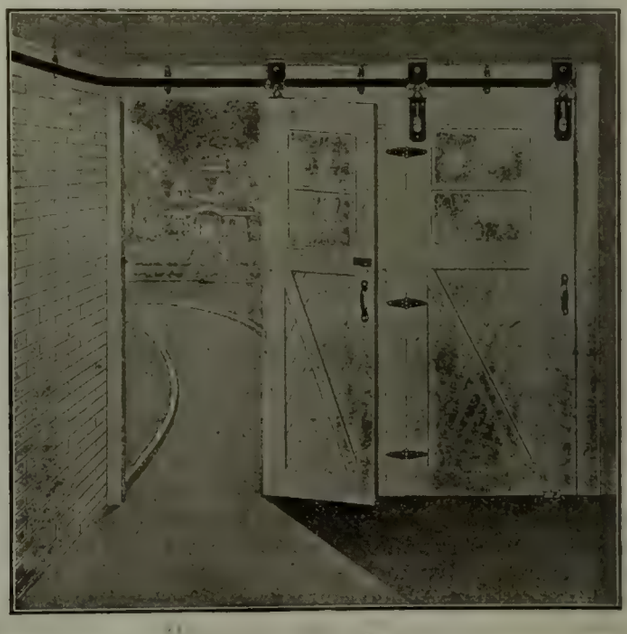
The Holley Manifold for Ford cars, manufactured by the Holley Carburetor Company, Detroit, will, it is claimed, vaporize successfully the lowest grade gasoline, give more power, make for smoother running and give greater efficiency the year around. It is stated that it will prevent excessive carbon accumulation, pounding and pre-ignition and also the thinning of lubricating oil. The Holley it is stated is easily installed and will provide a homogeneous and uniform mixture which has a greater explosive effect than the ordinary poorly vaporized mixture. The Holley manifold, it is claimed, makes the best possible use of fuel, heats every particle until it is thoroughly vaporized, and thus gives greater power. To facilitate starting a primer equipment with auxiliary gasoline tank is furnished it is stated. The primer is connected to the intake manifold at a correct position between throttle and engine to allow the extra amount of gasoline to enter directly into the cylinders, thus insuring, it is claimed, an easy and positive start regardless of temperature, making any change of needle valve adjustment unnecessary.

Holley Manifold

CYLINDER REBORING JIG



The Davis cylinder reboring jig and reamer manufactured by the Hinckley Machine Works, Hinckley, Illinois, it is stated is made in various sizes, one for boring Ford cylinders and other sizes which are furnished to order. With this device, it is stated, all knock and piston slap due to pistons not properly fitting the bore is stopped. Also it is claimed piston leak is stopped and higher compression is obtained, giving more power for hill climbing. It is also claimed that all fouling of spark plugs is eliminated and also that less lubricating oil is used. One cut, it is stated, does the job and leaves a gun barrel finish. The reamer blades, it is stated, are adjustable for setting out and regrinding to original size when dull or worn from long use.



Cylinder Reboring Jig

GARAGE DOOR SET

A garage door set, manufactured by Slater and Barnard, Ltd., Allith Manufacturing Company, Limited, branch Hamilton, Ont., has a hanger, it is stated, which is not only swivel, but adjustable both ways. If the door drags or binds when erected, it can be adjusted, it is stated, without taking it off by simply raising or lowering an adjustment bolt. All parts, it is stated, are japanned. The swivel and adjustable hanger, it is claimed, can be used on any angle doors where flat track is used. The frame, it is stated, is constructed of boiler plate steel and sheave mounted with steel roller bearings. The hanger may be carried in stock and sold separately if desired, the manufacturers state.

Trolley Hanger

Garage Door Set

WILL INCREASE OIL OUTPUT

The Shell Royal Dutch Companies having acquired a large interest in the control of Mexican Eagle Oil Co., through the purchase of shares held by S. Pearson & Son, Ltd., expects to increase the oil production controlled by the Shell combination fully 50 per cent., and thus strengthen its position in the oil world. In addition to increasing its supplies of refined oil products, it will be able to cater for the fuel oil required by the mercantile marines and navies of the world.

The Eagle Oil Co.'s products will continue to be sold by the Anglo-American Petroleum Co., of London, but in association with the Shell products. British control of the Eagle Oil Co. will continue, while its combination with the Shell group is expected to insure a wider market for its products.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LINSEED oil furnishes the feature of the markets again this week in advances which range from 28c to 40c per gallon. This is a direct reflection of the meteoric flight of flax seed which has soared tremendously in the past few days and it seems may go even higher. Germany has become a buyer and taken substantial quantities of seed. Crop reports from the Southern States are anything but encouraging and Canadian crop reports are none too optimistic, so all tendencies point to high prices, though how long the present record figures can be maintained seems problematical. Most certainly buying of oil will be restricted to absolute requirements.

Turpentine, which recorded substantial advances during the past few weeks, has reacted and a decline has been made showing prices 10c per gallon below last week's record figures. Supplies locally are fair and the easing away of the export movement overseas will undoubtedly relieve the strain so that shipments can be made here without any trouble. The crop is not expected to be any larger than last year and so the reaction in prices in view of world needs is not likely to be too great.

Woodenware of all kinds seems to be very strong and new prices are shown on many manufactured lines, including stepladders and extension ladders which are up 2c per foot all around. Ironing boards, sleeve boards, clothes bars, folding chairs and many kindred lines have also followed the upward trail.

Copper is showing decided strength, the metal advancing 3c per pound during the week and a similar move has been made in rods and sheets. Nickel-plated copper teakettles, coffee pots and tea pots have been revised upward and it seems probable that a general revision upward in manufactured copper goods may be found necessary.

Many lines have undergone revision this week, among which will be found wire hat and coat hooks, japanned tower bolts, food choppers, furniture casters and Paris green blowers, all of these undergoing revision upward. Sash pulleys, alarm clocks and air rifle shot have also moved up, with stove pipe dampers, shelf brackets and brass seam binding declining.

MONTREAL MARKETS

MONTREAL, July 3—Hardware markets reveal several changes this week, among them some advances, and some declines. Advances are applicable to wire hat and coat hooks, these advancing 10c per gross. Silverware prices are up 5 per cent. in one quarter as applying to "1847" goods. Jute twines are also higher in price, while nickel-plated teakettles, tea and coffee pots are advanced about 10 per cent. Hose couplings are increased about 10 per cent. There seems likely to be increases also for other goods made of copper. Winchester rifles are advancing in price, discounts and lists now being revised.

Among the declines are those for stove pipe dampers and shelf brackets and also for some lines of butts, refrigerator, inside blind, and other builders' special butts being affected. Tin is easier in price, while lead and aluminum were slightly reduced in the ingot list.

Hat Hooks, Silverware Higher; Brackets Down

Montreal.

SILVERWARE, HOOKS, BRACKETS —Increased prices to the extent of 5 per cent. have been effected in one quarter on 1847 spoons, knives, forks, etc. Common wire hat and coat hooks are advanced 10c per gross to $1.10, this applying to the 3 in. standard pattern. Bradley shelf brackets are reduced 10 per cent.

Lower Prices Apply Stove Pipe Dampers

Montreal.

DAMPERS.—Declines have been effected for cast stove pipe dampers, and the new prices available are as follows: 5 inch, per gross, $12.50; 6 in., $14, and 7 in., $19.

Jute Twines Higher; Butts Go Lower

Montreal.

JUTE TWINES.—Advances have been made in various jute twines and these will total 7½ to 10 per cent. The increases were not unlooked for and HARDWARE AND METAL has pointed out the strengthening of hemp prices in primary points. Various butts of Stanley Works make have been reduced in price. The discounts vary and the change will mean declines of from 10 to 20 per cent.

Rifles To Advance; Couplings Up 5-10%

Montreal.

RIFLES, COUPLINGS, ETC. — Advances are expected to be made in the price of certain Winchester rifles. Lists and discount are now under revision. Brass hose couplings are up about 10 per cent. in some cases, and in others 5 per cent. Copper rivets may be again revised to higher levels, for there has been a general stiffening of copper prices.

Nickeled Goods Up; Stoves Have Moved

Montreal.

STOVES AND WARES.—For summer lines of stoves there has been a splendid demand, and oil, gas and electric lines have figured prominently in the turnovers of manufacturers and jobbers. Prices are steadily maintained.

An advance to approximate 10 per cent. will be made at once on nickel-plated teakettles, teapots, coffee pots, etc. This is due to the firming of the ingot copper markets.

Wax Quoted Less; Oil, Gasoline Steady

Montreal.

GASOLINE, OILS. — Marketing of gasoline is heavy and there is a steady and unchanged basis at the held price of 33c per gallon. Coal oil is selling freely at 20-23c per gallon, and there is a summer movement of lubricating oils on the recently announced price basis. Wax has declined in price half a cent, but this is on the plain wax only.

For Wire and Nails Good Demand; Firm

Montreal.

NAILS AND WIRE.—There has been a decidedly better movement of some lines of wire. Hay wire is one of the big sellers these days. The basis is firm. Wire nails have been ready sellers and the basis is unchanged and firm at $4.75 per keg, this applying to cut nails also. No reductions are anticipated.

Soft Fibres Stiff; Rope is Steadied

Montreal.

ROPE AND CORDAGE.—A decided firmness characterizes the soft fibre markets and advances have been the order in the United States. These advances are reflected here in a higher basis for twines. It is expected that a good demand will soon manifest itself from Europe. Rope markets are fairly well maintained and there is a seasonable movement. Pure manila rope basis is held at 34c per pound; British manila, 30c; and sisal, 27½c.

Increased Business For Iron and Steel

Montreal.

STEEL AND IRON.—There is much better feeling in the iron and steel market and it is expected that increased selling will be apparent as a result of peace signing. The undertone is firm and orders received are for reasonably liberal quantities. The price undertone is, if anything, firmer.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

BRIEFS FROM THE WEEK'S MARKETS

Linseed oil soars and soars—another 25c per gallon being added to the price this week.

* * *

Turpentine declined 10c per gallon this week and even somewhat further reductions seem probable.

* * *

Wire hat and coat hooks advanced 10c per gross this week.

* * *

..Nickel-plated teakettles, tea and coffee pots show an increased price.

* * *

Shelf brackets have registered a decline from former levels.

* * *

Stepladders and extension ladders show an increase of 2c per foot this week.

* * *

Copper is very strong, the metal going up 3c per pound, and sheet copper and rods also being affected.

Firm Basis Holds on Sheets and Plates

Montreal.

SHEETS AND PLATES.—Demand is better for sheets and the undertone is firmer as a consequence of manifestly better buying mood. There have been some fairly good sales lately and the tendency is to a maintenance of the price basis rather than toward a reduction of any kind.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 4	7 00

20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Peace Will Help Move Old Material

Montreal.

OLD MATERIALS.—The movement of old material will be accelerated, it is expected, by larger orders from the mills for supplies of metal. There is a better feeling manifest now and prices are generally firm. The demand for heavy copper is good and prices are inclined to advance.

Better Trade Sales For Lead Products

Montreal

LEAD PRODUCTS.—There is a fairly noticeable improvement for made-up lead products and this will be appreciated by the manufacturers. Some building activity is manifest here and there and plumbers are getting quite a lot of jobbing and other work. The tendencies of the market are firmer.

Copper Goes Higher; Tin and Lead Less

Montreal.

INGOT METALS.—Lower prices are available this week on tin and pig lead. There has been a somewhat lower condition on tin, but the general tendency of ingot markets is better. Copper has advanced again.

COPPER.—A steady firming of the market has been manifest for some weeks and the local condition is reflecting that of primary points. The basis this week is 22-22½c per lb.

TIN.—Two cents less is quoted this week, and 54c is the ruling price for block tin in this market. More trading would be welcomed.

LEAD.—The undertone is a trifle easier, with market quotations here 7¼c per lb.

ANTIMONY. — Changes are absent this week and the moderate amount of business being transacted is done around 9½c per lb.

ALUMINUM.—Prices are shaded this week one cent and 35c is the ruling basis.

SPELTER.—Although weakness was attributed to this market at primary points, there has been no change and quotations remain at 9¼c.

PIG IRON.—Excepting a continued firmness, there is no change this week, the price remaining at $48 per ton.

TORONTO MARKETS

TORONTO, July 3.—Woodenware has come in for revision upward in some quarters this week. Ingot metals are perhaps one of the most active lines and variations in quotations are shown in copper, spelter and antimony, which are tending upward, and tin, which is lower. Wire nails and rods are showing strength and indications seem to point to a slight revision upward following a similar move in some quarters in the United States. Sheet copper and rods are very firm and have moved up somewhat. Business is active and jobbers and retailers express satisfaction over the outlook.

Ironing Boards, Clothes Bars Move Higher

Toronto

IRONING BOARDS, CLOTHES BARS.—Practically all lines of woodenware seem to be coming in for revision, and the changes which are being made reveal a higher scale of quotations than those formerly in effect. This is shown in additional lines during the present week, ironing boards and clothes bars being two lines which are affected. New prices which are being quoted on ironing boards are for the No. 32, $12.00 per dozen; No. 33, $13.00; No. 35, $26.00; and No. 36, $30.00. These prices represent an advance of $1.00 per dozen all the way through. On clothes bars, the No. 4 is now being quoted at $11.00; No. 5 at $13.00; the No. 6 at $15.00, and the No. 38 at $15.00, all of which represent an advance of $1.00 per dozen.

Plated Hinges May be Revised

Toronto

HINGES.—It is understood that a revision in plated steel butts and kindred lines is under contemplation. As far as can be learned, the manufacturers have issued new prices which provide for a slight decline, but as yet these prices have not been generally adopted.

Woodenware Shows Much Firmness

Toronto

WOODENWARE. — Many lines of woodenware have been affected and quotations which represent a slight revision upwards named on: sleeve boards, bread boards, extension gates, child swings, baby swings, garden seats, folding chairs, kindergarten sets, folding tables and baby walkers.

Step Ladders Move Up 2c Per Foot

Toronto

STEPLADDERS.—There has been a general advance named in stepladders and extension ladders, the new quotations which now are being named to the trade providing for an advance of 2 cents per foot. This will provide for quotations being made on the following basis: Perfect, 34c per foot; Hercules, 36c per foot in four to ten foot lengths, and twelve to fourteen feet, 41c; Faultless, 32c; Ontario, 29c; Shelf Lock, 24c; Gardner No. 1, 21c; Gardner No. 2, bolted, 24c; Dominion No. 3, 25c; Dominion No. 4, bolted, 28c. Quotations which are now being named on extension ladders are for the 22 to 32 foot, 26c per foot; the 36 to 40 foot, 29c per foot; 44 foot, 32c per foot, and over 44 feet 42c per foot.

Bath Tubs, Kindred Lines Show Advance

Toronto

BATH TUBS, OTHER LINES. — A change became effective on Monday of this week on bath tubs and other kindred lines of enamelware. The advance on bath tubs amounts to 10%; on all other lines there is an increase of 5%. This, the manufacturers state, is the result of higher manufacturing costs, due to the increased demands of labor and the move in the Canadian market follows similar action taken in the States a few days ago. Business seems to be very fair and indications are that the present volume at least will be maintained, and probably a very satisfactory increase shown.

Nails Show Firm Tone; Wire Strong

Toronto

NAILS, WIRE.—Reports from the United States indicate that there is a much improved demand for wire nails and wire rods. This had had the tendency to eliminate all price cutting, indications of which were prevalent until the last two or three weeks, and one maker has announced an advance of $2.00 per 100 pounds on rods, and 25c per keg on nails. Whether this will result in a similar move being made in the Canadian market is still hard to determine, but the situation is undoubtedly stronger in view of conditions which prevail across the line. Quotations are steadily held, the wire nails selling at a base of $4.70 per 100 pounds, and the cut nails at $4.75.

There is nothing new in the ordinary grades of steel wire, the demand being fairly good and really improving, and the feeling is strong in some quarters that a revision to higher levels in the basis on wire may be looked forward to. The demand is certainly very much better, but production costs have not been lowered any, and this may mean that slightly higher levels will be reached. Opposition to any change at the present time has developed in some quarters and it may be that any move along these lines will not become immediately effective. There has been a change made in some quarters on the base on copper wire, the strength which has been shown in the metal being very largely responsible for this.

Oils Hold at Steady Levels

Toronto

OILS, GASOLINE. — The market shows no further revision this week and seems to have steadied down in line with changes recently announced. A big demand is in evidence, and this applies particularly on motor grades in Toronto, as well as gasoline, since the street car strike has been in effect. Gasoline remains at the unchanged figure of 32c per gallon, with big sales apparent all over.

Sales of coal oil have been heavy also, and there is no indication of any let-up in the demand. Prices are firm and unchanged at from 19½c to 22½c per gallon, according to grade.

Activity Marks Summer Stoves, Wares

Toronto

STOVES, WARES.—Activity continues to be the keynote marking operations of summer lines of stoves, which have enjoyed such a splendid sale the past few weeks. It is not any easier to obtain deliveries of some lines, and reports would indicate some slight delays in making shipments.

Sales of all lines of wares is considered satisfactory, and the market rules with a firm undertone.

Some manufacturers indicate that they are not pressing for fall business on stoves and ranges owing to uncertain labor outlook and the difficulty they may experience in getting supplies just when they want them. Even higher prices may result from the advancing production costs, it is indicated.

Steady Tone to Iron and Steel Bars

Toronto

IRON AND STEEL BARS.—The market holds in an unchanged position, with quotations generally very well maintained, though figures below show some slight revisions. There is a fair demand in evidence and no sign of any break from the prices being quoted herewith:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25

Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Better Tone to Tubes and Pipe

Toronto

WROUGHT PIPE, BOILER TUBES.—Quotations generally show no revision whatever, but there are indications of an improved trade. Merchant tubes are not very active as yet, but indications seem to point to a betterment coming. Prices are steady and hold at figures shown below.

There is a better demand for pipes from all accounts, and the trade generally feel somewhat optimistic over the outlook. Prices remain at unchanged figures as shown in current market quotations.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Steady; Lead Products Hold

Toronto

LEAD AND ZINC PRODUCTS.—The market remains steady and no signs of any material change are in evidence. Tin is slightly easier, with lead generally pretty firm, so solder is fairly well balanced between the two. There is a fair demand and improvement is mentioned in connection with the sale of manufactured lead products.

Lead pipe, ib.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

Sheets and Plates Maintain Activity

Toronto

SHEETS, PLATES.—"A very good demand" is the general view held in regard to business coming to hand at the present time on sheets and plates. Prices are very well maintained, although it is indicated some slightly lower figures are offered in some quarters on black sheets, though this is not expected to last. A report to-day from Buffalo shows where one big interest have stopped taking orders for wire products for the present, and that their tin plate mill is operating to 75 per cent. of capacity.

Sheet copper has registered a further advance this week and is being quoted at 32c per pound, with higher levels looked for.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Market Maintained on Corrugated Sheets

Toronto

CORRUGATED SHEETS.—The market is firm and well maintained, and manufacturers report a good volume of business coming to hand. Range of quotations to-day follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

BIG HAY WIRE MOVEMENT

In the Quebec district there is an immense hay crop. This will take a lot of wire to tie, and there is some possibility of a shortage of hay wire arising, it has been stated. In the meantime the movement is most active, hay packers being anxious to get along with the work of pressing as soon as may be.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

More Optimistic Note in Scrap

Toronto

OLD MATERIALS—The scrap yards are selling a fair amount of material right in Canada now to the foundries and mills. This is the first week that any movement of this sort has developed to any extent. There is a better feeling in the market, and that hesitation that was so manifest for some time is largely passing away. There is a certain amount of shipping directed to United States points. More material is being offered for sale than for some weeks past. Dealers are willing to part more freely with some of their material, and transportation and other companies are sending fair offerings to the market. It all points to better days for the scrap market. They are well nigh due, as the second-hand metal market has been a poor one nearly all the way through since the signing of the armistice.

There was at least one chap who was all optimistic this week. He is in the scrap metal business in a big way. He was not at the point where his optimisim led him to mark up prices, but he was quite willing to admit that it would come very soon, in fact values are a little better right now than the price list indicates, but it is not good to shove up the list for a few days and then lower again.

Dealers' Buying Prices—		
Tea lead		0 03
Heavy lead pipe		0 03
Pipe scrap		8 00

Bicycle tires		0 04½
Automobile tires	0 03½	0 04

Cotton Waste Prices Named; Oakum Holds

Toronto.

WASTE, OAKUM.—In line with information given out in these columns two or three weeks ago, prices on cotton waste have been revised downward and new quotations now available show a reduction of from ¼c to ½c per pound in some quarters. The figures now prevailing on white cotton waste are as follows: XXX, 18c per pound; XX, 16¾c; X, 15¾; XC, 13½c; Japanese 13c; those ruling on colored waste are; No. 5, 13¾c per pound; No. 1, 12¾c; No. 7, 11¾c; No. 1A, 10¾c; No. 1B, 9¾c.

Better Demand For Hay Fork Rope; Twine

Toronto.

CORDAGE, TWINE.—Manufacturers and jobbers report a very nice volume of business coming to hand on hay fork rope. Other kinds are not so active though sales are better than they have been for some time past. Prices remain firm, the following quotations being made: Pure manila, 34c per pound base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c; sisal lath yarn, 27½c. Repeat business is also coming to hand on binder twine, and indications are that retailers who are going after this business aggressively are securing a nice volume of orders in spite of the opposition of the farmers' clubs. As a matter of fact, many farmers have expressed themselves strongly in favor of supporting the local dealer another year, and retailers should be keen to take advantage of this attitude. Cotton twines are very firm and higher levels seem a possibility.

Copper, Spelter, Antimony Move Up

Toronto.

INGOT METALS.—Higher prices have been recorded in copper, spelter and antimony, and lead maintains a fairly strong position. A better feeling is

shown in markets in the United States and same is being reflected here. Tin is easier.

COPPER.—A sharp advance has been shown in copper this week, quotations moving up 3c per pound to 21½c. A much improved demand is in evidence with stocks reported ample.

TIN.—An easier tone is apparent in this metal, quotations being made at 55c to 56c per pound, a decline of from 2c to 3c per pound. Supplies are coming along satisfactorily, and a fair volume of business is being done.

SPELTER.—Quotations have stiffened, 8½c and 9c being asked for this. Business is showing some improvement.

LEAD.—The market maintains a fairly strong undertone and there is little new in the situation as it exists to-day. The price holds at 6½c to 6¾c per pound.

ANTIMONY. — Continued strength marks the position of this metal and a further ½c advance has been made this week, bringing quotations up to 9½c per pound.

ALUMINUM.—A little more activity is apparent in this metal with quotations now generally being named around 35c per pound.

LONDON MARKETS

LONDON, Ont., July 3.—New and higher quotations are in effect on putty, Gem food choppers, Gem furniture casters, dry Paris green blowers, lantern globes, steel sash pulleys, alarm clocks, rosin, shellac, and Winchester air rifle shot. Brass seam binding is the only line which shows a reduction. Business all through this district has been excellent. Crop prospects are splendid and although there are some labor troubles they have not in any way been a serious factor in disturbing business conditions. Building continues very active.

Higher Prices Named on Japanned Tower Bolts

London, Ont.

JAPANNED TOWER BOLTS. — Shipments of English japanned tower bolts are now arriving, and new and higher quotations are effective as follows:

No. 09 x 3 in., $1.45 doz.; No. 09 x 4 in., $1.65 doz.; No. 09 x 5 in., $2.00 doz.; No. 09 x 6 inch., $2.25 doz.; No. 09 x 8 inch, $3.25; No. 09 x 9 inch, $3.50 doz.

Gem Food Choppers Go to Higher Levels

London, Ont.

GEM FOOD CHOPPERS. — Gem food choppers have advanced and the new quotations are as follows:

No. 20, $24.00 doz.; No. 22, $30.00 dozen; No. 24, $40.50 doz.

Higher Prices Named For Gem Furniture Casters

London, Ont.

GEM FURNITURE CASTERS.—An advance has ben registered in the quotations on Gem furniture casters, and the new figures are:

Nos. 351, 352, 355, 356—36 cents per set.
Nos. 451, 452, 455, 456—40 cents per set.
Nos. 651, 652, 655, 656—45 cents per set.
Nos. 751, 752, 755, 756—51 cents per set.

Reduction Made in Brass Seam Binding

London, Ont.

BRASS SEAM BINDING.—Lower prices are being quoted on the new stocks of brass seam binding, which are now being received. The figures are:

9-16 inch, $5.50 per 100 yards; ¾ inch, $6.50 per 100 yards; ⅞ inch, $7.00 per 100 yards.

Paris Green Blowers Advance in Price

London, Ont.

PARIS GREEN BLOWERS.—A new and higher price of $13.50 per dozen is now in effect on Paris green blowers or bellows. There has been, and continues to be a brisk demand.

Higher Prices Named For Lantern Globes

London, Ont.

LANTERN GLOBES.—An advance has been made in lantern globes, and the new quotations are as follows:

1 dozen to case, $1.10 dozen; 3 dozen to case, $1.05 dozen; 6 dozen to case, $1.00 dozen.

Steel Sash Pulleys Register an Advance

London, Ont.

STEEL SASH PULLEYS.—Higher quotations on all steel sash pulleys are now in effect. The new figure is for the No. 12, 65c per dozen.

Advance is Shown In Alarm Clocks

London, Ont.

ALARM CLOCKS—Alarm clock prices show an advance, and the following quotations are now being made: Big Ben, $3.00 each; Baby Ben, $3.00 each.

Higher Prices For Air Rifle Shot

London, Ont.

AIR RIFLE SHOT—A new and higher quotation is now in effect on tubes Winchester air rifle shot, the figure being 75 cents per 100 tubes.

Demand is Brisk For Harvest Tools

London, Ont.

HARVEST TOOLS. — No price changes have been made on harvest tools. There is a brisk demand. Quotations are on the basis of 17½% discount. Hay forks have been unusually active, and prices are: 3-prong bent, plain, $11.40 per dozen; 3-prong bent, strapped, $13.00 per dozen, less 17½%.

Wire Nail Prices Are Holding Firmly

London, Ont.

WIRE NAILS.—Excellent sales of nails are being made. Prices show no change and are as follows, wire, $4.70 base, cut $4.75 base.

No Changes Shown in Prices of Rope

London, Ont.

ROPE.—While no changes are shown in rope prices, there has been a steady demand and large quantities are being sold. Quotations are as follows:

Pure Manila, 34c base; British Manila, 30c base; New Zealand Hemp, 30c base; Sisal, 27½c base.

Pure Putty is Up 55 Cents Per 100 lbs.

London, Ont.

PUTTY.—Putty prices have advanced, the quotations being figured at $2.50 per 100 pounds advance on Standard. Standard is up five cents per 100 pounds, prices being as follows: 100 pound drums, $6.80; 25 pound drums, $7.05; pure, 100 pound drums, $9.30 per 100 pounds; 25 pound, $9.55.

White Lead in Oil is in Brisk Demand

London, Ont.

WHITE LEAD IN OIL.—There is a brisk demand for white lead in oil. Prices are as follows:

Pure, in tons, $16.35 per 100 lbs.; less tons, $16.70.

Paris Green Demand Largest in Years

London, Ont.

PARIS GREEN.—Not in many years has there been such a brisk demand for Paris green to check the ravages of insect pests, especially potato bugs. Prices show no change and are as follows:

½ lb. pkgs., 54 cts. lb.; 1 lb. pkgs., 52c; 25 lb. drums, 50c; 50 lb. drums, 49c; 100 lb. drums, 49c.

Price of Rosin Shows an Advance

London, Ont.

ROSIN.—Rosin has joined the commodities which are soaring, and the new prices are as follows: Full casks, $9.50 per 100 lbs.; small lots, 12 cents per pound, gross weight.

Fifty-cent Jump in Price of Shellac

London, Ont.

SHELLAC—An advance of fifty cents per gallon is shown in the new prices of shellac. Quotations are as follows:

Orange, 1 gals., $5.65 gal.; ½ gals., $5.85; ¼ gals., $6.05.

White, 1 gals., $6.15 gal.; ½ gals., $6.35; ¼ gals., $6.55.

Further Advance in Linseed Oil Prices

London, Ont.

LINSEED OIL.—Linseed oil prices continue to climb and a further advance is shown over former quotations. The prices are, per gallon:

1 to 2 bbls., raw, $2.75; boiled, $2.78; 3 to 5 bbls., raw, $2.74, boiled, $2.77; 6 to 9 bbls., raw, $2.72, boiled, $2.75. Less bbls. add 10 cts. gal.

Turpentine Shows Easier Tendencies

London, Ont.

TURPENTINE.—Turpentine is down 15 cents and is showing a tendency to be a little easier. The new prices are:

1 bbl. lots, $1.55 Imp. gal.; 2 to 4 bbl. lots, $1.54; 5 gal. lots, $1.65.

WINNIPEG MARKETS

WINNIPEG, July 3—Price changes during the week are again fairly numerous, many revisions being made in lines of staple shelf hardware. Both advances and declines are recorded, the following being the principal articles affected: draw knives, combination anvil and vise, half soles, calf weaners, Weston chain blocks, brass escutcheon pins, spool wire, wash boards, wire rope clips, thimbles and pump leathers.

With the failure of the sympathetic strike movement in the city, many of the tradesmen have returned to work, and jobbers are working with full staffs. Freight shipments, however, are held up and it will no doubt be some time before the congested freight will be cleared away and shipments moving as in normal times. Business is reported very favorable at present, many lines of harvesters' supplies being in demand.

Draw Knives Register an Advance

Winnipeg.

DRAW KNIVES.—Prices on Gilmour draw knives show a further advance during the week, due to higher manufacturing costs, new prices being approximately 5 per cent. over former quotations. These are now selling at 45 per cent. off list, net prices being as follows: 8-in. $13.20; 9-in. $13.75; 10-in. $14.30 per dozen.

Half Soles Reach Higher Levels

Winnipeg.

HALF SOLES.—Prices on half soles which were on the decline a couple of months ago have advanced during the week, due to higher prices ruling on raw materials, the increase being from 5 to 10 per cent., which makes the net prices now ruling as follows: Half soles, No. 37½ $2.60; No. 122 $4.40; No. 123 $4.20; No. 126 $2.85 per dozen pair. Top lifts No. 50 $1.60 per dozen pair.

Decline in Brass Escutcheon Pins

Winnipeg.

ESCUTCHEON PINS. — Brass escutcheon pins. Brass escutcheon pins also show a drop during the week, due to recent declines in brass, new prices being approximately 10 per cent. better than former quotations on this line. New prices ruling to-day are given herewith: ½-in. 90c; ⅝-in. 88c; ¾-in. 86c; ⅞-in. 84c; 1-in. 83c per pound.

Chain Blocks Down 5 Per Cent.

Winnipeg.

CHAIN BLOCKS. — Weston chain blocks which have been steadily advancing for the past four years show a decline of 5 per cent. during the week, based on new manufacturers' prices, which makes to-day's market price as follows: ½-ton $22.30; 1 ton $27.55; 1½ ton $37; 2 ton $43.40 each.

Combination Anvil and Vise Goes Higher

Winnipeg.

COMBINATION ANVIL AND VISE. —Combination anvil and vise, as well as the attachments, register advanced prices during the week, and based on new factory prices, are now selling at the following figures: Anvil and vise DV, $7; attachment DD, $3.15 each.

Calf Weaners Show a Reduction

Winnipeg.

CALF WEANERS.—New prices just to hand on Shaw's calf weaners show a substantial reduction over former factory quotations, and new prices just issued by the Winnipeg jobbers are given herewith: No. 1, $5.25; No. 2, $6.20 per dozen.

Decline in Spool Wire of 10 Per Cent.

Winnipeg.

SPOOL WIRE.—New lists just to hand from the manufacturers show a decline in the prices of copper, brass, and hair wire of about 10 per cent., brought about by the reductions in the raw material. To-day's ruling prices are given as follows, based on 15 per cent. off list on copper and brass wire, and 20 per cent. off on hair wire: Hair wire, black, 28 ga. $2.80, 32 ga. $3.20 gross; tinned, 28 ga. $3.40; 32 ga. $3.80 gross. Assortments, No. 40 $3 each. Copper wire on spools, 16 ga. $1.90; 18 ga. $1.90; 20 ga. $1.90; 22 ga. $2.05 per dozen; brass wire on spools, 16 ga. $1.90; 18 ga. $1.90; 20 ga. $1.90; 22 ga. $2.05 per dozen.

Wash Boards Show Sharp Jump

Winnipeg.

WASH BOARDS.—Higher wages are principally responsible for this week's advance in wash board prices, which move up from 15 to 20 per cent. on the enamel, brass and glass, while the Globe line remains unchanged. Market prices now ruling are given herewith: Enamel, $8.05; brass, $7.65; glass, $6.75; Globe, $4.40 per dozen.

5 Per Cent. Advance In Pump Leathers

Winnipeg.

PUMP LEATHERS.—Advances in the leather market is reflected in the recent advance of pump leathers which move up approximately 5 per cent. and are now selling as follows: Cup, per dozen, 1-in. 70c; 1¼-in. 75c; 1½-in. 80c; 2-in. $1.10; 2½-in. $1.45; 3-in. $1.90; 3½-in. $2.45; 4-in. $2.95; 4½-in. $3.35. Valve, per dozen, 2-in. 85c; 2½-in. $1.05; 3-in. $1.35; 3½-in. $1.60; 4-in. $1.95; 4½-$2.80. Tank pump leathers, 5-in. $5 per dozen.

Wire Rope Clips and Thimbles Down 10%

Winnipeg.

WIRE ROPE CLIPS, THIMBLES.—Wire rope clips and thimbles have declined during the week approximately 10 per cent. following the reduction by American manufacturers, which went into effect recently. New prices ruling on these lines are as follows: Wire rope thimbles, ¼-in. $7; ⅜-in. $8; ½-in. $11; ⅝-in. $18; ¾-in. $20; ⅞-in. $25; 1-in. $33 per 100. Wire rope clips: ¼-in. $5.50; ⅜-in. $7; ½-in. $10; ⅝-in. $13; ¾-in. $19; ⅞-in. $27; 1-in. $31 per 100.

Linseed Oil Holds; Turpentine, Too

Winnipeg.

LINSEED OIL, TURPENTINE. — Linseed oil prices show no change during week and still hold at record prices, while flax seed is quoted around $5.50 per bushel with crop reports none too favorable, so that prices will no doubt

hold firm. To-day's market is confirmed as follows: Raw linseed oil $2.40; boiled linseed oil $2.43 per gallon. Turpentine prices also hold firm on the local market at former prices, and no immediate change is anticipated, to-day's prices being as follows: Barrel lots $1.65 per gallon; ½ barrel lots $1.68; 5-gal. lots $1.70; 1-gal. lots $1.70, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., July 3.—The signing of the peace treaty is expected to bring out a great deal of additional demand for steel. It is pointed out that a great many construction projects, involving the consumption of steel, have undoubtedly been held back, as a matter of general policy, to await the actual signing of peace. It was the common appraisal of the future of business, before the armistice was signed, that business of all descriptions would be stifled to a greater or less extent during the interim period between the cessation of hostilities and agreement upon peace terms.

The demand for steel in the past few months, when analyzed in detail, has shown clearly the distinction between two classes of orders, those that involved ordinary everyday consumption of steel and those that involved investments, such as can be made or postponed according to the judgment or whim of the investor. For example, there has been an excellent demand upon the pipe mills for "oil country goods," because oil is high priced and there is a continuous demand for it, but there have been practically no projects involving the laying of long oil lines, such as are regarded as of an investment character. Again, there has been an excellent demand for nails, which are used in common, everyday life, while there has been little demand for structural shapes, which are used for building factories, skyscrapers and bridges. A comparison like this might be carried to great length. The investment buyer of steel is expected now to be a much greater factor in the market than in the past few months.

A further improvement is reported in the demand for sheets. Having operated at about 60 per cent. of capacity in May, the sheet mills operated last week at fully 75 per cent. This week there is some idleness on account of the holidays, the time being propitious for making repairs. One plant, the Deforest, at Niles, recently acquired by the Republic Iron & Steel Company, is down for the month, installing an electric drive. The steam plant is abandoned and current will be purchased from a public service corporation, although eventually the company may carry current from its main plant in Youngstown to the newly acquired plant.

There has been improvement in demand for butt weld pipe, which is now running at a rate of about 75 per cent. of capacity, while lap weld departments of the pipe mills, chiefly by reason of the heavy demand for oil country goods, are not only operating at capacity, but are filled quite solidly with orders for a couple of months to come.

In merchant bars there is improved demand, though the total is still far below mill capacity. Plates continue to present an extremely sluggish appearance, although perhaps the appearance would not be so bad if there had not been such a large increase in productive capacity in the past two years.

In addition to the 200,000 tons of rails recently purchased, the Railroad Administration will probably buy 300,000 tons, which will round out its requirements for the year.

Price cutting has not disappeared from the finished steel market, but there is less of it, apparently, than 30 days ago. The important feature, however, is that there has been price cutting for so long a time without its pulling down the general market level. The market has displayed an inherent strength that was hardly expected of it. Earlier in the year the philosophy of the mills was, in substance: "Let us hang together, so that we do not hang separately." Price cutting, it was then thought, would cause the bottom to drop out of the market. Accordingly, it was very unpopular to cut prices, but of late there have been several lines of finished steel product in which a mill could have felt free to cut prices, if it desired, because it had so many examples to follow. In sheets, for instance, while the leading interest has adhered strictly to regular prices at all times, there was a time when probably 25 per cent. of the tonnage booked by independents was at cut prices. The proportion is now less. The Inland Steel Company, for instance, has withdrawn from the market entirely, being comfortably filled with orders. In pipe the irregularities recently far from uncommon have practically disappeared.

Pickands, Mather & Company and M. A. Hanna & Company are each reported to have sold fully 100,000 tons of pig iron, chiefly foundry grades, in a period of 30 days. Other producers have also done well, and the merchant furnaces now operating, with perhaps an occasional exception, are now comfortably filled with business for the third quarter, with some tonnage booked for fourth quarter. As a result there is little disposition to shade regular prices, which are those of March 21, except where it has been necessary for individual districts to develop different levels in order to place their markets in normal trade relation with prices in other districts.

While the market has thus improved materially, furnacemen hardly expect any advance in prices to occur in the near future. They recognize that with so many furnaces out of blast the market would experience difficulty in advancing. The furnaces that went out of blast did so not because they wanted to be out of blast, of course, but because they wanted the situation to be liquidated. They did not want to take chances in trying to stay in blast by cutting prices, as there was no telling where prices would go in such case. Now, however, they are eager to get in blast again, and many of them would probably decide to blow in if they saw an opportunity to build up some backlog business for the start, even perhaps at the expense of cutting existing prices slightly. Thus while few are disposed to predict positively that pig iron will advance this year, there are many who express conviction that next year it will be above present levels.

Steel mill operations may be estimated at a rate of 65 per cent. of capacity, representing a rate of ingot production of about 32,000,000 gross tons a year, capacity being about 49,000,000 tons. This compares with an average rate of 54 per cent. during May, while about the middle of that month the rate had probably dropped to about 50 per cent. Thus there has been a very substantial recovery. The present rate is approximately equal to the average rate in April.

After making extremely strong demands in connection with the sheet and tin plate wage scales for the twelvemonth beginning July 1, the Amalgamated Association has accepted some slight advances for some members of the crews, whereby the total of sheet mill wages is advanced 3.6 per cent. and the total of tin mill wages about 2.6 per cent. The settlement refers only to the labor at the hot mills. Less than half the mills are organized, but the non-union mills, with few exceptions, pay at least union rates, and some make a practice of paying just a shade more.

JOINS RANKS OF BENEDICTS

The announcement is made by Mr. and Mrs. Wm. J. Rath of the marriage of their daughter, Clara Beatrice, to W. Fred Reynolds, of the Canada Foundries & Forgings, Ltd., James Smart plant, Brockville, Ont. The wedding took place on Saturday last, June 28, at St. Peter's Church, Brockville, Ont.

BEEN DONE

Giles returned from the city with a scarf-pin that contained a "diamond" of no usual size.

It was the pride of his heart, and the envy of his village companions.

He treated all inquiries from them as to its value and its authenticity with high scorn.

His employer, after a week of basking in radiance, asked Giles about its history.

"Giles," he said, "is it a real diamond?"

"Well," said Giles, "if it ain't I've been diddled out of one and sixpence."

Keep Up Big "Drive" for Business

It Has Been a Wonderful Season, But That is No Reason Why Paint Should Now be Pushed Into Background—There is Any Amount of Much Needed Painting That Has Not Been Touched Yet

IN the past six weeks most hardware men have sold more paint than they have sold in a long time, and the orders are still coming in. "It's been a wonderful season," is the verdict of most retailers and practically every manufacturer. The manufacturers have been put to it to keep up with their orders. They have been working overtime and with greatly increased staffs, and even then they were not able to get all their orders filled on time.

End is Not Yet

Even with business as good as it has been, there is any amount of goods yet to be sold. Only a mere fraction of the painting has been done that there is to do. Just because the summer season is on is no reason at all why dealers should push their paint stock into the background and forget all about it. The live ones are not doing that at all. Now that the first rush of business is beginning to slow up they are going right out after more. Many of them have realized just what a tremendous amount of painting there is to be done and how little of it has been done. They have caught the vision of the possibilities of paint selling and are planning to make it an "all year" line.

Keep It Before Them

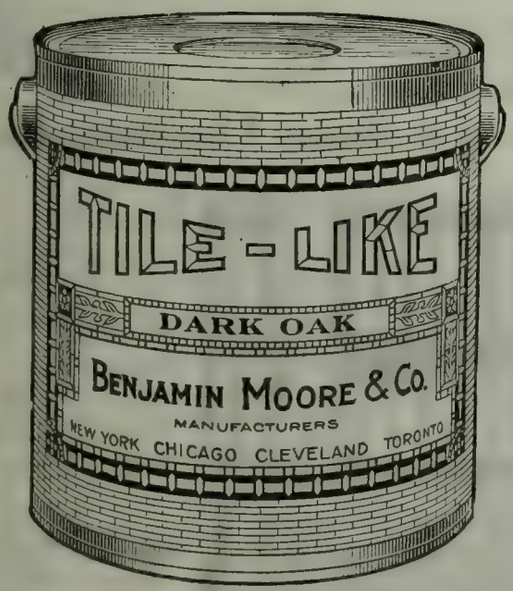
One of the best ways of doing this is to keep the goods before the public. Don't for one minute give them a chance to forget that it pays, and pays well to protect property with paint, that there is an enormous lot of property that has not yet been given its protecting coats of paint, and that the summer time is the ideal time in which to do the work. Timely advertisements backed by good window displays, and good store displays will help a whole lot in maintaining paint sales all through the summer and fall. Aim to keep your paint stock moving all the time. It means a little work, but it is not difficult, and it will pay well. Keep on talking paint right along and have your sales force do the same thing. Work for more paint sales every day and you will surely get them.

A lot of people who talked to you about painting earlier in the season put off the work for one reason or another. Now is the time to get busy and follow these people. Get right after them and find out all about what they will need. Even if they reside out in the country give them a call by telephone and you will be surprised how much business you can round up. Don't forget your printed matter and the matter supplied by the manufacturers. Every parcel that goes out of your store, and every bill that is mailed can carry its "paint message" if you will simply go to the trouble to enclose the matter. It is surprising the results some firms obtain by closely working along this line.

Others Make Calls

Others keep their men going out through the country calling on farmers and others. Owing to the unprecedented hot weather many of the farmers have been so busy looking after their crops and keeping up with their farm work that they have had to put off a lot of painting they had planned. It has been a wonderful season for the paint sellers,

Continued on page 70



Retailers are employing the window as a means of developing paint sales. It is a good medium too, that is successful.

Tile-Like Finish

"Save the surface and you save all" *Paint & Varnish*

A Varnish and Stain Combined

Put up in large and small size cans.

For use on hard or soft wood floors, old furniture, wicker furniture, porch chairs, linoleum or oilcloth, etc.

Tile-Like is the greatest renovator of old furniture you can sell in your store. Makes everything look like new.

For beautiful effects and great durable wearing qualities recommend Tile-Like. It's sold at a reasonable price and there are splendid profits in it for the dealer.

Write to-day for our agency proposition. It will put you in touch with a line of Paint and Varnish products that are being recognized by the public as the **"best money value"** on the Canadian market to-day.

Toronto **Halifax** **Winnipeg**

The Brush Department

Knowing Brushes a Material Aid in Effecting Sales

TO effectively sell the higher grades of brushes, a very necessary policy, as has been said, especially to painters, knowledge of how the article is made is advantageous, as this knowledge given to a customer always makes the article under consideration of more interest as well as the value more apparent. Where more and better bristles are used, greater care to give the brush proper balance, so that working with it will be easier, a better finish, of how the bristles are held, and many little touches that add to its value, these things should be pointed out. Let your customer know you are selling them brush service and not only a brush, and you will be surprised at the ease you will sell the higher priced lines.

Always keep your paint brushes near your paint stock, and always remember to suggest, not one brush, but several when you sell paint. A sash tool, a paint brush, and a varnish brush, are nearly always required and an effort to sell one of each of these lines should always be made. And when the sale is made, advise your customer how to care for them—he will appreciate this service.

Nearly every town, your town, no doubt, after four years of war, requires painting. By having your brush and paint department kept up to a high standard you are sure to command the attention of prospective buyers of your town.

The foregoing remarks as to display apply principally to painters' brushes, but with scarcely a vacant house in the Dominion and building prospects so bright, do you as a hardware dealer realize the market possibilities offered for the sale of tremendous quantities of household brushes? Every house should have a hair floor broom, which sweeps better and cleaner without raising dust and are incomparably cheaper, as they wear so much longer than a corn broom. In European countries only hair floor brooms are used and the continually increasing use of them in this country is only limited by a little educational effort, as when a house wife gets accustomed to one she rarely would be without it.

What house is complete without a hair floor broom, a banister brush, a stove brush, a shoe brush, a scrub brush, a saucepan brush, a window brush, a nail brush, a vegetable brush, a flue brush, and others? House cleanliness demands all these, as well as others. As in paint brushes, sales of household brushes are stimulated and increased many fold by display. One way to do this is to use wire trays on counters or tables with one line of brush in each tray, several trays for each class of brush, covering price ranges. It is always advisable to have a price ticket. Make your display big enough and attractive enough to arrest your customers' attention. "That's just what I want," you will often hear, and as your sales mount up you will say, "I would not have thought it possible."

TORONTO RETAILERS PICNIC JULY 30

The Toronto Retail Hardware Dealers will hold their fourth annual picnic on Wednesday afternoon and evening, July 30, to Long Branch Park. A special car has been chartered and will leave Sunnyside about 2 p.m., tickets being $1. A full list of sports throughout the day and dancing in the evening are on the programme. It will be a basket picnic, with hot water and dishes being supplied by those in charge of the park. An invitation is being sent to all manufacturers and jobbers to send a representative and a big day is looked for.

A PRESENTATION

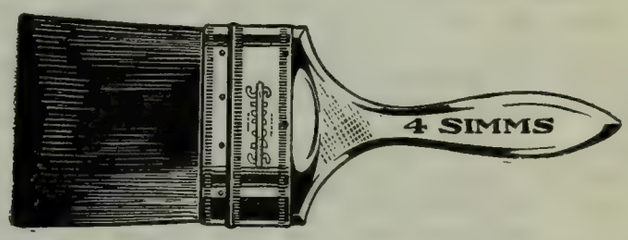
A very pleasant event took place at the Russill Hardware Co. last Saturday, June 28, when Chas. G. McMillan, on the occasion of his severing his connection with the firm, was presented by the members of the staff with a very handsome gold-headed cane, suitably engraved, and also by the firm with a substantial token of their recognition of his long and valuable services and the pleasant relations that had always existed between them. Mr. McMillan made a suitable acknowledgment.

How One Souris, Man., Merchant Displays Brushes

Most paint salesmen who visit the town of Souris are at once attracted on entering the store of F. & J. Field by a display of brushes in a small show case standing 50 inches high and measuring 40 inches in front by 26 inches deep. These salesmen are surprised to learn that the show case was manufactured during the winter months by one of the clerks in the store, assisted by the tinsmiths who fitted the drawers in the rear with a great number of metal compartments for all sizes of brushes. Altogether from 400 to 600 brushes are kept in this cabinet which is all the stock. As will be observed by the picture the show case is one of the prominent fixtures in the paint department, and as a "silent salesman" it has long since proven its worth. The paint department is at the front of the store.

Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.



TRADE SIMMS SET IN RUBBER MARK

This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever — they are absolutely guaranteed **never** to come out.

Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.

Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

KEEP UP THE BIG DRIVE

Continued from page 66

but it is going to be a wonderful year for the farmers and at the prices they have been getting right along they are going to be enormous buyers. Their purchases will include a lot of paint, and they can be made to buy a lot more if they are gone after in the right way. There is no excuse for them now. They cannot talk high prices because no one has been getting any higher prices than they have. There is no question either about the great amount of work to be done.

All Need Painting

All over the country there are barns that cost a lot of money to build and have not been given any paint for perhaps four or five years. Every one of these is a real prospect. Any number of homes and interiors of homes have been let stand, not always because the farmer did not want to do the work, but because he has been so busy and so short of help that he has been unable to get at it. Now with the boys back from Europe and things straightened away nicely, and with lots of money coming in, he is in a mood to listen to all kinds of practical suggestions about painting his home and fixing things up generally. And when you are talking to him about his buildings, don't ever forget for one moment that he has a lot of costly farm implements, and that paint can be applied to them, and that it will render real service and result in an actual saving of the equipment that has a measurable value in dollars and cents.

Get Good Results

Many dealers have obtained most excellent results by going after business in this way and not waiting for it to come to them. They have found that they not only get immediate orders but they get a line of future business and also very frequently obtain orders for various lines of hardware. In addition to the business side of it, work of this kind brings the store into close personal touch with customers. The firm's representative acquires an intimacy with the farmer and his home and his family and general conditions that will stand him in good stead in the future and helps greatly in laying the foundation for future business.

Other Good Business

The manner in which building got under way this spring was a source of great satisfaction in most sections of the country. Now that peace has been signed and all prospects of further disturbance of conditions is removed, there will be even greater developments in construction work. All this means unlimited opportunities for the hardware dealer to sell more paint. Every new home that is erected means the sale of so many gallons of paints and varnishes. Someone has got to get the business, and the dealer who goes after it is very often the party who comes back with the order.

Another possible source of business in your community is the schools and churches. A great many of these buildings are renovated during the summer season, and many hardware men have landed nice orders by getting in touch with those in charge and bringing to their notice the line of paints they handle and giving information regarding the cost and the amount of material required. Service of this kind is appreciated.

Back Up the Goods

One of the complaints that manufacturers make about many dealers is that the dealers are afraid to stand behind the goods. The manufacturers frequently state that a dealer, instead of backing the paint he is selling to the limit, is inclined to express a doubtful attitude when asked what it will do, or else merely state that the manufacturer says it will do this or that. If the dealer is not prepared to talk up the goods he is selling and become enthusiastic about them; it is hardly to be expected that the customer will. There is absolutely no reason, the manufacturers state, why dealers should not boost the goods to the limit. They (the manufacturers) are prepared to stand fully behind the dealer, and the dealer should go the limit.

ANNUAL OUTING OF THE SHERWIN-WILLIAMS CO. OF CANADA, LIMITED

The annual outing of the employees of the Sherwin-Williams organization was held at Lavaltrie. The employees and their families, over 1,000 in number, reached the picnic grounds on the steamer "Three Rivers," which was chartered by the company for the occasion.

Immediately upon arrival at Lavaltrie a baseball match, factories vs. offices, was played, the factories team being victorious by a score of 14 to 12. Luncheon was then served, after which a program of games, consisting of races, tug-of-war, broad jump, weight-throwing contest, etc., wes staged.

An orchestra was in attendance throughout the day, and dancing was indulged in both on the boat and the pavilion on the grounds.

At the conclusion of the day's events the prizes were presented by Mr. W. S. Fallis, managing director of the company, who dwelt upon the loyalty and good feeling that had always characterized the relations of the staff of office and factory alike. He stated that it was the desire of the management to do everything possible to perpetuate this feeling and that it was the intention to see that the treatment of every single employee was founded on the business of a "square deal."

Dutro C. Cale, who was recently elected vice-president of the Certain-teed Products Corporation, leaves shortly on a world tour and will visit Australia, New Zealand, South Africa and other countries with a view to getting export business.

OPPOSE HARRISON BILL

The naval stores section of the Savannah Board of Trade has placed itself on record as opposed to the enactment of the Harrison naval stores bill.

Complying with the request of the naval stores section, the directors of the Board of Trade considered the bill and also opposed its passage, stating in a telegram to Georgia senators that they favored legislation to standardize grades and to prevent fraudulent practices in trade, but were opposed to centralization of power in the hands of the Secretary of Agriculture, as proposed by the Harrison bill. In a letter to the senators following the telegraphed resolutions it was stated that the directors believed that "The fixing of grades and the prevention of frauds could be accomplished in a much simpler and far less dangerous manner by a very brief rider attached to the agricultural bill, something similar to the legislation under which the Secretary of Agriculture fixes grades of cotton." The naval stores trade would not like to feel that it was practically in the hands and under the control of some Federal officer in Washington, as it feels would be the effect of the Harrison bill," said the directors.

ACTIVITY OF BIRMINGHAM SMALL-ARMS TRADE

Commenting on the local gun trade, particularly the outlook for the revolver and pistol branch, the Birmingham "Post" recently stated that large orders are being received from abroad with the prospect of more to follow. Orders for sporting guns are also said to be pouring into Birmingham from all the principal markets of the world. India is well at the fore, and there is a keen demand from Italy and Greece, while the requirements of Africa and Canada have accumulated until they reach large proportions. France, Spain, and other European customers are pressing for deliveries, and the United States, despite its extensive home production, is said to be eager to get Birmingham specialties.

It is anticipated that a greatly increased production will materialize in the near future. Birmingham manufacturers have cleared their Government contracts, and reorganization of production for the civil trade is being contemplated. It is considered a good augury for the revitalizing of the Birmingham gun trade that the leading firm of military rifle makers is taking part in a co-operative scheme of production. This, it is expected, will insure development of the trade on that side where international competition is most formidable—in the cheap breech-loading shotgun.

With regard to tubes, for which the Birmingham trade relied so largely on foreign sources before the war, it is stated that arrangements will assure local gunmakers of regular supplies of all the tubes they want.

The Painters' Good Word

THE painters' cordial endorsement of the merit of Berry Brothers' Varnishes, Enamels and Stains is one of the reasons why they are so favorably known and easy to sell. Sixty-one years' adherence to fixed quality standards has established the confidence of varnish buyers in all "Berry" products.

No varnish stock is complete without Berry brands, and it pays to push them because there is a permanent and increasing demand for them.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 3.—On Wednesday of this week flax prices again scored, and the advance of 50c per bushel made the new high record of $5.45. This means that linseed oil, figured on the usual basis, is actually worth, on the spot market conditions, about $2.75 per gallon. The situation is strong, and this is made the stronger with seed supplies likely to remain small. The turpentine situation has been a little easier in the South, but is still quite firm here. As with oil, quotations are strictly nominal, some not quoting on either product. White lead in oil and putty are firm and steady, and prepared paints are very strong and active. The conditions are particularly good.

Strictly Nominal Linseed Oil Prices

Montreal.

LINSEED OIL.—The markets this week are harder to define than ever, and with most jobbers not quoting, prices are altogether of a nominal character. The flaxseed market is soaring greatly, and a jump of 50c per bushel was made in flax on Wednesday of this week, the new high being $5.46 per bushel. Spot seed is very scarce, and yet crushers state that they are getting small supplies forward from day to day and that they are endeavoring to take care of regular business. The outlook is for very high oil, and at present it looks as though $2.60 to $2.75 will be the quotable price within a week. The lowest and only quotation this week is $2.55, and this is not likely to obtain throughout the week.

Raw—	Imp. Gal.
1 to 4 barrels	$2 55
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$ 257½
5 to 9 barrels	....
10 to 25 barrels	....

Turpentine Short; Makes Price Range

Montreal

TURPENTINE.—In view of the difficulties experienced in getting supplies of turpentine regularly, the basis is really nominal. There has been an easier feeling, and tendency in the South during the past few days, but locally conditions are not so easy. Quotations range from $1.40 per gallon to $1.70. Demand has somewhat lessened and this may have a welcome result in helping toward a slightly better supply.

Turpentine—	Imp. Gal.	
1 to 4 barrels	$1 40	$1 55
Small lots	....	....
(Packages extra.)		

Putty is Steady; Selling Continues

Montreal.

PUTTY.—A continued demand exists for putty from the trade, for such quantities as are required at this season of the year. The undertone is very firm, but there are no price changes in addition to that made last week for pure linseed oil putty. If the oil market advances more, however, it is not improbable that there will be an increase soon for ordinary putty.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60

3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs advance on above prices.

Terms—2%, 15 days, net 60.

Sales Still Good; White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Marketing of white lead in oil continues on a satisfactory basis. There has been a big outturn by the corroders, and the tendency of the market is steadily firm. Prices are bound to be held fully as high as those obtaining to-day, the corroders state, and there will probably continue to be a strong demand. Five-ton lots are selling at $15 50 per 100 pounds; ton lots at $16, and smaller quantities at $16.35.

Big Repeat Sales For Mixed Paints

Montreal.

MIXED PAINTS.—From all reports, 1919 will present an excellent record in paint selling circles. The demands have been large and these are continuing heavy. Manufacturers have planned to take care of their customers well, and to this end have made prompt shipments where transportation could be regularly secured. Many have worked overtime to fill the trade's requirements with the minimum of delay. There is much strength of undertone. Two weeks ago, when changes were made, it was not expected that linseed oil would pass the $2.50 per gallon mark. With flax well over the $5 mark the situation is different. The prepared paint market is stronger than ever.

TORONTO

TORONTO, July 3.—A sensational advance of 68 cents in the price of flax seed in two days has shot linseed prices up until the range of quotations to-day is from $2.75 to $2.90, with every indication of a further advance. Turpentine has been decidedly easier and the market shows a tendency to decline still further. The rosin market is steady. In some quarters it is stated that further advances in paint prices would cause no surprise. If an increase is made it is stated that it will include all lines. Some of the manufacturers, it is stated, do not think that the advances made recently in a few lines were sufficient to meet conditions.

Linseed Oil Prices Smashing All Records

Toron'o

LINSEED OIL.—All previous records have been smashed by the present prices of flax seed and linseed oil and the tendency is towards even higher levels. Reports that owing to the hot dry weather the flax crop in the South-western States is a failure has caused a sensational advance in flax seed prices. On Saturday it was quoted at $4.92 and to-day had jumped to $5.60. This is one of the biggest jumps on record. Crushers are now beginning to wonder if there will be enough flax seed to go around until the new crops come in. The American markets are reported bare. From Saskatchewan come reports of a very light crop owing to unfavorable weather conditions. Other reports regarding flaxseed from the West are not reassuring. Added to these conditions is another factor. With the signing of peace Germany comes into the market, and according to reports large shipments have already been made from England to Germany. In the meantime, European buyers are getting the big share of all the seed that is being shipped from the Argentine. As a result of conditions that have developed many firms have withdrawn all quotations temporarily. Those who are still quoting state that the market is very strong and will ad-

Build your store on this firm foundation. Brandram's Genuine B.B. White Lead is nearly two centuries old—it has a long and honorable history behind it. In the world competition of all these years Brandram's process is the only survivor of all the Patented White Lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English Paint."

Your guarantee and your customer's satisfac ion lie in that two centuries of history.

Turpentine Declines; Rosin Holds Firmly

Toronto

TURPENTINE—As stated in HARDWARE AND METAL last week the turpentine market is steadily declining and to-day's quotations are ten cents lower than former figures. The market is still weak and further declines are expected. The only factor that may steady prices at the Southern ports, it is stated, will be a resumption of buying from overseas. It is believed, however, that European needs are temporarily filled. England especially is well supplied, not only with actual stocks, but with shipments now en route. No one, however, is looking for the bottom to drop out of the market, as the crop is not heavy and as soon as prices are stabilized a little from the recent new high records a good volume of home business is expected to offer. This year's crop will not, it is stated, be any larger than that of last year. Prices are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 55
2 to 5 barrels (barrel included)	1 54
5 gallon lots	1 65

Paint Manufacturers Still Very Busy

Toronto.

MIXED PAINTS.—Further advances in paint prices are not at all unlikely, it is stated. Some of the paint firms are of the opinion that the advance made recently of 25 cents a gallon in oil paints was not sufficient to meet present day conditions, high production costs and record prices of linseed oil. If another advance is made, it is stated that all lines will be affected. No changes are shown beyond those mentioned in last week's issue of HARDWARE AND METAL.

Window Glass May Advance 10 Per Cent.

Toronto.

GLASS, PUTTY.—While no changes have been made yet in window glass prices a revision upwards is expected shortly and it is stated that the new figures will be at least ten per cent. higher than present quotations. A fair volume of business is offering. Putty prices show no changes from the revisions reported last week. Prices are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 50

Pure putty advance $2.50 per 100 lbs. over above.

White Lead in Oil May Advance Shortly

Toronto.

WHITE LEAD IN OIL.—Just what effect the recent heavy advances in linseed oil will have on white lead in oil remain to be seen, but higher prices are looked for. A good volume of business is being handled. Quotations are as follows: 5 ton lots, $15.85 per 100 pounds; one ton lots, $16.35; and in smaller quantities, $16.70.

Retailers Strongly Supporting Move to Eliminate Unfair Advertising

Merchants Are Much More Alert Than Manufacturers and Jobbers, Says Bulletin Issued by the Associated Advertising Clubs of the World

SOME manufacturers who so often complain that the retailer is behind times in movements for the improvement of business methods may be greatly surprised, says a bulletin from the Associated Advertising Clubs of the World, to learn that retailers are, on the average, very much more alert than manufacturers and jobbers in their interest in the elimination of unfair advertising and other unfair practices in selling, such as are dealt with by the National Vigilance Committee of the Associated Advertising Clubs, and by the local vigilance committees of advertising clubs affiliated with the A.A.C. of W.

Support The Movement

"Perhaps there could be no better indication of the interest of local advertisers," says a bulletin from the Associated Advertising Clubs, "than the way the retailers contribute toward the support of the truth in advertising movement. Some local stores contribute $1,000 or more a year toward local better business bureau work, and a large number are paying more than $250 a year. One store pays $1,300, and says it is getting its money's worth.

"When the Better Business Commission of Toledo was recently organized," continues the bulletin, "there were eleven subscriptions of $300 each from local business men, while the local Chamber of Commerce signed up at $1,000 a year. In Cleveland, Indianapolis, Detroit, and in numerous other cities, payments of $250 a year and more are not unusual.

"These figures are cited," says the bulletin, "to show that the local retailer is very much interested in better advertising, and that he proposes to see the movement go forward. In the meantime, some of these stores which are investing considerable sums in local vigilance work are paying considerable sums toward the general work of the Associated Advertising Clubs of the World. One store which pays more than $1,000 locally is paying $200 a year as a member of the general movement, another which pays $300 locally pays $100 to the general cause, etc.

"While the retailers may be slow in some things, they have not been slow at all in their support of the movement for truthful advertising and for the elimination of unfair selling competition."

NO BIG DROP IN PRICES SCHEDULED

One of the chief reasons for high price levels is the presence of gold in abnormal quantities. Prior to the outbreak of the European war the United States was carrying a normal stock of approximately $1,900,000,000. The demands of war brought additional gold to our shores so that now we have over three billion dollars of gold money, over two billion of which is in the Federal Reserve Banks.

Is there any immediate prospect of the gold leaving our shores? Figure it out for yourself.

Gold moves back and forth between countries in response to international trade conditions, to settle international trade and other financial balances. For a number of years to come vast sums of money will be due and payable in the United States in interest and principal on war loans made to foreign countries. These loans have amounted to $10,000,000,000, and the annual interest will approximate $400,000,000. This will have a strong tendency to keep our gold at home; indeed, unless checked by counter moves, as in a wholesale investment of our foreign credit moneys in the securities of these debtor countries, more gold is likely to come this way. In addition to this, the trade balances between all European countries are sure to be immensely in favor of the United States and for some years to come, for Europe must look to us to repair, in a large measure, the ravages of war, and our exports are sure to be vastly in advance of our imports.

The logical conclusion, then, cannot fail to be that our gold, our abnormal gold, will remain in our hands; stimulating credits, business and prompting high price levels.—*Forbes' Magazine.*

ADDITION TO HALF-HOLIDAY LIST ONTARIO

SPECIALISTS

Some doctors are just doctors. Some doctors are specialists. Did you ever go to a doctor who prescribed for you, and the beastly stuff cost you $3.00, and after shaking and taking you felt worse? Another visit and the doctor said: "We will try something else"—another $3.00 and results as before.

One visit to a specialist who can diagnose your case correctly and prescribe what is necessary and all is well.

There are doctors and specialists in every business. A Specialist in white metal alloys never needs to experiment with his customer. All experimenting has been done long ago and that is why we

THE CANADA METAL CO., LTD., ARE SPECIALISTS.

All experiments are conducted by our own chemists in our own laboratories, and whether you are interested in

BABBITT METALS—SOLDER—SHEET LEAD—LEAD PIPE

or any other white metal alloy, you cannot do better than get in touch with us. You will never be advised to "try something else." You will get exactly what you want the first time.

THE CANADA METAL CO., LIMITED

Hamilton Montreal TORONTO Winnipeg Vancouver

Vacation Time is Bicycle Time

In the country, on the seashore or at home, a vacation is not complete without a bicycle.

Many people need only a reminder to see their need and purchase.

During vacation the money needed to buy a bicycle can often be earned. Just try getting a bunch of boys working on this.

C·C·M· Bicycles

The Principal C.C.M. nameplates are:

Massey
Gendron
Columbia
Ivanhoe
Perfect
Cleveland
Brantford
Red Bird

are well made and well known, so they sell readily and build up good-will.

For agencies open, prices and full particulars, write head office or nearest branch.

Helping you sell more Munro's Pure Paris Green

The First Line of Defence

A plentiful supply of ammunition is the first line of defence against the enemy. When waging war against the Potato Bug army, make sure that your first line of defence is impregnable by using Munro's Pure Paris Green—the only ammunition you'll need. When the first Potato Bug appears spray the plants with a liquid solution of this old reliable Killer, and the enemy will be destroyed and your potato crop saved.

MUNRO'S PURE PARIS GREEN

is a fine fluffy rich green powder made to Government standard. It has been killing potato bugs for years, and this year will kill more than ever, because more people will use this old standby to make sure of getting a good crop of potatoes. Be sure you get Munro's from your Hardware, Drug, Grocery and General Store.

Manufactured by

McARTHUR, IRWIN, LIMITED MONTREAL

The potato bug's deadliest foe

GET after Mr Potato Bug early and often with Munro's Pure Paris Green. It is the most efficient bug exterminator on the market. Sprayed on thoroughly it rids your plants of the pest and permits the development of bigger and better potatoes.

Munro's Pure Paris Green
(GOVERNMENT STANDARD)

is a fine, fluffy powder that sprays out evenly, covers thoroughly and adheres to the foliage without scorching it. It has better "killing records" than any other insecticide and is much the cheapest, judged by results. At hardware, drug, grocery and general stores.

Make sure you get the genuine Munro's Pure Paris Green manufactured by

McARTHUR, IRWIN, LIMITED
MONTREAL

Don't Let Him Sneak Up on You

Old Potato Bug doesn't blow a horn to let you know he is coming. Just when your potato plants are shooting out tender green leaves this deadly destroyer sneaks in and begins to chew them up. Have a hot reception all ready for the pest by spraying plants with

MUNRO'S PURE PARIS GREEN

It is the good old killer that always does the job right. Spray early and as often as required and your Potato plants will be impervious to attack.

Munro's Pure Paris Green is made to conform to Government standard. It is a fine fluffy rich green powder which mixes evenly in water. Ask for it by name at all stores where garden supplies are sold.

Manufactured by

McARTHUR, IRWIN, LIMITED
MONTREAL

Get a Bigger Potato Crop

Authorities will tell you that spraying is as important as plowing and cultivating. Spraying saves your crop of healthy, full-sized potatoes that will command top-notch prices.

The well-timed use of

MUNRO'S PURE PARIS GREEN

will keep your plants free of bugs and give Nature the chance she asks to produce good sound tubers, and lots of them.

Don't experiment with new-fangled "bug powders." Use the old reliable Munro's Pure Paris Green, that is sure and deadly in its action and never harms the plants.

Ask for Munro's by name, and make sure you get it. At hardware, drug, grocery and general stores.

Manufactured by

McARTHUR, IRWIN, LIMITED
MONTREAL

A CAREFULLY selected list of one hundred and ninety-three newspapers and ten magazines is carrying these advertisements. Destruction to potato bugs is being preached broadcast and there can be only one result—increased sales of Munro's Pure Paris Green.

But—increased sales will come only to those dealers who are prepared to handle them. Is your stock adequate?

Order through your jobber or direct.

SHARPLES

PIONEER IN 1884
LEADER IN 1919

The above is more than the picture of the oldest and largest separator works in North America. It is convincing evidence, expressed in bricks, machines and men, of the support given Sharples by the dairymen of the world.

Back in 1884, P. M. Sharples, a machinist at West Chester, Pa., began studying the problems of dairymen. Quickly realizing, through actual experience, that foreign separators were inefficient, he invented the first American separator. Not only is Sharples the pioneer North American separator, but every notable improvement in separator construction has been a Sharples achievement. The Sharples Suction-feed Separator is to-day the only separator that skims clean at any speed —and has no discs in the bowl.

Sharples Milker—the only milker with a positive squeeze—is another Sharples pioneer achievement.

Now, Here's what the above means to you

Through a Sharples Dealer Contract, you can take advantage of the Sharples 35 years of goodwill; the Sharples pioneering; the Sharples 100% Americanism; the Sharples mechanical supremacy. But the Sharples Contract is not being "hawked" around—we only want dealers who measure up to the Sharples standard. For such dealers there are opportunities now that may not be available in six months—as the Sharples Contract is naturally being eagerly sought after.

Correspondence invited from progressive dealers

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

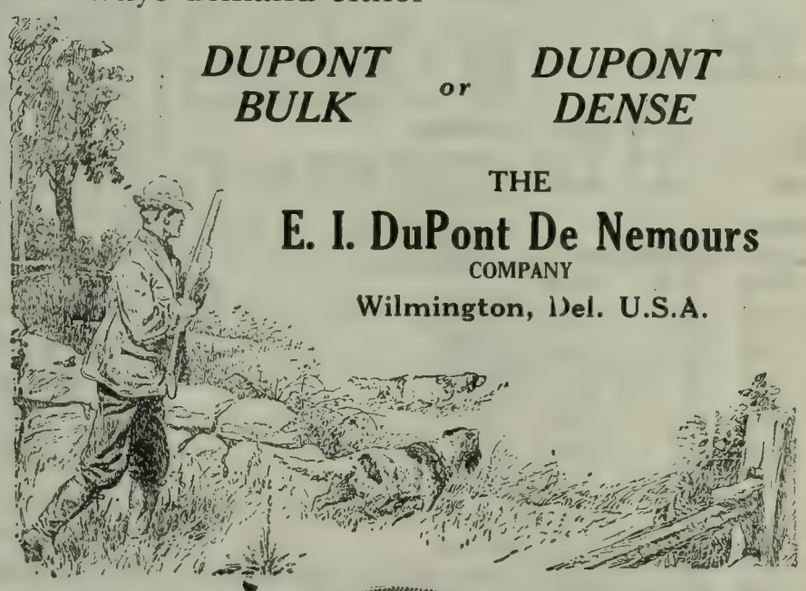
If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.



DU PONT CANADIAN INDUSTRIES

Skilled Shooters Choose "DUPONT" Loads

Trapshooters are particular people when it comes to choosing loads for their pet shotguns. Each and every one of them has championship aspirations and to that end they are mighty careful to choose "Dupont" loads, at all times.

High velocity, perfect patterns and absolute dependability are features of all "Dupont" loads. Good shooters know these points of excellence and always demand either

Stephen House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

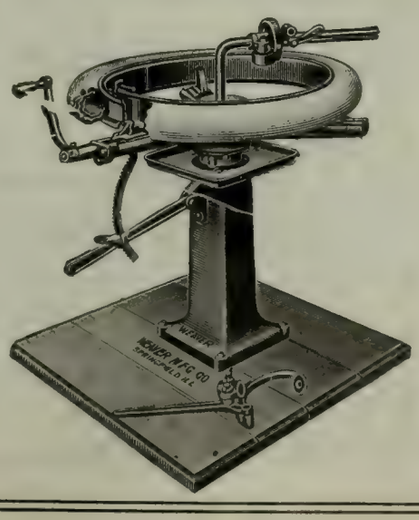
IF IT'S STEEL OR IRON WE HAVE IT

The MANITOBA STEEL & IRON COMPANY.

WINNIPEG, MANITOBA LIMITED

WEAVER GARAGE AND SHOP EQUIPMENT



The requirements of the garage and repair shop have been carefully studied and diagnosed by the manufacturers of this line with the result that the various difficulties and contingencies that arise in the handling and repairing of automobiles can now be disposed of

Quickly and Economically

and with a minimum of labor.

Each device in this very complete line is an article of real merit and a practical necessity to the garage or repair man.

Ask for a copy of the WEAVER BOOKLET and also a copy of our 1919 ACCESSORY CATALOGUE.

GREAT WEST ELECTRIC CO., LTD.

LAWN AND GARDEN HOSE

Dominion Rubber System Brands Always Give Satisfactory Service

In Dominion Rubber System Hose, every ounce of material and every detail of workmanship must test up to a fixed quality standard—a standard that has proved its worth under the severest tests. It is the result of over half a century of hose-making experience by the oldest and largest rubber organization in Canada.

Dominion Rubber System Lawn and Garden Hose is always sure to give satisfactory service. That is why hardware dealers all over Canada insist on having Dominion Rubber System brands.

If your stock of Lawn and Garden Hose is running low, write or phone the nearest Dominion Rubber System branch. Sorting orders are filled promptly.

ECONOMY TROLLEY ROLLER-BEARING DOOR HANGERS

An Economy Hanger for Every Door

Economy Hangers have

full Cold Rolled Steel Roller Bearings on Cold Rolled Steel Shafts.

All parts are made of Heavy Steel Accurately Machined and are Practically Indestructible.

Economy Hangers run on Economy Heavy Steel Tubular Track.

For Warehouses, Barns, Implement Sheds and Garages.

Economy Hangers, Track and Fixtures are sold by all leading Western Dealers.

Write for Catalogue and Price List of

"The Economy Line"

THE ECONOMY FOUNDRY CO., LTD.

PORTAGE LA PRAIRIE, MAN.

It's Impossible!

So said a man who heard our claims about WINDSOR SOLVENT STAIN. He didn't believe that the stain could be put on over former varnish, penetrating the varnish and the wood itself, **changing the color completely,** from OAK to MAHOGANY, or GREEN, or WALNUT, and **LEAVING THE ORIGINAL SURFACE FINISH.**

WE QUICKLY SHOWED HOW IT IS DONE.

THINK, MR. DEALER, OF THE POSSIBILITIES IN THIS!

DEMONSTRATION is very simple.

If you are not already handling this wonderful line of stains, get in touch with us at once.

PROFIT and MORE TRADE for your Paint Department.

This is only ONE of our many superior lines.

Day and Night—Year In and Year Out

You will find Bowser Gasoline and Lubricating Oil Pumps, serving the motorist everywhere.

From coast to coast, from the northern pines to the southern Gulf, motorists look for Bowser Stored Gasoline and Oils.

Dealers everywhere enjoy the convenience, safety and saving afforded by Bowser underground storage tanks and self-measuring pumps.

Bowser Outfits

Give Years of Continuous Service

with no up-keep cost. They store gasoline and oils with safety and without loss.

You will have a Bowser some day, so Why Not Now and get your share of the business in your community.

Send your name and address for literature, It will pay you.

MONTREAL

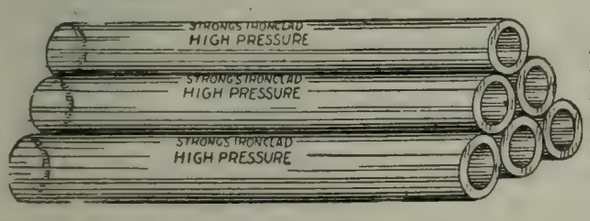
THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.



FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

For months we have looked for the day **The Peace Treaty** would be signed and the event will be marked by thanksgiving and celebrations of various kinds. No celebration will be complete without the **glorious old Union Jack** floating everywhere. Flags are continually wearing out. Stock up for immediate sales and delivery. We have a large stock and our prices are right.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONT.

How About Gauge Glasses?

You get safety for your boilers and your employees when you install

STRONG'S IRONCLAD
HIGH PRESSURE GAUGE GLASSES

The toughest and most durable glass made to-day for high pressure steam. The U.S. Steel Corporation has used **Strong's Ironclad Glasses** for ten years and the greatest industries in the country rely upon them with absolute confidence.
Made with fused ends. Length 1 to 72 inches.

MYERS GIANT TANK PUMPS

For filling thresher tanks and many other uses. Have many late features, are easy to operate and throw an abundance of water with least pumping labor. Compactness and strength for size and weight insure uniform and dependable service.

This is Tank Pump Time — Be sure and sell the MYERS this year. Ask your jobber or write us.

F. E. MYERS & BRO.
Ashland, Ohio.

WHY
Do You Import Bar Iron?

Our goods have a reputation in the Canadian market, thoroughly established for the last eighteen years. And compare in quality with most imported brands, yet are considerably lower in price and close to hand.

You can get quicker delivery from us.

Copy of tests made by Strength of Materials Laboratory (University of Toronto) March 27th, 1918, prove our claims as to quality.

	9-16 Sq.	⅞ Rd.	1 Sq.	1⅜ x ½
Elastic Limit, per sq. in. . .	39.000	33.300	33.000	35.300
Ultimate Strength	54.600	54.300	52.000	50.000
Elongation in 8 in.	25%	27%	29%	26%
Reduction	47%	49%	50%	50%

The Evidence Is There

The big feature of the Stack Gas Water Heater is readily apparent.

Your arguments may be clinched by simply opening up the Heater. Those near perpendicular copper tubes will convince your customers. They can see at once that the water is subjected to intense heat. They will understand how small columns of water will heat quicker than in a large coil. The fact that the *Stack Gas Water Heater* heats water in one minute will make sales for you. You will have no trouble convincing your customers that this is the best heater on the market to-day.

Trade with Gt. Britain

Extract from the "Times," London, May 2nd, of cable sent to Ottawa by Canadian Mission:

"Caradian manufacturers should realize the advantage of having representatives in England, they should not overlook the British market, where a great variety of commodities is needed, and the market is favorably open and worthy of individual effort."

The Opportunity Now Before You.

A director of an influential British firm will be visiting Canada during June and July to buy from Canadan manufacturers, or would act as selling agents throughout Great Britain.

The goods of interest are Enamelled and Aluminum Kitchen Utensils, Domestic Woodware and Household Hardware.

Propositions carefully considered; Please communicate (in confidence) with
SIDNEY S. FREEMAN, (London,) Eng.
National Park Bank, New York.

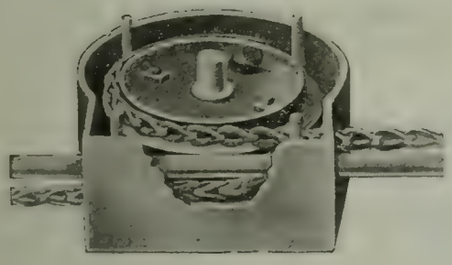
A Peace Time Resolution



to include the NOISELESS washer with your up-to-date, quick-selling lines of household labor-savers will be profitable and satisfactory.

The NOISELESS is the easiest running dolly-type washing machine on the market. There is not a gear, spring, rack, pinion, fly-wheel or piece of intricate mechanism about it. It washes quickly without effort.

So easy a child can operate it.

Also is moderately priced.

Note the NOISELESS in your order book and get them from your jobber or direct from us. Special descriptive folder on request.

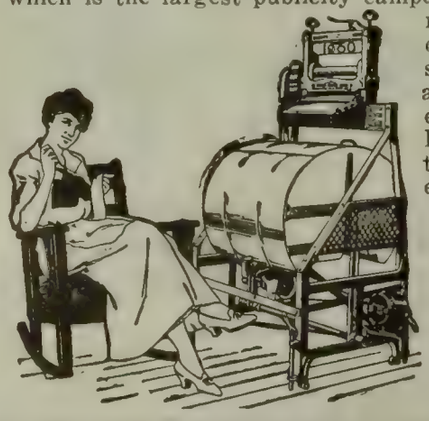
SUPREME AMONG WASHERS



The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.

Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

THE "1900" WASHER COMPANY

Install Laco Lamps In Your Own Store

And Watch Results

You'll make money directly by saving the 50 per cent. longer life they will give you.

You will make money indirectly by the improvement of your store's appearance, and add to its reputation as a Quality store.

Then by your enthusiasm of the Laco performance you will quickly demonstrate to your customers the value of Laco for them — and you'll sell more Laco Lamps.

And you'll not only get volume of sales, but you'll make a good price-protected profit when you handle

LACO LAMPS

Canadian Laco-Philips Co., Limited

MONTREAL TORONTO WINNIPEG VANCOUVER

Fifty Subscriptions from One Firm

THE International Business Machines Company, of which Mr. Frank E. Mutton is vice-president and general manager, subscribed to 10 copies of THE FINANCIAL POST some months ago—these copies to go to their travelling salesmen. Now this company has increased the number of these subscriptions to 50 because the results of the experimental subscriptions have proved so satisfactory.

FRANK E. MUTTON

Mr. Mutton explained that the object of putting THE POST in the hands of the men of his company was to keep them intelligently acquainted with general business conditions in Canada. He said he knew no better paper than THE POST for the purpose. It would seem that his men have responded fully to effort made to keep them well informed about Canadian business affairs—so much so that the management have added 40 other men to the original 10 to receive THE POST.

When Mr. Mutton was with the National Cash Register Company as its Canadian manager, he was the king of all managers in the matter of sales records. In this position he achieved a big reputation built on solid achievements. He learned salesmanship in a school where competition was of the hottest kind, and where the competitors were brilliant men. Giving Mr. Mutton full credit for superior personal qualities and energy of the most ardent kind, it is taking nothing away from him when it is said that not a little of his success was due to his intimate and sympathetic knowledge of the other man's business. And he taught the men associated with him as salesmen to know the point of view and requirements of the men they called on to sell machines to.

As vice-president and general manager of the International Business Machines Company, Mr. Mutton is putting into operation an idea used by him in past days with brilliant results—he is causing his salesmen to know the business and requirements of their prospective customers. To establish points of contact swiftly and surely is one of the open secrets of successful selling.

In the case of **your** solicitations of customers and desired customers, it is excellent strategy to have your salesmen so well informed about business conditions generally, and about the interests of the men they canvass, that they will be able almost instantly to relate their proposals to the interests of the buyer. When a salesman shows himself intimate with the interests or business or objectives of the man whose order he wants, he is immensely strengthened as a salesman, and his percentage of successful canvasses goes steadily up.

Our definite suggestion to you is: Subscribe to THE POST yourself, and learn from its pages how your salesmen or executives can draw power from this newspaper. Then, having acquired the sought-for knowledge, subscribe to THE POST for each man in your service who can profit you by knowing what is in THE POST each week. If Frank Mutton and other prominent executives are making a success of THE POST as a salesman's aid, it is reasonable to suppose that other managers of salesmen and executives can likewise employ THE POST as a producing agent. And so we ask you to sign and forward the coupon below.

The MacLean Publishing Company, Limited,
143-153 University Ave., Toronto.

Send me us THE FINANCIAL POST OF CANADA (weekly). Subscription price of $3 will be remitted on receipt of invoice in the usual way. Have this copy sent to

H.M. .....

Have The Maritimes Had Fair Play?

THE Maritime Provinces did not enter Confederation very willingly and it may surprise people in other parts of the Dominion to learn that at the present time the people of New Brunswick and Nova Scotia are not altogether pleased with the results of the bargain. There is a distinct feeling among them that the advantages of Confederation have gone to the other Provinces. In the course of an article in the July issue of MACLEAN'S MAGAZINE, Thomas M. Fraser explains why this feeling has grown and the basis for it.

This article was written for the purpose of letting the other provinces know that the feeling exists but it will be of intense interest to people in the Maritimes. Be sure to read it—"The Spirit of the Maritimes."

"The Land of National Leaders"

An article on the political aspect of the Eastern Provinces and the achievements of their leading statesmen.

"Guarding Our Coast Line"

An extremely interesting description of the measures that were taken to patrol and guard the Atlantic seaboard during the war.

Bonar Law, the man from the Maritimes, who has been the able lieutenant of Lloyd George at all crises in Great Britain, appears on the cover in a handsome three-color reproduction.

Other Big Features of the Number

"With the Snowball Brigade"

By Captain Louis Keene

Just back from Siberia—Captain Keene tells some sensational and intensely gripping things about conditions in that country which the Canadian forces are helping to stabilize. It is a record of international complications, strange atrocities and almost unbelievable living conditions.

"The Three Tommies"

By Robert W. Service

A war poem of unusual strength.

"Solving the Problem of the Arctic"

By Vilhjalmur Stefansson

The fourth instalment of his remarkable story of the five years he spent in the north for the Canadian Government, appearing exclusively in MACLEAN'S.

Three Magnificent Stories

The best fiction obtainable is found in this issue: "Owners Up," a race horse story by W. A. Fraser; "His Majesty's Well Beloved," by Baroness Orczy; "Bunkered," by Allen C. Shore.

The Review of Reviews

Here are a few of the articles in this splendid department chosen as the best published during the past month in all magazines:

Finding Husbands For Three Million Women.
Will England Become an Agricultural Country?
Germany Can be Prosperous Under the Peace Terms.
The Woman Who Wrecked the World.
The Great Lama Rides in Motor Car.
Strange Personalities at Paris.
Making All Men Equal.
Winning the Secrets of the Desert.

Over 70,000 Canadian Families Buy

MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

JULY ISSUE *Now On Sale At All News Dealers* ***20c.***

If there are no newsdealers in your town, or if your newsdealers cannot supply you, send 20 cents for a sample copy or $2.00 for a whole year's subscription to MACLEAN'S MAGAZINE, 143-153 University Avenue, Toronto, Canada.

Dealer Co-operation is Essential

You can't afford to ignore the dealer—he is the man whose enthusiasm or indifference, knowledge or ignorance can make or mar the success of an advertising campaign.

You can secure the enthusiastic support of the dealers who are selling or should be selling your goods in just one way — by showing them that it will be profitable for them.

Every dealer is in business to make money. He is always figuring on what lines are profitable and what lines are stickers or slackers. He frequently finds that some line moves slowly because he has not been giving it the proper display or attention.

It is money in his pocket to find out

(1) What to stock.

(2) How to sell the goods after he has stocked them.

Usually point (2) comes first. A dealer wants to be assured before he stocks a line that he can sell it.

Now don't take our word for this next statement, but make inquiries from dealers or ask us to send you the proof in the form of unsolicited letters we have received. Here is the point.

Wholesale and retail dealers throughout Canada subscribe for HARDWARE AND METAL to get this information in the news and advertising pages, and many dealers and their clerks tell us that they look through the advertising pages first.

The shrewdest hardware buyers in Canada are regular readers of HARDWARE AND METAL. The shrewdest advertisers in Canada are advertisers in HARDWARE AND METAL—and they get results.

HARDWARE DEALERS

The Trade Mark Name BANNER on Ash Sifters is Your Guarantee.

The No. 2 BANNER is the common-sense, popular-priced ash sifter that your customers will demand shortly. Lay in a stock in good time. It is an A1 ash sifter at a popular price.

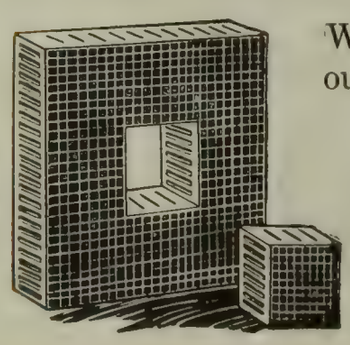
McKINNON RADIATORS

Really Cellular

RADIATORS are made to protect and cool the engine, but their ability to do this job is not the only measurement of efficiency, because durability and readiness of repair also figure very largely in the measurement of radiator efficiency.

McKinnon Radiators measure up to every standard of efficiency, no matter what that standard may be.

They cannot positively clog with sediment because the interior is corrugated to keep the water in constant agitated action. The cells and the air passages are so scientifically proportioned that a strong cooling draught is sucked through the air passages to keep the water cool, so that your engine hits regularly, runs smoothly and does not get over-heated during the summer days.



McKinnon Radiators are simply a combination of indivdiual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core; the very method that hardens the metal and makes it crack so easily.

You dealers and garage men will readily see what a perfect radiator it is, how easy it is to repair by the simple soldering in of new cells.

Over 750,000 of these radiators are in use.

They are now being nationally advertised.

You dealers and garage men should be ready to sell this line, or to make repairs, as accidents will happen to the most careful drivers.

Write us for information—Address your communication to our "General Sales Department."

Lowering The "Overhead"

The percentage of "Overhead" is lowered by the rapid turnover of merchandise.

If you sell brooms, brushes, woodenware and other household supplies, why not consider the buying of another household necessity which, with its demand and frequent sales, would cut down the "overhead" and add to your real profits.

O-Cedar Polish

and O-Cedar Polish Mops are known to the public; the margin is fair; you do not need to stock heavily; the goods are easily obtained from your jobber; therefore, you get small "overhead" and many turnovers which assure you a real profit.

Another big feature of O-Cedar Products is that after a customer is once sold she must buy again as her supply of O-Cedar Polish must be replenished. The repeat sales bring the customer to your store and enable you to sell other goods as well as O-Cedar Products.

Devote a little more effort to O-Cedar Products by displaying them prominently about store or in window—and watch how your efforts are rewarded and your "overhead" lowered.

CHANNELL CHEMICAL CO., LIMITED
TORONTO

HARDWARE AND METAL, July 12th, 1919. Volume XXXI., No. 28. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office

—then comes the time when the cold water bath fails to renew the lustre, the time when the motor knocks on the pull, the time when little things go wrong— That time is right now

This has been a big automobile spring. Not only have there been thousands of cars sold, but there has been, owing to the fine weather, a more general use of the automobile. Then, too, the several street car strikes have brought hundreds of cars into use which had been practically discarded.

Now is the time to keep the cars running by bringing into action the remedies which will temporarily or permanently prevent the laying up of the car for overhauling.

Johnson's Auto Products

will make and keep the car young

RICE LEWIS & SON LIMITED TORONTO HARDWARE ESTD 1847

Johnson's Carbon Remover

Will clean a most stubborn coat of carbon from any engine. Its regular use will keep it clean.

Johnson's Radiator Cement

Stops, as effectively as solder, all leaky spots with one application without even stopping the car.

Johnson's Stop Squeak Oil

The bug-bear of the motorist, squeaks can be eliminated with this most penetrating of all oils.

Johnson's Hastee Patch

Pure rubber patches put up in handy form ready for instant use.

Johnson's Prepared Wax

The finest auto body polish on the market; put up in paste and liquid.

Johnson's Cleaner

When used to clean the car before polishing gives a most luxurious finish.

O-Cedar Polish Mop

(Reg. Can. Pat. Office) (Made in Canada)

"O-Cedar" polish has become so extensively used in polishing automobiles that amongst autoists the name "O'Cedar" is a byword. It is taking a permanent place in the garage as well as in the home.

"O-Cedar" may be used on the car with a regular "O-Cedar" dust cloth, or with cheesecloth. The "O-Cedar" hand duster has a permanent place in many cars.

For the home, the mop, either round or triangle lends itself to the daily dusting. This is dust season. Keep your stock of "O-Cedar" mops and polish complete.

Liquid Veneer

for the home or Auto

"Liquid Veneer" has proven its great worth to the home and garage as a cleaner and polisher of highly finished surfaces. We stock the "Liquid Veneer" Sprayer which is especially recommended for use in applying "Liquid Veneer" evenly to the surface of the car. It makes possible the dry-cleaning of the car when the use of water is impractical or unnecessary.

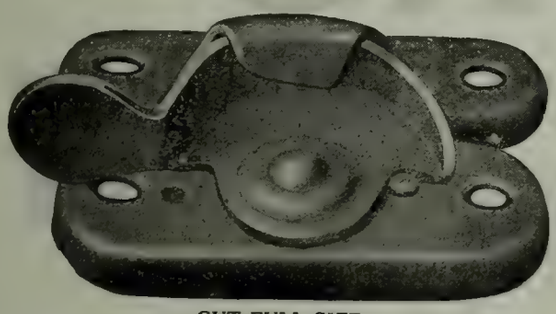
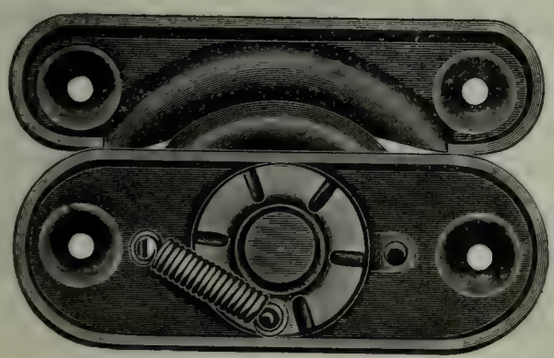
Sash Locks and Cupboard Turns

(All Steel or Solid Brass)



CUT FULL SIZE

With building activities excelling all records of recent years and builders demanding the best you should stock a full assortment of these.



The National range of Sash Locks and Cupboard Turns is a very wide one. They are made up in many attractive designs and finishes.

The sash lock here illustrated is our latest model, and one which we consider to be the best. The lock is made of cold rolled steel throughout, taking an exceptionally fine finish; also furnished in solid brass. Owing to the simple construction of the lock, friction is reduced to the minimum and the rigidity of the lock is retained. You will have no difficulty in selling the No. 600 Sash Lock. Each lock is wrapped in a separate package, complete with screws. Packed one dozen in a box. Seventy-two dozen in a case.

The No. 699 Pressed Steel or Brass Cupboard Turn above illustrated is only one of the many designs for your customer to choose from. These turns are simple in construction and cannot get out of order. Each turn is wrapped in a separate package; complete with screws. Packed one dozen in a box.

Our big catalogue of Builders' Supplies will acquaint you with our profitable lines. Write for it to-day.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

The Big 6-in-1 Tool

That Thousands will Buy---

The Stewart "Handy-Worker"

The pictures tell the story of the Handy-Worker itself. But they give only a hint of its multitude of uses—

On every Farm and Ranch
In every Private Garage
In every small repair shop
In thousands of Home Workshops
In countless other places.

So many need the Handy-Worker RIGHT NOW that you should order a stock and make a "Drive" on them both in town and among farmers.

The fine profit on each sale makes this "Big 6-in-1 Tool" worth pushing.

And the splendid **performance** of the Tool **wherever** it is sold makes each sale a "nest-egg" for several more.

Retail price $27.00, with a handsome margin for dealers.

NUMBER ONE

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

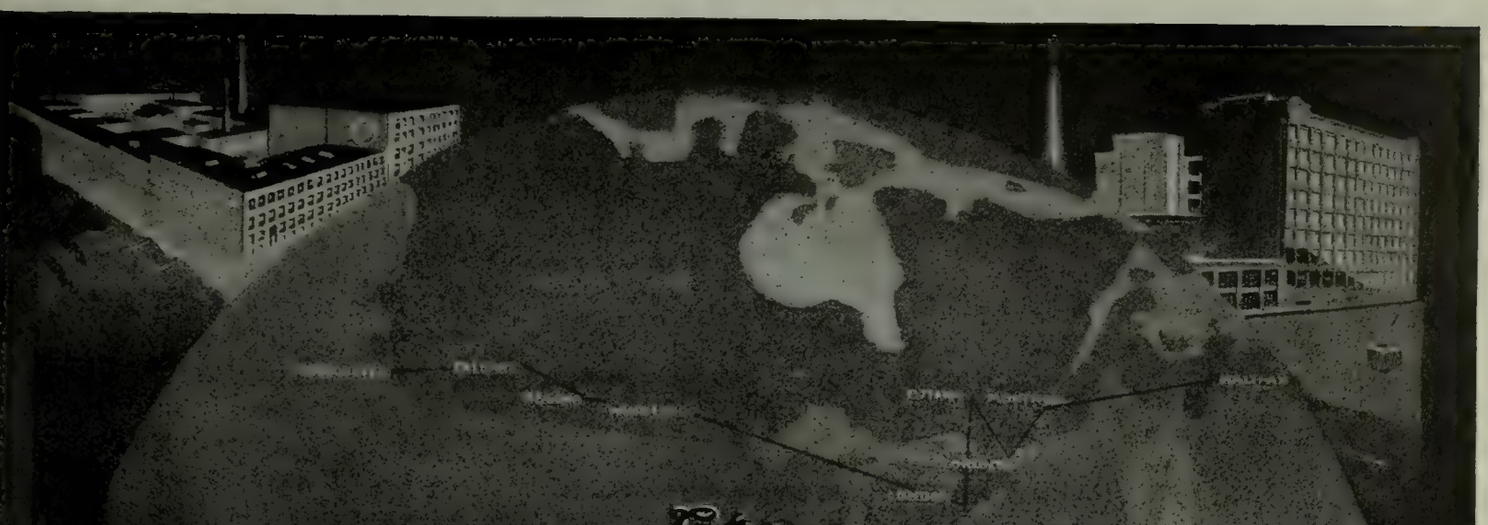
The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.



Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

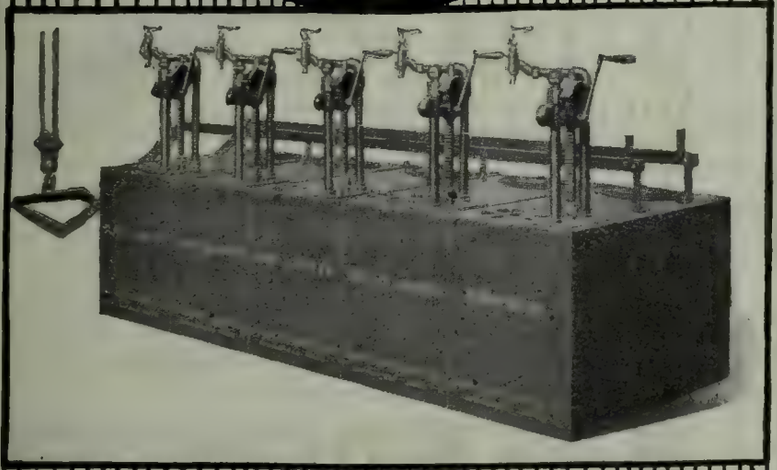
MILLERS FALLS TOOLS



Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner

"ACME" SHEARS AND SCISSORS ARE STANDARD

For Low-Priced Cutlery

Canadian Buyers Can Increase Their Shears and Scissors Sales by Adding Our Numbers to Their Stock.

We are the leading and largest Scissor makers in the world, producing about 35,000 pairs daily.

"ACME" BRANDS, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

Realizing the importance of prompt service to orders, we are now in a position, on account of improved manufacturing facilities, to give all Canadian orders special service.

Our Canadian representative at Toronto will be pleased to show our samples to you, or have his traveller call on you.

We would esteem it a favor to demonstrate through a trial order the excellent goods we furnish and their fast selling ability.

Have you seen our new No. 5 Catalogue? Let us mail one to you.

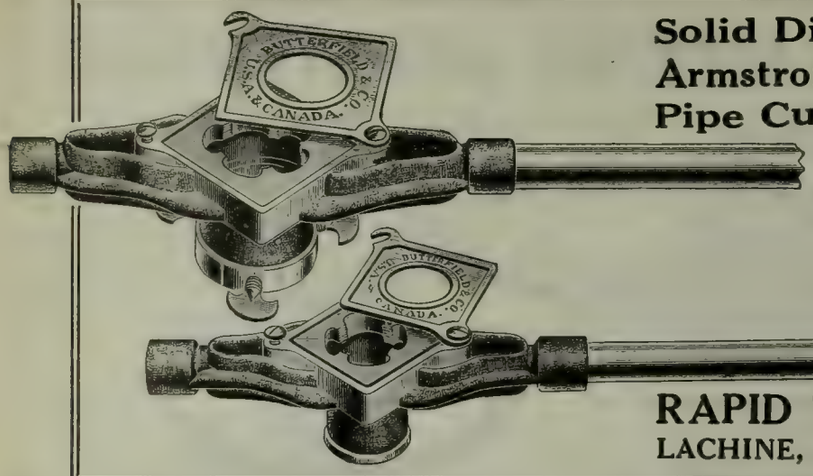
WARD & PAYNES

CELEBRATED LIGHT EDGE TOOLS

THE ANVIL BRAND

Light-Edge Tools

—possess unusual selling qualities



The history of the manufacturing of these tools in England covers a period of one hundred years. The reputation enjoyed by **"W. & P." Light Edge Tools** to-day is conclusive proof of what painstaking efforts must have been put into the making of these high quality tools. As the **Anvil Brand Trade-Mark** is the **"stamp of Quality"** to every tradesman, so it will reflect its reputation upon your store in more business and greater profits that are really worth while. We can now fill all orders with the same prompt, attentive service that has made **"W. & P."** products famous throughout the world. If your jobber cannot supply you, write our nearest representative.

Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weight accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew
HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs. Government Inspector's certificate accompanies every scale.

Write to-day for literature and attractive selling proposition to

Manufacturers—Gloves, Mitts, Moccasins, Shirts, Sheep Lined and Mackinaw Clothing

Introducing

Williams' "Agrippa" Turning-Tool Holders Set Screw Pattern

TO provide increased and abundant variety of selection in Williams' "Agrippa" line of Tool Holders, we offer this Set Screw pattern of Turning-tools primarily for those who use Cutters made of steel which has been hammered or rolled with a greater variation in size than is common to usual mill practice. But for the majority of users who purchase Cutters of accurate size, we recommend the original "Agrippa" Turning-tool of Cam Pattern as being stronger, more reliable and more generally satisfactory than any other method of Cutter-fastening. Both patterns are illustrated above.

The Screws, made of a fine grade of Alloy Steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong and give the maximum efficiency obtainable from this extra type of Cutter-fastening.

Right and Left Hand Offset and Straight Shanks in stock at same prices as Cam Pattern of corresponding size.

Our Machinists' Tools Booklet will be sent on request.

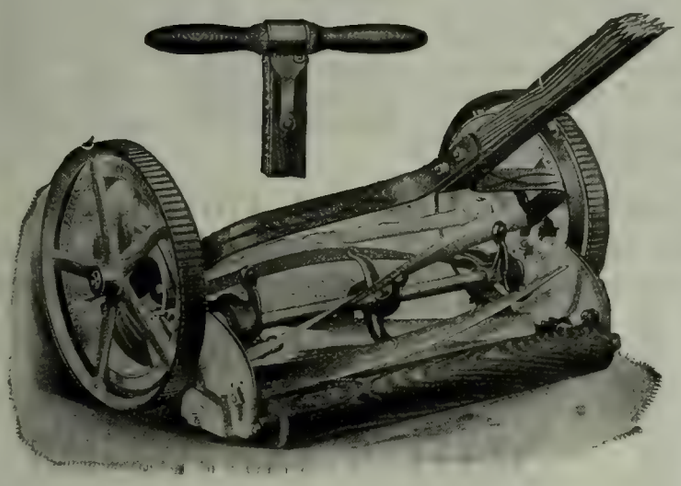
4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.



STRONGER—Actua. tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

There are other "Taylor-Forbes" Lawnmowers besides the little old "Woodyatt"

"EMPRESS" LAWNMOWER

The "Woodyatt" enjoys popular fame. It stands among lawnmowers where the Ford stands among automobiles.

But if you were in the automobile business and you sold only Ford cars you would miss the custom of the man who wanted a limousine.

And you will be missing a lot of lawnmower business unless you have the "Empress" or the "Adanac" to show the man who has an idea "he will go something better."

Ball bearing lawnmowers—they sell just as readily and mean more on the turnover.

On the Free List

BINDER TWINE is on the free list. This means that the Brantford Cordage Company receives *no* tariff protection.

We have always competed for business on a basis of price and quality.

We have thrived on competition. We have increased our output from 80 tons a year to 10,000 tons.

BRANTFORD BINDER TWINE

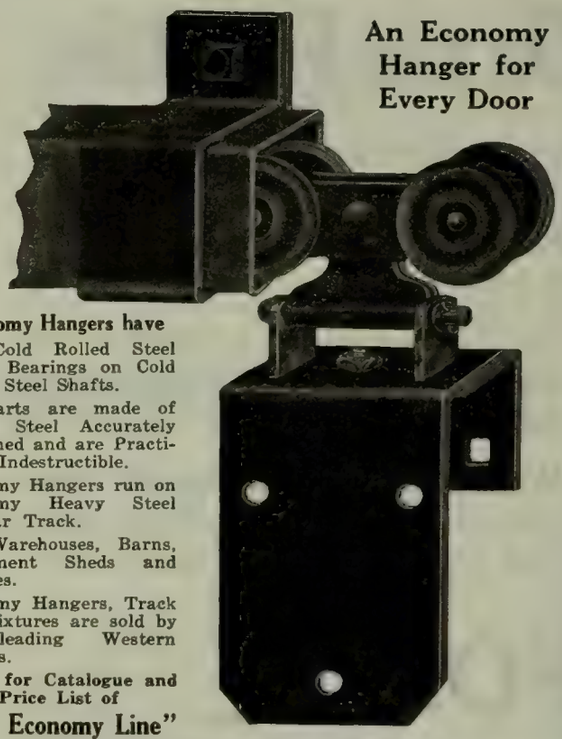
has a world-wide reputation.

Repeat orders running into hundreds of tons are being shipped to Great Britain, Roumania, Greece, Africa, Uruguay, Paraguay, Argentine, etc.

The big buyers of twine in these countries know a good twine when they see it.

Your customers are satisfied with nothing but the best.

You need only show them one of our four brands and let them compare it with other twines. The reputation of our twines is founded on comparisons, because ours are the best.



They are absolutely uniform, made of the longest, cleanest fibres, firmly woven, and are submitted to a special preserving treatment to make them insect-proof.

The Cannon Ball Barn Door

MEHASCO

Hanger was the first Hanger made to run inside its track. The wheels are hollow steel Balls—frictionless, noiseless, tandem, flexible and roller bearing — and absolutely protected from snow, rain and sleet.

For a strong, serviceable Hanger to run outside we heartily recommend the 20th Century. Both these tracks can be conveniently carried under the counter in a hardware store as the Cannon Ball is put up in three-foot ends and the 20th Century in two-foot. This makes it very convenient for the customer to take home in an automobile, buggy, or democrat.

Merchants Hardware Specialties, Ltd.

CALGARY

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

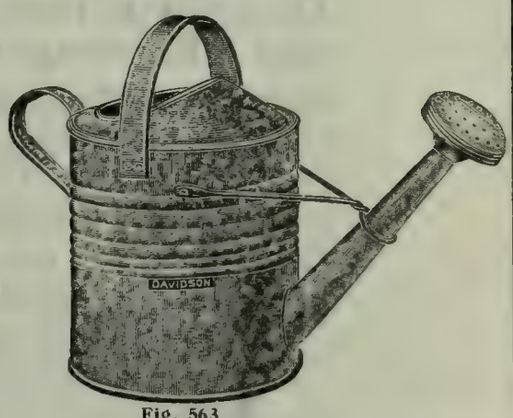
Watering Pots For Midsummer Gardens

Fig. 469

Watering pot Japanned green; strong, well-balanced efficient sprinkler. This quick selling model is equipped with Patent Cleanable Rose.

Gardening Days

In these days when regular gardening is supplemented by backyard and vacant lot cultivation in every available square foot of land, everything for the garden is welcomed by the customers. A first necessity—even for the beginner with a window box—is a watering pot.



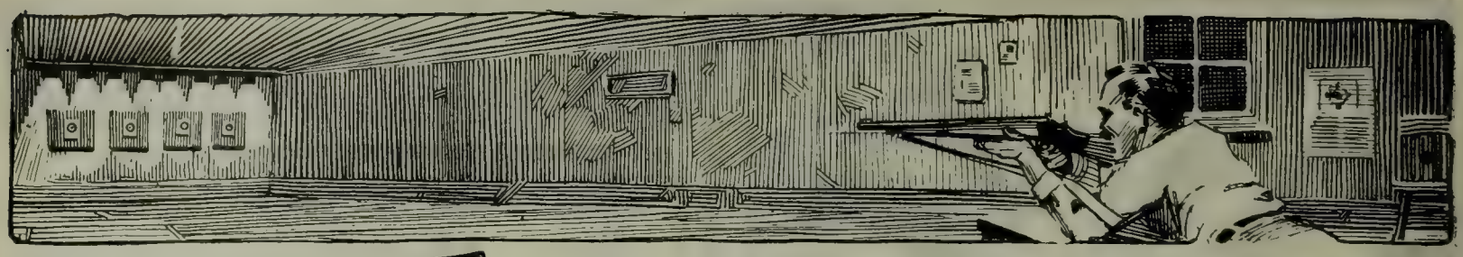


Fig. 563

Galvanized Watering Pot; strong, well-designed, giving a well distributed spray. Patent Cleanable Rose appeals to practical gardeners.

They do not leak easily, being constructed to stand rough usage. The galvanizing process fills all joints.

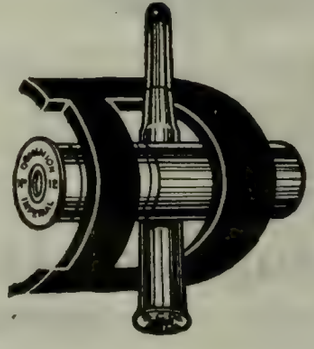
Build Your Sales OF AMMUNITION

DOMINION .22's



Over 6,000 Canadian boys — members of Dominion Marksmen's Club will shoot millions of rounds of Dominion .22's in their competition this year.

Thousands of Canadians have taken up target shooting since the beginning of the war and many more are adopting this interesting sport.

Make this the basis of bigger and more profitable ammunition sales. Encourage the boys. Every target shooter sooner or later becomes an ardent sportsman. They will be the purchasers of Dominion Metallics and shot shells later.

Push your sales of .22's to-day and your ammunition business of to-morrow is assured.

Dominion .22's mean a small investment, a quick turnover and good profits. Order from your jobber to-day the little cartridges backed by the big "D" guarantee of dependability.

"Use Ball Bearing Butts for Permanence"

STANLEY

FEATURES

NON-RISING PIN—A butt pin rises because of its independent circular motion caused when the barrel revolves about it each time the door swings.

In Stanley Ball Bearing Butts two wings are pinched up under the head of the pin. These wings lock into corresponding grooves in the barrel. When the door swings and the barrel revolves the pin moves with it. There is no independent motion on the part of the pin and consequently the pin cannot rise.

This non-rising pin is only one of the many features that have been built into Stanley Ball Bearing Butts in our effort to make them the very best butts you can offer your customers.

Has Enlarged Store Twice in Two Years

W. J. Kerr, of Dundas, Ont., Has Tripled Sales of Auto Accessories—In Future Will Handle Only One Line of Paint Instead of Two—Past Season's Business in Stoves a Record-Breaker

W. J. KERR, of Kerr's Hardware, Dundas, Ont., is in business to get results. There is no such thing, he says, as standing still. A business that isn't going ahead is going backward, not standing still. Mr. Kerr backs up his theory by action. He has enlarged his store twice in two years and is planning to enlarge it again before long, so as to add more lines.

To HARDWARE AND METAL Mr. Kerr stated that he has tripled his sales of auto accessories in three years. He keeps his stock of accessories in one of the most prominent places in the store, just inside the front door and they are neatly and attractively displayed.

Goes After Business

"Our auto accessory sales have grown steadily and are still growing," said Mr. Kerr. "I estimate that two out of three of the farmers in this district have cars now, and the others are getting them. There is a lot of good business to be had in this line and I have found accessories a nice line to handle and easy to sell. Very often car owners, who drop in for accessories, buy a lot of other goods as well." Mr. Kerr handles motor oils and finds these a very active end of the motor accessory business.

This spring Mr. Kerr added bicycles and bicycle accessories to his stock and also electric washers. Since adding the washers he has sold three a month, but expects to greatly increase this record as soon as a number are out, as, he says, he finds that one satisfied customer sends another.

Centering Efforts

After going into the situation carefully, Mr. Kerr decided recently to centre his efforts in paint selling on one line instead of trying to push two. He

This gives an idea as to the location of the paint department and the importance placed on same by being right up at the front of the store. It will be noted that cards outlining position of the various departments are hung in prominent positions, the above photo showing one for "Paints and Varnishes"; "Graniteware and Kitchenware." It will also be noted the use of shelving on the pillars and display tables. The firm of Kerr's Hardware, Dundas, Ont., believe in having goods out where people can see them, and this view of their store is evidence of their attitude in this respect.

believes that he will get much better results in every way. The location of his paint department will remain where it has always been, right up at the front, in one corner of a wide store.

"I find that people are buying paints in larger quantities this season than ever," said Mr. Kerr to HARDWARE AND METAL. "I do not know whether it is because they have a lot of work that has been standing off for some time, or because they cannot get help and have to do the painting themselves, but they are asking for the larger sized cans more than ever. Every time we have a call for paint we endeavor to help the buyer in every way we can by finding out just what kind of work he is planning. We have found out by experience that paint is just paint to most people and that if we did not tell them why one kind is better for certain work than another, they would buy the wrong kind and get results that would not be very satisfactory. We find that they thoroughly appreciate all the pointers we can give them, also about the best ways to do the work and the best brushes to use and so on. Every time we have a paint prospect we try and sell brushes also, and we do sell quite a number."

Keeps in Touch

Mr. Kerr finds that it pays well to keep closely in touch with his customers in the country. He makes frequent trips out through the district around Dundas and goes to church meetings, socials and similar gatherings. In this way he often gets in touch with business and prospects. Very often he hears of people who want new stoves or are planning painting and gets in touch with them quickly and follows up the business.

"Our stove sales in the past season," he said, "were better than ever before. We sold, I should say, twice as many as we did the year before. We frequently trade stoves and find that by doing this we can make a good profit, both on the new one and by selling the old one. Very often we make as much out of the old one as on a new stove."

Put in Full Line

Recently Mr. Kerr put in a full line of crockery goods and says that he finds business growing rapidly.

"We used to carry only a few lines of crockery," he said, "but there were so many people asking for it and for lines other than we carried that we saw an opportunity to go into the business more extensively. We have found that it paid well."

A special crockery section has been arranged in the front of the store. It is displayed on tables, and Mr. Kerr says that he finds this method gets quick results from a sales standpoint.

"By putting the goods out where the people can see them," he said, "we sell a lot of stuff quickly and with a minimum of sales effort. It takes less time because if a clerk is busy waiting on some other customer, the buyer can pick out just what he wants. He sells himself and all the clerk has to do is to wrap up the goods and take the money for it."

Likes Display Tables

Mr. Kerr has a number of display tables and display stands in his store, and says they sell a lot of goods. They are kept changed frequently and are also moved about the store.

Mr. Kerr is loud also in his praise of the results he has had from his window displays. These are also changed regularly, at least once a week, and the goods shown are all priced. Special window display cards are frequently used and with good effect, Mr. Kerr says.

Remember the Goods

"It is curious," said Mr. Kerr, "how people will remember the things they see in a window. We often have people come in perhaps a month or six weeks after a display has been taken out and tell us they want such and such an article that was shown at such a time and at such a price. They have all the details fixed in their minds and can tell us exactly what the article was like. Very often we have practically the same thing happen in reference to goods we have advertised. Somebody will come in and tell us that they remember that we advertised a certain line of goods at a certain price and they want [illegible]. We get good results from our advertising. We vary our space according to the seasons, or according to whether we are offering some specials or not, but we always have a weekly message and we try to keep it interesting and presented attractively. In arranging our advertisements we always try to have several illustrations. People, especially those out in the country, like to see a picture of whatever is offered. We always make a point of giving the prices and giving them plainly.

Mr. Kerr says customers also like prompt service. With this end in view the Kerr Hardware Co. maintains a motor delivery and Mr. Kerr is well satisfied with the results.

"It does away," he said, "with one

A view of the auto accessory department of Kerr's Hardware, Dundas, Ont. A wide range of goods is carried and bicycles also play a prominent part in sales. To the right and directly back of the store windows is shown a fine assortment of cooking ware. Incidentally this is making good display use of space very often overlooked.

extra man, saves a great amount of time, considerable expense, and makes for quick service."

In the past two years the residents of Dundas have joined the thrift movement and the fight against the high cost of living by going in for chick raising. Here again Mr. Kerr saw a chance to increase his turnover and he has been handling a number of incubators and more poultry netting than ever before.

He conducts his business on a basis as near cash as possible. There are some cases in which he finds it necessary to provide for accommodation, but this is limited, and definite arrangements are made for payment within stated times.

"Eighty per cent. of our business is cash," he said.

Sends Out Handbills

Besides his regular newspaper advertising and window displays, Mr. Kerr says he finds it a good plan to send out handbills once a month. Following the distribution of these many sales are made of the lines featured in the bills. A line which has proven an excellent seller, he says, is enamelware. He shows a big variety of stock in this line, and says he has no difficulty in turning it over from three to four times a year.

Auto accessories come in for their share of the window display space of Kerr's Hardware, Dundas, Ont., this being a photograph of a window recently put in. Every effort to increase the effectiveness of the store front is made and keeping seasonable goods, attractively arranged, constantly before the people is proving good business for this firm.

Personal Campaign Helped Dollar Day

Merchants of Paris, Ont., Visited All Villages in a Seven-Mile Radius—Got Into Personal Touch With Hundreds of Prospective Customers—All Past Sales Records Smashed on Dollar Day

DOLLAR Day in Paris, Ont., this year was the kind of a success that is only achieved by well-directed team work, backed by judicious advertising. A good deal of the direction that was responsible for making the day a record breaker originated with the hustling secretary of the Paris Dollar Day Association, Donald Sinclair, hardware merchant. Mr. Sinclair gets enthusiastic when he starts to tell about Dollar Day.

"It was some day," he stated to HARDWARE AND METAL. "Most of us smashed all previous sales records, I guess. The population of Paris is about 4,500, but on Dollar Day the merchants sold more than $18,000 worth of goods. Of course, it wasn't all sold to Paris people. We got together in good time and planned our campaign carefully. Our idea was to draw people from a radius of seven miles around Paris, and we certainly did it.

Let People Know

"We realized that if our campaign was to be the success we wanted it to be," Mr. Sinclair continued, "that we would have to let people know about it. So the merchants sent out circulars on all the rural mail routes, and, in addition, we divided into parties and personally distributed circulars in many of the villages around the country. We got into personal touch with scores of people, and everywhere we talked about Dollar Day in Paris and what a big success it was going to be. Any number of people promised they would be in town to see what we had to offer, and we kept up the enthusiasm we had started by a series of timely advertisements. The results were beyond our greatest expectations and all the merchants were more than satisfied. To make them even more satisfied after the big business that was done we discovered that it only cost us $7 each to cover all expenses, including our advertising. Another good feature we found was that our big sales on Dollar Day did not interfere with regular business."

Keeps Goods Displayed

Mr. Sinclair follows out this idea of letting people know what goods his offering for sale in his own store all the year round. He keeps his windows changed regularly, and seasonable lines are on display all the time. He backs this up by an interior arrangement that is effective. Seasonable goods are kept right up in the front of the store all the time where people cannot help seeing them.

"Nothing like it to get results," said Mr. Sinclair. "If I kept all these things buried away behind the counter or down in the cellar, or some other place, where people could not see them, I would not sell one-quarter of what I do. People would not know I had the things or they wouldn't think about them when they came into the store, because they did not see them and would not buy. My experience is that you cannot keep too great an assortment of goods out where people will see it. It stimulates buying all the time."

Seizes Opportunity

Making the most of opportunities by taking advantage of them quickly has

HOW THEY DID IT

Team work in which all the merchants of Paris, Ont., did their share was a big factor in making their Dollar Day campaign a record.

By calling personally at each home in all the villages for seven miles around their town, they got into the closest possible touch with a large number of prospective buyers.

The Paris, Ont., merchants started right by getting their plans in shape early enough to insure their organization working as smoothly as possible.

When everything was ready they went after business in the most aggressive manner and they backed up their own efforts by an advertising campaign that covered the entire territory they wanted to reach.

They found that when everything was settled up the expense to each merchant, including advertising, etc., was only $7. On Dollar Day in a town of 4,500 people, more than $18,000 worth of goods was sold.

After watching carefully they state that the sales made on Dollar Day did not affect their regular business.

helped Mr. Sinclair in keeping goods turning over. For instance, he has always done a good trade in fishing tackle, because there is some splendid fishing to be had around Paris. But when the Government stocked the river Mr. Sinclair was quick to see that as soon as the ban was lifted there was going to be a splendid chance to sell more fishing tackle and supplies. His guess was a good one and although he was prepared to meet record demands, having laid in a large stock, he had none left and had to get more.

In the same way he has kept pace with the demands of the people in the countryside. There are many prosperous farmers in the district and many of them have been adopting modern improvements. Mr. Sinclair soon let them know that they could get electric fixtures at his store, and also that he handled bathroom fixtures, electric lamps and electric washers.

Gradual Development

While there has been no big rush in these lines, but rather a gradual development, as one satisfied party told another of the benefits of the new lines, it has been a steady growth that has meant a lot of nice business for the hardware dealer. Mr. Sinclair has had to meet mail order competition in these goods and others, but he says he can do it every time and without any trouble. In selling electric washers he nearly always works on the plan of letting any woman who shows that she is really interested take a machine home and try it.

"Once the women get them home," said Mr. Sinclair, "and see just how much time and drudgery a machine will save them, they don't want to part with the machine, and it is rarely that one ever comes back."

Buy Better Goods

Mr. Sinclair has noted a decided tendency on the part of the public in general to buy better goods. He has an explanation for this that may have in it a lot of truth.

"I think there is little doubt that people are buying better things now," he said, "because they have not been able to get a lot of the cheap German goods that flooded our markets before the war. Few people have any idea how much Made-in-Germany goods were sold in Canadian stores before the war. As soon as German goods were off the markets people began to buy the better goods." From the dealer's standpoint there was no doubt about the advantage of selling the better stuff. Personally, many of them had no heart in selling such cheap stuff. After handling the better lines it was soon apparent that there were no comebacks and that the better goods stayed sold and were more satisfactory all the way round from the dealer's standpoint, as well as the buyers.

Sales Were Trebled

Another effect of the war was to treble Mr. Sinclair's sales of poultry netting. In the town of Paris there are a great many working men and the high prices that were being asked for eggs resulted in many of them promptly going into poultry raising on their own account. One told the other of how the cost of living was being reduced in this way and the first thing Mr. Sinclair knew he was doing a thriving trade in netting, incubators and poultry supplies. This was continued.

Favors Cash Trade

While Mr. Sinclair favors doing business on a cash basis, he says it is not always possible to do this under conditions as they exist in his vicinity. He has strong sentiments regarding the matter, however.

"In my opinion," he said, "credit business is a curse of the country. Everybody knows you and tries to take advantage of you because they know you. I think the Government ought to enact legislation which will prohibit the credit business. There are endless small accounts and these eat themselves up in no time in efforts to collect them."

Plumbing Department

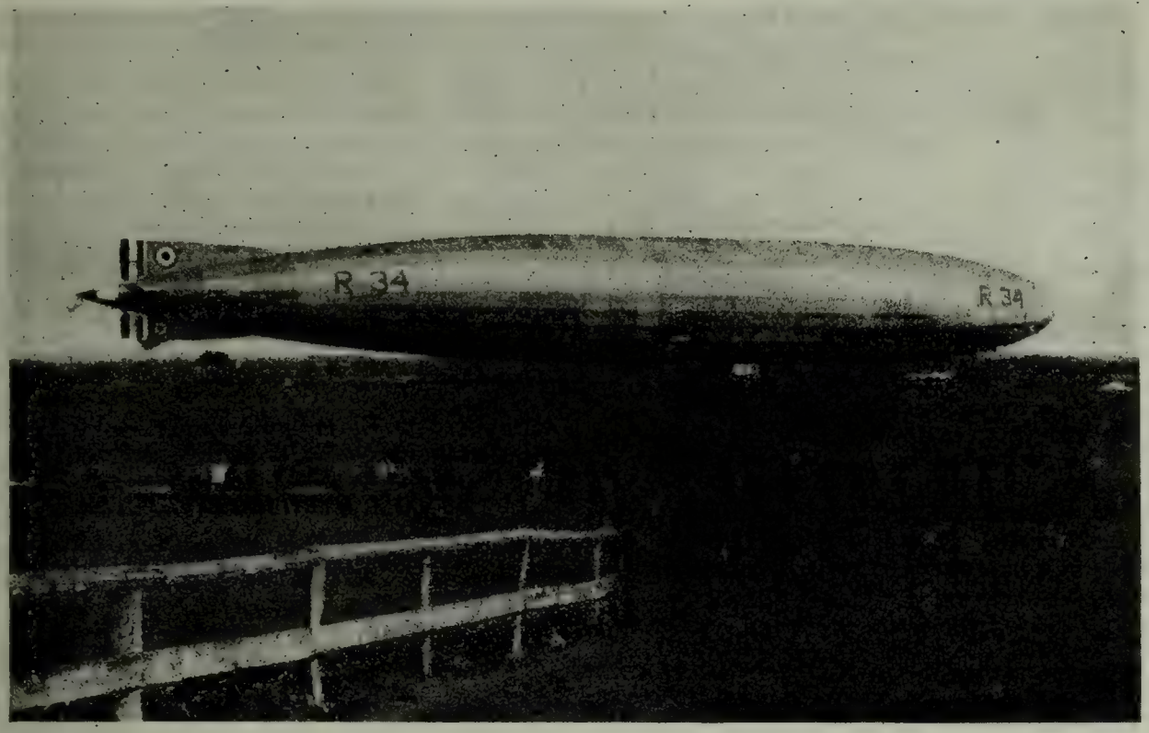
In connection with his hardware Mr. Sinclair maintains a plumbing department, which he finds brings him in touch with people all over the district and results in a lot of business. In this department also he follows out the same ideas that are employed in the hardware, that of going after business aggressively. Another foundation principle is that all work that is done must be of the best. Mr. Sinclair wants no dissatisfied customers either from his hardware store or his plumbing department. With an eye to building for the future, he has always worked along this line, and he says it is the only plan to follow. He has found from experience that no merchant can have a better advertisement than satisfied customers. No matter what they buy from you, if they are satisfied they will talk about your store and your goods and your service to your friends. Mr. Sinclair can trace a lot of business to good words spoken about him by those whom he has pleased. Not only that, he says, but they always come back when they want anything else.

Has Found Good Sale

Mr. Sinclair has done a steady business in the installation of pneumatic water systems, heating systems, bathroom equipment, and other plumbing lines. Now that peace is signed and a lot of much needed home building is going forward, he looks for business to expand steadily. Each year also sees more and more farmers putting modern improvements in their homes. Mr. Sinclair is a salesman and neglects no opportunity when out on a job to size up all the needs of the customer, either hardware or plumbing, and then gets busy with practical suggestions, which

DONALD SINCLAIR SAYS:

Don't be afraid to let people see your stock. Goods that are kept hidden away under the counters, in drawers or down the cellar will not turn over nearly as fast as those that are displayed in your store so everyone that comes in will see them.



Keep seasonable lines right up at the front of your store and in your windows. Don't be afraid to keep changing stock around so as to keep the lines people want now where they can see them.

Don't neglect window displays. Well-dressed windows are one of the best sales producers a merchant has, and they work all the time. Keep the window displays changed regularly.

The elimination of German made goods from the Canadian market after the war is one of the real reasons why people are demanding better stuff. They can't buy cheap Made-in-Germany products and they have learned the difference between quality goods and cheap stuff.

Credit business in my opinion is the curse of the country. Everybody knows you and tries to take advantage of you because they know you. The Government should enact legislation which will prohibit credit business.

Current Events in Photograph

First Dirigible to Cross Atlantic

The photo gives a good idea of the great size of the R34. It was taken shortly after the explosion which tore the dirigible from her moorings. The explosion was caused by the gas in one of the front sections becoming heated by the sun. It tore a section of the outer skin thirty feet long from the forward lower surface of the gas bag. This accident has delayed the return trip of the huge aircraft. But it is now on its way, having left Wednesday at midnight.

often lead to sales. There is a great deal to be done in this way, he says, and a lot of business to be rounded up that can be reached in no other way. He finds that people appreciate his suggestions as service from a man who knows his business and is advising them, not because he has something he wants to sell them, but because he has goods which will make their homes better, and more comfortable, and will pay many times over in service the money expended.

Says More Publicity is Needed For Canada in China

"CANADIAN firms who want to sell goods in China must give China what she wants, not what we want to give her," said Charles S. Meek of Charles S. Meek & Company, Limited, Vancouver, on his return from a three months' tour of the Orient, made especially to size up trade possibilities. Mr. Meek says he was never more impressed in his life than when he saw the big possibilities the East offers for trade, and so close to Vancouver.

Mr. Meek deplored the fact that so many Canadian firms are endeavoring to break into Chinese markets through United States agents.

"The people of the great centres across the Pacific do not know there is a Canada, or if they do, they attach about as much importance to it as we do to the area within the Arctic circle," said Mr. Meek. "Canada is part of the United States when you come to talk to the man in the street, and the reason is that for every trade advocate Canada has in the Orient, there are thousands of men whose business houses are located in the United States."

"Now is the time for the Canadian to sell his goods in China," said Mr. Meek. "China is a logical market, and now is the time for Canada to mould her Pacific trade."

Mr. Meek expressed regret that the Canadian Trade Commissioner is located in a little office in an out-of-the way place. This is especially regrettable, he said, because the British Commercial attache and his staff has done much to establish a bond of confidence between the British and Chinese in all commercial dealings, and is anxious to foster trade within the Empire. Canada could benefit greatly by the pioneering of the British authorities in Mr. Meek's opinion. He states that he was one of the first Canadian general export men to visit many centres, and that merchants when they knew why he was there, came in numbers to talk with him about handling Canadian goods.

Mr. Meek also visited Japan, Korea and the Philippines, and was a short time at Vladivostck. He looks for no important trade developments with Japan and Canada, but says Japan is buying great quantities of machinery in various markets, and will in a short time endeavor to flood China and other markets with her goods. He declared that Japanese atrocities in Korea were equal to those perpetrated in Alsace-Lorraine and Belgium by the Germans.

TRADE WITH DANISH INTERESTS POSSIBLE

Information has been received from the Foreign Office by the Board of Trade that the Danish Government have now given a general guarantee, which has been accepted by the associated Governments, that goods imported into that country will not be re-exported to enemy countries. They announce, therefore, that except for goods on lists A or B, all restrictions on export to Denmark, whether by freight or by parcel post have been removed.

Exporters should, however, satisfy themselves that the goods are not subject to any Danish import prohibition.

Applications for licenses to export goods on lists A or B should continue to be made to the Export License Department (4, Central Buildings, Westminster, S.W.1.), but no certificates from the Danish associations need be produced.

BRITISH GAS STOVE MAKERS COMBINE

With the idea of strengthening their position in holding home markets and in going after export trade, British gas stove makers have combined under the name of Radiation, Limited. The new company has a capital of $13,750,000, and includes the businesses of John Wright & Eagle Range Co., Ltd. of Birmingham; Richmond Gas Stove and Meter Co., Ltd. of Warrington, and the Davis Gas Stove Co. of Luton. The head office will be at Birmingham.

Paint May Advance Before Week-End

No Guarantee of Latest Schedules Holding if Oil Continues to Soar—Present Prices Based on Oil at $2.25—Other Products Firming

"I WOULD not be surprised to see an advance of at least 25 cents a gallon in prepared paint before the end of the week."

This statement of an Eastern manufacturer, made to HARDWARE AND METAL, reflects the exceedingly strong position which has developed in paint manufacturing circles within the past week. As this article is written the $6 mark has been passed on spot flaxseed, and there is no telling where the line will be drawn, if any, indeed, be drawn at all. It has been freely predicted elsewhere that flax may reach the unprecedented figure of $7 per bushel. If the world supply be as curtailed as is borne out in the information available regarding total holdings, it is impossible to conjecture what the figure that will be demanded of all who seek supplies and who must have them will be.

Defer Issuing Lists

In speaking with one big manufacturer, HARDWARE AND METAL was informed that the issuance of the new schedule recently decided upon was being held up. This was necessary owing to the immediate strong position that has been taken by seed, and which means that manufacturing of prepared paints can be accomplished only under increased cost.

When the price of prepared paint was revised two or three weeks ago the base on which figures were made up allowed for linseed oil at $2.25 per gallon. The most recent seed market price of $6 per bushel is equal to oil at around $3 per gallon. Obviously, if oil prices continue to rule at this figure, or thereabouts, there is but one alternative, and that is to increase the price of paint. That this will be done seems most probable. When the change is made it is likely to come quickly, even without notice. It is now a question of making no predictions of definite character as to the duration of markets as they exist. Changes will come in precipitate fashion when they do come.

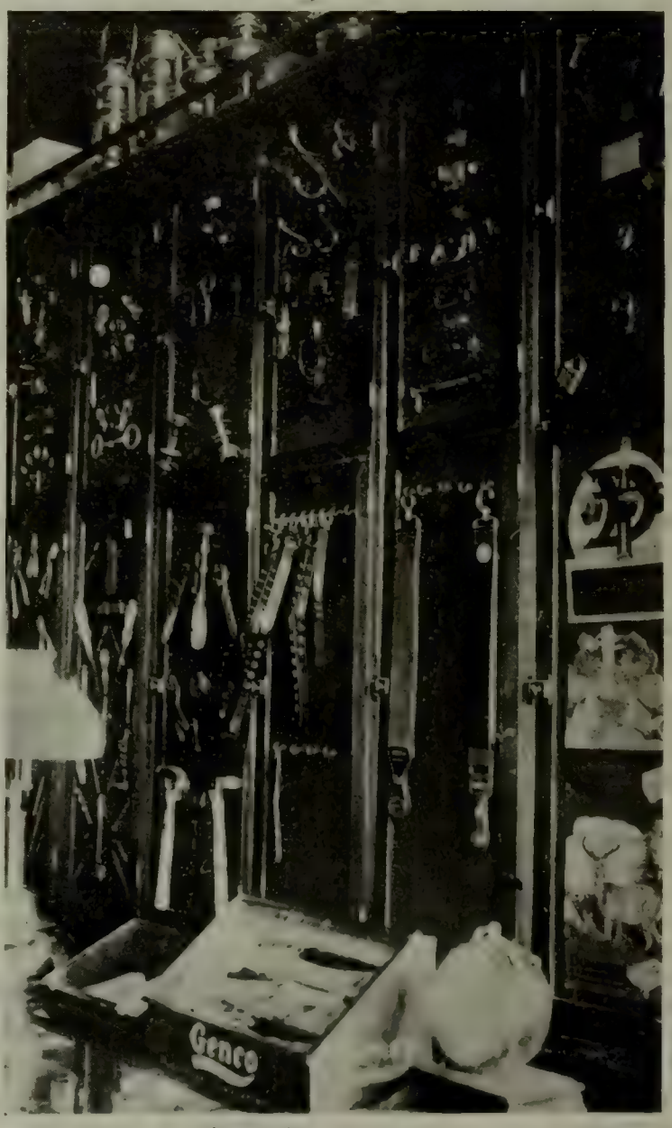
Other Changes, Too

Decidedly firm undertones characterize white lead in oil and putty. It will be recalled that HARDWARE AND METAL has published several articles on white lead. These referred in particular to the position on corroded lead, and which continues to hold its position steadily, but when oil is added to make it the commercial product in which the average retail and wholesale hardware man is concerned the position is manifestly different. With high-priced oil ground into it there is strong probability of new high prices being named, and, if paint prices be revised, white lead in oil may be advanced at the same time.

Putty prices have held for some time without change. The only revision of late was that for pure linseed oil putty, the differential being advanced to $2.50 per cwt. And, although this is not the active selling season, it is still considered likely that new high prices will soon prevail because of the higher oil basis.

Varnishes—Shellacs

Varnish manufacturers state that increases of price have been justified for this line.



"Tendencies are very firm and there are almost sure to be advances," said a Montreal varnish maker to HARDWARE AND METAL. "But any increase will be staved off as long as possible. The cost of raw materials has been advancing right along."

Manufacturers of these lines were able to work along on supplies that had been secured on a more favorable basis than exists at the present time, it was further pointed out. "But, as soon as these raw materials have been absorbed it will be necessary to advance prices."

Shellacs have greatly increased in price. In fact the conditions to-day are somewhat unique in that supplies are most decidedly scarce. Here and there some have limited supplies, but a strictly nominal basis obtains and many will name no prices whatever. It may be October before new shipments are to hand. In the meantime no relief in price or supply is looked for.

Niagara Wall Paper Co., Ltd., capital $40,000, head office Niagara Falls, Ont., plans to manufacture and deal in wall papers.

Home Made, But Effective

This picture was taken in the hardware store of J. E. Thompson, at Rivers, Man., to show expressly what can be accomplished in erecting an attractive home-made cabinet. Only one section of a 30-foot cabinet is shown, and the whole fixture, which was built by a carpenter, cost between $100 and $200. The doors in the lower part of the cabinet are 3½ feet in height, while the upper doors are three feet high. All the doors have a width of 16 inches. They open onto shelving which contains the various articles displayed on the exterior. A very fine, high-class appearance is given this cabinet by the use of green baize on each door, which forms an excellent background to the various articles displayed. A gun case is fitted into one section of the cabinet, as well as a special section for the display of tools. It will be observed that there is a top rail on which a sliding ladder is operated.

Final Drive on Summer Stoves On

Still Time to Make a Good Season Better—Hot Weather and Advertising Factors in Sales—The Use of the Cut—Giving the Price—Determine News Value, Then Play It Up

IT is still early summer, and many opportunities present themselves to the retailer for the completion of a summer stove selling season that will eclipse all records. And the retailers all over Canada, from coast to coast are, as a whole, making the most of their opportunities to keep up the records established during June and so far this month.

Excellent Results

Manufacturers and jobbers report a business on summer stoves which has eclipsed all former figures. Orders have literally been pouring in—the greatest difficulty has been in getting shipments away promptly to meet the urgent demands of their customers.

Hot Weather and Advertising

The cause of this rush is not hard to find. June was a month of unusual and prolonged heat—the housewife was ready to listen to the call of an easier method of preparing meals, and right here is where the retailer lined up to develop the opportunities for business which the heat wave washed up to his door.

Perhaps never in the history of the retail hardware trade has a finer advertising campaign been carried on than that which the retailers as a whole instituted. The daily paper in the city, the weeklies in the smaller centres—from all pages could be seen an appeal which had as its basic appeal that the housewife avoid the intense heat of cooking.

Samples Reproduced

Reproduced on this page are three ads. picked at random from a group reaching the desk of the writer on Monday of this week. They are three different layouts, three different appeals, and each carries a message which gives information to possible customers that they will want to know.

The Use of the Cut

The ads. shown are not difficult to prepare. An illustration is used in each and how much the use of a cut adds to the attractiveness of the layout. The illustration is one of the first things to catch the eye—it carries a message in itself—it gives the reader something tangible which the mind can grasp. And in the hot weather, such as has been experienced in the past few weeks, copy needs to be right to the point. The reader wants to get the news quickly, and when your ad. carries news and presents it attractively, you've done much to get what everyone wants from their advertising—results.

Giving the Price

Then there is another important point in advertising these stoves—it would be true of other lines as well—the prices are there in good plain type. The day of keeping the price a secret from a competitor is long since past. The retailer to-day who advertises his goods at a certain price will get business away from another who fails to quote figures, even though the latter merchant's prices may be lower. It has happened times without number, and the doubting Thomases are losing business daily through their failure to let their readers know what the figures are on the price tag.

It is News That's Wanted

There is perhaps nothing much to be said in criticism of these ads.—that is, probably as much good can be derived by studying them carefully as though pages were written. There may be points which, in looking over, you feel you can improve upon—the point is then to do it. What appeal have these ads. to you? What do you want to know about a store? Put yourself in your customers' shoes for a minute and get the answer to these questions. The answers will not only help you in preparing good stove copy, but in becoming critical you naturally turn the analysis to other lines as well with results that are enlightening.

Keep Up Good Work

Another month at most and the bulk of your summer stove business will be history, but there are still a good thirty days to make this history one to be proud of in every way. Hammer away through the medium of your local papers. Show the lines you are stocking. Give the sizes and prices, and reprint some vital factor in connection with the stove. The results you get will enable you to go further with your regular lines of stoves and ranges for fall and winter trade. If your advertising copy brings in tangible evidences of success, you're on the right track—if there are no results you're probably falling down in some respect. Study your stoves—ask your wife what a woman wants to know about them and tell them in your advertising. It's news they want, and you have it to give them. Keep up the new value of your advertising and the results will be shown in increased sales.

These are samples of newspaper ads picked at random from a group of good ones. Retailers all over the country have been writing a good class of copy and getting good results from their advertising on all lines of summer stoves. Similar results are possible on other lines as well with "newsy" copy.

NEW BRITISH MOTOR SUPPLY COMPANY

A gigantic project that will furnish improved facilities for the supply and repair of automobiles is announced in England in the formation of the British Motor Trading Corporation, nominal capital $10,000,000. The firm's first step will be to open, in the principal cities, large depots which will carry immense stocks of spares for every make of car, and be equipped with machinery capable of handling the most difficult repair work.

EDITORIAL COMMENT

BUSINESS COMES LAST

THE calm admission by Hon. Hugh Guthrie, K.C.. before the Merchants' Association of Montreal, (published in last week's issue of HARDWARE AND METAL), that for forty years there has been no proper Bankruptcy Act covering the whole Dominion shows how little attention Governments pay to business interests. Russia, China and Canada, said Mr. Guthrie, were the only countries without legislation of this kind. All other civilized countries had it, he declared. The trouble with too many of the men who go to Ottawa seems to be that they are too busy pulling strings to have any time at all for helping business. In fairness to some of the elected representatives, it might be stated, that they have not the slightest appreciation apparently of the problems that retailers and other business men are facing continually. The new Bankruptcy Act will facilitate matters in some lines greatly. It is being passed largely as a result of the combined efforts of the wholesale and retail firms of the Dominion, the Bankers' Association, and other organizations. Had these men not got busy the Government would probably have slumbered on for another forty years, or perhaps for 140 years before it did anything on its own initiative to help business men. One thing busy merchants and others interested in commercial pursuits have to learn is that if they want to get anything done at Ottawa, they have to initiate it and practically put it through themselves. Even then, very often the progress is impeded owing to official red tape, indifference and just plain ignorance.

THE SPEED AGE

MANY people who in watching the developments of the past ten years in bicycles, motor cycles, automobiles and aeroplanes expressed the view that the world was moving too fast, are waking up to the fact that the real speed is yet to come. When aeroplanes during the war frequently exceeded 120 miles an hour, easily outdistancing the fastest express trains, many people thought the limit had been reached. Some of the huge new planes that are planned for commercial purposes will make those 120-mile-an-hour planes look like lumbering old stage coaches. As a result of the developments in air service the world is contracting rapidly. Just what the next ten years has in store it would be most interesting to know. Certainly there is every indication that under the impetus given aeroplanes through the war they are to play a big part in the commerce of the future. Not only aeroplanes but dirigibles. The successful trip across the Atlantic in 108 hours of the big British dirigible R 34 opens up some tremendous possibilities, especially when it is remembered that this is much faster time than the speediest of the Atlantic liners can make the trip in. And the cost of operation is not to be considered. All air routes which will clip days and in some cases weeks off the present schedules of trains and ships, and which will put the most distant points within easy reach, are now being planned and materialized so rapidly that it will only be a short time before the trips are actually being made regularly. Just what this means to business men in time saving and in the delivery of mail, to say nothing of merchandise, cannot be estimated. It is especially gratifying to know that the leader in this great new development is Britain and that improvement after improvement is being made which brings air travel ever nearer to the point where it will come into general use and be devoted to the service of hundreds of millions of people.

STRIKES ARE EXPENSIVE

WHILE it is too early yet to make any accurate estimates of what strikes have cost Canada this year, it is certain that the loss will run into several millions. Business men are always directly affected when any large number of men go on strike and big plants are tied up. In the case of Winnipeg it will be many months yet before business recovers from the effects of the walk out there. In the street car strike in Toronto, although it lasted not quite two weeks, down-town merchants lost heavily. No stores, it is stated, were hit harder than the big department stores. Business men who have discussed the situation with HARDWARE AND METAL urge the necessity of evolving some plan by which differences can be arranged without the men ceasing work and plants tied up. Many of them declare that so far as practical results are concerned the present plan is not a great success. In spite of the machinery that is supposed to exist at Ottawa for arranging disputes thousands of men have quit work and scores of plants and millions of dollars' worth of machinery have been idle. This is where the greatest loss oc-

curs. Another big loss aside from the production standpoint is to the workers themselves. It will take many of them months at full time to make up for the time they have lost. In England the Whitley plan of settling labor troubles has been adopted and from reports is working satisfactorily. It is likely that an effort will be made to investigate this plan and have it tried out in Canada. In the meantime, it is encouraging to know that good progress is being made in settling numerous strikes all over the country.

WHY NOT STOP THIS?

FROM time to time HARDWARE AND METAL has mentioned the serious fire losses in Canada, most of which are directly traceable to carelessness. At the present time reports from Northern Ontario indicate that enormous losses are occurring there through forest fires. Fortunately, so far there have been none of the harrowing tales of scores being burned to death that have so often come out of the north country. This fire loss, which has been occurring annually, and runs into millions very often, could in the opinion of many of those who have looked into conditions be practically eliminated if the Ontario Government took the necessary steps. Why such a terrific loss should be allowed to occur each season and demoralize business conditions in many northern towns, to say nothing of adding to insurance rates, if an efficient system of forest protection can be established, it is difficult to say. It would appear that it would be more than worth while for the Government to remove this menace if there is any way of doing it. Each year is seeing a substantial growth in Northern Ontario. In mining alone the past twelve months has seen a tremendous development to say nothing of agricultural and lumbering interests. The north country is rich, but one of its terrors has been the forest fires. This has impeded development unquestionably. The losses from the fires have gone a long way towards making Ontario's fire loss one of the largest in the world per capita. It is time, it would appear, that somebody got busy and studied this problem.

FEAR COAL SHORTAGE

BUSINESS firms all over the country are beginning to get anxious over the coal situation as a result of reports that are being received from mining centres. Up to the end of June the production is a little over 65,000,000 tons short. This has been caused by the exodus of miners to Europe and the inability of the mine owners to fill the places of those who have gone. Approximately 45,000 miners have in the last six months gone overseas to see relatives from whom they have been cut off by the war for nearly five years. Many Canadian merchants and manufacturers know from previous experience just what a coal shortage means and they are not anxious to have the trouble repeated. The situation has special interest for the hardware dealers on account of the large number of stoves, oil and electric heaters they handle. There is little doubt that many people are heeding the warning sounded by coal dealers and are laying in stocks of fuel now. A shortage of coal, however, will find many without a supply and this will mean a big demand for oil heaters and electric heaters which can be used in case of an emergency. Even those who may have some supply of coal may wish to supplement this by other means. This will mean an opportunity for good business for the hardware merchant he should be quick to grasp. Just another instance of that old saw: "It's an ill wind, etc."

OBLIQUE REASONING

SOMETIMES it is just a little difficult to follow the mental peregrinations of the newspaper scribes in their efforts to put the blame on somebody for the high cost of living.

The Toronto *Star* deals thus with a certain phase of the subject:

"The argument that profit should be allowed upon turnover instead of on capital is altogether fallacious. Carried to its logical conclusion it should be applied to labor as well as to capital. A diamond-cutter should receive fabulous wages because his "turnover" means a lot of money. If a bank teller should receive a percentage of the vast sums which he handles his salary should place him in the millionaire class. These illustrations show that the contention is absurd. Labor should be paid according to the energy and skill of the worker, and capital should be paid a fair return on the actual investment."

The two instances given above may be conclusions, but they certainly are not logical conclusions. The logical conclusion would of course be that the diamond-cutter should be paid on a basis of the quality and quantity of the work turned out, and the bank clerk on the basis of the efficiency and expedition with which his task was accomplished.

Capital should not be paid on a basis of a return on the actual investment. That is not the logic of the *Star's* own contention. "Labor should be paid according to the energy and skill of the worker," it urges. Quite so, and the manufacturer on the same basis, and "turnover" if it represents anything, represents the result of the energy and skill used in the management of the business.

SOME dealers get the idea if they use a small space in the local paper three or four times a year that they are advertising. They are. But they are advertising the fact that they don't know what real advertising is. It is in towns where this occurs that the mail order houses get busy and the mail order firms are always watching for openings of this kind.

Discusses Tariff Questions With Farmers

President Findley of the Massey-Harris Co. Tells of Conditions That Exist in the Implement Business in Canada, Especially in Connection With Prices.

TARIFF matters especially, as they affect the trade in farm implements, were dealt with at some length by Thomas Findley, president of the Massey-Harris Co., Toronto, in an address he made to Huron County farmers at their annual U. F. O. picnic held near Goderich.

"I do not hold any brief for high protection," said Mr. Findley. "I never did. Shortly, my position is this: We have got to have revenue, and, in my belief, the easiest way to get the great bulk of our revenue is through the customs tariff, and that, of course, means giving protection to a certain extent to any industry natural to the country. In that way reasonable help is afforded to make them successful. I had a letter the other day from a farmer in the West, who wrote me, perhaps, in regard to my evidence before the commission regarding the tariff. One thing, he said, was that the tariff is designed to protect individual manufacturers and enable them to become wealthy by robbing the rest of the community. In my reply I said that while there are a lot of debatable things in connection with the tariff, if, for my part, I thought the tariff designed to benefit individual manufacturers I would join him very quickly, for I hold as absolutely unreasonable, a tariff intended to protect some men in making money and getting rich who form a small number in the country.

Affects Others

But there are more in my opinion than this small number who are interested in the tariff. It is not my idea at all that only a small number are interested in maintaining it, and that small number the owners of the manufacturing industries, all interested in industry.

The people in the towns are interested in these industries, the farmers in the country surrounding the towns are interested in the home markets the towns provide. Large international questions are even involved in it. If I did not think so, I tell you I would have no use for the tariff for one moment. I do not at all regard it as a scheme to help individual manufacturers. I speak to you of the tariff of implements. We could not make implements in Canada under free trade, but we could make just as much money when we had removed our industry to another country. That removal I do not wish to contemplate, because it means the enrichment of another country at the expense of this. As to this the manufacturer also pays duty. But if we were to say on that account we want to go to the other country and ship the finished articles from there, though we should make as much money under free trade in this country, it would mean first putting the industry on the other side of the line. The capital and the employment would go out of Canada. That is what is involved by the attack upon the tariff on the claim that it affords protection to particular industries.

Says Lost Money

But let us consider the attack as it is made and then we look at the conditions prevailing on both sides of the line. Are you prepared for a free trade country on this side? We have had a high tariff upon implements here, as high as 35 per cent. That accounted for the number who went into the manufacture of binders. There were nineteen different companies making binders in Canada, while at no time were there more than nine companies making binders in the United States. One of the results was that most of the Canadian companies making binders during the last 35 years lost money. Only a few made money. None did except those who had an export business. So far as Ontario is concerned the farmers have had cheaper implements during the past 35 years than they would have had if they never had a tariff and were dependent upon the United States, or any other country to get their implements sent in. All over the world the implement makers were doing business, and it was through no consideration of free trade or protection, but of local competition of the strongest character that the farmers of Ontario got their implements at the prices prevailing. There were higher prices in Russia, in the Argentine, in Australia. There were very much higher prices in the foreign markets.

Cream Separators

Take another article, cream separators. They were almost free and at the time they were tariff free the 500-pound separator cost $120, which was scandalous. They were so high that other manufacturers went into competition, with the result that the price was cut in two. They have gone back something, owing to conditions of the war, but by normal competition they

(Continued on page 57.)

Monkeying With the Buzz Saw

Germany Found It Was a Dangerous Thing To Do

By A. W. DOUGLAS, Vice-President Simmons Hardware Co., St. Louis, Mo.

THERE is a story of a man working in a lumber mill who was sent home in sections in a clothes basket, and on his tombstone was engraved the epitaph: "Don't Monkey With the Buzz Saw."

Evidently Germany had that man in mind when she agreed to sign, unconditionally, the Treaty of Peace, which the Allies handed her, although, like the short sport she is, she put a great cry about being forced to do so.

She ran her bluff to the limit, and then laid down when the Allies called her.

She likewise showed how yellow she is when the German sailors, on their captive fleet, which they surrendered so ignominiously to the Allies, treacherously sank all the ships in violation of the terms of the armistice.

The Old German Toast

In this last humiliation of theirs they should have recalled their naval toast, before and during the war, "Der Tag"—(The Day), the day when they boasted they would meet England's fleet on the ocean and destroy it and be, then, the mistress of the sea, and of the world.

The German point of view reminds me of what our Mr. Semple once said of a man we were playing golf with: "I would rather have 30 cents than that man's disposition."

Germany is down and out, but plotting and scheming already to come back again.

We shall deserve all that is coming to us if we ever allow her to get into a position where she can disturb the peace of the world again.

Things are quietening down somewhat in Europe.

Bolshevism is not the threat that it once was, although Russia is still aflame with it, and there are enough evidences of its spirit in this country to warn us that our job is to stamp it out before it makes any headway, and we shall certainly do so.

One thing immediately lies ahead of us and that is, disposing of the Peace Treaty and the League of Nations' Covenant.

Not a Political Question

Unfortunately there are some politicians in this country who have never head of that man who went up against the buzz saw, and what a swell funeral he had.

Some of these same objectors are trying to make a political question of it instead of a broad problem which concerns the safety of the whole world.

It is an immortal cinch that these same objectors are going to have the steam roller run over them because every day brings new evidences that the people of the country are overwhelmingly in favor of the League of Nations plan, as a whole, as being the only practicable plan so far proposed which promises an end of war, at least for many long years to come.

ALL PARCELS AND CATALOGUES CARRIED BY MAIL SHOULD BEAR THE COST OF THE SAME, AND NO PORTION SHOULD BE CHARGED TO THE LETTER SERVICE.

By E. M. TROWERN, Secretary, Dominion Board, The Retail Merchants' Association of Canada, Incorporated

THOUSANDS upon thousands of retail merchants in all parts of Canada have complained for many years that the methods which have been adopted by the large mail-order houses, which are located in one or two large commercial centres in Canada, are such that they are enjoying special privileges and receiving special benefits at the expense of the public generally.

Many Prosperous Communities Best

It is readily conceded by those who have given the subject any thought and consideration that it is very much better for Canada to have a large number of prosperous cities, towns and villages, than it is to have only a few overcrowded and congested centres. To those who have studied this problem, and who have visited the towns and villages throughout Canada, it is quite apparent that the towns and villages are by no means as prosperous as they should be. There must be a cause for this condition. General stores in towns and villages are generally rendezvous for commercial intercourse and social exchange of the new ideas and inventions that are placed upon the market. The more stock that the retail merchant can carry, the more convenient his store becomes and the better service he can render to the community.

The Plan Adopted

The plan that is usually adopted by mail-order houses is to advertise well-known staple lines (that are usually sold by the general stores) at prices below which they should be sold at, and the mail-order houses then make up the loss on lines of goods that the general store does not carry. This system is deceptive on the face of it, and it is demoralizing in its tendency.

The Zone System

When the Post Office Act was amended the last time this matter was taken up by our association, and we expressed our approval to the Postmaster-General of the plan he had adopted, of creating zones of about twenty miles radius, each increasing the cost of the mail service the further they proceeded from the point of mailing. We fully understood at that time that this plan would be carried out in reference to mail order catalogues as well as to all articles sent by parcel post. Since then we have learned that mail-order houses send their catalogues by freight or express from their central warehouses to the central post-office within the twenty-mile zone, and from this point they are delivered, thus defeating the original proposal.

Parcel Post System Does Not Pay

Upon further investigation, we find that the entire parcel post system of Canada does not pay sufficient revenue to cover the cost. In order, however, to cover this loss, a very large profit is made on ordinary mail matter, and this profit is credited to the department, and set out as against the loss made on the parcel post service. In other words, the entire commercial community, when they place postage stamps on their letters, are helping one or two large mail-order houses to carry goods all over Canada to the detriment of the retail merchants of Canada, as well as to the consuming public, who are anxious to have thriving towns and village in their midst.

Railroad Loss

In addition to this enormous loss, there is now a still further loss on the amount that is allowed to the Government railroads for the carrying of the mail, including parcel post. It is estimated that it costs twenty-seven cents per mile per car to carry mail matter, and all that is allowed to the railway companies for this service is sixteen cents, thus showing an enormous loss on this service alone.

We believe that we have shown sufficient reason why this subject should be taken up and dealt with in a proper manner, and we are asking that a special committee, consisting of members of the House of Commons, and the Senate, be appointed to act during the recess, and to prepare an official report on this matter.

Of General Interest

As stated before, this subject is one of great interest to not only every retail merchant in Canada, but also to the manufacturers and wholesalers, as well as the public generally. A great many suggestions are made from time to time setting forth plans to endeavor to remedy this evil. Some have suggested taxation of mail-order houses so that the municipalities out of which they take large sums of money would be partially recompensed for the loss of trade within the municipality. This suggestion, however, has always lacked any concrete plan whereby this proposed tax could be collected, and, in our opinion, it would be too cumbersome and complicated, and by the adoption of any proposed plan of taxation we would be legalizing a system which is based upon an unfair foundation.

Pay Full Cost

For this reason, we believe that the first step that must be taken to remedy this injustice is to compel all persons using the mail service to pay the full cost of the same, and that no portion of this cost should be taken out of the cost of carrying letters, or out of the Dominion Treasury.

We have our facts and figures all compiled, and our chief desire now is to have this matter laid before the elected representatives of the people, who are represented in the Commons and the Senate, and we are making every effort to accomplish our object.

The Retailers' Position

As a class, retail merchants stand between the producer and the manufacturer on the one hand, and the consumer on the other. Their duty is to distribute merchandise after it has been produced and manufactured. Being in this position, they are more apt to see any injustice that is being done, either to the laboring man, the producer, manufacturer or the consumer.

In the case of the large mail-order houses, we can see that a great injustice is being done by taking money out of the public treasury of the Dominion to benefit a few mail-order houses, who are receiving public service for less than it costs. This means that there is less money to pay the postmen, rural mail carriers, postmasters and all other persons, both inside and outside, of the mail service of Canada. We believe that every laborer is worthy of his hire, and there should be no system in Canada which will benefit a few at the expense of the many, and there is no question about it but that the present mail-order system is unfair and unprofitable, and our sole motive in asking for an investigation into this subject is to see that all those who use this service should pay the cost of the same, and all those who are employed in the service should receive a fair remuneration for their time and labor.

EVENTS IN THE TRADE

Business Changes

Central Butte, Sask.—Archibald Bell, of Riverhurst, Sask., is entering into partnership with T. Mair, hardware.

Earl Gray, Sask.—A. M. Nairn has purchased the interests of A. B. Cruickshank in the Earl Grey Hardware Co., Ltd.

Durham, Ont.—Alister McIntyre has purchased from his brother Shirley McIntyre, the hardware business formerly owned by the late Wm. Black.

New Firms

R. J. Howard has opened a hardware store at Goderich, Ont.

Trade Notes

Work is being rushed on an addition to the plant of the Dominion Tire Co., at Kitchener, Ont.

Under the auspices of the Retail Merchants' Association of Chatham, Ont., a most enjoyable outing was held at Erie Beach on Thursday, July 10.

The Wm. Cane & Sons Co., Ltd., Newmarket, Ont., who recently suffered loss to their plant by an explosion, followed by fire, are again operating at capacity.

The employees of the Reg. N. Boxer Co., Ltd., Toronto, and their friends held a most successful picnic to Wabasso Park. A fine program of games and sports was thoroughly enjoyed, and after supper the prizes were presented by Mrs. R. N. Boxer.

A. B. Cruickshank, until recently a partner in the Earl Grey Hardware Co., Ltd., Earl Grey, Sask., has gone to Northern Saskatchewan with a view of starting a new hardware store. Mr. Cruickshank is a former resident of Owen Sound and went West ten years ago.

As a result of Goderich, Ont., ratepayers voting in favor of a by-law the old factory of the Goderich Wheel Rigs Co. will be taken over by a recently formed company known as the Goderich Mercantile Co. The new firm plans to manufacture toys, small wheel rigs and other articles.

Personals

J. A. Martin of Montreal, formerly of London, Ont., has been appointed manager of the Dominion Tire Company, Toronto.

Chas. Nicoll, formerly with Hamilton Stove and Heater Co., Hamilton, but with the Munition Board since the beginning of the war, has taken over his old territory again in the Maritime Provinces with the above firm.

Geo. W. Kemp, formerly with James Stewart Mfg. Co., Woodstock, has taken over the Hamilton district for the Hamilton Stove and Heater Co., Ltd., Hamilton.

Peter Large, of Toronto, who has been city salesman with the British and Colonial Press, of Toronto, is leaving shortly to join the staff of the Van der Linde Rubber Co.

W. F. Dean, who has been with the Canadian General Electric Co., Ltd., Toronto, has left to take the position of sales manager with Sharp Spark Plug Co. of Cleveland, Ohio.

F. M. Baker, accompanied by K. C. Baker, leave Saturday night for St. John, N.B., to be in attendance at the annual salesmen's convention of T. S. Simms & Co. being held next week.

H. B. Agnew, London, Ont., representative of T. S. Simms & Co., St. John, N.B., leaves Saturday night to be in attendance at the annual convention of the salesmen being held next week

Montreal News

Oliver B. North, of the O. B. North Co., was a Montreal caller this week.

R. W. Bain, representing the American Ring Company, is expected in Montreal shortly.

J. T. Connor, representing A. W. Faber, Incorporated, Newark, N.J., was in Montreal this week.

W. G. Harris, Jr., vice-president the Canada Metal Company, Toronto, was in Montreal this week.

C. D. McDowell, with the H. D. Smith Company, Plantsville, Conn., was a Montreal visitor this week.

Jos. St. Mars, manufacturers' agent, Winnipeg, was in Montreal this week with a line of auto accessories.

Brandram-Henderson, Limited, Montreal, are holding their annual picnic and outing on Saturday of this week at King Edward Park.

George Henderson, president Brandram-Henderson, Ltd., attended the Master Painters' convention in Hamilton this week and where he gave an address on the "Save the Surface Campaign."

Winnipeg News

J. L. S. Hutchinson, manager of the Saskatoon Hardware Co., Saskatoon, is spending a few days in the city on business.

W. Winteringham, of Glen Ewen, is in the city on business, and reports business to be very fair with prospects of a good fall business.

Incorporations

The Creelman Motor and Tractor Co. has been incorporated at Creelman, Sask.

The Lambert Stooker Co., Ltd., capital $100,000, will have its head office at Winnipeg.

The Manifold Light & Power Co., Ltd., capital $100,000, will have its head office at Winnipeg.

Roughton & Skelton, Ltd., head office Montreal, capital $15,000, plan to deal in glassware, silverware and fancy goods.

H. H. Robertson Co., Sarnia, Ont., capital $40,000, plans to manufacture and deal in structural building materials.

Falconers, Ltd., capital $60,000, head office Winnipeg, has been incorporated by Chas. C. Falconer, hardware merchant.

Maulson Buchanan Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in plumbers' and steamfitters' supplies.

Sterling Rubber Co., Ltd., head office Guelph, Ont., capital $150,000, plans to manufacture and deal in rubber goods of various kinds.

Concrete Pipe and Products Company, Ltd., head office Hamilton, capital $200,000, plans to manufacture and deal in concrete pipe and products.

The Jewel Specialty Manufacturing Co., Ltd., head office Toronto, capital $40,000, plans to manufacture and deal in bath tubs and paper balers.

United States Rubber Co., of Canada. Ltd., capital $20,000,000, head office Montreal, plans to carry on a general business in rubber goods of all kinds.

COL. STRANGE REMEMBERED

On Saturday, on the occasion of his birthday, Lt.-Col. C. M. Strange, secretary of the Engineers' Club, was presented with a silver flower vase and a serviette ring by the staff of the club. Lt.-Col. Strange was formerly sales manager for Lewis Bros., Limited, Montreal.

TENDERS RESIGNATION

Despatches from London, Eng., state that Sir Arthur Steel Maitland, head of the Department of Overseas Trade Development and Intelligence, has resigned owing to his dissatisfaction with the Government policy, which, he says, hampers the re-establishment of Great Britain's international trade.

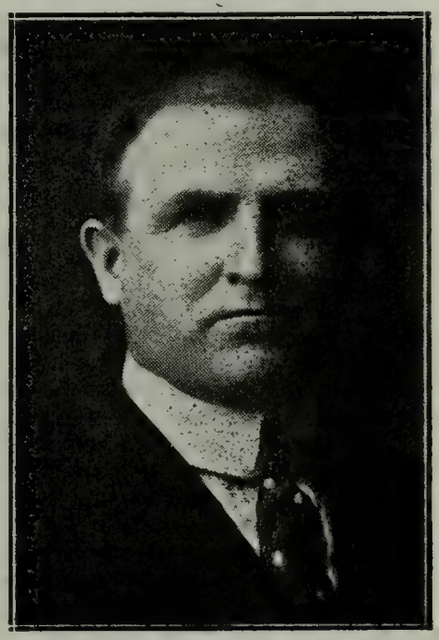
PICNIC AT GRIMSBY

The second annual excursion of the employees of the Auto Strop Safety Razor Co., Ltd., Toronto, with their families and their friends was held at Grimsby, Ont., and was a great success. The party went over on the steamer Macassa. On arrival at Grimsby a formal welcome on behalf of the Canadian employees was extended to N. R. Maas, advertising manager and director of the company, by Geo. S. Crump. Mrs. Maas was made the recipient of a bouquet of American beauty roses. An illuminated address, the work of A. Scott Carter, was presented by F. C. Parfett on behalf of the employees to H. J. Gaisman, president of the company, in appreciation of his recent gift to the employees of free life insurance. A program of sports was run off, and at 7 o'clock the party left for home, a dance being held on the boat. The committee in charge of the outing composed Messrs. S. C. Stampleman, G. S. Crump, F. C. Parfett, J. Dunbar, E.

LONDON, ONT., HARDWAREMEN READY FOR BIG ANNUAL OUTING

Plans for the London retail hardwaremen's big picnic, to be held at Port Stanley, Wednesday, on August 6, are completed, and preparations for the event are in full swing. The band will be larger and better this year, the "eats" will be more plentiful, and more hardware men and their friends are expected to be on hand to partake of them. The sports are expected to eclipse all former efforts of the hard-working sports committee. The outing is expected to be one of the big events of the summer season. A special train will leave for the lake at 1.20 p.m. and doings are planned from that time until 11.30 p.m.

BUYS LONDON HARDWARE BUSINESS



John A. Brownlee, of London, Ont., and his son, Albert, who has just returned after seeing four years of active service overseas, have purchased the stock and fixtures of the London Hardware Co. from Mr. A. J. Smith. Messrs. Brownlee & Brownlee will continue the business under the name of the London Hardware, and will carry a complete line of shelf and heavy hardware, paints, oils, etc. Mr. J. A. Brownlee will continue to operate his sheet metal and hardware business on Talbot Street as usual.

WIRE COMPANY ELECTS OFFICERS

At the organization meeting of the Clinton-Wright Wire Company, the merger of three Massachusetts manufacturers of wire products and specialties, George M. Wright was elected chairman of the board, Evan F. Jones treasurer, John A. Denholm and George F. Wright vice-presidents. The board of directors is composed of the officers mentioned and Harry Bronner, president of the Missouri Pacific Railroad; Frank A. Drury, president of the Merchants National Bank of Worcester; Paul B. Morgan, president of the Morgan Construction Company; Charles F. Fairbanks, formerly president of the Clinton Wire Cloth Company; Richard B. Young, E. H. Rollins & Sons, and George F. Naphen, of Liggett & Drexel.

J. F. Zimmerman Heads Chamber of Commerce

J. F. Zimmerman, manager of Whites, Limited, wholesale hardware, Collingwood, Ont., has been chosen as the first president of the recently organized

J. F. ZIMMERMAN

Manager of Whites Ltd., Collingwood, Ont., who has been elected president of the Collingwood Chamber of Commerce.

Chamber of Commerce. Mr. Zimmerman, who is a native of Listowel, Ont., began his hardware career with Vantuyl and Fairbanks at Petrolea, Ont. Some years later he went with the Soo Hardware Co. at Sault Ste. Marie, Mich. Eighteen years ago he joined the firm of Whites, Limited, at Collingwood. It was at that time a retail company. Mr. Zimmerman has been very actively identified with all work of a progressive nature aimed to help Collingwood grow.

Amending Law to Stop Carrying of Firearms

Amendments are to be made to the Offensive Weapons Act with a view of eliminating the carrying of firearms, especially among foreigners. The police officials of Canada have succeeded in having a bill introduced in the Commons to prevent the carrying of concealed weapons. Large consignments of weapons are known by the police to have been coming into Canada from across the border. They were aware of many aliens importing them to disturb the peace of Canada, and waited on the Department of Justice and made representations to Hon. Arthur Meighen, showing the seriousness of the situation.

Various amendments were suggested to the Offensive Weapons Act to guarantee the safety of the public, and among these changes was included the granting of a permit by an officer to cover only his own territorial jurisdiction, instead of for the whole of Canada. Other changes aim at preventing people, particularly aliens, from having such weapons in their possession.

The permits, when the amendments are made, will cover only counties, towns and cities, and only naval and military men will be allowed to have weapons in their possession without a permit.

RAISING BLOCKADE ON GERMANY

By unanimous resolution of the Allied Council in Paris it has been agreed that the new peace treaty shall not be effective until the deposit of ratifications by the signatory powers. At the same time it is announced that trade with Germany will be permitted to begin as soon as Germany herself has ratified. The announcement given out is as follows:

"The Council of the principal Allied and Associated Powers has adopted the following resolutions in regard to the raising of the blockade on Germany. The Superior Blockade Council is instructed to base its arrangements for rescinding restrictions upon trade with Germany on the assumption that the Allied and Associated Powers will not wait to raise the blockade until the completion of the ratification as provided for at the end of the treaty of peace with Germany, but that it is to be raised immediately on the receipt of information that the treaty of peace has been ratified by Germany."

STRIKE IS STILL ON

Although an agreement has been reached between the owners of a number of the smaller shops and their employees, the strike of the Toronto metal workers is still on, and it is estimated that about 5,000 of the 7,000 men who walked out are still not working. About 1,000 it is stated have gone to the States.

EARLY CLOSING BY-LAW EFFECTIVE

The new by-law closing stores in Ottawa at six o'clock went into effect on July 5. Hardware dealers, sporting goods houses, and those handling bicycles will be compelled to close all the year at six with the exception of the days from December 20 to 31, both days inclusive.

TAX ON COMMERCIAL TRAVELLERS IN JAMAICA

The Government of Jamaica, it is understood, has instituted a tax on commercial travellers representing foreign business houses, effective June 1, 1919. Commercial travellers are required to register and pay an annual tax of £10 ($48.66). Failure to so register and pay the tax involves heavy penalties, including imprisonment.

Andian National Corporation, Ltd., capital $1,000,000, head office Ottawa, plans to prospect for and develop petroleum and minerals.

WANT BUILDERS' HARDWARE

The Weekly Trade Bulletin published at Ottawa by the Department of Trade and Commerce, says:

"Particulars have been received from Melbourne of the requirements of builders' hardware to be used in the construction of soldiers' homes in Australia. Interested Canadian manufacturers are invited to promptly communicate with the Commercial Intelligence Branch of the Department of Trade and Commerce, Ottawa (refer to file 22930), for details of the goods which are briefly outlined as follows (approximate size):

10,000 escutcheons, 10¼ x 2⅝ inches.
100,000 escutcheons, 7 x 2⅜ inches.
10,000 knobs, 2¼ x 2¼ inches.
10,000 mortice knob locks, 5⅜ x 5⅜ x ⅝ inches.
100,000 mortice knob locks, 3¾ x 3⅞ x 9-16 inches.
200,000 hook sash lifts, 1⅜ inches.
200,000 ring sash lifts, 1½ inches.
100,000 sash fasteners to design.
100,000 sash fasteners to design.

Net quotations upon the basis of f.o.b. steamer at ocean port are requested to be cabled at the earliest possible date to the Canadian Trade Commissioner's office, Melbourne (cable address Canadian, Melbourne), for transmission to the Soldiers' Homes Department. Manufacturers must clearly indicate the metals to be used, such as brass, bronze, etc., and what quantities can be delivered monthly. The next outward mail leaves Vancouver for Australia on July 15, which would give manufacturers an opportunity to furnish their illustrations and designs to approximate as closely as possible the specification given above.

BUSINESS BOOM AT SHEFFIELD

Manufacturers in the lighter Sheffield trades are unable to increase their output or to take up new lines because no additional premises can be obtained. The absence of such accommodation is also holding back the establishment of new industries. Letting values of workshops have almost doubled, and the oldest ramshackle buildings are at a premium, and are being adapted for industrial purposes of some kind. Nearly the whole of the building sites also have been covered during the last few years, and new premises can only be erected on the extreme outskirts, often in inconvenient situations. Those disposed to erect new premises are deterred by the slow pace of building construction. The shortage is bringing expansion almost to a standstill. It limits, at any rate, what can be done in this direction. There is a corresponding scarcity of office accommodation. Since the ending of the war all the available offices have been absorbed, mostly by persons starting in business as merchants and agents, of whom there are far more in Sheffield than at any former time. A number of these are compelled to transact business at their homes.

Cheap Japanese Imitations

On several occasions articles have appeared in HARDWARE & METAL regarding the cheap imitations of British and other goods made by the Japanese in an effort to capture export trade. It is stated that in Australia recently the Japs have been endeavoring to sell large quantities of spoons offered at a very low price. The spoons offered, it is stated, are marked as being nickel silver, and in appearance very closely resemble British-made goods. When a portion of the surface was removed, however, a spoon was found to be made of brass, and thinly coated with nickel.

HALF-HOLIDAY BOOKLETS FOR TRAVELLERS

There are still some copies of the half-holiday booklet published by HARDWARE AND METAL *available for those who may want same. An effort to place these in the hands of travellers, jobbers and manufacturers was made but there may have been some omissions which will be gladly rectified if a post card is sent through at once. The supply is limited and an early reply to this stating "How many," will secure immediate attention.*

Flashlight Would Have Saved All This Trouble

L. Charlesworth, hardware dealer at Wheatley, Ont., and an assistant, C. A. Bickford, were painfully burned in a fire and explosion which practically destroyed the oil house. They were emptying roofing paint from a leaky barrel into another in the oil-house at the hardware, when one lit a match to see if the paint was all out. An explosion immediately followed and the clothes of both there set on fire when the whole interior of the building became a mass of flames. Both men received immediate medical attention. Their burns are exceedingly painful. The fire gained considerable headway in the building before help dared to rush in, fearing other explosions. The loss to the building and stock in the oil house will amount to several hundred dollars, but is covered by insurance.

ASH SIFTERS

Walter Woods & Co., Hamilton.—Kindly advise where we can purchase common wood ash sifters.

These are made by the Sanitary Plumbing Mfg. Co., Granby, Que., and E. B. Salyerds, Preston, Ont.—Ed.

J. Sand & Sons

Catalogue No. 10, issued by J. Sand & Sons, of Detroit, Canadian branch, Campbell Agencies, McKinnon Building, Toronto, lists the complete line of levels, both wood and aluminum, manufactured by the firm. The catalogue is most attractively printed, the pages being 10½ inches by 7½ inches each, surrounded by a neat blue border, with illustrations of the levels in natural colors. A special section of the catalogue deals with the exclusive features of Sands' levels, giving details regarding the spirit glasses, adjustment, finish, etc. The cover, which is in pale blue, is most attractive. Readers of HARDWARE AND METAL who desire copies of this catalogue may obtain same upon request.

Humphryes Manufacturing Company

The Humphryes Manufacturing Company, of Mansfield, Ohio, is issuing to the trade a series of bulletins in lieu of a new catalogue, which will be published in the early part of next year. The bulletins conform to the standard size adopted by the National Association of Purchasing Agents, and are punched for standard ring or post binders. Each bulletin is being supplemented with a short letter describing briefly the salient advantages of the new designs. The latest bulletin lists and illustrates the double-acting force pump, H 600. Copies of the bulletins will be sent to readers of HARDWARE AND METAL upon request.

British Aluminum Co.

"The Casting of Aluminum" is the title of an interesting booklet published by the British Aluminum Co., Ltd., of London, Eng., Canadian branch, 265 Adelaide Street W., Toronto. It deals at length with the subject of aluminum alloys, their development and uses. There are sections which deal with "Mixing Alloys," "Moulding," and "Melting," in which a great deal of valuable information is given. Copies of the booklet may be obtained upon request by readers of HARDWARE AND METAL who are interested.

F. R. Murray Co., Ltd.

Catalogue No. 10, just issued by the F. R. Murray Co., Ltd., of 365 Water Street, Vancouver, B.C., lists the lines of aluminum ware manufactured by the firm. It is profusely and attractively illustrated, such lines as teapots, kettles, percolators, double boilers, saucepans, preserving kettles, cake pans, pie plates, combination cookers, roasters, fry pans, ladles, dippers, funnels, cups, children's tea sets and others being shown. Copies of the catalogue will be sent upon request to readers of HARDWARE AND METAL who are interested.

German Cutlery is Being Allowed to Enter British Markets

Not Only This, But British Government is Assisting the German Cutlers to Get Back to Work—Startling Advances Are Shown in Prices

THE British Government is not only granting facilities to German cutlery makers to export their wares, but is preparing to assist the industry in getting back to work. This sounds rather startling and unexpected at first, but the situation is explained by "The Ironmonger," of London, England, as follows:

"The expected, or the unexpected—according to the point of view—has happened, and we have this week examined a parcel of folding pocket scissors made recently in Solingen and imported to this country under a special license granted by our own Government. It was announced some time ago that such licenses would be given in respect of goods produced in occupied enemy territory, and the explanation offered is that all commodities so imported are to be in payment for foodstuffs supplied to the enemy people. The scissors mentioned are stated to form part of the first lot of German cutlery brought to England under this arrangement.

No Serious Criticism

Except on sentimental grounds there can be no serious criticism of the action of the Government in this matter, because, while it will not injure any trading interests here, it provides the public with a convenient article which they are unable to obtain from any other source. The folding scissor is a German specialty which sold in millions throughout the world, and, although in recent years similar patterns were made in Sheffield, and to a lesser extent in London, production has not been on a considerable scale. None, however, are being made to-day in Sheffield, and throughout the war-period such scissors have been unobtainable. The Sheffield makers have far more orders on hand than they can execute during the next twelve months, and so long as that condition obtains they will not interrupt their output by taking up special lines.

Startling Prices

The prices at which these German scissors are quoted are somewhat startling, and lend support to the theory that the era of cheap German cutlery has come to an end, for the quotations are five times the price at which the articles were formerly sold; and, although there is a widespread call for such scissors, we doubt whether many people will be prepared to pay from 3s. 6d. or 4s. for the German variety, and they cannot be sold at a less figure. The price may, of course, be an artificial one, and not fairly indicative of the present costs of production. It is not impossible that the Government or the military authorities are making a little profit out of the deal.

Keenly Interested

To what extent this innovation will be developed is a matter of conjecture at present, but it is safe to say the future developments will be watched with the keenest interest, not unmixed with anxiety. The importation of cutlery is prohibited except under official licenses, which are to be granted only in exceptional circumstances, and traders will now be alert to learn how the authorities intend to interpret that condition. Presumably the privilege will be strictly confined to such articles as the British public need badly and cannot get from their own manufacturers, and there are a considerable number of such wares. Economists are well aware that the German indebtedness to the Allies will have to be liquidated, to some extent at least, by payment in kind; but the Government's action in this matter places in an awkward position those trading bodies and individuals throughout the land who are unconditionally pledged never to buy, sell, use, or handle goods made by enemy peoples.

Assisting Industry

In addition to granting facilities to the German cutlery makers to export their wares it transpires that the British Government is prepared to assist the industry in getting back to work. Contrary to popular belief, that trade was never wholly self-contained. Its best razors were made of Sheffield steel, and the Solingen manufacturers have always found it necessary to draw upon Sheffield for supplies of ivory, pearl and horn scales and handles for their knives. During the present week the Sheffield firms who did this particular trade before the war received a communication from the Government Department concerned intimating that they were now at liberty to resume supplies to Solingen, and several parcels of ivory and pearl have already been despatched thither on the strength of that permission.

AMERICAN WIRE MILLS ARE RUNNING CLOSE TO CAPACITY

Reports from New York state that sales of wire products during June by the largest interests have run close to full capacity of the mills which means that approximately 200,000 tons have been disposed of to merchants and manufacturing interests in all sections for shipment over the next 60 to 90 days. Manufacturers' contracts generally run about three months, but in a few instances wnere needs have been pressing, contracting has extended over the fourth quarter of the year. Buying by distributors however has been confined to 60-day shipments.

It is notable that very heavy sales of fencing have been made for this time of the year for shipment into the agricultural districts. This is probably due to the relatively light buying earlier in the spring season when buyers were disposed to hold off in anticipation of lower prices. Another point of interest is that stocks in hands of consumers, jobbers and dealers as well as of manufacturers have been reduced to a very low point, and there is a disposition now to replenish stocks. In the case of the mills even stocks carried in warehouses have been about one-third of normal. The policy now is to replenish these stocks also, but mills are not operating up to the extent of specifications.

The mills of the American Steel & Wire company are operating about 80% of capacity, but the operating end is being urged to increase output to take care of the large increase in business that has been coming in in the last 60 days. Independent wire drawers are operating about 75% of capacity. The demand for nails and plain wire for export continues active, additional liberal sales being reported for shipment to South America and the Orient. Larger European orders are also expected in the next few weeks.

SCALES HOLD ON FIRM BASIS

That various scales are likely to hold on a firm basis is the opinion of the New Warren Scale Company, St. Paul street, Montreal. In speaking this week with the manager, Mr. Lewis, he stated that there was likely to be a continued firm price basis and that changes of a downward nature were altogether improbable.

"I do not see how regular commodities can be reduced in price," said Mr. Lewis. "This will apply to most lines for which there is a regular demand. Lines that depended upon the war, or which were sellers only while the war was on would tend to come down, but regular sellers will not.

"It is doubtful if foodstuffs will be lower in price for a couple of years at least, and most other goods will not be lower. We never will see prices as low again as they have been."

Mr. Lewis states that there has been a desirable increase in the sales of scales lately. This has been quite marked and there is an increasing demand right along. This indicates that the merchant is needing more goods and that there is a healthier condition of retailing.

Copper and brass markets are firming again, and yet Mr. Lewis believes that there will be no dearth of brass supplies. "There ought to be a lot of this recovered from the battlefields in Europe. Then the Government, I understand, have a great deal of this to put on the market. It ought to make some difference."

Meeting To-day's Competition

Specialty Store the Store of the Future—With What Are You Competing?—Buy in Cold Blood, Sell With Enthusiasm—Limit the Lines But Give the Assortment

THIS is the fourth and concluding address delivered by Frank Stockdale, the noted business expert, in connection with the Saskatchewan R.M.A. Convention, as reported by the special representative of HARDWARE AND METAL.

The series of lectures has been followed with great interest and the points brought out in this lecture on "Meeting To-day's Competition" are worth careful perusal. Mr. Stockdale says that whereas to-day in the West, competition is probably from the general store, the store of the future is the specialty store. He indicates that the retail merchant's creed should be "Buy in Cold Blood and Sell With Enthusiasm." There is something in it too—think it over.

"WHEN we start to define competition we want to know what kind of competition it is," said Mr. Stockdale, opening his address on the subject, and proceeding to outline competition under the following headings: 1. General stores; 2. Specialty stores; 3. Department stores; 4. Mail-order stores; 5. Chain stores.

"A great evolution is taking place in business," continued Mr. Stockdale. "Western Canada is a developing country and that makes a difference. One of the things in a new country is the rapid change which takes place when the country begins to get settled. Then you have not only changes in retail merchandising but the changes that take place between a new and an old community. The question in the average man's mind is what of the foregoing classes of store is the store of the future? This is not a very important question. Don't worry about someone else's kind of a store, it is the way you take care of the kind of a store you are running. As the country grows older there will be fewer general stores. There will be more specialty stores, and general stores will evolve into department stores.

Specialty Store the Store of the Future

"In the West your competition is probably the general store, and you will have to face it. The store of the future is the specialty store. Department stores are collections of specialty stores, and in many cases in the United States the advertisements of the various departments of the department store are run individually in the newspapers as if to advertise individual stores specializing on the lines advertised.

"We have general stores competing with general stores, chain stores competing with chain stores, etc., and all competing with each other.

"My experience is that there is ten times as much noise over a customer who goes to the mail-order house as there is over a customer who goes anywhere else out of your town. I know the seriousness of mail-order competition in some districts, but you have a way of measuring this competition, whereas you have no way of finding out the amount of goods brought into your community in the suit cases of your townspeople when they return from the cities. We must realize that we are going to beat the field, and whoever is in the lead we are going to beat them. The flypaper stage of business is passed. By this is meant the time when customers used to light and stick. Many business men made their money at that time in new districts. The mail-order house has been a big factor in eliminating the flypaper stage of business. People are not forced to buy at one place. People are travelling. Your competition to-day is nation-wide. You are not competing just with the fellow across the street or in the next town, you are competing with the best they have in Canada, and when you talk of the best in Canada you are talking about the best in the world as far as retail merchants are concerned. The big octopus you talk about is one of the best managed businesses I have seen.

With What are You Competing

"What are you competing with? Low prices, beautiful stores, high class salesmanship, or what? I think you are competing with a man or men who have the keenest and highest developed brains along the line of retail distribution that are to be found anywhere. Your customers are reading their literature each evening. Your customers are going into their stores every day and are being served by stores managed by the keenest brains in business. And the only reason that you are able to exist is because of your advantage of being on the ground. If you had to compete side by side you would not stand very much show until you revised your methods of business. We are getting along in a way without any retail preparation. One retailer who made money yesterday figures he is going to make it the same way to-morrow, but he has to find another way to make his money to-morrow. You made your money in competition with certain kinds of merchants, now your competition is becoming nation-wide and the only way to meet it is to study merchandising yourselves.

"The retail store is one of the biggest business propositions to-day. The great trouble with many retailers is that they think they know the game. There is nothing more fatal than this. Business requires more kinds of the higher grades of ability than anything else. I have sympathy for you when I think of the pitfalls along your path.

"A good retail merchant must be a good buyer and a good seller. A manager of things and a manager of people. Selling is divided into three sections: 1. Display; 2. Advertising; 3. Personal selling.

Buy in Cold Blood and Sell With Enthusiasm

"One of the reasons why we are having business done in bigger units is because we cannot find a man who can do all of these things well. This is the reason for the general stores, department stores, etc., because we have to get specialists to do this job. Very few of us are good buyers and good sellers. The retail merchants' creed should be: 'Buy in cold blood and sell with enthusiasm.'"

At this point Mr. Stockdale gave an illustration regarding buying and selling. An Ottawa, Ont., merchant who now manages one of the biggest stores in that city, and who a few years ago travelled the city with sample rugs on his back, made the following statement: "I never allow myself to become enthusiastic over goods that I do not own, but once I own them they become the greatest goods that were ever brought to Ottawa."

"Two-thirds of the merchants to-day buy with enthusiasm and sell in cold blood," continued Mr. Stockdale, "and the stocks of goods in their stores proves this is true. Why does a man buy with enthusiasm? Because there are men who make their living by supplying enthusiasm to a man when he is buying. Hotels and trains are full of them. A man could not get far as a travelling salesman unless he can impart this enthusiasm.

Limit the Lines But Give the Assortment

"One of the reasons that people trade with mail-order houses and go to the larger towns is not price, but assortment. Where you have lines criss-crossing you have a partial assortment—a little of everything but not much of anything. You should not carry too many lines and be unable to give what may be required in any one of them.

"As long as you depend upon the salesman telling you what to buy, as long as you refuse to keep stock record systems you are going to buy with enthusiasm and sell in cold blood, because you will be dissatisfied after you get them. The only way to have enthusiasm which you can cash in on is to generate it yourself. Any man who generates en-

Display Tables Effective Sales Medium

This picture taken in the hardware store of Box Bros., in Souris, Man., shows an effective method for displaying and selling small hardware. Last winter the firm had manufactured a series of four long tables with the top formed of two inclines sloping from the centre. These tables, which are near the centre of the store, are constantly kept filled with articles commonly used around the home, workshop or farm, and are certain to catch the eye of all customers to the store. It has the same effect on the buyer as the display in a 5 and 10 cent store. All prices are marked in plain figures.

thusiasm gets paid for it."

The following definition for efficiency was hereupon given by Mr. Stockdale as follows: "Efficiency consists in buying from a Hebrew and selling to a Scotchman."

"We have got to find some way to give time and attention to our businesses so that we can do some thinking. Our competitors are winning out because they have more mental ability.

"In meeting to-day's competition you have to meet men who know how to figure profits, manage things, and manage people.

Some Questions Answered

In the discussion that followed some interesting questions were raised.

Question.—"In taking goods from stock for expenses of the store, should they be charged at cost or selling price, and why?"

Answer.—"There are two expenses in selling. One is carrying expense and the other is selling expense. A moderate overhead charge should be added on to the cost of goods in stock. When you deal with figures, deal with facts.

Question.—"Should there not be a distinction made in regard to cash and credit customers in the matter of the price charged for goods?"

Answer.—"A distinction is being made between cash and credit customers. The cash-and-carry stores and the mail-order houses are two examples. The general practice is to put the goods high enough so you can charge high enough and yet give discount to cash customers. By doing this you are not adding anything to anybody—so that they can see it."

At the conclusion of this address Mr. Stockdale spoke a few words, impressing upon the assembled retailers the necessity of getting away from their businesses to avoid getting in a rut and becoming narrow-minded.

"Come to conventions, and don't come thinking that you are needed at home. If this is the way you feel, it is because you leave no organization behind you," said Mr. Stockdale. "I admire the man who has the ability to take a vacation. I make this recommendation for two reasons. One is because of the things you will have to do in your store before you can take a holiday. The store has to be in running order and needs organization. The men who come to conventions usually have good businesses. The successful business man is the one who works for his community. He gets a perspective and sees what the other fellows are doing."

DISCUSSES TARIFF QUESTIONS WITH FARMERS

(Continued from page 50.)

were cut down in price under practically free trade conditions. In mowers the same kind of competition acts similarly. I might fairly ask you to consider these two articles in judging the natural and inevitable results of keen competition. I am perfectly willing to abide by what the people of this country decide; I am willing to abide by what the farmers alone think of the way prices rule under free trade and protection with competition if I am sure that the farmers have all the facts before they decide."

Long Agitation

Mr. Harris referred to the long agitation for tariff changes in the West, stating that there had been a good deal of misrepresentation and citing the statement constantly made that implements are sold abroad at prices lower than in Canada, and that Canadian makers sold in Canada for the money they get through the tariff. He declared these statements are untrue and that there never was a time when implements in Canada were cheaper than in any other country in the world, except the United States, and that very little difference existed between American and Canadian prices, largely owing to the duty which has to be paid on material coming in. The farmers, however, he stated, do not pay an additional cost, as there is a different method of distribution in the United States. In Canada there is a uniform price. In the U. S. the manufacturer sells to the retailer, who adds his own expense and makes his own price in his own town or district. He declared that in corresponding parts of Canada implements are from $20 to $30 cheaper than in Montana.

SPACE BUYERS WANT COLUMNS KEPT CLEAN

Recent inquiry by the National Vigilance Committee among advertisers has developed the fact that a great many space buyers are sufficiently interested in the kind of advertisements published in mediums they use, to prefer those whose columns are clean.

Advertisers have reported many specific cases in which they withdrew their advertising from one medium and placed it in another because they found that the first accepted advertising of a character such as would destroy public confidence. In several cases, the publication was named by advertisers in relating such experiences, and many others stated that they confined themselves to certain groups of mediums, concentrating all their appropriations in these mediums because they believed clean advertising columns had greater influence.

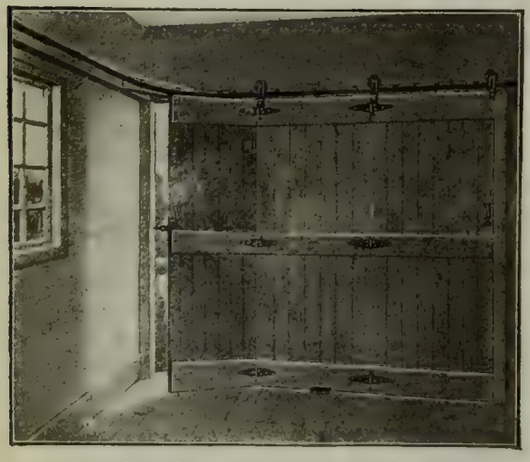
The investigation has also shown that an increasing number of space buyers are writing letters to advertising mediums whenever they see anything in advertising in those mediums which they believe should not be accepted.

SASKATCHEWAN

HUMBOLDT.—Hardware stores close at one o'clock on Wednesday afternoons during July and August. On every other day, except Saturday, stores close at 6.30 p.m.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN



GARAGE HARDWARE

The Stanley Works, New Britain, Conn., announce that they are now making garage hardware for rolling doors in three different sets. The manufacturer, in briefly describing the three sets, states that Set No. 2500 is so arranged that the three rolling doors may be carried from the front entrance of the garage around to the side wall with one operation.

Set No. 2505 has a service door hinged from the door casing. The two remaining doors are so arranged that they will roll past the service door when the service door is in the open position to as far as necessary along the side wall.

Set No. 2510 has a service door hinged from the door casing, also two accordion doors arranged so that they may roll on the track to the side wall, swinging inward at the same time. These are held in the open position by a floor bolt.

In the manufacture of this hardware

Stanley Garage Door Set No. 2500

for rolling doors every item of consideration, it is stated, has been carefully gone over to make them sturdy, easily operated and easily installed.

McKINNON RADIATORS

The McKinnon Industries Ltd., St. Catharines, Ont., are placing on the market after successive tests, the McKinnon radiators for automobiles. The process of making the really cellular core of this radiator is, it is indicated, to wrap the metal around the forming mandrels in automatic machines, as a result of which it is possible to use metal as thin as .0025 of an inch without tearing or stretching the strips.

The manufacturers state they cannot positively clog with sediment because

McKinnon Radiator

the interior is corrugated to keep the water in constant agitated action; the cells and the air passages are so scientifically proportioned that a strong cooling draught is sucked through the air passages to keep the water cool, so that the engine hits regularly, runs smoothly, and does not get overheated during the summer days.

McKinnon radiators are, it is indicated, simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core; the very method that hardens the metal and makes it crack so easily.

The corrosive action of alkali or acidulated water has been overcome, it is said, by tinning inside and out. The tubes are ⅛ in. wide, straight downward, with corrugated sides agitating the water in its downward passage, thus carrying sediment with it and at the same time making as nearly perfect as is possible the transfer of heat to the metal, where it is carried away by the free passage of air through the cells. To lessen the danger of bursting from freezing the minimum water tubes are so constructed as to permit of an outward strain many times before the actual burst takes place.

TRIPLE CLUTCH TRAP

A new game trap has been placed on the market by the Triumph Trap Co., Inc., Oneida, N.Y., which they call their "Triple Clutch." This trap was built especially for muskrat, skunk and mink, and it is said on account of its wonderful holding power to be positively escape proof. The manufacturers point to the fact that the grippers on Triple Clutch jaws are separated, making this trap proof against an animal twisting free. It is likewise stated that a sidewise movement is just as impossible, as it would be for the animal to move its foot up or down. The grippers on the inside are slightly hollow and the flesh swells in between; even if chewed off close to the under jaw there isn't a chance to get away. In addition to the individual grippers the jaws of this trap are, it is indicated, high arched, affording an extremely high grip on the animal's leg where the flesh is heavier. The trap is guaranteed by the manufacturers

Triple Clutch Trap

against every known defect for one full trapping season.

AUTOMOBILE LOCK

A new vest-pocket size padlock for Chevrolet cars is now being placed on the market by Homer and Wilson, Hamilton, Ont. Points enumerated in its favor by the manufacturers are that it is easy and simple to operate, and can be carried in the vest pocket. These are put up on on a neat counter display card.

Automobile Lock

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

NUMEROUS changes are again the order of the week's hardware markets and some of the revisions made are most important. One of the outstanding changes is that which has been made on shovels, spades and scoops, the new discounts named providing for a decline of about 10 per cent. in these lines. Another important announcement made by the manufacturers of these is that half polished and full polished finishes will again be available at the usual net extras.

In line with the strength shown in the metal market on copper, manufactured lines have responded and copper wash boilers, tea kettles, tea and coffee pots have all undergone revision upward, the advance amounting to a straight 10 per cent. Copper rivets have gone to higher levels also this week.

Linseed oil is again featured in the changes which have taken place, prices going up from 20c to 30c per gallon, and in one instance 50c per gallon. This is a direct reflection of the soaring tendencies of flaxseed which has passed the $6.00 figure. Predictions were made a month ago that $5.00 flax would be reached—another dollar has been added to it and still the end does not appear to be in sight. Crushers, however, are loath to make any predictions and buyers from jobber to retailer are only taking delivery of what they consider they need.

Turpentine shows no change locally, but a stiffer market has developed in the South, due to the entry into the market of buyers from overseas again. The crop is not going to be any too ample and the firm situation now developing is expected to be maintained.

A new pipe list has been issued, but the only change is that applying to wrought nipples which register a decline. Wrought pipe and couplings show no revision from prices ruling during the past two or three months.

A sharp advance in tap soles and heels has been reported, amounting to about 25 per cent. Sole leather is also up in line with these changes and a revision has been effected in leather belting, which provides for an advance. Indications are that the peak has not yet been reached in the various lines of leather goods.

Cotton rope, sash cord, wrapping twine, seine twine and kindred lines have all registered an advance this week of from 2c to 4c per pound. Jute twine in coarse grades is also up 1c and finer grades 2c per pound. Coal oil has gone up 1c per gallon. No change is reported on gasoline which holds at recent decline.

MONTREAL MARKETS

MONTREAL, July 10—Considerable change is made in prices of some commodities this week and among these are important advances. Shovels, spades, scoops, etc., on the other hand, have been reduced 10 per cent. Other declines have been announced on wrought nipples. Knife handle wrenches are lower. Increased prices are in effect for cotton twines, sash and awning cord, candle wick and cotton rope. Winchester rifles, carbines and shotguns are all advanced. Sheet brass and various copper goods are on an increased price basis. So are tap soles, and also heels. One line of ready roofing is marked up. An advance of one cent per pound is applicable to lead pipe and lead waste. Antimony is higher and copper is likely to be. There is a stronger undertone to ingot metal markets. All around there are strong tendencies. Business is seasonably good.

Rifles, Guns Higher; Sheet Brass; Soles

Montreal.

RIFLES, GUNS, BRASS, SOLES.—Advances have been made in the price of Winchester shotguns and rifles, carbines, etc. The new discount is now list plus 25 per cent., the former plus being 15 per cent. Sheet brass is up, too, the advance varying. Leather soles have been increased in price, in some cases 10 per cent. and in others more. No. 121 are priced now at $4.60 per doz.; 123, $4.20; and 11, $7.15. Women's No. 36 are $5.25, and men's heels, No. 50, $2. Women's heels are $1.40 for No. 81.

Cords Are Higher; Lines, Twine, Wick

Montreal.

CORD, TWINE, WICK, LINES.—Effective at once, new prices have been named on various twines and cord. Candle wick is advanced to 75c per pound; 30 ft. cotton clothes lines to $2.50 per dozen, and 48 ft. to $3.75. Sash cord prices are: No. 6, per pound, 75c; No. 7, 74c; and No. 8-12, 71-73c. Awning cord, drab, is quoted at $2.80 for No. 3½, $4.20 for No. 4, $5.60 for 4½, while for white relative prices are $2.35, $3.75 and $5.20. Common cotton wrapping twines are up 3c to 68c per pound in balls, 3 ply, to 72c for 4-ply. In cones the 3-ply is quoted at 66½c.

Wrought Nipples Down; Shovels; Wrenches, Too

Montreal.

NIPPLES, SHOVELS, WRENCHES. Reductions have been made in wrought nipples. The new discount is 80 per cent. for 4 inch and under, and 70 per cent. for 4½ inch and larger. The former

discounts were 60 and 50 per cent.

A decline of approximately 10 per cent. has been made in the price of square and round nose shovels, scoops, spades, etc. The new discounts are 45 per cent. and 5 per cent. Coes genuine knife handle wrenches are reduced 10 per cent.

Copper Rivets Up; One Line Roofing

Montreal.

RIVETS, ROOFING.—As predicted in HARDWARE AND METAL last week, prices have advanced on copper rivets. The discounts now are 10 per cent. instead of 15 per cent. for rivets and burrs mixed, and for burrs only the plus 25 per cent. is still effective. One line of ordinary roofing carried by a Montreal jobber, "ready roofing," has advanced 25c per roll to $1.60 for two-ply and to $1.90 for 3-ply.

Much Wire Sold; Nails Move, Too

Montreal.

WIRE AND NAILS.—Wire mills have been accorded an enormous business of late and this was occasioned in part by the failure of the trade to place orders earlier in the season. The basis has remained firm, but no changes have developed. Smooth steel wire is still on a $5 base. Some considerable movement of wire nails has been made and the price has remained for both wire and cut nails at $4.75 per keg.

Cotton Rope Up; Sisal Has Held

Montreal.

ROPE AND CORDAGE.—Increased prices have been effected for cotton rope. The new quotations are: 3-16 inch, 67-70c, and larger sizes, 66-69c. The undertone is firm. Price basis has remained without change on sisal, 27½c being quoted, while pure manila is still 34c and British manila 30c.

Coal Oil is Sold; Gasoline Has Held

Montreal.

COAL OIL, GASOLINE.—There has been a steady outgo of coal oil, and much is used these days in oil stoves. The prices remain unchanged at 20-23c per gallon. Gasoline is a big seller and this has not changed in any way, the price for motor grade being 33c.

All Copperware Up; Stoves Have Moved

Montreal.

WARES AND STOVES.—Movement of stoves has been continuing, and the booking for fall delivery has been active. Prices are very firm. In addition to the advances given in HARDWARE AND METAL last week for nickelplated copper goods, copper goods in general have advanced ten per cent. There is a steady and unchanged basis for other wares.

SPADES, SHOVELS AND SCOOPS DECLINE.

A revision in the discounts prevailing on spades, shovels and scoops has been made this week resulting in a decline. The new discounts named are 45 and 5%, replacing the former figures of 25 and 25%, or approximately a 10% reduction.

It is also stated that polished and half-polished finish will in future be available, the former taking a $1 net extra per dozen, and the latter a 50c net extra. The range of quotations with new discount are as follows:—

SPADES, SHOVELS AND SCOOPS.

	1st Grade %	2nd Grade %	4th Grade %
Plain Black Shovels and Spades	45 and 5	45 and 5	45 and 5
Draining Tools	45 and 5	45 and 5	.....
Hollow Back Scoops	45 and 5	.....	45 and 5
Sand Shovels	45 and 5	.....	45 and 5
Hollow Back Shovels	45 and 5	.....	45 and 5
Hollow Back Coal Shovels	45 and 5	.....	45 and 5
Riveted Back Scoops	45 and 5	45 and 5	45 and 5
Miners' Spring Point Shovels	45 and 5	.....	.....

Above discounts apply whether goods are sold in carload or less than carloads.

The above discounts apply only to Black List; Black List prices being as follows:

BLACK LIST PRICES.

Plain Black Shovels and Spades	$29.00	$28.00	$25.00
Draining Tools, No. 2, black	29.00	27.50	.....
Hollow Back Scoops, No. 2, black	34.50	.....	32.00

Miners' Spring Point Shovel, No. 2, black	36.50	.....	.....

NET EXTRAS—

For each size larger than No. 2, add 25c dozen net.

For full polished, add $1.00 per dozen net; half polished, 50c per dozen net.

F.o.b. London, Hamilton, Toronto, Gananoque, Ottawa, Montreal, Quebec, Halifax, St. John, Moncton, and freight may be equalized thereon.

No Advances But Iron Market Steady

Montreal.

IRON AND STEEL.—Steady and unchanged basis for the various grades of iron and steel continues. The summer demand is quite active and conditions are reported satisfactory.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Many Sheet Prices Indicate Holdings

Montreal.

SHEETS AND PLATES.—It would appear that there has been considerable stock of sheets here and there for the basis is still an unsettled one and sales are made at varying prices from day to day. Actual changes have not been made during the week. It is evident, notwithstanding, that the basis quoted is quite near rock bottom. There has been a fair volume of business here.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35

20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

One Cent Advance For Lead Pipe

Montreal.

LEAD PIPE, ETC.—Advances are made for lead pipe and lead waste of one cent per pound. The increase takes effect at once. There are no further advances, but most lines in the list are somewhat firmer. There has been a fairly good trade and the outlook is better.

Lead pipe	0 12½
Lead waste	0 13½
Lead traps and bends	15%
Lead wool, lb.	0 13
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½

40-60	0 35
45-55	0 37½
50-50	0 40¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Larger Sale For The Old Materials

Montreal.

OLD MATERIAL.—Sales of large quantities of old material have been made here and there, it is stated, and there has been a large receipt of old stuff from the dismantled munition plants. Better prices are in prospect for a great many of the materials, it is said, if the mills secure larger orders for manufactured products, and which they likely will later on.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00

Heavy copper	0 16	0 16½
Wrought iron, No. 1, per gr. ton	....	12 00

Antimony is Stronger; Ingots Are Selling

Montreal.

INGOT METALS.—In a general sense there has been a fair movement of various metals. Prices are quite firm. The only change of price is that of an advance for antimony.

COPPER. — Firmness characterizes the market and there is every indication of firm prices prevailing. Demand is quite good. Price, 22-22½c. There is probability of higher prices ruling at once.

TIN.—With the removal of the restrictions as to import in the United States, there has been an increased interest and trading is expected to take on a new aspect. Price holds here at 54c.

LEAD.—Firmer markets are featured in the States and it is not unlikely that there will be a firming of local markets. In the meantime prices remain at 7¼c lb.

ANTIMONY.—Ten cents is quoted as a low price level here. The market does not promise immediate further change, but when made this will be in the nature of an advance, it is stated.

ALUMINUM—An easy but unchanged condition prevails. Price, 35c.

SPELTER.—Export demand has been good. The undertone is steadily firm and prices remain at 9¼c.

PIG IRON.—There has been a better tone to the market. Prices here are held steadily at $48 per ton.

TORONTO MARKETS

TORONTO, July 10—Price changes have been very numerous again this week with a great many lines showing an upward trend. Chief among these are leather belting, half soles, tarred felt, copper rivets and many lines of cotton, such as twine, sash cord, rope, etc. Copper boilers, tea pots and tea kettles are also higher and an advance of 1c per gallon is shown in coal oil. Practically all line of old materials have advanced, brass, copper and lead being higher. Wrought nipples show a decline and a slight downward revision is noted in lead and waste pipe.

Leather Belting Registers Advances

Toronto.

LEATHER BELTING.—Higher prices have become effective on leather belting following the continued strength of the hide market. Even at the new discounts named to-day, manufacturers intimate that it does not look as though the peak has been reached. Business is good and there is no reason to complain on that score. Quotations being made to-day are for extra quality 23 per cent. from standard list, and standard quality, 23 and 10 per cent. from standard list.

Tap Soles, Lifts Register 25% Advance

Toronto.

TAP SOLES, TOP LIFTS.—A further sharp advance has occurred during the week on the price of tap soles and top lifts. The new prices which are being named to the trade provide for an advance of 25 per cent. On this basis quotations which are now in evidence on this line are for men's taps, grade No. 120, $4.85 doz. pairs; No. 121, $4.60; No. 122, $4.40; No. 123, $4.20. Men's slip soles No. 124 are quoted at $3 doz. pairs; No. 125, $2.80; No. 126, $2.55; No. 127, $2.40 and No. 128, $2.20. Boys' taps, X grade, No. 30½, are quoted at $3.60 per doz. pairs; No. 31½, $3.30; No. 31¾, $3.05. Women's taps, No. 37¼, are quoted at $4.50 per doz. pairs; No. 37¾, $3.05; No. 37½, $2.60. Men's top lifts are being quoted at the following prices: No. 50, large, $2 per doz. pairs; No. 51, medium, $1.80; No. 52, small, $1.60; No. 53, large, $1.40; No. 54, medium, $1.20; No. 55, small, $1. Boys' top lifts, No. 56, large, are quoted at $1 per doz. pairs, and women's No. 82, medium, are quoted at $1.20.

Clothes Lines, Seine Twine Move Up

Toronto.

CLOTHES LINES, SEINE TWINE.—Revised prices are shown in many lines of cotton goods this week, and among those affected are cotton clothes lines. New prices which are being named to the trade are for the 40 ft., $3.20 doz.; 48 ft., $3.85, and 60 ft., $4.80. There has also been a revision in seine twine and Nos. 12 and 15 are now being quoted at 93c lb., and Nos. 18 to 72, 90c lb.

Copper Rivets Higher; Burrs Hold

Toronto.

COPPER RIVETS AND BURRS.—A change has been named in the discounts applying on copper rivets, effective Monday of this week, which provides for an advance from the previous figures. The new prices which are being quoted to the trade are given below along with the prices formerly in effect for comparative purposes. Copper burrs, it will be noted, did not change.

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding one-third of combined weight of copper rivets and copper burrs, discount before, list less 15 per cent.; discount now, list less 10 per cent.

Copper rivets with copper burrs where the burrs are more than one-third of the combined weight of the copper rivets and copper burrs: copper rivets, list less 15 per cent. before, 10 per cent. now; copper burrs up to one-third of combined weight of copper rivets and copper burrs, list less 15 per cent., now list less 10 per cent.

Copper burrs in excess of one-third of combined weight of copper rivets and copper burrs, list plus 25 per cent, now list plus 25 per cent.

Copper burrs only, list plus 25 per cent., now list plus 25 per cent.

Builders' Hardware in Strong Position

Toronto.

BUILDERS' HARDWARE.—Advices said to be in hand advising of a change in the price of the various lines of builders' hardware. Full details are not yet available, but it is understood that when the new prices are finally put into effect that there will be a fairly substantial increase show.

Sharp Advance in Rifles and Shot Guns

Toronto.

RIFLES AND SHOT GUNS.—Another sharp advance has occurred this week in the price applying to Winchester rifles and shot guns. These have been selling to the trade at standard list plus 10 per cent., and on the new basis they are being quoted at list plus 25 per cent. This is said to be a result of higher labor costs, which have added so greatly to production figures.

Cotton Wrapping Twine, Wick Higher

Toronto.

WRAPPING TWINE, WICKS.—New prices have been named on cotton wrapping twine this week, which provide for an advance over figures formerly in effect. The 3 ply in balls is now being quoted at 71c per lb., and in cones 70c per lb. The 4 ply cotton twine in cones is quoted at 73½c per lb.

Cotton candle wick has also been revised and is now selling to the trade at 68c lb.

Tarred Felt Up 15c; Roofing Firm

Toronto.

TARRED FELT, ROOFING.—An advance has been made in tarred felt this

week, the price moving up from $3.75 to $3.90 per 100 lbs. An increase is also shown in Red Star ready roofing, the 2 ply moving up from $1.40 to $1.60 per sq., and 3 ply from $1.70 to $1.90 per square.

The roofing market is considered very strong, the rag market being tight and the price of felt advancing rapidly. An advance in most lines has been made in the U.S., approximating 15c to 20c per roll, whereas tarred felt in that market to the south went up as much as 25c. Higher roofing prices seem to be a possibility.

Cups, Lemon Squeezers Show Advance

Toronto.

CUPS, LEMON SQUEEZERS.—There has been a revision upwards in many lines of manufactured aluminum ware, such as cups, lemon squeezers, salt and pepper shakers, and kindred lines. The new scale of quotations is on a higher level than formerly was ruling.

Jute Twine Up; Cordage Active

Toronto.

CORDAGE, TWINE.—There has been an advance this week in jute twines, the coarse grades advancing one cent per lb., and the finer grade two cents per lb. The market seems to rule with a fairly strong undertone and indications are that the markets may be maintained at at least its present level for some little time. There has been nothing new develop in regard to rope, although the hay fork rope is showing a remarkably good volume of sales with other grades fairly active. Prices remain firm, the following quotations being made: pure manila, 34c lb. base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c; sisal lath yarn, 27½c. Crop reports indicating short straw on the grain are affecting sales of binder twine adversely and repeat business has fallen off somewhat. Prices are steady at figures shown in current market quotations.

Sash Cord Up 4c; Cotton Rope Stiffens

Toronto.

SASH CORD.—Revised prices are again the order of the day for sash cord, and the Hercules No. 6 now quoted at 75c lb., the No. 7 at 74c and No. 8 at 73c. Star sash cord No. 5, is quoted at $13.20 per doz. net.

Quotations which are just being issued to the trade on cotton rope show a revision upward in this line. The present scale of quotations is for ⅛ in., 79c lb.; 5-32 in., 78c; 3-16 in., 74¾c and ¼ in. and larger 73½c.

Blind cord has also joined the list of cotton goods to be revised, the white No. 3½ is now quoted at $2.20 doz.; the No. 4 at $3.50, and the No. 4½ at $4.85. The drab No. 3½ is quoted to the trade at $2.65 doz.; No. 4 at $3.95, and No. 4½ at $5.25.

Advance of 1c Made in Coal Oil; Gasoline

Toronto.

OILS, GASOLINE.—An advance of 1c per gal. has been made in the price of coal oil, effective Wednesday of this week. What is back of this change has not been given out but the prices which are being quoted to the trade are now for the Royalite 20½c per gal., and Palacine, 23½c per gal. The demand keeps up at a remarkably high level, but orders are being taken care of promptly; no shortage of supplies so far as can be determined has been evident.

Gasoline holds at an unchanged figure, namely 32c per gal. Business in this product is very active. There have been some changes made in black oil, this declining still further. Summer black oil is quoted at 13½c and Winter at 15c per gal., list subject to a discount of 15 per cent.

CHANGE ON PIPE DISCOUNTS

Advices are to hand regarding the discounts on ordinary wrought iron pipe when bought in quantities. Heretofore, when 5,000 feet or more was purchased in one lot the discount allowed was 5 per cent. This has been now changed and the 5 per cent. discount is made to apply on orders for which the invoice value is not less than $400.

Copper Goods Up 10%; Stoves Very Firm

Toronto.

STOVES, WARES.—Copper products are very strong and a revision to higher levels has become effective this week. The new scale of prices provides for an advance of 10 per cent. as will be seen from the following figures being quoted: copper boilers, list plus 10 per cent., copper tea kettles, list plus 10 per cent., copper tea kettles in 3 doz. lots, list plus 10 per cent., less 10 per cent.; copper tea and coffee pots, list plus 10 per cent.; in 3 doz. lots, list plus 10 per cent. less 10 per cent.

Manufacturers indicate that they are getting business lined up on stoves and ranges for Fall, and whereas they are not pressing very aggressively for trade there seems a tendency on the part of the retailers to cover for supplies which they think they will need. All Summer lines are still very active, and manufacturers and jobbers are both experiencing difficulty in getting shipments away to retailers promptly.

Nails Hold Firm; Wire Products Too

Toronto.

NAILS, WIRE.—There seems to be a fair demand for nails and manufacturers generally are fairly well satisfied with the volume of business they are doing. The market seems to have stiffened up, and there is some talk of a higher level of quotations being reached. However, there is no indication of this just at the moment, and until things open up considerably more, it is possible that the present prices will be maintained. Quotations which are being made to the trade are, for the wire nails, $4.70 per 100 lbs., and the cut nails, $4.75.

Activity seems to be paramount in regard to wire, and reports which emanate from the other side indicate that business over there in all lines of wire products has been exceptionally heavy. The market is firm as a result and whereas no changes have been made locally, there is little tendency shown to make concessions from the base price on smooth steel wire of $5 per 100 lbs. Labor costs are factors which it is thought may contribute to higher prices.

Iron and Steel Bars Hold Steady

Toronto.

IRON AND STEEL BARS.—New developments are lacking in regard to this material. There is a fair demand in evidence and prices are very well maintained. There is no difficulty in securing supplies as far as can be learned and the figures generally prevailing to the trade are listed herewith:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Nipples Register Sharp Decline

Toronto.

WROUGHT NIPPLES. — There has been a sharp decline recorded this week in the price of wrought nipples. The present scale of discounts which are applying on these lines are for 4 in. and under 80 per cent., replacing a former discount of 60 per cent.; 4½ in. and larger are now quoted at 70%, replacing a former discount of 50% and 4 in. and under, running thread are now quoted at 50 per cent., replacing a former discount of 30 per cent. This change does not extend to wrought couplings or wrought pipe.

Wrought Pipe Holds; Tubes Too

Toronto.

WROUGHT PIPE, BOILER TUBES. —The market is steady on wrought pipe and no change is shown in new list published last Friday, except in nipples as mentioned above. Prices appear in current market quotations.

Boiler tubes are without any quotable change also and jobbers report a fairly nice volume of business being handled. Quotations follow:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

New Basis on Lead and Waste Pipe

Toronto.

LEAD AND ZINC PRODUCTS.—A new basis of quoting has been determined upon in lead and waste pipe, which it is thought may result in minimizing frequent changes in the list prices. Prices have been advanced 1c per lb., making the list on lead pipe 12½c and lead waste pipe, 13½c, and to which a discount of 10 per cent. now applies; sizes over 8 in. take a list of 14½c.

There has been no change in prices shown below on solder. Business in these various lines is reported very satisfactory.

Lead pipe, list, per lb.	....	$0 12½
Lead waste pipe, list, per lb.	....	0 13½
Do., over 8 inches, list, per lb.	....	0 14½
Above subject to discount of 10%.		
Lead traps and bends	....	15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

Steady Tone to Sheets and Plates

Toronto.

SHEETS AND PLATES.—Steadiness marks the position of sheets and plates. A very nice volume of business is being handled and the outlook is considered promising. Prices remain at unchanged figures for the week at the following levels:

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets On Good Basis

Toronto.

CORRUGATED SHEETS.—There is a feeling that corrugated sheets are on a good basis, and outlook seems to be pretty satisfactory. Manufacturers are enjoying a very good trade and there seems no immediate prospect of a change from the following price levels:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

General Revision Upward in Scrap Prices

Toronto.

OLD MATERIALS.—There has been a general revision upward in scrap prices this week and a much better feeling prevails throughout the trade. Even higher prices seem to be well within the realm of possibility now. It is said there is a movement on the part of some of the dealers to let go of a considerable part of their holdings. They figure out that prices are not going to jump very much higher, especially in coppers. In fact it may be that they are now near the level that will make about as good selling as can be expected for some weeks.

Fairly large shipments of iron and steel are being made to the United States market. Canadian mills and foundries are not taking up very much material. Range of prices now in effect follows:

Dealers' Buying Prices—		
Tea lead	....	0 03½
Heavy lead pipe	....	0 05
Pipe scrap	....	8 00
Stove plate, per ton	....	12 00
No. 2 busheling	....	8 00
Yellow brass	....	0 08½
Red brass	....	0 13
Light brass	....	0 06
Scrap zinc	....	0 05
Heavy copper	....	0 16½
Wrought iron, No. 1, per gr. ton	....	15 00
No. 1 machinery cast	....	16 00
Heavy melting steel	....	12 00
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots	....	0 06
Bicycle tires	....	0 03
Automobile tires	0 03½	0 04

Copper Makes Further Advance

Toronto.

INGOT METALS. — Copper made a further advance of 1c per pound this week furnishing the feature in the metal markets. There seems to be a fair amount of activity in the various metals, the situation generally being much improved over that in the early months of the year.

COPPER.—Another 1c per pound has been added to the price of this metal this week, bringing prices up to 22½c per pound. There is plenty of copper available and a very fair demand.

TIN.—The market in London, England, showed substantial advances during the week, but whether this will continue is still uncertain. No change has been made locally from last week's figures of 55c to 56c per pound, but the British situation, if continued on its present move, may affect the markets here.

SPELTER.—No change is reported in spelter this week, the price holding at 8½c to 9c per pound.

LEAD.—Some efforts are apparent to create a bull market on this metal in the United States, but leading interests seem content to hold quotations steady. Quotations here are being made at 6½c to 6¾c per pound, unchanged figures.

ANTIMONY.—A firm undertone is shown here, but for the week prices have held without change.

ALUMINUM.—The volume of business is still limited to small amounts and price holds at around 35c per pound.

LONDON MARKETS

LONDON, Ontario, July 10—With the exception of a few lines of plated butts, tee and strap hinges, shelf brackets and wrought staples, which show reductions, there is a decided tendency for prices to be firm and even advance. Business has never been better and all through this district the stores are busy. Haying and harvesting supplies are in brisk demand at the present time. Collections were never better and business has been so good that merchants are able to meet their obligations promptly.

No Changes Shown in Nails or Rope

London, Ont.

NAILS, ROPE.—There has been a brisk demand for nails and this promises to develop as an unusual amount of building is in prospect. Prices show no change and are as follows: wire, $4.70 base; cut, $4.75 base.

There has been a big sale for rope recently. Prices are holding steadily as follows:

Pure manila, 34c base per lb.; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Paris Green is Still in Demand

London, Ont.

PARIS GREEN.—The ravages of insect pests throughout the district have created a big demand for Paris green and sales have been very active. Prices show no change and are as follows:

½ lb. pkgs., 54c per lb.; 1 lb. pkgs., 52c; 25 lb. drums, 50c; 50 lb. drums, 49c; 100 lb. drums, 49c.

Bull Dog Vises Show an Advance

London, Ont.

BULL DOG VISES.—New and higher quotations are now in effect on genuine Bull Dog vises. The new figures are:

No. 50, $10 each; No. 41, $11.50; No. 52, $14; No. 53, $17.25; No. 54, $22.25.

Winchester Rifles and Shot Guns Are Hihger

London, Ont.

WINCHESTER RIFLES, SHOT GUNS. — Winchester rifles and shot guns have moved to higher levels, the new quotations being 25 per cent. advance on list as against the old of ten per cent. advance on list. All take down rifles also show an advance on list prices.

Slight Reduction is Made in Ash Sifters

London, Ont.

ASH SIFTERS.—For present or Fall bookings ash sifter prices are a little lower than last year's quotations. Prices are: Banner, $3.20 each; Burrows, No. 1, $4.75 each.

Plated Butts Are Revised Downward

London, Ont.

PLATED BUTTS.—Lower quotations are named on plated butts, the figures being as follows::

No. 241, 2½x2½, 33c pair; 3x3, 35c; 3½x3½, 36c; 4x4, 46c; 4½x4½, 68c; 5x5, 85c.

Light and Heavy Tee Hinges Are Cheaper

London, Ont.

TEE AND STRAP HINGES. — Both light and heavy tee and strap hinges have been revised and the new quotations are downward. The light lines are now 12½ per cent. off list as against 10 per cent. off list formerly, and the same quotation is given for the heavy goods also. Net prices on the heavy goods are figured at 12½ per cent. Quotations are as follows:

Loose.	Heavy tee Per doz.	Heavy strap Per doz.
4 inches	$2.23	$2.64
5 inches	2.80	3.24
6 inches	3.15	3.50
8 inches	3.59	4.73
10 inches	6.39	8.40
12 inches	10.15	10.41
14 inches	10.32	11.90

Lower Prices For Cellar Window Bolts

London, Ont.

JAPANNED CELLAR WINDOW BOLTS.—A new and lower quotation is being made on japanned cellar window bolts, as follows: No. 1076x2½ in., 90c doz. Japanned barrel bolts have also been revised to lower prices as follows: No. 1078x2½ in., 85c doz.; 3 in., $1.05; 4 in., $1.20; 5 in., $1.50.

Sash Cord Higher; Also Cotton Rope

London, Ont.

SASH CORD, COTTON ROPE. — Cotton goods show an advance. Prices on sash cord are now as follows: No. 6, 75c per lb.; No. 7, 75c, and No. 8 to 12, 73c per lb.

Cotton rope is also higher, quotations being 3-16 70c a lb, and ¼ in. and larger 69c per lb.

Seine Twine Higher; Also Awning Cord

London, Ont.

SEINE TWINE, AWNING CORD, CLOTHES LINE.—All of these goods have moved to higher levels and quotations are now being made on the following basis:

No. 18 and larger, in 1-lb. spools, 89 cents per lb.; No. 18 and larger in ¼-lb. spools, 90 cents per lb.; No. 15 and smaller, in 1-lb. spools, 90 cents per lb.; No. 15 and smaller ¼-lb. spools, 91 cents per lb.

NO CHANGE IN M. R. M. HORSE NAILS

In the June 28 issue of HARDWARE AND METAL on page 55, there was an item respecting a decline in the price of M. R. M. horseshoe nails. This was an error as there has been no change recorded in the selling price of these. HARDWARE AND METAL secured this information from a thoroughly reliable source, but the interpretation placed on certain correspondence happened to be wrong. Prices prevailing are therefore, for No. 5, $5 per box of 25 pounds; No. 6, $4.75; Nos. 7 and 8, $4.50; Nos. 9 to 12, $4.25.

Braided awning cord (new prices)—No. 3, $2.00 doz. hanks; No. 3½, $2.25; No. 4, $3.60; No. 4½, $4.90.

Twisted cotton clothes lines—30 ft., $2.60 dozen; 48 ft., $3.75; 60 ft., $4.85.

Higher Quotations on Pearson Horse Pokes

London, Ont.

PEARSON HORSE POKES.—A new and higher quotation on Pearson horse pokes is now effective as follows: $16.50 per doz.

Copper Rivet Prices Have Been Advanced

London, Ont.

COPPER RIVETS, BURRS.—Higher quotations have been made on these lines following the recent advances in copper prices. The new quotations are:

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding one-third of combined weight of copper rivets and copper burrs, list less 10 per cent., as against the old discount of 15 per cent.

Copper rivets with copper burrs where the burrs are more than one-third of the combined weight of the copper rivets and copper burrs: copper rivets, list less 10 per cent., formerly 15 per cent.; copper burrs up to one-third of combined weight of copper rivets and copper burrs, list less 10 per cent., formerly 15 per cent. Copper burrs in excess of one-third of combined weight of copper rivets and copper burrs, list plus 25 per cent. Copper burrs only, list plus 25 per cent.

Ten Per Cent. Drop in Japanned Brackets

London, Ont.

JAPANNED SHELF BRACKETS. — New prices which are ten per cent. lower than former quotations are now effective on these goods. The new prices are:

3x4 in., 80c doz. pair; 4x5 in., $1.05; 5x7 in., $1.60; 6x8 in., $2; 7x9 in., $2.35; 8x10 in., $2.75; 10x12 in., $3.85; 12x14 in., $5.75.

Wrought Staples Show a Reduction

London, Ont.

WROUGHT STAPLES.—A revision to lower levels has been made in wrought staples and the following are the prices:

1¼ in., 50c gross; 1½ in., 50c; 2 in., 70c; 2¼ in., 80c; 2½ in., 95c; 3 in., $1.25; 3½ in., $1.50; 4 in., $2.15.

Valve And Plunger Leathers Up 10%

London, Ont.

VALVE, PLUNGER, PUMP CUP LEATHERS.—All of these goods have moved to higher prices following the recent stiff advances in leather. The new prices are:

Pump valve and plunger leathers—No. 1x2½ inch, $1.00 dozen; No. 2x3 inch, $1.30 dozen; No. 3x3½ inch, $1.50 dozen; No. 4x4 inch, $1.85 dozen.

Pump cup leathers—No. 1x2½ inch, $1.35 dozen; No. 2x3, $1.85; No. 3x3½, $2.35; No. 4x4, $2.75.

Cut Lace Leather Soles, Heels Advance

London, Ont.

CUT LACE LEATHER, SOLES, HEELS.—New and higher prices are effective on all these goods. The quotations are as follows:

Cut lace leather, $2.15 lb.

Leather soles and heels, new prices on best selling numbers—Men's, No. 121, leather soles, $4.60 dozen pair; No. 122, $4.40; No. 123, $4.20. Boys', No. 31½, leather soles, $3.30. Ladies', No. 37½, leather soles, $2.60. Men's, No. 51, leather heels, $1.80 dozen pair; No. 52, $1.60. Ladies', No. 81, leather heels, $1.40.

Advance of 20c in Linseed Oil

London, Ont.

LINSEED OIL. — Prices are again moved to still higher figures, the advance being 20c per gal. Quotations are now as follows:

	Raw.	Boiled.
1 to 2 barrels, gal.	$2.95	$2.78
3 to 5 barrels, gal.	2.94	2.97
6 to 9 barrels, gal.	2.92	2.95

Less barrels, add 10 cents gallon.

No Changes Shown in Prices of Turpentine

London, Ont.

TURPENTINE.—There has been a very fair demand for turpentine. Prices show no change from the following:

1 barrel lots, $1.55 per Imp. gal.; 2 to 4 barrel lots, $1.54; 5 gal. lots, $1.65.

White Lead in Oil is in Good Demand

London, Ont.

WHITE LEAD IN OIL.—There has been a good sale for white lead in oil. Prices are as follows:

Pure, tons, $16.35 per 100 lbs.; less tons, $16.70.

Putty Prices Are All Holding Firmly

London, Ont.

PUTTY.—There has been a good demand for putty and it is expected that it will be maintained. Prices show no change and are as follows:

Standard, 100 lb. drums, $6.80 per 100 lbs.; 25 lb. drums, $7.05; pure, 100 lb. drums, $9.30; 25 lb. drums, $9.55.

WINNIPEG MARKETS

WINNIPEG, July 10—Price changes for the past week show only a limited number of items affected and include both advances and declines. Among the lines are cobblers' sets, glaziers' points, gasoline faucets and turnbuckles. There are no changes in any of the heavy goods and prices just at present seem firm.

With the big strike called off, practically all lines of businesses are running 100 per cent., with many working overtime to take care of the rush of business that has accumulated in the mails. However, all this will no doubt be taken care of within the next week. With the approach of the harvest season, which will be from two to three weeks earlier than last year, there is good demand for valves, packing, harvest tools, etc.

Rope Prices Are Showing Firmness

Winnipeg.

ROPE.—Prices on rope of all grades which were very active a few months ago seem to have reached a firm basis, while the demand is reported very good and stocks well assorted. To-day's prices are as follows: pure manila 35¼c, British manila, 31¼c, sisal 28¼c, African hemp 31¼c, lath yarn 28¼c.

Cobblers' Sets Show 10 Per Cent. Reduction

Winnipeg.

COBBLERS' SETS.—A reduction of approximately 10 per cent. is recorded during the week on Economical cobblers' sets, based on new lists issued by the manufacturers, and to-day's price is now $12 doz.

Zinc Coated Points For Glaziers Lower

Winnipeg.

ZINC COATED GLAZIER'S POINTS.—Zinc coated glazier's points are also revised to lower levels, due to the lowering of the zinc market, new prices just issued being from 5 to 10 per cent. below former quotations, making to-day's price $1.40 per doz. papers.

Gasoline Faucets Slightly Reduced

Winnipeg.

GASOLINE FAUCETS. — Gasoline faucets No. 35 show a slight drop during the past week, based on lower prices for raw materials and to-day's ruling price on this line is now $13.80 doz.

New Prices Named on Stub End Turnbuckles

Winnipeg.

STUB END TURNBUCKLES.—Stub end turnbuckles have undergone a general revision, based on new prices issued by the manufacturers, the smallest sizes showing a slight advance, while the larger sizes come in for a reduction. To-day's market prices on a few of the most common sizes is given as follows: ½, 59c; ⅝, 65c; ¾, 82c; ⅞, 98c; 1 in., $1.15 each.

Wrought Iron Pipe is Holding Firmly

Winnipeg.

WROUGHT IRON PIPE.—Prices on wrought iron pipe still hold firm on the local market at former quotations. Sales are reported good on this commodity, with stocks fairly well assorted. To-day's ruling prices are confirmed as follows:

	Black.	Galv'd.
Wrought Iron Pipe, 100 ft., ¼	4.91	$7.20
⅜	5.00	7.34
½	6.66	8.37
¾	8.33	10.71
1	12.33	15.75
1¼	16.65	21.29
1½	19.94	25.43
2	26.82	34.25
2½	43.07	54.77
3	56.40	71.70
3½	73.86	.....
4	87.25	.....
4½	100.26	.....
5	116.82	.....
6	151.52	.....

Shovels and Scoops Showing No Changes

Winnipeg.

SHOVELS AND SCOOPS. — Shovel and scoop prices still hold firm at former quotations, while the sale is reported very good, particularly on scoops, as the harvest season is not far off. To-day's ruling prices are herewith confirmed. Shovels:

Fox and Olds—D.H. sq. pt., $15.05 doz.; D.H. rd., $15.05; L.H. sq., $15.05; L.H. rd., $15.05.

Bulldog and Junes—D.H. sq., $16.30 doz.; D.H. rd., $16.30; L.H. sq., $16.30; L.H. rd., $16.30.

Scoops, Crescent—No. 4, $19.00; No. 6, $19.50; No. 8, $20.00; No. 10, $20.50 doz.

Moose and Jones—No. 4, $19.90; No. 6, $20.90; No. 8, $21.40.

Coil Chain Prices Are Holding Steady

Winnipeg.

COIL CHAIN.—Coil chain prices show no change of late holding very firm. They are given as follows:

3-16 in., $19.20; ¼ in., $16.25; 5-16 in., $13.75; ⅜ in., $12.75; 7-16 in., $12.35; ½ in., $12.25; 9-16 in., $12.25; ⅝ in., $12; ¾ in., $11.65; 1 in., $11.40 per 100 lbs.

Log chain: 5-16 in., $15.55; ⅜ in., $14.55; ½ in., $14.05 per 100 lbs.

Linseed Oil Shows Advance of 50c

Winnipeg.

LINSEED OIL.—Linseed oil prices show a further sharp advance this week, amounting to 50c per gallon. Indications point to even higher levels. Sales at to-day's prices are reported fairly light, while stocks are not heavy. To-day's ruling prices are now given as follows: Raw linseed oil, $2.90 gal., boiled linseed oil $2.93 gal.

Expect Turpentine Will Remain Steady

Winnipeg.

TURPENTINE. — Turpentine is another paint commodity which is also holding very firm on the local market, and from present reports no reduction is anticipated for some time at least. Sales are reported below normal owing to present prices, which are confirmed as follows: barrel lots, $1.65 gal.; half barrel lots, $1.68 gal.; 5 gal. lots, $1.70 gal.; 1 gal. lots, $1.70 gal., plus the usual extras for containers.

Advance Looked For in Prices of Paints

Winnipeg.

PREPARED PAINTS.—Following the recent heavy advances in both linseed oil and turpentine, paint prices are due for a further advance, which is reported at 25c per gal., and new price lists will no doubt be issued by the paint manufacturers this week.

PITTSBURGH MARKETS

PITTSBURGH, Pa., July 10.—Pig iron production in June was at the rate of about 26,100,000 tons a year, the rate showing an increase of an even million tons over the rate in May. This is the first increase in pig iron production since before the war ended. Last Sep-

(Continued on page 74.)

Get Ready for Fall Paint Business

Review of Conditions Faced in Spring and Attitude of Some Dealers Then a Lesson For Fall—Public Demand Large—Advertising Campaings Help—The Price Question Again—Buy to Meet Needs.

WHEN paint salesmen were booking spring orders last fall dealers shook their heads, wise-acre fashion, and declared: "Paint prices are too high; people won't buy, so we won't stock up. We'll wait till prices come down; they're bound to come down."

Prices didn't come down and still the public bought. Of necessity prices had to go up. Linseed oil went up, labor went up, cans went up; scarcely anything but what went up in the manufacture of paint.

One Dealer's Experience

The following incidents illustrate the trend of events. A paint dealer arranged to stock a line of floor paint in half-pints at near-popular prices, thinking that thereby he would overcome the high price conditions. In the midst of the active season enquiry elicited the fact that the experiment didn't work.

"Why?" he was asked.

His explanation was more of a confession — "When people want floor paint they want it in sizes that will meet their requirements. If it takes a quart to cover their floor, they want a quart; if it takes a gallon, they want a gallon. They're not going to monkey around with small sizes.

"What about prices?"

"That's where I got fooled the most," he continued in confession. "When people make up their minds to paint the floor prices don't seem to bother them in the least. They've got used to paying higher prices for everything else and they've fallen right in line about paints. Fact of the matter is there is a question arises in their minds as to quality if they're asked too low a price."

Another dealer openly argued that if all paint dealers would hold off in their buying it would lower both linseed oil and paint prices. This man foolishly attempted to buck against a situation that neither he nor the whole paint trade combined could stop.

Did the prices come down? They did not!

Public Demand Was There

Public demand for paint put up an impenetrable barrier against any such possible hold-up of the trade. The upshot was that he was forced to buy when his shelves were practically bare and at higher prices than at the time he was urging most strongly not to buy.

Neither high prices nor holding off of buying could possibly stop the trade this spring.

One factor did retard the amount of painting that might have been done. The shortage of painting labor has made it necessary for many to postpone their painting until this fall or next spring. In one Western Ontario town a man supplying the farm trade with lumber, building supplies and farm equipment explained that he would have taken on a line of paint if there had been painters in town who could apply it. "Time and again I've had farmers practically begging me to get a painter somewhere to paint up their homes. They've got the money to pay for good painters, but they are not to be had. They haven't time to do it themselves because they're shorthanded for their own work. There is a small-sized gold mine with paints for me if we could only get the painters."

Advertising Campaigns Help

The various campaigns that have been running through Canadian farm papers and magazines have also been of immense value in bringing home the necessity of using paint for protection and preservation.

The Secretary of the Canadian Master Painters' Association affirms that this campaign has undoubtedly increased the demand for paint and the services of painters.

In spite of all prophecies to the contrary the paint trade has been maintained and advanced this year, and from present appearances it will continue in demand as the public is brought more and more to the realization that paint is a necessity for protection and preservation. It has become more and more apparent to those interested in both the wholesale and retail distribution of paints and varnishes that this impetus will continue steadily throughout the year.

Haying and harvesting will probably bring a temporary lull in paint and varnish sales in the country districts and the summer holiday season will retard them to a certain extent in cities and towns, but an unusual demand is expected to revive this fall.

Fall Outlook Bright

Painting that could not be done this spring, on account of the lack of labor, will be done this fall before the winter months set in. The labor unrest that has prevailed throughout the country during the spring will become more settled and Canada, it is expected, will begin to experience the most prosperous time of the industrial reconstruction period.

The advertising campaigns are again expected to as-

GET READY FOR FALL PAINTING

(Continued from page 66)

sist in a large measure in advocating fall painting and backing up what many manufacturers have been doing in the past in their advertising, telling of the advantages of paint applied in the fall.

In conference recently with a number of Toronto master painters they all declared that the fall was by far the best time of the year for painting. One man stated that paint applied in the fall would look better and wear better the following summer than if applied in the spring of the same year.

Price Question Again

Perhaps the question of probable prices will loom up before some paint dealers as it did when spring orders were being bought last fall, and winter. Those is the know are positive in their opinions that history will repeat itself and that the public demand will continue as it did last spring. Anyone in the trade attempting prophecies concerning prices is not doing so in favor of any considerable measure of reduction. Prices are most likely to remain firm and the reasons reach way back into the fundamental conditions that exist in visible and possible supply of flaxseed, turpentine, pigments, dyestuffs and the labor market.

There is very little that is fictitious in these conditions. The flax acreage on this continent for 1919 has been reduced in favor of wheat at a guaranteed Government price. Russian oil is out of the question. Oil from India is difficult to obtain owing to shipping conditions.

Buy to Meet Needs

Now, what position is the retail dealer to assume under these circumstances? Certainly he should avoid the errors that many made in connection with this last spring's buying. He can confidently bank on a more than usual demand for paints and varnishes this fall. He should be prepared to meet this demand with an adequate stock. Too many sales were lost this last spring on account of inadequate buying. Hand-to-mouth buying has had its turn and there is nothing appea ing on the horizon to indicate that it will avail or be any safeguard this fall in view of the demand that is practically certain to come when fall painting is resumed.

This warning is being given at this early date to enable the far-sighted dealer taking care of every possible sale that comes his way.

Now is the time to get ready for the coming fall business. Stocks should l considered and bought as early as possible to insure supplies and early delivery. Individual advertising and advertising in co-operation with the manufacturer should be arranged now so that the natural demand and the demand created by all methods of advertising can be well taken care of.

As the retail paint dealer is the last link between the trade and the consumer, his complete readiness will contribute very largely to the success of the fall

Sheffield Refused Permission to Adopt Community Trade Mark

THE Local Legislation Committee of the British House of Commons has refused the application of the Sheffield Corporation for powers to register the name of its city as a community trade-mark and to control its use in connection with all metal manufactures. Included in the Corporation Bill now before Parliament is a "community trading clause," which provides that it be lawful for the corporation to register the word "Sheffield" or the words "Sheffield, England," or any such known marks as community trade-marks. The object was the very laudable one of preventing, in the interests of honest trading, the improper and misleading use of such words.

Would Protect Name

What the promoters particularly desired to secure was jurisdiction over the name of the city in connection with the titles of firms and companies. Had the application succeeded no person could have adopted "Sheffield" as part of the name of his business without the permission of the corporation, and the committee probably thought it inadvisable to entrust such arbitrary powers to a few individuals. Such authority vested in a responsible body like a municipal corporation would certainly be capable of much good, and no one could question the bona fides of the motive underlying the application; but unless exercised wisely and with perfect impartiality it might be found to contain potentialities of injustice and injury to individuals, as well as of invidious decisions. The committee was perhaps wise in recognizing those possibilities.

Questionable Ways

That the corporation possessed the best of grounds for their action will not be questioned by those who know that Sheffield's name is being used in many questionable ways in connection with businesses handling the city's best-known staples, and there is nothing, for instance, to prevent a foreign firm, making all its goods abroad, from establishing an office in Sheffield and including "Sheffield" in its title. Counsel for the Home Office, in opposing the proposal, said that the clause as drafted would prohibit a person manufacturing goods in Sheffield from adopting "Sheffield" as part of its trade name and would also prevent people carrying on business in Sheffield from calling themselves "The Sheffield So-and-So." In reply to this point it was stated that the corporation asked for discretionary jurisdiction in such cases, which would be subject to an appeal by the trader to the Registrar of Trade-marks.

May Be Registered

The utmost the committee was prepared to concede was the inclusion in the Bill of a clause empowering the Corporation to register the words in question as a community trade-mark to have effect only in such countries the laws of which recognize community trade-marks as applied to manufactured goods, and counsel on both sides were asked to draft and submit a clause embodying that power. Such a decision amounts to a rejection of the proposal, as the only country whose law recognizes community marks is Germany, where the plan was adopted shortly before the war. This enactment enables any community in the country to take advantage of the provision. The hint was thrown out during the course of the inquiry before the committee that it would be more desirable to legislate in the matter of community marks by a national rather than a local Bill.

The clause subsequently drafted and now part of the Bill awaiting Parliamentary sanction reads as follows: "The Cutlers' Company may register in Sheffield the word 'Sheffield' or the words 'Sheffield, England,' as community marks so that they may have effect as such in any country the law of which recognizes community marks as applied to manufactured goods." The effect of the clause is that the words mentioned can only be used for trade purposes in countries which eventually adopt the principle of community marks, with the permission of the person or body who registers them under the power of the Bill.

DU PONTS REPORTED TO BE ENTERING OIL INDUSTRY

According to press reports Charles A. Patterson, vice-president and general manager of the E. I. du Pont de Nemours & Co., with Sylvester D. Townsend, jr., one of the attorneys for these interests, Edward B. Rich and Simon L. Wolfe, well known oil operators, have incorporated the Atlas Petroleum Corporation, with an initial capitalization of $5,000,000.00.

The new company begins operations with seven producing wells, ample resources and over 33,000 acres of oil lands in West Virginia and Texas, completely equipped for an extensive development campaign.

T. S. SIMMS & CO. HOLD CONVENTION

Representatives from coast to coast of T. S. Simms & Co., Ltd., St. John, N.B., will gather at the headquarters of the company on July 15, 16, 17 and 18 for their annual convention. Discussions relative to the business outlook for fall and next spring will be taken up, and many subjects, such as prices and the policy of the company, will come up before the meetings. F. M. Baker and K. C. Baker, Toronto representatives of the company, and H. B. Agnew, London, Ont., representative, leave on Saturday night for the East to be in attendance.

BOECKH'S RUBBER SET BRUSHES

IMPORTANT JUDGMENT BY COURT OF APPEAL

THE action brought against the BOECKH COMPANY, LTD., to prevent their using the descriptive words "RUBBER SET" on, and in connection with their Brushes, has been **dismissed with Costs** against the Plaintiffs by the unanimous judgment of the Court of Appeal, which affirms the judgment of the Trial Judge, the Honorable Mr. Justice Masten.

The word Rubberset, or the words "RUBBER SET," are the only words which **accurately** and **absolutely** describe how the Brushes which have a Rubber Setting are made, and no person has, nor can have, a monopoly in the use of such word or words.

We think it only fair to notify the Trade and the General Public of this judgment, so that they cannot be misled as to our right to make use of the words "RUBBER SET" to indicate the process by which our genuine "RUBBER SET" Brushes are made.

Our **Paint, Varnish, Kalsomine, Sash Tools and Shaving Brushes** are made by our genuine "RUBBER SET" Process, by which the Bristles are firmly held in vulcanized rubber, and we are thereby able to **absolutely guarantee them** in every particular, and we use the words "RUBBER SET" to let the buyer know exactly how our Brushes are made.

"THE BRISTLES CAN'T COME OUT"

Every Brush Guaranteed

THE BOECKH COMPANY, LIMITED

TORONTO, CANADA

Big Demand For Paints in Western Canada; Going Out After It Proves Successful

"IS there a demand for paint in Western Canada? Say, if the hardware dealers of this country would get out and take the orders of farmers who need paint, want paint, and are ready to buy paint for the asking, we would not be able to supply the demand."

The speaker was James W. Duncan, traveling salesman for the Canada Paint Company in Western Canada, and the story of his own personal experiences in selling paint direct to farmers should be an eye-opener to merchants.

Mr. Duncan explained their policy of sales service whereby salesmen on the road stop over a few days wherever a new agency is established in order to visit farmers in the surrounding country, and demonstrate the possibility of selling paint.

"The other day," he said, "I established an agency with a Craik, Sask., firm, putting in a $500 stock of paint. I then accompanied the dealer in a car to the homes of 70 farmers in the immediate vicinity, and sold 12 good jobs in three days. We presented to each of these farmers attractive color schemes, and we impressed the farmers with the fact that they could convert their shabby homes and barns into fine appearing buildings at very little expense, while at the same time preserving them against rapid decay. Most farmers had an exaggerated idea of the cost of the work, and had not fully realized the saving qualities of paint, for they had never been told. They were quick to respond to the color schemes submitted to them as revealed in pictures of farm homes and buildings, and in short by canvassing them their desires were aroused to the point of buying. In this special case we secured five returned soldier painters from the G.W.V. of Regina to go out and handle the various jobs.

"There was no question of the money being available in any of these 12 cases. At any time, perhaps in the last two or three years, the farmer could have easily afforded to have his buildings painted. Like others all over the country he was buying automobiles, and phonographs and ranges, and like as not making a trip to California in the winter. The whole reason was that no one had endeavored to stimulate interest in the paint-up movement. Some of the jobs were on massive barns that had been recently built and which might have gone unpainted for a number of years if we had not happened along. In every case the paint was sold for cash, and the work was done for cash.

"We made the same kind of canvass in the case of a recently established store at Lang, Sask. This merchant sold $2,000 worth of paint since last December by taking the tip and going out after business."

The main feature of these experiences is that in every part of the country there are numbers of buildings which required to be painted. All that is required to complete a sale is for the country hardware merchant to observe these buildings and canvass their owners either directly in their homes or when they enter his store. He can, at least, pave the way for a sale and start the farmer thinking by supplying the farmer with some illustrations of color schemes to take home to his wife.

Apart from these direct methods it is easy to dress up a paint window during the summer months by using the posters supplied by the paint houses together with a display of color cards and pyramid piles of paint in tins. Such a window was on display in the store of William Anderson at Melville early in June, and he stated that he made several sales as a direct result of it.

COURT OF APPEAL AFFIRMS THE JUDGMENT

Dismisses With Costs Action Brought Against the Boeckh Company, Ltd.

It will be recalled that action was brought against the Boeckh Company, Ltd., Toronto, by the Rubber Set Company, to prevent their using the descriptive words "Rubber Set" in connection with their brushes. The Court of Appeal has given judgment in favor of the defendants dismissing the action with costs. The word Rubberset, or the words "Rubber Set," are held to be the only words which accurately and absolutely describe how brushes which have a rubber setting are made, and no person has, nor can have, a monopoly in the use of such word or words.

TIN PLATE PURCHASES INCREASING

Canada is now one of the largest buyers of tin plate, terne plate and taggers tin that the United States has. Figures available for the latest monthly period show that in that time Canada purchased 9,496,288 pounds, valued at $709,301. The United States' next largest customer for tin was the Argentine, which took tin valued at $425,419.

ATTRACTIVE WINDOWS BRING RESULTS

Here is a view of the store front of Dinnick's, 1520-1522 Commercial Drive, Vancouver, B. C. Splendid opportunities for displays are presented by the fine store windows and in inset will be seen a window display recently put in on aluminum ware. In commenting on this W. D. Dinnick stated that the firm had received excellent results from a sales and advertising standpoint. "The window when lighted at night," Mr. Dinnick stated, "produced a brilliant effect and brought people from outside the city who saw the window in passing on the street car to our store to make purchases." In front of the store will be seen the motor car which this firm uses in speeding up deliveries to their customers.

The Salesman's Good Word

The salesman's finger is always on the pulse of the buyer, and he is, therefore, a good judge of the merit of the goods he sells over the counter. It's pleasant business for a salesman to recommend and sell things that always please, and bring customers back for more of the same.

This is why Berry Brothers Varnishes, Enamels and Stains have won the salesman's good word. There are never any complaints of "Berry" brands, they always satisfy because they are uniformly good and reliable.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 10.—Three dollar linseed oil may be a general low basis before the week end. In the meantime few are naming prices to the trade, and flaxseed has scored to the highest price in history, being quoted at $6.04 on Wednesday's market. The lowest and only quotation made on oil is $2.90, and this may be withdrawn at any moment. World stocks of flaxseed are reported short and it is impossible to predict where the advances will stop. Turpentine, while easing for a brief period, reacted and has climbed back to slightly higher levels than those quoted last week. Putty and white lead in oil are firming and may be advanced soon. Shellacs are scarce and higher and varnishes are decidely firmer. Litharge and red lead are quoted down.

Record Flax Price; Oil Exceeds $2.90

Montreal.

LINSEED OIL.—It is unsafe to make any predictions on linseed oil and crushers are less inclined than ever before to make them. Flaxseed reached the unprecedented level of $6.04 per bushel on Wednesday. It may go on till the $7.00 mark is reached. Short supplies are reported aud crushers are able to secure seed only on the advance basis. Jobbers, for the most part, are out of the market and will not quote. Some oil has been sold, it is stated, at above $3 per gallon. Increases will perhaps make the basis at least $3.00 before the week-end.

Raw—	Imp. Gal.
1 to 4 barrels	$2 90
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$2 92½
5 to 9 barrels	....
10 to 25 barrels	....

More Turpentine; But No Reduction

Montreal.

TURPENTINE—While there has been some relief in the matter of supply this week, conditions have not eased to the extent that is desirable. Prices have not been lowered, and until there is the desired improvement to give a steady supply of the commodity low prices are not likely to prevail. There was a temporary easing for a few days, but the reaction which followed has stiffened the market quotations slightly to $1.45 to $1.60.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 45 $1 60
Small lots	....
(Packages extra.)	

Advance is Likely; Putty Market Firm

Montreal.

PUTTY.—Increasing prices for linseed oil will have the effect, it is expected, of bringing about revision to higher basis of putty prices. This is not an active selling season, and it is therefore not a time when prices are usually changed. The situation is strong and increases are quite justified, it is stated.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do. 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Red Lead is Down; So is Litharge

Montreal.

RED LEAD, LITHARGE.—Lower prices have been named for red lead. The prices now quoted on casks is $10.50 per 100 pounds and that for 100 pound lots $11.50. Litharge is quoted down to $10.75 per 100 pounds in ton lots, and in small quantities per 100 pounds at $11.75.

To Advance Paint Is Present Outlook

Montreal.

PAINTS, ETC.—Advancing oil prices make it extremely likely that another advance will be made for prepared paint. In view of the abnormally high oil markets, it has been impossible to anticipate these increases, and if oil holds on its basis, as is almost sure, that paints will be revised to a higher level. This may amount to 25c when it comes and it may come during the present week. There is a good active movement yet.

Shellacs Higher; Varnish Firming

Montreal.

SHELLACS, VARNISHES.—A distinctly nominal basis obtains for shellacs. Quotations are not guaranteed by the trade, and dry shellacs in particular are very scarce and high. Those having the latter are quoting around $1.25 per pound for them. There is a decided firmness of undertone to the varnish market. Raw materials are reported to be very much higher, and it is only the holdings of supplies that cost less some months ago which has enabled manufacturers to refrain from price revision, it is stated.

Tendencies Firming White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—It is not unlikely that white lead in oil may be advanced in price. HARDWARE AND METAL has pointed out before that while corroded lead would perhaps not be advanced, the future of price on the product in oil would depend largely upon the price of oil. The latter is now so high that increases of price may be put into effect. In the meantime the basis holds at $15.50 for five-ton lots, $16 for tons and $16.35 per 100 pounds for small quantities.

TORONTO

TORONTO, July 10.—All guesses as to where linseed oil prices are likely to go to are mere speculation. Those who a short time ago thought that $5 flaxseed would be the limit have seen it pass the $6 mark, and it is still climbing. The markets are bare, and with a good volume of business offering there is every indication that linseed oil will remain high for some time. To-day's quotations range from $2.95 to $3.15. The development of more business from overseas during the week has had the effect of checking the downward tendency of turpentine, and indications are that it will be very firm and likely to advance slightly. Rosins are holding firmly but some are expected to go higher as there are heavy demands both from overseas and at home.

New High Records Made By Linseed Oil

Toronto

LINSEED OIL.—Ever higher prices for flaxseed, unfavorable reports regarding this year's crop prospects and a steady demand are all having the effect of sending linseed oil prices to new high levels. To-day's quotations range from $2.95 to $3.15. With flaxseed quoted at $6.04 and the market very firm, even higher prices are likely to develop shortly. The official report on the flax out-

Saved

500 Pounds White Lead

JUST one trial convinced the Niagara, St. Catharines, Toronto Navigation Company that Brandram's Genuine B.B. White Lead rightly deserves the title "Best for over two hundred years."

Usually they bought one ton of ordinary White Lead for covering their boat "Dalhousie City." Last year they were persuaded to try Brandram's. They bought one ton and when the job was finished *had* 500 *pounds* left, while the job was pronounced better than former years.

"Save the surface and you save all" *Paint & Varnish*

This is one instance in hundreds that we could tell you about. Painters all over Canada who have used Brandram's Genuine B.B. will never "go back" to any other.

Our dealers are enthusiastic in their praise of Brandram's Genuine B.B. White Lead as a builder of business. They never have any complaints.

There is a sales proposition waiting for you—write for it. Better still, send in a trial order.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

look issued at Washington estimates this year's crop at 13,000,000 bushels. This is a big reduction from the normal figure of 21,000,000 bushels and is due, it is stated, to hot and dry weather. From the reports of other years it is gathered that the United States needs 30,000,000 bushels, the difference being made up by importations from the Argentine. Very little seed has been coming in from the Argentine for some time, the shippers there preferring to pay forfeits and ship to the British markets. Toronto crushers have been receiving requests by cable every day from London, Eng., for linseed oil. This is business that until a short time ago never came to Canada, and is due to the shortage of steamers. From the Canadian West reports regarding flax continue to be somewhat unfavorable, the long spell of dry weather having greatly reduced the yield. Prices are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$2 95	$3 15
3 to 5 barrels, gal.	2 94	3 14
10 barrels and over	2 92	3 12
	Boiled	
1 to 2 barrels, gal.	$2 98	$3 18
3 to 5 barrels, gal.	2 97	3 17
10 barrels and over	2 95	3 15

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Turpentine Firm; Rosins Advancing

Toronto

TURPENTINE, ROSIN.—After dropping for only a brief period in Southern markets turpentine has recovered owing to new business from overseas, and the market is very firm, and prospects are that it will continue so. Crop reports indicate that there will not be any greater output than was available last year and this was not nearly enough to meet normal requirements. The rosin market is very firm and prospects are for immediate advances. Turpentine prices are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 55
2 to 5 barrels (barrel included)	1 54
5 gallon lots	1 65

Many Rumors That Paint is to Advance

Toronto

MIXED PAINTS.—Manufacturers are expecting that further advances will be made in paint prices. It seems difficult to find out when these will become effective but the opinion seems general that prices are very shortly to be revised upward. The unprecedented prices of linseed oil are a big factor in the situation. Repeat orders continue to come in most satisfactorily, and many of the paint firms are still working overtime in getting their shipments out.

Paint Brushes Are Likely to go Higher

Toronto

PAINT BRUSHES.—As a result of conditions which have been developing in the bristle market and steadily advancing prices, which, in some instances, show an increase of ten per cent. in the past three months, it is stated that higher prices for paint brushes are likely to become effective shortly. There has been a fair volume of business offering in all parts of the Dominion except Manitoba, where the strike caused demoralization, which will take some time to straighten out. Building reports indicate a steady and very satisfactory development.

Window Glass Firm; Putty is Unchanged

Toronto

GLASS, PUTTY.—A noticeable increase in the demand for window glass is a feature of this week's markets. All over the country there is a steady increase in the building activity, and as some of the work that was started early is now reaching the stage where the glass is required, business is showing an improvement. This, it is expected, will continue. Putty prices show no change, the quotations being as follows:

Standard Putty -	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 50

Pure putty advance $2.50 per 100 lbs. over above.

White Lead in Oil Remains Unchanged

Toronto

WHITE LEAD IN OIL.—In spite of the big advances in linseed oil quotations on white lead in oil are holding steady. The volume of business offering is most satisfactory. Quotations are: 5 ton lots, $15.85 per 100 pounds; one ton lots, $16.35; in smaller quantities, $16.70.

PITTSBURGH MARKET

(Continued from page 65)

tember the record rate was attained, 41,900,000 tons, and month by month thereafter there were successive decreases. The turn has now been rounded. It is possible, however, that July will show little if any increase over June, because midsummer brings such high humidity, cutting down individual blast furnace outputs. There is, at any rate, a greater furnace capacity in blast than the average of June.

Mill Operations Increase

Steel mill operations on July 1 were running at the rate of fully 65 per cent. of capacity, and there has been a slight further increase since then. A 70 per cent. rate may be attained within two or three weeks as there is a continued tendency to put more capacity in operation since the orders received have been consistently running ahead of the shipments made. The low point in operation was about 50 per cent., at the middle of May, the month as a whole showing an operation of 54 per cent., against 65 per cent. for April, and an estimated 60 per cent. rate in June, the official figures for June not being available as yet.

The demand is for finished steel products, in the various forms of bars, shapes, plates, sheets, wire, etc., produced from ingots through the various finishing processes. It is practically certain that the capacity for producing steel ingots is in excess of the absorbing power of the various finishing departments, this arising from the fact that during the war many additional open hearth furnaces had to be built to produce ingots, on account of the heavy demand for shell steel, which was not rolled through any of the regular finishing channels. The result is an unbalanced industry. In ordinary times the total of finishing capacity has exceeded the ability of the steel departments to produce the raw steel, an excess being necessary because in one year the demand might run more heavily to certain products, and in another year it might run more heavily to others. Steel ingot capacity increased from 35,000,000 tons a year in 1914 to 49,000,000 tons at the present time, or 40 per cent., whereas outside the building of many plate mills there was but little increase in steel finishing capacity. While it is very difficult to estimate, it is probable that the various finishing departments, excepting the rail and plate mills, would probably be filled up solidly before the requirements in ingots ran beyond 85 or 90 per cent. of the capacity. If so, one does not need to look for steel mill operations to attain one hundred per cent. before there is full activity. Taking it that ingot production was 50 per cent. of capacity at the middle of May, and 65 per cent. on July 1, the increase in that short space of a month and a half represented between one-third and one-half the total progress necessary to bring virtually full operation to the steel industry as a whole.

AN ELECTRICAL WINDOW DISPLAY

An electrical window display which has been bringing big results for a Toronto firm since the weather became unpleasantly hot consists of a simply and easily arranged lattice work, painted white, as a background, three sets of steps as display stands and a foreground in which advertising matter plays a leading part. The steps are covered with wine colored plush, and on each step was placed an assortment of large and small electric fans, toasters, grills, and other appliances in demand not only for hot weather purposes, but as suitable gifts for wedding presents. To several of the fans were attached long streamers of ribbons. At the top of the white lattice work, in red and white letters, was the wording, "Keep cool—do it electrically." At the ends of the lattice work a Summer touch was added by a few sprays of artificial flowers. The fans in motion, with the ribbons floating around in the window, the advertising matter, and the fact that the mercury was near the 100 mark and that people were really wanting to get relief from the terrific heat helped the window to "pull" splendidly.

PEACE—and the "NEW ERA"

At last—the Peace Treaty is signed. Men will now be able to give attention to matters which have for nearly five years been put aside as of small importance.

Buildings have for several years been left without repainting because such expenditure was regarded by many as an undue extravagance in war time. **That is changed now. This is the paint dealer's opportunity! Grasp it!**

"NEW ERA" Paints are made from the best materials which money can buy. THERE ARE NO BETTER PAINTS ON THE MARKET!

Our agencies, established for years, throughout Canada, continue to supply thousands of customers who would have no other brand.

Are YOU in line? Write now for our proposition.

BICYCLE PARTS and ACCESSORIES

WHY do so many of the most experienced and successful Canadian bicycle dealers obtain the bulk of their accessories from the C.C.M.?

Because of the large, varied, and well-selected stock from which to choose.

Because of the prompt, careful service and the earnest effort to ensure satisfaction in every particular.

Because prices are always fair and reasonable.

The C.C.M. Accessories Catalog carefully and accurately describes and illustrates the best selling styles in all lines of bicycle accessories.

You should have a copy if you are handling, or intend to handle, Bicycle Accessories.

THE varnish that gives floors a hardwood finish—brings out the natural grain perfectly.

Specially made for the hard usage to which floors are subjected.

—impervious to water—even boiling water won't hurt it;
—elastic—don't show tell tale heel marks;
—durable—don't show white marks when scratched.

The Floor Varnish that Satisfies the Customer.

BRITISH AMERICA PAINT CO., LTD.

VICTORIA VANCOUVER CALGARY EDMONTON REGINA

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

FIRE ANNOUNCEMENT

We are pleased to state that the fire which occurred in our Plant on Saturday, June 21st, will not have any serious results to our customers.

We have a large stock of finished Pumps, Cylinders, etc., which were not anywhere near the fire and quantities of parts already made will enable us to take care of any needs.

Patterns are in course of manufacture, so that we anticipate no inconvenience to our customers. Advance orders are solicited.

DAYLO Prices are DOWN

DAYLO and Tungsten Battery prices are slashed—batteries especially.

And Eveready production wheels are whirring fast to meet the Daylo and Tungsten Battery demands growing by leaps and bounds.

Better quality than ever. The Tungsten Battery is the longest-lived, pep-crammed battery made—the kind that brings customers back smiling.

The clanging hammer-blows of Daylo advertising are resounding from coast to coast. General magazine advertisements are blazoning everywhere the myriad uses of Daylo.

Right in your town, right in your block are customers ready to buy new Daylos and renewal batteries. If you want their dollars to hop into your cash-drawer, stock, display and push Daylo hard now!

The Trade-Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Ashdown's Water Supply Systems Open a Wide and Profitable Field To the Dealer

In demand by all farms, country houses, summer resorts, greenhouses, etc. for independent supply.

Supply water from either deep or shallow wells, by hand, gas-engine or electric power.

A—Supply to House. B—Suction for Shallow Wells. C—Suction to Deep Well.

While the outfit shown above is equipped for supplying water from deep or shallow wells where belt power is available, it may be arranged for hand, gas-engine or electric power.

The complete system comprises Hydro-Pneumatic Tank, Hydro-Pneumatic Power Pump, Gasoline Engine, Water and Pressure Gauges and mountings, complete. No piping is included.

Send a post card asking us to show why handling Diamond "A" Water Supply Systems are profitable for you.

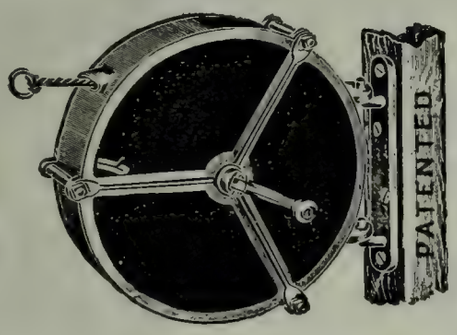
Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATJRE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

The Banwell-Hoxie Wire Fence Co., Ltd.
Winnipeg Man. Hamilton, Ont.



--needed in every home

and needed badly; that's why the "DOUST"

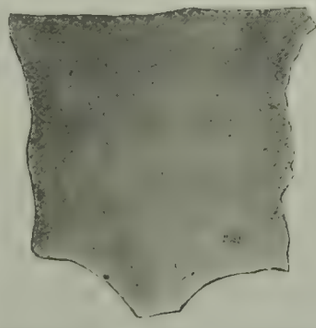
Self-Winding Clothes Line

is to-day having a very large sale. It contains 110 feet of high grade rope that winds up into the case—away from dirt and dust. For interior and exterior use.

Send for full particulars.

A child can operate it

Coleman Fare Box Co., Limited
1191 Bathurst St. Toronto



A GOOD INVESTMENT

Stamp your name on every tool and be insured against loss and theft. We will make for you a stamp, hand cut from tool steel, it will last a life time. Send 20c for each letter or initial, and 10c postage.

We also make special Trade Mark Stamps and Dies. Steel Letters and Figures in sets for the hardware trade.

Prices on Application. *Immediate Shipment.*

JAMES HUTTON & CO.
706 Shaughnessy Building - MONTREAL

WHY NOT ALLOW YOUR STAFF THE PRIVILEGE OF INCREASING YOUR SALES?

Making change takes time that might be used to better advantage in the selling of more good. And, too, it diverts the salesmen's mind from his real business. We have a cash carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps. They should not be forgotten.
Write for our four-page leaflet which tells how to obtain a double check on sales, and allow your salesmen in a greater degree, to display their selling ability.

All kinds of Cash and Parcel Carriers.

CARTER'S

Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Ordinary woven lining

Notice the loosely woven texture. Wears down quickly and unevenly. Loses its gripping power as it wears.

Thermoid Hydraulic Compressed Brake Lining

Notice the compact texture. Wears down slowly. Gives uniform gripping surface until worn wafer thin.

Safety first means efficient brakes. Thermoid Brake Lining insures 100% efficient brakes.

A brake lining with 40 % more material

WHEN you sell Thermoid Brake Lining you sell a lining that has over 40% more material. It weighs over 40% more than any woven lining.

This means that Thermoid has greater strength and durability—it means longer service, better service. That's why it is better fitted to stand the responsibilities placed on it.

Proved best by test

This test was made. One hundred feet of Thermoid Brake Lining and one hundred feet of each of four leading woven brake linings of the same size were bought from dealers' stocks in Philadelphia and New York.

They were accurately weighed—this test showed that:

100 feet of Thermoid Brake Lining weighed 54 lbs. 8 ounces.

100 feet of woven lining A weighed 36 lbs. 4 oz.

(50% lighter than Thermoid)

100 feet of woven lining B weighed 36 lbs. 4 oz.

(50% lighter than Thermoid)

100 feet of woven lining C weighed 37 lbs. 8 oz.

(46% lighter than Thermoid)

100 feet of woven lining D weighed 35 lbs. 6 oz.

(54% lighter than Thermoid)

This is convincing proof that the buyer gets more high grade brake lining for his money in Thermoid Brake Lining than in any make of woven lining.

The 100% brake lining

Thermoid is impregnated throughout with *Grapnal,* an exclusive process which makes it impervious to gasoline, oil, water, dust, etc.

It is the best and most efficient brake and assures absolute satisfaction.

Every foot of Thermoid is backed by our guarantee: ***Thermoid will make good—or WE WILL.***

"At All Dealers"

¶ Ask any dealer and he will supply you with a Dunlop Tire, or get one with the minimum of delay. Practically every dealer is a Dunlop man. He will take your order because we play no favorites—sell the big and small store or garage.

* * *

¶ The tires with the good reputation that lasts, the service that satisfies, and the dealer representation that settles the issue of emergency, as well as repair calls, are branded: Dunlop Cord—"Traction" and "Ribbed"; Dunlop Regular—"Traction," "Special," "Ribbed," "Clipper," "Plain."

Two Features That Help to Sell Locktite

The surface of the injured tube must be cleaned before being patched. There's a cleaning pad in the cover of the Locktite Auto-New-Matic Patcher container.

The abrasive top of the container is used to roughen the surface of the tube before applying the cement.

To complete the Locktite Patcher, there is a clamp to hold the tube tightly in position around the container while being repaired, a sheet of canvas-back patching and cement.

Everything for repairing a punctured or blown-out tube on the road, if necessary.

Because the outfit is complete—

Because is saves the motorist time and money—the demand for the Locktite Patcher is increasing every day—every week.

Are you in position to get your share of the Locktite business?

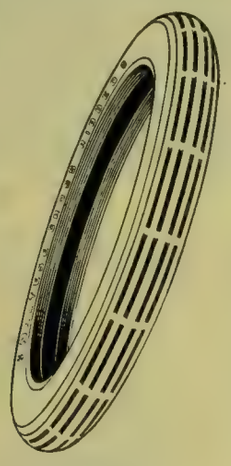
Requiring little shelf room and no service—selling over the counter like a spark plug—there's a good profit in Locktite.

A special larger size is made for the garage and repair shop.

Write for our dealer proposition

LOCKTITE PATCH COMPANY, WINDSOR, ONT.
American Plant, Detroit, Michigan

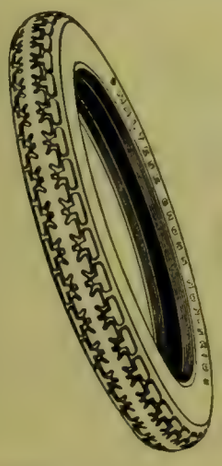
LOCKTITE
AUTO-NEW-MATIC PATCHER



Practically all good buyers of Hardware in Canada are readers of Hardware and Metal.

MALTESE CROSS TIRES

Business Builders



Maltese Cross Tires are business-builders of exceptional merit. Every Maltese Cross Tire you sell, by its ability to give perfect satisfaction to the purchaser, results in your customers coming back for more. More than that, when a motorist gets tire satisfaction he does not keep the good word to himself, but passes it on to all his friends who, in turn, pass it on again. Soon you have a clean sweep of all the tire business in your locality.

"The Tires that Give Satisfaction"

Don't take chances on selling your customers tires that you are not absolutely sure of. The impression of the dealer who sold him "something good" is one that stays and is the one you create when you sell Maltese Cross Tires. You can safely recommend Maltese Cross Tires to the tire crank of your town. We know they'll please him. You ought to carry complete sizes in all treads.

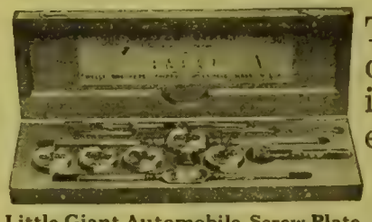
Head Office and Factory, Toronto

Branches: Halifax, Montreal, Ottawa, Toronto, Fort William, Winnipeg, Regina, Calgary, Edmonton, Saskatoon, Lethbridge, Vancouver, Victoria



Little Giant 2 Stock Set

Motor Screw Plates

With all signs pointing toward a record-breaking season for passenger cars, trucks and tractors the prospects are bright for a brisk season for maintenance and repair tools.

Little Giant

Combination Screw Plates in both U.S. and S.A.E. standard threads contain a good range of tap and die sizes. They give the best possible service. They secure thereby for their owners maximum results at a minimum expense.

Little Giant Automobile Screw Plate

There is a screw plate for every need listed in our new No. 40 catalog. Make your selection in good season and be prepared for emergencies.

Automobile Set in Leather Roll

Wells Brothers Company of Canada, Ltd.

Galt **Ontario**

Canadian Plant of the Greenfield Tap and Die Corporation

"—saves two-thirds of my Tire Expense"

"Once a week I go over my tires—and seal the little holes and cuts that ruin tires by permitting dirt, oil and water to reach and rot fabric. With the SHALER Vul-Kit I 'vulcanize' these holes with tough, new rubber that makes a lasting job of it. It takes only a few minutes—but keeps my tires good as new—prevents tire trouble—*doubles* my mileage—and actually saves ⅔ of my tire expense."

Sell the SHALER VUL-KIT

It's easy to sell. Motorists are looking for a tire-saver like this. Their word-of-mouth endorsement of the SHALER to their friends gives you a chain of sales. The repair material they buy of you to use with this vulcanizer gives you "repeat" profits that come to you regularly—without effort. You make a good profit selling the Vul-Kit itself and big, steady "repeat sale" profits.

SHALER Vulcanizers are advertised regularly throughout the year. Motorists are now reading the large, dominant advertisements in the leading national and motorist publications. Every car-owner needs a SHALER Vul-Kit—sell it to him and make these big steady profits for your self.

Order From Your Jobber Now—Write Us for Catalog

of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use.

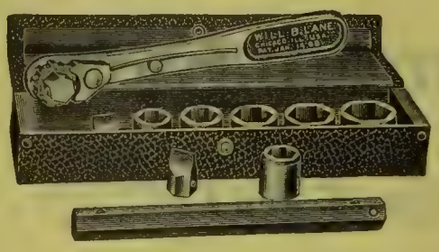
Big Newspaper Advertising Campaign to Begin Immediately To Assist Dealers Who Handle

V D L

TIRES

At a meeting of the Board of Directors held recently it was decided now that V.D.L. Tires and Tubes have a national distribution among hardware dealers from coast to coast, that an advertising campaign should be undertaken to let the public know why V.D.L. Tires will give more mileage than any other tire on the market. Dealers who are not already handling tires as a part of their business should get a V.D.L. price list at once from any of the following distributors:



Codere et Fils, Sherbrooke.
A. Chown & Company, Kingston.
Crowell Brothers, Halifax.
Eug. Julien, Limited, Quebec.
Kloepfer, Limited, Toronto.
Merrick-Anderson Co., Ltd., Winnipeg.
Miller-Morse Company, Winnipeg.
2 in 1 Tire Company, Montreal.
Wood, Vallance & Leggat, Ltd., Vancouver

Hand Made in Canada by

VAN DER LIND RUBBER COMPANY

WINNIPEG, MAN.

The Feature

that makes

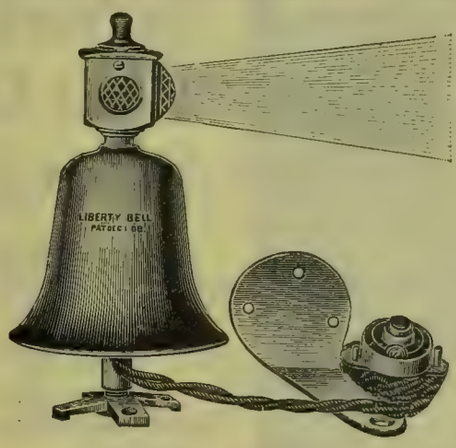
IVER JOHNSON
SAFETY—AUTOMATIC REVOLVERS
easy to sell

Just note this simple automatic safety action. The *only* way to discharge an Iver Johnson is to pull the trigger (1) *all* the way back; this action raises the lifter (2), which forces the hammer (3) to cocking position. When lifter is at its highest point the hammer covers the firing pin (4) and at this position the hammer is released, striking the lifter, which in turn strikes the firing pin, driving it into the primer of the cartridge.

No impact can ever force the hammer against the firing-pin—thus the world-famous slogan, "Hammer the Hammer."

Stock the entire line—22, 32, 32 special and 38 calibres, Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

Write for firearms catalog and complete dealer information. Ask about Iver Johnson bicycles and motorcycles, too. A good line to stock complete.



"The Safe Revolver to Sell"

Iver Johnson's Arms & Cycle Works
1000 River St., Fitchburg, Mass.
99 Chambers Street, New York
717 Market Street, San Francisco

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

The Signal of Distinction
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS
BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"
DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

ROYAL OAK TIRES

BUILD BUSINESS

IT is impossible to get a tire proposition more paying than the Royal Oak.
It is impossible to make a better tire, or to handle one.

Royal Oaks sell well. People like them and want them, because they do deliver extra mileage. They are a real tough treaded tire made to deliver service.

Royal Oaks pay you a profit---the kind you want. They satisfy customers, they "repeat," and there is a mighty good margin on every sale.

Dealers are invited to send for this proposition. Get it now while the season is good. Royal Oaks are honestly made in a big way to be worthy of your representation. Send for complete information to-day.

TRADE B&C MARK

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Starrett Hack Saw Charts
Belong In Every Tool Room

When you sell your customer Starrett Blades, ask him if he has a Starrett Hack Saw Chart where the men can use it.

For any but the most unusual conditions, a Starrett Hack Saw Chart in the tool-room, is almost as good as having a service man in the factory—and it's always there when you want it.

A copy of the Chart and the Starrett Catalog No. 21MA sent free upon request.

STARRETT HACK SAWS CUT QUICKER LAST LONGER

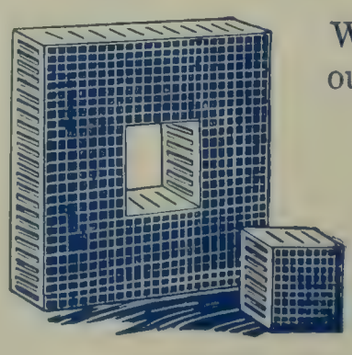
McKINNON RADIATORS

Really Cellular

RADIATORS are made to protect and cool the engine, but their ability to do this job is not the only measurement of efficiency, because durability and readiness of repair also figure very largely in the measurement of radiator efficiency.

McKinnon Radiators measure up to every standard of efficiency, no matter what that standard may be.

They cannot positively clog with sediment because the interior is corrugated to keep the water in constant agitated action. The cells and the air passages are so scientifically proportioned that a strong cooling draught is sucked through the air passages to keep the water cool, so that your engine hits regularly, runs smoothly and does not get over-heated during the summer days.



McKinnon Radiators are simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core; the very method that hardens the metal and makes it crack so easily.

You dealers and garage men will readily see what a perfect radiator it is, how easy it is to repair by the simple soldering in of new cells.

Over 750,000 of these radiators are in use.

They are now being nationally advertised.

You dealers and garage men should be ready to sell this line, or to make repairs, as accidents will happen to the most ca reful drivers.

Write us for information—Address your communication to our "General Sales Department."

YOU CAN *FEEL* THE DIFFERENCE

Starrett Hack Saws

Cut with less effort. That's the point that appeals to the machinist. In hand-sawing he feels the difference in his arm. On a power saw the economy of the Starrett blades shows in the increased number of cuts per hour and cuts per blade.

The combination of the Starrett Hack Saw Chart MA and Starrett Hack Saw Blades will reduce the cutting costs in any shop.

Williams' Superior Drop-Forged Wrenches For Every Purpose

PURSUANT to our policy, inaugurated nearly half a century ago, of standardizing lines of Drop-Forged Wrenches, we have now developed some 40 patterns in about 1,000 sizes with openings running from 3/16 to 7-5/8 inches, for every purpose.

All are reliable, efficient tools, made of the best materials obtainable, and manufactured by methods developed and perfected through many years' experience.

We carry them Big and Little, Bent and Straight, Thick and Thin; something *Standard* for every recognized trade need.

Specify "Williams' Wrenches" or Tools when you order and get *Superior* quality.

UNIVERSAL

Vacuum Bottles and Accessories

FOR EVERY SEASON--FOR EVERY PLACE--ALL YEAR SELLERS

When you tell a customer that "UNIVERSAL" Vacuum Bottles are superior, you are not spinning selling fiction. You don't have to hedge, back down or hunt for an alibi. You can prove what you say as fast as you say it. Show the exclusive patented features of the "UNIVERSAL" line—supremacy will be evident without extended argument.

Show how the spring steel holder grips the filler firmly in place and absorbs all bottle-breaking shocks. Note the absence of insanitary felt pads, cork rings and cement fastenings. See how the rubber gasket around the neck of the bottle prevents leakage into the case. Bear in mind that thorough tests have shown the greatest temperature-retaining efficiency is found in "UNIVERSAL" Bottles.

"UNIVERSAL" Vacuum Bottle with extra cups is a patented UNIVERSAL feature. Whenever you sell a Vacuum Bottle, show the nested cup feature and you've added another selling point to your story.

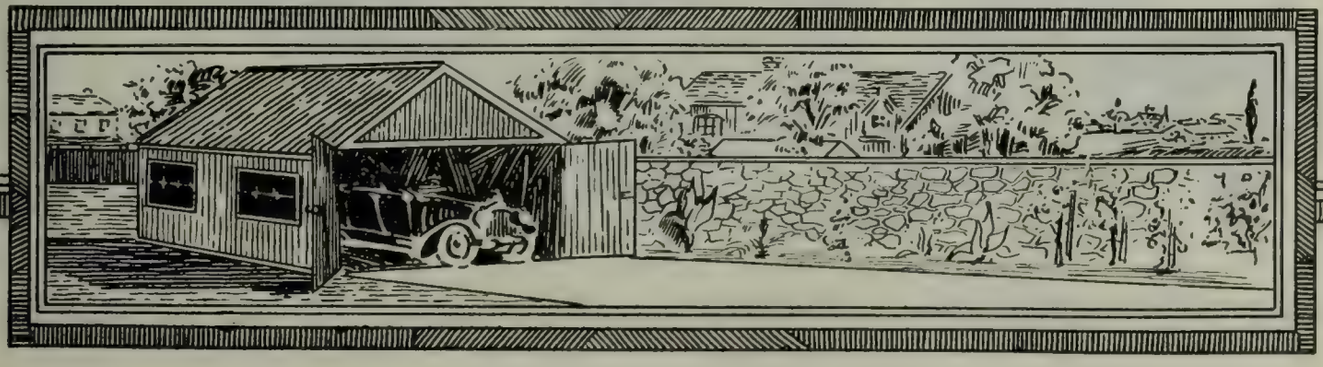
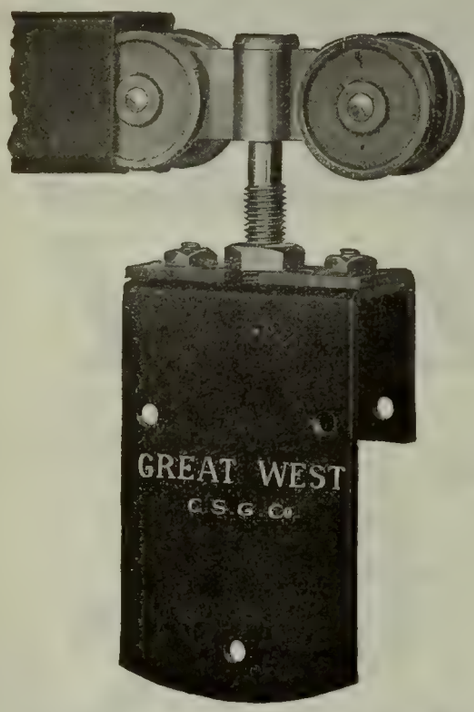
National

Garage Sets



Time is Money--So is Space



The No. 805 Garage Door Set opens at a push and closes at a pull—both light ones. Saves space because doors are hung inside and fold against the inner wall. Adjustable for settling walls or swelling floor. The price is right and satisfied customers continually bring more sales.

Set No. 805 includes—No. 29 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4 x 4 inch Jap. No. 505 T.P. Butts; 1 only No. 820 Chain Bolt; 1 only, No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. All bolts and screws packed in the **"unusual National way"** Japan finished. Catalogue and prices for a postcard.

National Mfg. Co., Sterling, Ill.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

PLYMOUTH ROPE

A Big Winner

In 1916 the Plymouth Rope-by-the-foot plan was first given to the trade in practical form as a profitable selling suggestion, enabling dealers to successfully conduct their retail rope sales over the counter on a price per foot basis. This Plymouth-devised Automatic Selling Chart is in use to-day with several thousand dealers throughout the United States and Canada, and the following letter is typical of many that are received daily from the trade:

"I have your plan for selling Plymouth Rope-by-the-foot, and saying that the dealer likes it because it offers him a greater profit, and that the customer likes it because he knows in advance just what his rope is going to cost, is putting the whole thing in a nut shell. It is just what I have wanted for years. When I received a lot of rope I did not have time to sit down and figure it out for myself. Many thanks to the good fellow who got this schedule out. I could not do without it now."

F. L. VORCE,
Weyerhauser, Wis.

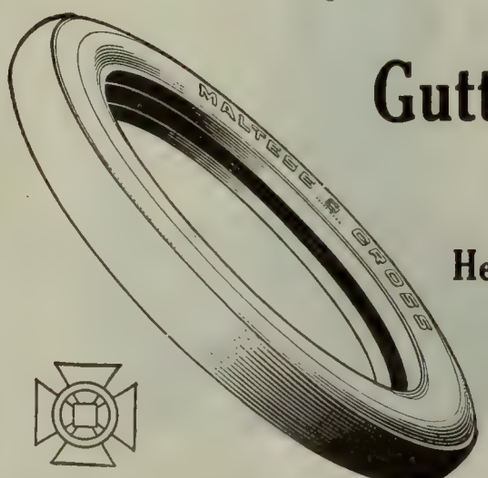
PLYMOUTH TRADE MARK 1824

Make Friends of Your Customers



Yield not to temptation, especially the temptation to sell a poor tire, because it pays a bigger profit. When John Smith comes in and kicks about the last tire he got, it ought to be a lesson to you not to sell poor tires. Don't yield to the temptation of selling him an inferior tire again.

Maltese Cross Tires give satisfaction. You know that to sell a tire which gives satisfaction makes the user solid for that brand for all time, and more than that, he becomes a booster for your store.

Display Maltese Cross Tires in Your Windows —It Pays

Have you noticed the number of cars equipped with Maltese Cross Tires lately? Here's the reason—

"Maltese Cross Tires—Give Satisfaction."

BARCALO

"S" Wrench

Service

There are no frills about the Barcalo "S" Wrench. Yet any mechanic will take pride in its attractive and business-like appearance.

The primary object of the Barcalo "S" Wrench is to perform a special service for the Machinist, Engineer or Garage man.

It will perform all the operations required of any wrench, besides helping the mechanic out of many a tight place where the ordinary wrench would be an impossibility.

Its Claim to Usefulness—is backed by extraordinary strength, unsurpassed lasting qualities, simplicity of construction and freedom of manipulation.

Made in 6, 8, 10, 12 and 14 sizes.

We are zealous of our ability to make good wrenches.

We guarantee to replace, free, any Barcalo Wrench proving unsatisfactory to your customer.

Dealers are making **a good margin** of profit, through **Barcalo sales.**

How about you?

May we mail you further information? Write to-day.

The new VICTOR No 1 GIANT

A giant in jaw-height, holding power and durability

Wide-spreading jaws that catch away up on the animal's leg.

—

Patented Humped Cross—no chance for freezing or accumulations of mud, dirt, etc.

—

Direct Pan Fastening—does not tighten when rutsy.

—

Wide, strong Dog—easily engaged with notch in Pan Shank.

—

Patent Extension on Jaw Lug. Jaw can't spring out when setting Trap.

—

Lively, high-rising Spring—made of finest steel, scientifically tempered and tested.

—

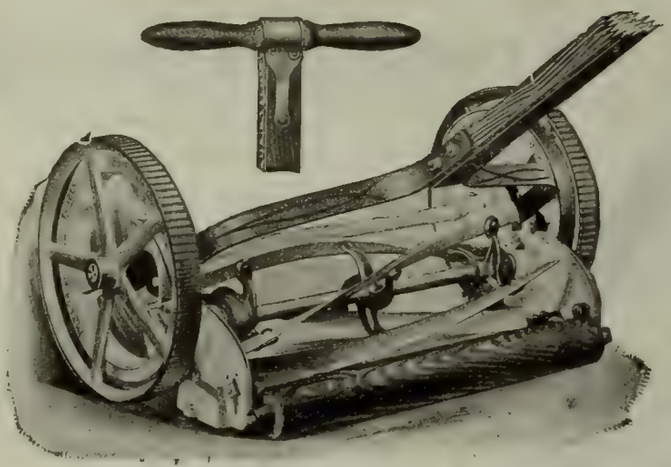
New type, smooth-acting Swivel.

A NEW & DIFFERENT VICTOR TRAP

—a *Giant* in name, size and strength. A modern trap that catches and holds far up on the animal's leg. Especially adapted to trapping skunks, muskrats and mink.

The *Giant* jaws have great holding power—the lightning-action spring rising high on the jaws. Right here is where *Giant* size counts, as the spring and other parts of the trap are built proportionately larger to take care of the additional height of jaws.

SPECIFICATIONS



Spread of jaws 4 7-8 inches. *Weight per Doz. 8 1-2 lbs.*

Packed	*Dozen*	*Shipping Weight*
In Barrels	35	323 lbs.

Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner

To-day is a better day than to-morrow—write.

ANNUAL FALL DIRECTORY *and* SALES NUMBER

HARDWARE and METAL

ON or about the 23rd of August, in every year for the past 31 years, the hardware trade of Canada has received the Annual Fall Directory and Sales Number of HARDWARE AND METAL. This number is looked upon as a most essential part of the early fall stock in every wholesale hardware buyer's office, and in over 90% of the retail hardware stores from coast to coast. The issue is a real buyer's guide and directory number. Owing to its size and the great amount of practical and valuable information in the editorial and advertising pages, the number is read, re-read, and consulted many times during the fall and winter months. A cord is inserted in the upper left-hand corner, in order that hardware buyers can hang up their copy close beside their desk. The Canadian hardware trade in all its branches naturally expects to find in this number advertisements from manufacturers and wholesalers who desire to do business with the hardware trade.

One manufacturer of planes, etc., received a large order from his ad. in one of our fall numbers, exactly eleven months after the number was issued. This indicated the long life of an advertisement in a number of this kind.

Reservations made to date for the "Fall Number" make it quite apparent that this year's number—the first since the close of the war—will eclipse all previous records, and that it will be necessary to close all forms earlier than in previous years.

If you have not arranged for space in this number, drop us a line and we will gladly send complete details regarding circulation rates, etc.

Gillette Safety Razor

The Shaving Service for Every Man Everywhere

KNOWN THE WORLD OVER

Dealers in men's needs from Halifax to Vancouver and around the world, back again to Halifax know the Gillette Safety Razor as one of the world's best sellers.

Here is a reputation based solely on quality. Our London office, for instance, reports that the word "Gillette" carries extraordinary weight and, while the following is written in humorous vein, there is a very firm foundation of fact to support it:

> . . . . "You visit the Police Bureau with the never ending Identity Book registration. In fear and trembling you answer the terse "Name?" "Business?"—and then, presto, the now smiling Inspector says, "Oh, 'The Gillette,' sit down please. We shall detain you but a moment, and perhaps Monsieur will be so kind as to suggest where one may obtain the real Gillette Blades—thank you so much, Monsieur is most kind. Shall I also stamp you out?" You no longer cringe, you are of men a man apart.
>
> "At the hotel, the Director greets you with blank amazement in presuming to expect a room not engaged a fortnight before. Then again the magic word and you are ushered to Suite 'A.' It transpires that Mr. Jones, an old patron of the hotel, is not using his room that night, and then, wistfully, the Director suggests, "Perhaps Monsieur would be so kind as to give me one of your discarded blades. I have not had a good shave since, etc."
>
> "The pathway of the weary Gillette traveller is smoothed continually by the mere magic of the name.
>
> "Somehow, or other, as I grow older in the Gillette service, I cannot avoid the feeling that each and every razor I sell makes some man happier, saves his time, his money, his health, and improves not only his personal appearance, but his opportunities in life; in short, makes him a better citizen, no matter what his flag."

Are you profiting as much as you should by the popularity of the Gillette Safety Razor?

System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

Paints and Varnishes are Advanced

Due in Particular to Higher Linseed Oil—All Oil Paints Affected—Varnishes Are Also Advanced—Colors in Japan Up—Lead and Putty Unchanged

HARDWARE AND METAL very clearly stated in last week's issue that paint was due for an advance, and that other lines also might have to take on a new price basis. This information was very definite and the changes forecast have been made and are now effective.

As is generally understood, the unprecedented rise in the price of linseed oil was the immediate contributing factor, making higher prices necessary. It will be recalled that an unusually difficult condition has obtained in the linseed oil markets of this continent, as well as elsewhere throughout the world, seed being in short supply everywhere. This condition has not improved. Every week sees a reduction of the visible supplies and every day brings its price changes on seed. So frequent have these changes been of late, and of such extent, that the paint manufacturer simply was confronted with the problem of losing money on his prepared paints or of advancing his costs to meet the increased cost of the raw material. An advance was imperative.

Producing Costs

The additional big factor in the increases made necessary is that of labor. True, increases were made before and labor was assigned as one of the contributory elements in making advances necessary then. This matter is not as fully understood as it might be, perhaps.

In speaking with a prominent manufacturer, HARDWARE AND METAL was informed that there had been a tendency this spring to defer buying in the usual quantities. Dealers and manufacturers alike had hoped prices would decline on raw material, and thus make it possible for the manufactured product to be turned out for less money. "Watchful waiting" had no reward. As far as some of the important raw materials were concerned, prices held firmly, and changed but little. Linseed oil and turpentine kept on advancing, however, and then the dealers, realizing that declines were improbable, began to send orders forward. This meant an extremely busy time for the manufacturer and his staffs. It meant that there was as much expense in handling an order for a few items, and the total of which might be a hundred dollars or so, as there was in the average order received under normal conditions. Then there was a manifest desire to buy carefully and the dealer was not unduly urged by the maker to buy more than he wanted. Thus, all through the present season there has been a steady stream of orders from the dealers everywhere throughout the country. The machinery employed in the process of distribution has simply been worked to the limit, and, in addition to the higher wage costs in the factory increased outlays have been called for in the office. The whole matter of filling the trade requirements as outlined has been an increasingly costly one. For a given outlay, it was out of the question, this manufacturer stated, to get the same outturn; the cost was greatly increased over former figures.

It will have been observed that certain lines that were not advanced when the increases went into effect in June, have now been revised upward. All oil paints, as previously affected, have been again advanced, and in addition to these, a number of other prepared paints.

The paints now changed in addition are those of flat wall colors, barn and dory, oil and japan colors, all shelf goods, and also many specialties sold regularly and having any oil content in them.

For many months HARDWARE AND METAL has referred frequently to the strength characterizing the varnish market. This has now developed into a definite price change and varnishes priced at $2.50 per gallon and lower are advanced 25c per gallon, while those priced above $2.50 per gallon take on an advance of 50c per gallon.

In the very nature of market conditions, paint manufacturers have been unable to speculate in seed-buying, for there has been a scarcity of seed from time to time, making it difficult to maintain an oil supply commensurate with the needs of the average manufacturer under present-day conditions. It has been necessary to curtail orders and to cut these down, delivering oil of late in but limited quantities. Not only so, it has been very necessary to conserve supplies of oil for manufacturing purposes. As a consequence of this condition, quotations have been withdrawn repeatedly in recent weeks.

It is freely stated that there has been little buying ahead of present requirements by the manufacturer of paints, as far as his purchase of linseed oil is concerned. This left no alternative when prices were considered other than that of advancing prices to carry the added cost of the raw product.

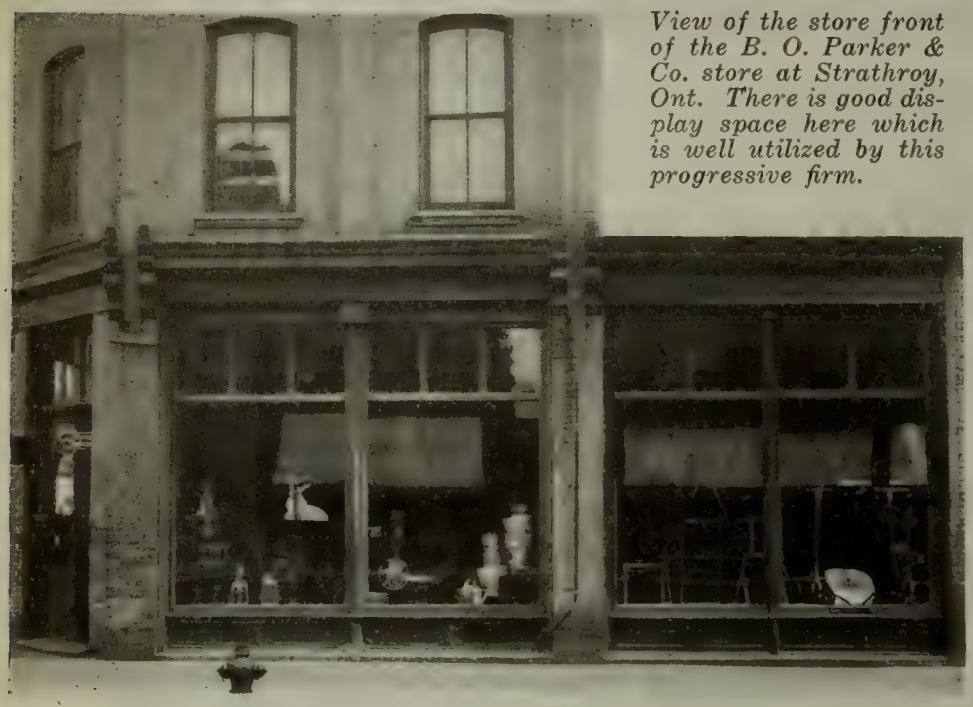
Continued on Page 66

PAINT CHANGES IN BRIEF

The following covers in brief form the new prices which were put into immediate effect on July 14, by the paint manufacturers:

All regular lines of oil paints, including marine and railway, advance fifty cents a gallon.

Inside floor and flat wall paints advance 25 cents a gallon.



Roof, barn and bridge paints advance 15 cents a gallon.

Shelf goods, stains, auto enamels, etc., advance fifteen per cent. over former list prices.

An advance of two cents a pound is made in oil colors.

Varnishes costing up to $2.50 per gallon are advanced 25 cents and varnishes costing more than $2.50 are increased by 50 cents per gallon.

Says Cash Discount Plan Works Well

View of the store front of the B. O. Parker & Co. store at Strathroy, Ont. There is good display space here which is well utilized by this progressive firm.

B. O. Parker & Co., of Strathroy, Ont., Have Doubled Their Cash Business—Firm Has as Its Final Objective Cash Basis — Store Space Has Been Doubled to Meet Steadily Expanding Trade

Based on an interview by C. E. PARSONS, of Hardware and Metal, with B. O. Parker, of B. O. Parker & Co., Strathroy, Ont.

SOME months ago, after carefully considering the question from every standpoint and investigating business conditions, B. O. Parker & Co., Strathroy, Ont., decided to offer a discount of two per cent. for spot cash. The firm announced its new policy in the half-page newspaper ads. it carries each week in the local newspapers and also by placing large cards about the store bearing the following:

NEW TERMS
2 Per Cent. Off
For Spot Cash
CHARGE ACCOUNTS
7 per cent. will be charged on all accounts after three months' time.
IT WILL PAY YOU TO PAY CASH
B. O. PARKER & CO.

"I have been keeping very careful track of what happened," said Mr. Parker to HARDWARE AND METAL, "and the figures show that we have just doubled our cash business in two months. I can say frankly that I would not go back to the old plan under any consideration. What I am really working towards is putting the whole business on a cash basis. The results of the past two months have satisfied me that this is a move in the right direction."

Customers Like It

Strathroy is a town of 3,500, situated in the heart of some of the finest farming territory in Western Ontario. The farmers are prosperous and Mr. Parker states that his customers met him more than half way on his cash plan, and welcomed it warmly.

"I was surprised in several instances," he said, "to find that people who had been owing small accounts came in and paid up, and have since been buying regularly at the store. They did not want to come in before, because they knew they owed me money. It is a funny thing how people will keep away from a store when they owe only a small amount. One may easily lose enough business in this way to more than pay for the whole account."

Has Doubled Store

Parker & Co. have found their business expanding so rapidly that this spring they secured the adjoining premises. They took out the partitions, did some remodelling and added it to their former building, thus doubling their space. The location is a splendid one, perhaps the best in town, being at the main corner, and having show windows on both main streets of the town.

The firm has found that it gets splendid results from its window displays and plans to put in a new and seasonable display every week. "Things are no sooner shown in the windows," said Mr. Parker, "than they begin to move. People come right in and ask for the goods that are on display, and we can trace a large number of direct sales to our windows."

Store Arrangement

Since securing the adjoining store and adding it to the former premises, the firm now has one show window about forty feet wide. Immediately behind this in the front of the store is arranged a seasonable display of various lines on the floor.

On one side of the store is a battery of silent salesmen, and Mr. Parker says they have produced splendid results from a sales standpoint. One of the silent salesmen contains a display of auto accessories and adjoining it on the floor is a display stand, on which are shown bumpers and other lines.

"We are just finishing our first year of handling auto accessories," said Mr. Parker. "In that time we have quadrupled our stock and are constantly adding to it. Pretty nearly every farmer in this district now has a car, and it looks as if auto accessories are going to be one of our big departments."

Looking to Future

The firm has handled quite a number of hand and water-power washing machines, but now the farmers are agitating for hydro power lines and getting them in many sections. Mr. Parker, with an eye to the future, has added electric washers to his stock. He is just getting started with this line, but has already sold several and has some good prospects.

One of the ways he is taking to introduce the electric machines is to keep one running in his window. This attracts a lot of attention, especially on market days, and brings in a lot of prospective buyers who want information. Mr. Parker is planning to stimulate the interest aroused by his window display by a store demonstration, to which the housewives of Strathroy and the surrounding country will be invited.

Gets the Results

Mr. Parker says that he finds it is good business very often to let people see such lines as washers or stoves actually at work. It helps sales, he says. Besides the electric washer running in his window he has, right up at the front of his store, a couple of handsome summer stoves, oil burners, all lighted and in full blast. These arouse a lot of in-

terest and have resulted in many sales, 65 being the turnover last season.

He also has a stove and range department and the sales here will average one a week the year round. In addition the firm does quite a business in repairs.

Wire fencing is a good seller also and a fair average year's turnover is five carloads.

A Good Seller

"We find that our sales of tinware and enamelware are steadily growing," said Mr. Parker. "We have doubled our stock in these lines in four years and turn the stock four times a year." All of one side of the store is devoted to enamelware and kitchen ware, and the shelf displays are augmented by table displays. Every woman who comes into the store of Parker & Co. knows before she leaves that they have enamelware and kitchenware. She cannot get out of the store without seeing it somewhere.

"It pays to let people know you have the goods," said Mr. Parker. "Our display tables sell a lot of goods and our whole stock on the shelves is easily seen."

Steady Advertiser

While Parker & Co. always use generous space in the local papers, they usually double their space during the spring. Illustrations are used freely. "We always get big results from our advertising," said Mr. Parker. "Our newspaper ads. and our window displays are two of the best selling forces we have. We find that people read the advertisements closely. Very often in the busy seasons the farmers cannot get in for a week or two and will telephone in for things they see advertised. We do a big trade over the telephone at some seasons and it is directly traceable to our newspaper advertising."

Paint Sales Grow

The farmers around Strathroy are not afraid to buy paints and keep their buildings and homes beautified and protected. The paint business of Parker & Co. has doubled in seven years.

"Every one of the clerks," said Mr. Parker, "is instructed in paint selling, so that if a farmer or his wife comes in and wants to know about some work that is planned, they can give them real service. We find that this is appreciated. A great many people do not know which is the best paint for interior work, or for some other job they have in mind. We not only tell them what paint to use and why, but always tell them about the best ways of preparing and finishing the work and the best brushes to use. By following out our directions they get satisfactory work, and that means that when they are going to do some more painting they come to us for the goods."

Another New Line

While Parker & Co. have always handled sporting goods, they are, since they got additional space, going into the bicycle business. A stock has just been installed and one of the first things that was done was to arrange a window display, in which bicycles were included.

"Sporting goods trade has been quiet for the last four years," said Mr. Parker, "largely because so many of the young men of the town and district went overseas. There is every indication, however, that this business is coming back strong, and we are making our plans accordingly and expect to develop the good business in this line that we had before the war."

Business Growing

While the firm has not gone to any extent into the toy business, such lines as children's wagons are handled and a steadily increasing sale is found for them. Last year, for instance, thirty wagons were disposed of. These were all of the better quality. Mr. Parker says that while there is some mail order competition in his district, he is not affected to any extent.

"The mail order business," he said, "has been killing itself to some extent because the firms have been sending out goods that were not what people expected they were going to get. That has meant dissatisfied customers and there is no advertisement so bad for any business as a dissatisfied customer."

Meets the Farmers

So far Mr. Parker has not had any difficulty with the Farmers' Clubs in his territory.

"They seemed to have the idea that I would not want to sell to the club as a club," he said. "When they came to me, however, and wanted to know if I would

By keeping his tinware and enamelware where everybody can see it, Mr. Parker has greatly increased not only his sales but his rate of turnover. Note the card on the pillar. There are a dozen of these cards at various points in the store telling people about the new Cash Basis plan the firm has adopted. As will be seen from the illustration display tables are numerous and produce excellent results Mr. Parker says.

Snaps in Seasonable Summer Supplies

Now that the preserving season is on no doubt you will require some extra Kettles, Sauce Dishes, etc., etc. Our **Cash System** has proven to be such a great success we have decided for the next two weeks to give **10 per cent. off** on all cash purchases of Granite Ware. Now is your chance to get a supply of these goods.

	Grey	Imperial	Blue Canada Ware
Preserving Kettles, No. 24	45c	65	85

" " 22	40c	60	80
" " 24	45c	65	90

Covered Kettles, Milk and Rice Boilers, Teapots, Potato Pots, Colanders, Granite Spoons, Mixing Bowls, etc., etc.

☞ **2 only, Refrigerators,** to clear at **$15.00** and **$18.00**

All above prices less 10 per cent. discount for cash.

We have on hand a good stock of Hay Making Tools at Reasonable Prices

Pure Manilla Rope 40c. a lb.
Trip Rope, Sling Ropes, Hay Loader Rope, etc., etc.

Cars, for wood or steel track in two makes, **$8.50** to **$15.00.**

Stop Blocks, Ball Pulleys, Rope Pulleys, Sling Chains, etc.

Forks—Team Forks, large size, **$6.00.** Pitch Forks, plain and strap ferrule, in different length handles.

McCormick Repairs — We carry a large stock of genuine parts for McCormick machinery. Look these over now and save delay.

Pure Powder Arsenate of Lead, **50c lb.** Paris Green, **65c. lb.**

Martin-Senour Paints **B. O. Parker & Co.** **Florence and PerfectionOil Stoves**

We give 2 per cent. off on All Spot Cash Purchases Book Accts 3 months net

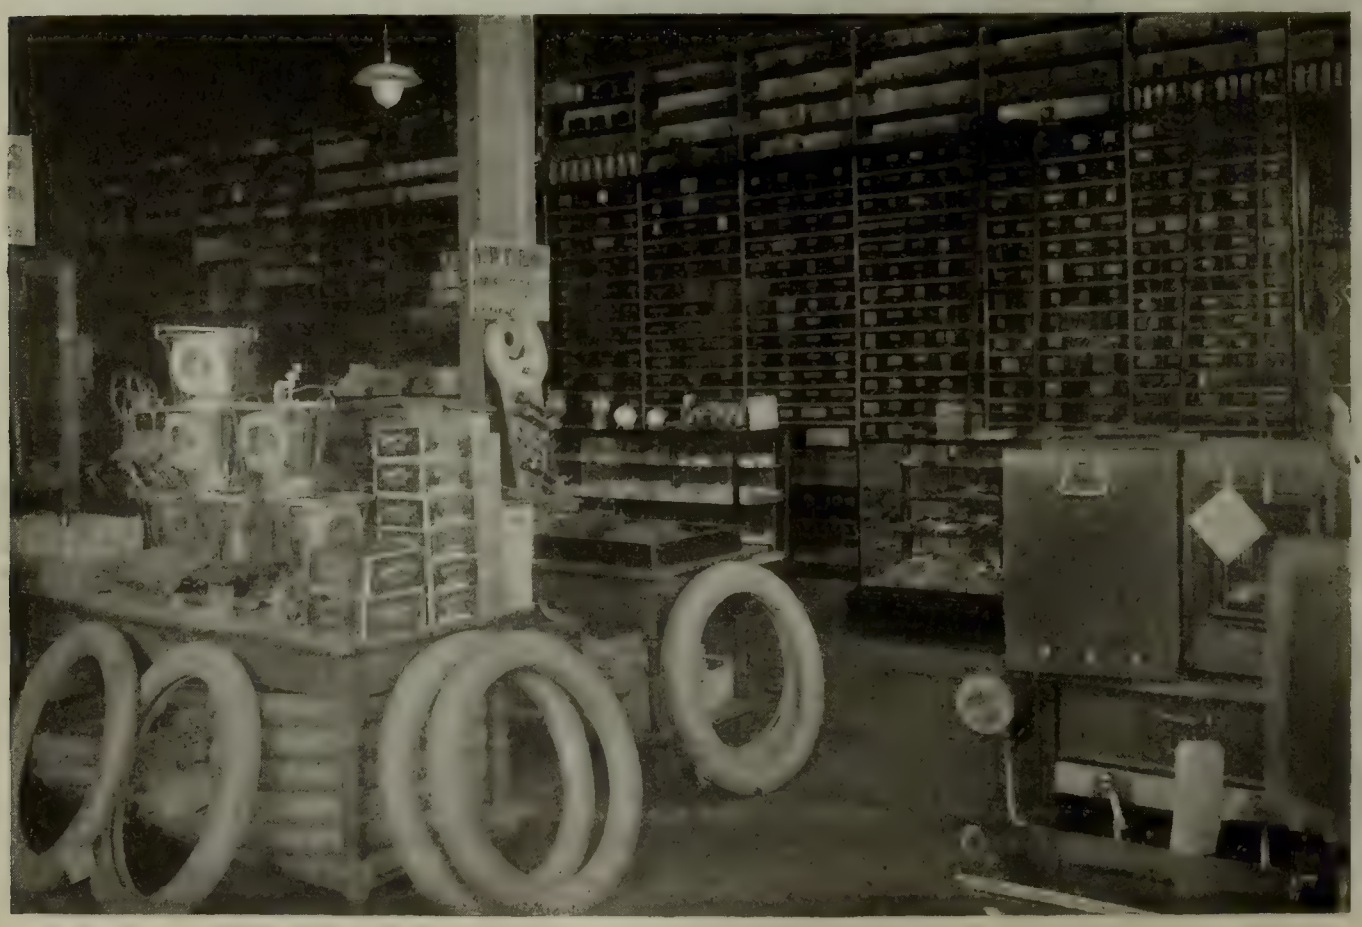
One of the regular weekly ads. reproduced in the local paper for B. O. Parker & Co., Strathroy. Right across the bottom of the ad. will be noted in black face type their statement re discount for cash purchaser. The cash business seems to be getting a greater number of advocates every day.

give them a price on a carload of fencing, or whatever they wanted, I gave them every encouragement. I made them a fair price, allowing for a fair profit for myself and I got the business. We were both satisfied, and, as far as I am concerned, I have not had any trouble so far with the Farmers' Club. I do not try to buck them in any way and I do not sell them goods on which I do not make a profit. If they want to buy in quantity I am prepared to give them a fair price, and, apparently, they are satisfied with that."

MONTREAL ASSOCIATION KEEPS MEMBERS POSTED

That its members may be always on guard in their travels out of Montreal, the Montreal Automobile Association has mailed cards to them containing valuable information. The points brought out are as follows and serve to indicate the service that a good Association may afford its membership:

TO OUR MEMBERS:



1. Road between Point aux Trembles and Bout-de-Isle is now being newly covered with tarvia. Alternate route is via Sault au Recollet and Riviere des Prairies.
2. Ile Perrot road across island is now under construction. Go slow.

Routes Point to Malone

3. Road under construction and detour between Chateauguay and Malone. Passable with care.
4. Very hot police trap for motorists at Canton, N.Y. Watch out.
5. We have placed danger signs at various points on the King Edward Highway.
6. Please observe speed laws and obey the "traffic cop." T. C. KIRBY, Secretary.

WATERWORKS PROJECTS STARTED

Practically all waterworks projects were suspended in Japan during the war, but renewed activity is now being shown in this industry. Among the orders received by Japanese manufacturers of water pipes are the following: Dairen, 2,000 tons, and Kagashima, 500 tons. It is said that Shanghai, Sendai, Fukoka and Tsingtau are expected to order, shortly, water pipes aggregating 18,000 tons. Water piping is now quoted at $100 per ton.

The illustration shows how goods are kept displayed in the store of B. O. Parker & Co. at Strathroy. In the foreground at the right is a battery of oil stoves. Several of these were kept lighted so that people coming in could see them in action. The silent salesman at the right contains auto accessories. As may be seen tires are shown on a separate display table and at points about the store.

Big Demand for Electrical Fixtures

Brisk Building of Good Class of Homes All Over the Country Offers Hardware Dealers Splendid Opportunity For Business—Carrying the Stock to Show Home Builders Good Method of Clinching Sales.

THE splendid revival in building that is now in progress all over Canada opens up opportunities for selling electrical fixtures that many hardware men are cashing in on. Every week sees a big jump in the building permits and it is very significant from the point of view of the merchant who handles fixtures that a very large percentage of the construction work now under way is for homes of the better class, that is homes in which there is an opportunity to sell electric fixtures. Hardware dealers have been going after this business, and from all reports most successfully.

Successful Methods

A case in a Western Ontario town is typical of what is happening in other places. In this town there were two firms handling electrical fixtures, one a regular electrical dealer and the other the hardware man. Owing to conditions in the past four years building has not been brisk and neither wished to put in a very extensive stock. After sizing up the situation carefully this Spring and getting a line of what building was likely to proceed, the hardware man decided to get ready for a greatly increased business. He not only put in a stock of fixtures which was calculated to meet the requirements of his town, but he put them right up in front of his store and had them connected so that when people who were building homes came in he could show them exactly how the goods would look when installed.

Getting the Business

The stock of fixtures makes a fine showing in the store in connection with the other goods and at night when they are turned on the display is especially effective.

The electrical dealer, who is the only rival of the hardware man, outside of the mail order houses, decided that instead of carrying a stock he would sell from the manufacturers' catalogues. The electric man and the hardware man had practically equal opportunities as far as getting after the business at first went. They both knew most of the parties who were building, and from a sales point it simmered down to a question of whether the goods could be sold from the catalogue or from the stock in the hardware man's store.

Hardware Man Wins

Up to the present time the hardware man has been getting away with the lion's share of the business and he attributes his success to the fact that he not only had the stock to show people when they called, but that he let them know he had it, by doing some advertising. He has had to meet some competition from the mail order houses but has had no difficulty in more than holding his own every time. In this he was helped by the fact that one builder who ordered from a mail order catalogue got goods that were not at all like those he thought he was going to get. This man was not satisfied and he did not fail to let other people who were building know that the mail order firm goods were not what he had expected.

Sees Good Business

There is a lot of good business to be had all over the country in handling fixtures. One important consideration for the hardware to keep in mind is not to stock up with goods that are either too expensive or too cheap for the people to whom he expects to sell. It is necessary to study this situation carefully and find out all about the class of houses that are being built.

A manufacturer stated to HARDWARE AND METAL that a mistake some dealers make is in not carrying sufficient stock to completely supply a prospective customer.

"Many of those who are building," he said, "want to have the same kind of fixtures in every room in the house. Some dealers have lost business by not being able to fill orders of this kind."

Outlook is Good

While it is difficult to forecast the extent of the building that will go on, those who have obtained from architects and contractors, views as to prospects, state that the outlook is good. There is no question about the scarcity of dwelling houses in Canada. This shortage is general from coast to coast. The building that is already under way will not begin to meet the needs. The building program which got under way in the Spring has been developing steadily and there is every indication that it will continue to expand all the rest of the year and go on on an even more extensive scale next Spring. Architects are very busy. Many of them have handled more work in the past eight or ten weeks than they have had to look after in five years.

Prices Not High

While prices of building materials have advanced the increase is not even proportionate to advances that have been made in other lines. As far as electrical fixtures is concerned there is little doubt that advances will be made shortly. Copper and brass have gone up and with all round increases in wages the manufacturers say there is only one thing for them to do.

In Toronto the employees of one firm have been on strike for some weeks, having gone out with the metal workers. When the strike began this firm had on hand a large stock of electrical fixtures. Business has been so good that the stock at the present time is nearly depleted in many lines, and orders are being received constantly from all over the country.

Buying Good Goods

The opinion seems general in the trade that while there is not an extensive demand for really high priced fixtures there is a steady demand for medium priced goods of good quality. It is important to consider this when arranging to purchase a stock. The average person does not aim to buy some new electric fixture every day, and if the dealer can show him something of attractive design and good quality at a medium price rhtee is little difficulty in completing the sale.

MARKET FOR ENAMELLED WARE

The weekly bulletin published at Ottawa by the Department of Trade and Commerce has the following regarding the market in France for household enamelled ware:

"Enamelled household utensils are becoming increasingly popular among the French, the American consul at St. Etienne reports, but in spite of the home industries specializing in these lines French manufacturers are unable to supply the demand. German and Austrian products dominated the French market prior to the war on account of superior organization, but they turned out an article which, while having all the appearance of similar products sold at high prices, possessed neither the quality nor solidity of the latter. The following are the articles chiefly in demand: Covered saucepans, 9.45 inches in diameter, capacity, 4 litres; stewpans with straight sides and handled covers, 7, 8 and 8½ inches in diameter, capacities, 4, 6 and 8 litres; long-handled saucepans, 4¾ to 8 inches in diameter and from one-third of a litre to 2½ litres capacity; round, shallow dishes for eggs with handles 6 to 8 in. in diameter; small kettles of 1 to 2 litres capacity; coffee pots, holding 6 cups; also ladles, large kitchen spoons, skimmers, pitchers, washbasins, pails and waste buckets. It would be well to make these goods in three qualities: ordinary, medium and superior, and to present them under distinguished trade marks, to take care that handles are solidly attached to the utensils, to have the lids also enamelled and to furnish illustrated catalogues containing detailed information concerning the process of manufacture and indicating the diameter and capacity in the metric system, with prices in francs and centimes."

Push Roofing and Help Conservation

Timeliness Suggests New Angle to Hardware Man in Pushing Roofing Sales—Farmers Need Product—Importance of Advising Better Insulation Will Mean Larger Sale Building Papers

CONSERVATION of what we have to-day is an important watchword. This is no truer in any one respect than in connection with the property which has been erected and which could not be replaced to-day for anything like the price it cost a few years ago. And there is one line of merchandise which the hardware dealer may get behind and push to the limit with a feeling that he is inducing thrift and truly helping in the conservation scheme so widely recommended—in that of roofings and building papers. The farmer has his outbuildings and sheds to protect and the householder also has buildings that cost money and should be properly looked after. Without fear of intrusion or meddling, the hardware dealer may exercise the knowledge which he has to the benefit of his customers and with profit to himself.

Who Gets the Business

There had been, of late, a gratifying volume of business indicating a considerable improvement in the amount of building which has been undertaken, and this has come about in so quiet and so unconscious a manner as to be decidedly solid and quite encouraging. Who's getting the business?

Roofing of the prepared variety has become very popular. It has passed the experimental stage. Formulas have been so perfected as to ensure the dealer a line of goods on which he can depend and which may be recommended to his trade. Immense increases have from year to year been recorded in the output of factories throughout the country. All of this increased business is not going through the hardware dealer; that cannot be expected. But is he getting his share?

Should Use Helps

The manufacturer affords the dealer helps and these he ought to use. Good information is available as to the best methods of laying prepared roofing. Dependent upon the nature of the work in hand the ultimate seller—the retailer—should be prepared to recommend that grade of roofing which is best for a given job. Is he taking a real interest in the prospect, coaching him with good information, advising the right product and giving additional advice about the class of foundation which ought to be used beneath the roofing? Upon the execution of his duties in this respect will depend, very largely, the permanence of the job, and from this important consideration it is obvious that the customer's regard for the goods sold him will be either made or destroyed. It is wisdom for the merchant to take a real interest in the farmer's or the townsman's roofing needs.

While the purpose of this article aims to impart some important points relative to roofing sales, stress is placed upon intensified selling of sheathings and building papers. The material of the article, as it relates to the latter commodities, is based on an authorized interview with D. J. Munn, President Alex. McArthur & Co., Limited, Montreal.—EDITOR'S NOTE.

It should be remembered that there are several merchants after the roofing business in every community. Since it is a profitable line to sell, the hardware man can very well afford to make a close study of his district and get after the big share of the business. Interest in his customers and would-be customers even before building operations begin will secure many a nice order that might otherwise be lost to the other fellow.

Tarred Felt Lasts

Mr. Munn pointed out that one of the most durable roofing materials yet offered was that of tarred felt. This may be had in a variety of weights, of course, and the nature of the work to be undertaken will determine the quality necessary. For the permanent jobs that are being done in cities throughout the country, and even in towns, much of this is employed, and there are jobs which can now be pointed to, Mr. Munn states, which have stood the elements for many years and which will stand them for many years to come. For real permanence they have long since proven their worth.

Go After Business

It may be that the average hardware dealer will not be in a position to secure the big share of this business. Very frequently it is specified through the architect and the contractor gets his supplies through the lumber dealer. Why not cultivate the architect and the contractor too? The merchant cannot afford to ignore any possible source of business. Through widening his circle of acquaintances he may surely expect to make business friends, and this is also a broadening process without which the merchant has a lessened business vision. Much of this business might come to him through closer cultivation of these two men.

So much for roofing just now.

Urge Better Insulation

Mr. Munn estimates, conservatively, that from 30 per cent. and upwards is lost in an endeavor to heat buildings comfortably. In other words great excess of fuel is required to make our buildings comfortable in the winter season. That this great waste can be saved, Mr. Munn has no doubt, and it is simply a matter of properly insulating our buildings while in process of construction. This is no idle dream, for the experiments which have been conducted to ascertain these results, Mr. Munn says, have revealed the facts to be as stated. Further experiments will perhaps be more gratifying.

And herein is the big opportunity of the hardware dealer. Some are more fortunately situated than others with regard to getting close to prospective builders. Where this is the case there seems to be little excuse for failure to urge the customer to spend a little extra money and make the most of his opportunity.

Use Refrigerator Principle

If the principle adopted in the construction of a refrigerator be employed, Mr. Munn believes that house owners would experience a great deal more comfort in both summer and winter. That is to say, the home would be heated more uniformly in the winter season, and with the minimum of fuel, while no dangerous drafts would be introduced in severe weather. In addition to this—and quite equal in point of comfort, the house would be a most inviting place in which to live when the heat waves were great and prolonged. The principle of perfect insulation would produce those desirable results in retaining a cool and liveable temperature desired by all. And, to prove that this is not a dream or idle fancy, experiments have revealed the truth of the above contention.

Fifteen Degrees

In one case, for instance, the temperature difference secured through careful insulation amounted to fifteen degrees. Surely that is a wonderfully convincing argument. What home lover would not welcome an inside temperature fifteen degrees less than that obtaining outdoors on a sultry summer day of 90 degrees and upward?

These facts are pointed out that the importance of argument upon the part of the dealer may be shown. The customer is about to build. The hardware merchant, if he is alive to his opportunities, already knows this and has been bidding for the business in building materials which he customarily carries in stock. Why not make a study of proper insulation as required in the average house? Any manufacturer of building papers and felts would be only too pleased to co-operate and impart assistance to this end, for it is co-operation that he appreciates. Fortified with this knowledge, it

Value in a Store Front and Displays

A REVELATION of what can be done in the way of transforming a cheaply constructed and cheap looking building into a modern store with an attractive front is furnished in the case of W. A. Gabb, hardware merchant at Rocanville, Sask.

When Mr. Cabb took over the business in November, 1917, the store was set seven feet back from the street line. It had a plain square front of clapboards with three narrow windows above, and two show windows measuring about six feet square. They are designated show windows, but they were not that at all, for they were put in mainly with a view to supplying light to the interior.

It was a dismal outlook for a wide-awake merchant not only from an outside view, but from an inside one. Mr. Gabb took the representative of HARDWARE AND METAL to an old warehouse in the rear where he had buried away what constituted the shelving and fixtures of the store as they were when he took it over. They were of the vintage of 1880, and very poor specimens at that. They were only good for firewood.

It was impossible to do anything during the succeeding winter, but Mr. Gabb laid his plans, and in the spring he ripped off the entire front of the store, added sevent feet which would bring the building level with the street line, and proceeded to put on a modern front. This consisted of two large plate glass windows surmounted by a cornice work, with a further cornice work across the top front of the building. All of this cornicing was sanded, and the name of the proprietor was placed above the windows in block letters finished in gold, which gave the last touch to a very fine appearance. All of this work cost $1,300, but Mr. Gabb states that the business has just doubled since he took it over, so that the expenditure was more than justified.

It is surprising what can be done to dispose of goods if they are displayed properly. When W. A. Gabb took over a hardware business in Rocanville, he found an excessive number of screen doors stored away on an upper floor. A few weeks later what was his surprise to find that another shipment of screen doors had been ordered by his predecessor, and were in the freight sheds.

The front, by the way, was carried out without the use of supporting posts, which was an achievement in itself, and a very original arangement was made in connection with the floor of the windows which are made adjustable, and can be lowered or raised in order to show off certain lines of goods to the best advantage. Hardware is displayed in one window and furniture in the other. In the latter window there is space enough to exhibit a bedroom suite with the bed set up. The next move was to put in new hardware cabinets and counters, and to convert the upstairs into an excellent show room for furniture. An office was also installed in the rear, a window being cut to afford sufficient light. This office is installed with all the latest filing devices and equipment, and in connection with office work it may be a good tip to other merchants to know that Mr. Gabb protects himself against the stealthing of checks by simply using a little rubber stamp on them inscribed: "This check for deposit only."

Every modern method of attracting and holding business has been adopted by this merchant. One of his strongest assets is that he carries an exclusive line of well-known and highly advertised goods. He, however, is a strong believer in advertising himself, using large space in the local weekly. In this connection he will go to any length to secure suitable cuts, which he believes add 50 per cent. to the value of an advertisement.

"I constantly keep everything changed around in the store," said Mr. Gabb," in order to present a fresh and attractive display. I go to particular pains with my windows which are changed every week. At present I have a four-room suite of furniture laid out on the main floor, and find that this form of display

BEFORE and AFTER

REMARKABLE ILLUSTRATION OF WHAT CAN BE DONE TO TRANSFORM AN OLD STYLE STRUCTURE INTO A MODERN STORE AT SMALL EXPENSE.

BEFORE.—Under this heading is shown the hardware store in Rocanville, Sask., as it was when taken over by W. A. Gabb in the fall of 1917. It stood seven feet back from the street line, and presented rather a crude appearance.

AFTER.—This is the same store after it had been remodelled by Mr. Gabb the following spring. The seven feet which were added to bring the front flush with the street line are clearly shown at the end of the building. The manner in which plate glass windows were built in, together with the attractive cornicing and the dignified sign replacing the old style type are clearly shown. It will be noted that the old door and the three upper windows were used in the transformation which cost $1,300. Instead of buying an expensive gasoline pump the new proprietor moved the old one seen above to the street line and enclosed it with a tin casing equipped with a door, which fills the bill and looks well.

Interior of the store of W. A. Gabb, hardware merchant at Rocanville, Sask. On the day this picture was taken he had on display down the centre of his store the furniture for a suite of four rooms. The dining-room furniture is shown in the foreground. In its mirror may be seen a reflection of the show cases and hardware cabinet on the other side of the store.

attracts unusual attention from women customers. The main thing in business according to my notion of thinking is to give satisfaction to customers. In a country town you must rely upon their coming back again and again in order to build up your business, therefore courtesy, and tact, and kindness, and all those attributes of high-class salesmanship must be adopted to hold trade. It pays well."

WHERE SCREEN DOORS WENT

"I had enough screen doors on hand," he said, "to last me four years under normal conditions."

Now it so happened that Mr. Gabb was remodelling the front of his store, and he debated in his mind whether he should separate his store windows from the store proper by putting in a partition of glass. He happened, however, to think of those screen doors, and decided to use them as a background. By inserting a double frame across the rear top of the windows at just the proper height, he was able to slip his screen doors in or out with ease, and they were well displayed both from the street and from the interior. He not only sold out his whole stock that summer, but there were repeat orders.

SEE RECORD TRADE COMING IN WASHING MACHINES

More than sixty manufacturers of washing machines from all parts of the United States and Canada attended the convention of the American Washing Machine Manufacturers' Association held in Chicago. Reports of the delegates indicated that the washing machine business is flourishing and that many firms are finding it difficult to keep up with their orders. From present indications it is expected that sales for 1919 will break all records. Many of those at the convention expressed the view that there is going to be an enormous demand for power washers, and that it will not reach its maximum for some years. While manufacturing costs are steadily climbing prices are being maintained on a basis that is not affecting sales injuriously. The manufacturers considered various plans for stimulating business, such as home demonstrations in small communities, demonstrations in universities and increased publicity. Among the members of the association are Beatty Bros., Ltd., of Fergus, Ont., and J. H. Connor & Son, Ottawa.

WARNING TO FLAX TRADE

In view of the unprecedented prices now in effect for flax seed and linseed oil the following warning issued by the Duluth Board of Trade, is of interest to the trade:

"The directors of the Duluth Board of Trade urge upon all members the necessity for the exercise of the utmost caution in trading in flax seed at the present time. The market is unusual in the extent of declines and advances, and presents great risk in trading. The directors desire to warn all members that any attempt at manipulation or the creation of artificial values is an offense of which it will be their duty to take instant notice, and any indication of their presence in trading will result in prompt action by the Board."

BUILDING MATERIALS SCARCE

Building materials, such as bricks, tiles, lumber and lime are reported to be exceedingly scarce in Hankow, China, at the present time. The conditions among the laboring classes in provinces producing these materials have greatly curtailed the production.

COPPER SHOWS UPWARD TENDENCY

While the price of copper in Japan shows an upward tendency, this is said to be entirely due to the rapid reduction of the present supply, rather than to any great improvement in the general industrial situation causing a greater demand.

Bicycle Sales Greatly Stimulated by Street Car Strikes and Increases Made in Car Fares

THE sales of bicycles and motor cycles have been greatly stimulated this season by street car troubles. Complete tie-ups in such centres as Winnipeg, Toronto and London were directly responsible for a great demand for bicycles. Another factor in making a great demand for wheels has been the increase in trolley fares. Many street railway companies in view of the demands of their men for higher wages and generally increased operating expenses have raised their rates. This has happened in at least eight Canadian cities. In many of these places the merchants selling bicycles have not been slow to make the most of their opportunity by pointing out that riding a bicycle is a straight business proposition, as enough money can be saved in a short time by not having to pay car fare to purchase a bicycle. Besides the feature of the healthful exercise in the fresh air has been used with good effect.

Higher Car Fares

Among the Canadian cities which have adopted higher car fares are London, Ont., five cents straight; Montreal, 6c fare, 15c for "owl" service; Ottawa, straight 5c fare, 10c owl fare; Lethbridge 10c cash, 4 tickets for 25c; Edmonton, 7c fare; Vancouver, 6c fare; Victoria, straight 5c fare; Winnipeg, 6c fare, workingmen 6 tickets for 25c.

Says "Read as You Run" Cards Are Best

Merchant Tells of Practical Results He Has Obtained and Urges Others to Make Comparisons and Find Out Just Which Type of Cards Are the Best Business Producers.

Written by R. T. D. EDWARDS

STEPPING into an exclusive Yonge Street store in Toronto the other day, the writer inquired of the proprietor about his show cards.

"No," he said, "we don't wish to change. The shop we are buying from is giving us just the kind of cards we think are the best business getters."

On being informed that orders for show cards were not desired but just his opinion as to what he had found out were the most successful business-getting show card is used only on exceptional occasions. These if used in abundance often tend to detract from the merchandise.

Plainly lettered show cards which can be read at a glance are far superior for the busy public to read, in other words, the "read as you run" card is his motto. He has some small decorations on his cards, but the wording stands out in plain type.

Thus far we have what a successful Yonge Street merchant has found to be the best for him, and he speaks not just offhand but from years of experience.

SEASONABLE SHOWCARDS

Take a Tent on Your Camping Trip.

Haying Tools for the Harvest.

Pails and Shovels for the Kiddies' Sand Pile.

For a Real Rest—Try One of Our Hammocks.

No Sun Glare With These Goggles.

Always a Cool Breeze With an Electric Fan.

Supplies for the Thresherman.

Get a Fishing Rod for That Outing.

A Vacuum Bottle for a Cool Drink.

So all show card writers in our Canadian stores may be benefited by his experience. He has made this subject a business and studied it from a business-getting standpoint, and has proven what he says is right in dollars and cents.

Appreciates Their Value

Being an enthusiast regarding the value of show cards the proprietor expressed his opinion very emphatically.

This merchant has found out that plainly printed show cards, both in the windows and throughout the store, are best for the class of trade to which he caters. The highly decorative style of show card is used only on exceptional occasions. These if used in abundance often tend to detract from the merchandise.

Make Comparisons

We don't say that each and every merchant should use the same style of show card, because we think that would be a mistake, but all may do the same as this merchant has done by making a study of this subject, the same as you do salesmanship, or the buying end of your business.

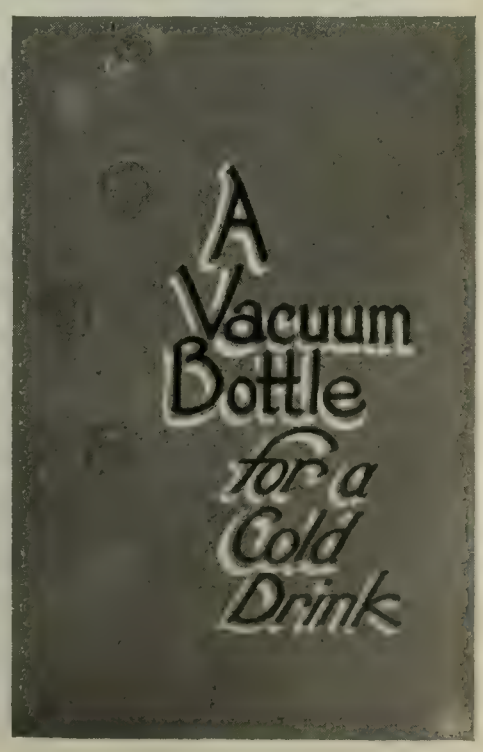
A very striking example of the different ideas merchants have in their show cards is shown if you walk just one block north of this store we have been talking about.

The north store is one which sells exclusive merchandise, that is just one line of goods. These goods are not at all decorative in themselves and cannot be displayed so as to be made attractive as merchandise which has more variety of colors. So the owner of the store makes his show cards the decoration. He has six or more large double windows, and in each one is used one-half or full sheet show card with highly colored decorations.

Air brush work is most prevalent on these cards, with heavily decorative border effects. Shadow script and shade lettering is used which tends to make the cards quite showy.

These cards certainly would not do for many merchants. Some would pronounce them vulgar, but this is just another case of a man making a study of the kind of card that helps him get the business he is after, and, by all appearances, he is getting results.

Catchy wording is also playing a great part in attracting trade to both these stores. For years they have used snappy, attention compelling phrasings which make people give the windows more than a casual glance. These wordings are different to those used in other stores, and are without the use of any slang.



The sample wordings shown on this page are similar to those used on these show cards.

The show cards reproduced are quite suitable for the present season. The design is of opaque colors, attractively blended in Summer hues. They are quite simple to draw and will go with almost any wordings you wish to use.

S. F. BOWSER & COMPANY. INC.

"Systems For Oil, Economy and Efficiency" is the title of a handsomely lithographed circular in colors issued by S. F. Bowser & Co., Toronto. It deals at length with economical methods of handling oil that increase efficiency and add safety. The lubricating oil outfits manufactured by the firm are attractively illustrated, also pumps for gasoline, storage systems for paint, oil and equipment for storing and handling rubber cement. Another folder issued by the firm and also very attractively lithographed in colors tells about the garage equipment the firm manufacturers. Readers of HARDWARE AND METAL may obtain copies of the folders upon request.

EDITORIAL COMMENT

TIN PLATE COMPETITION

THE recent decision of the Welsh tin plate trade to send to the United States a joint delegation of manufacturers and workmen to study conditions with a view of finding how best to meet a competition that has become very keen has an interest to Canada. As stated in a previous issue of HARDWARE AND METAL, one of the largest Welsh tin plate firms has secured a location in Toronto, where a plant costing $3,000,000 will be established. Canada, it may be noted, is at the present time one of the largest buyers of tin plate that the United States has. It may be characteristic of the Welshman to carry the war right into the opposition camp and by locating a big plant in Canada not only endeavor to supply the demands of the best buyer the United States has, but even invade the American field. An issue between the Welsh makers and their men appears to relate largely to tonnage. The Welsh workmen are said to have promised tonnages equal to those produced in American mills if they are given equal equipment. It may be taken for granted that the Welsh manufacturers will see to it that the necessary modern equipment is secured and with this and a big plant located in Canada they should be in a position to regain a position in the tin plate business that is being threatened by Americans. It is apparent that the Welshmen are not going to let anything slip if aggressive action will hold it.

MAKING BETTER BUSINESS MEN

BRADSTREET'S reports show that during the first week in July there were only nine failures in Canada, as compared with 54 in the same week in 1915, 26 in 1916, 14 in 1917 and 8 in 1918. This is not in any way a record as in the week preceding there were only 5. The figures, however, are interesting in that they indicate that Canadian business men have learned a good deal in the last four years. Those who are in closest touch with the commercial life of the country state that Canadian business is absolutely sound. This does not mean that there is not still room for improvement, because no business man ever reaches the stage where he knows everything about business. But taking them as a whole, they have come through an extremely trying period and have learned lessons that will make them more efficient as merchants in every way. Having come safely through nearly five years which unquestionably are among the most critical years in Canada's commercial history they find themselves established on a foundation that was never stronger. Not only this, they are looking forward now with confidence to a steady development in the Dominion and are prepared as they never were before to take part in and keep pace with this growth.

A BIG PROBLEM

IN view of the demands that are being made all over the country by employees, many merchants and manufacturers are giving more attention than ever before to profits. In many cases, not only shorter hours are being demanded, but a share in the profits. Just how far they can go in meeting demands of this kind without vitally affecting their business is what business men are trying to discover. Any business starved of profits will soon eat up its own capital. Big assets are of little good unless they are of such a character as to bring increased earnings. Big earnings which are merely the result of accidentally favorable conditions are usually only temporary. A good many firms who were engaged in war work of one kind or another have found this out in the last six months. But growing earnings which are based upon a constant increase in the productive assets are of great importance. Any firm which is constantly plowing back into its assets a considerable part of its earnings each year is in a position to build for the future. Many business men hold that in order to make the best of the opportunities offered for expansion a business must absorb a good share of its own profits. That, they say, is the only sound way to finance for expansion. Many of the largest firms in the country have built on this foundation. If a firm earns, say an average of 15 per cent. annually for five years, it might pay a 12 per cent. yearly dividend and retain 3 per cent. in the business or it could pay 5 per cent. and retain 10 per cent. for expansion. In this case its capacity would in five years increase fifty per cent. This plowing in process would give it splendid stability. But if the firm endeavored to pay, say six per cent. on its invested capital and then distribute the balance to workers it would soon cease growing and starve. This question of how much profits can go to the workers, especially when they are lessening production by asking shorter hours, is a big one and upon its successful solution depends the future of a great many firms.

Mr. Parsons' Misstatements

By Col. J. B. Maclean in "The Financial Post."

S. R. PARSONS was president of the C.M.A. in 1917-18. He liked the honor so much, he put his whole thought into it. He enjoyed it; it became so much of his life, he forgot in 1918-19 that he was no longer president. In fact he complained several times recently to his friends that he was so busy with association affairs he had no time for the B. A. Oil Co., where he is employed. He was always on the spot with a speech or a letter to defend capital, or to attack any who might not agree with what he—always with the best of motives—thought inimical to the C.M.A. It became a habit with him. There was, too, perhaps, a touch of vanity, which warped his good judgment and he began to speak unwisely and to make foolish suggestions. This rather displeased some of the industrial leaders for whom he assumed to speak. He threatened the Methodist Church with the disapproval of the millionaires just when men of this type are trying to keep under cover. His last break was a letter to the Press, suggesting that the place to look for profiteering and high prices was the wholesale and retail trade. Experienced manufacturers agree with Lloyd Harris that the biggest problem before us is not the making, but the selling of Made-in-Canada goods, that the friendship and co-operation, particularly of the retail merchant, is absolutely essential. Their opposition would kill the Made-in-Canada movement; and for the self-assumed mouthpiece of the C.M.A. to rush into print over his own signature in so uncalled for a way was quickly recognized as damaging. But Mr. Parsons now explains he was merely emphasizing something the Minister of Labor said—but, which it happens, he did not say. This makes it worse, and it is also an example of the little vanity habit referred to above, that, of course, the public would not approve of the idea until it had Mr. Parsons' endorsement for the C.M.A., even though the Hon. Mr. Robertson is one of the most highly regarded members of the Cabinet, in fact, has shown himself an unusually broad type of Minister.

Anyway it was the last straw, and mutterings from a certain influential quarter developed into a suggestion that THE FINANCIAL POST tell its readers that Mr. Parsons had now no official position in the association, and that his prolific utterances misrepresented the great mass of manufacturers, and never more so than when he, as a manufacturer, went out of his way to suggest an investigation of merchants' books for the real cause of the higher living costs. As requested, FINANCIAL POST pointed this out, and as many of our readers know Mr. Parsons did not take the hint. Instead, he occupied much time at the annual meeting in an attack on me and my motives. Chiefly, he said the article was due to his refusal to take up a grievance with Mr. Murray, their secretary. This was a serious charge and he clearly misled the meeting.

The facts are these: Business newspaper publishers, in common with the paper makers, Western Canada manufacturers, and other members, had complained of the way Mr. Murray was dealing with their interests. A Made-in-Canada campaign was in progress and the association offices were all the time actually using foreign, instead of Canadian-made paper. Because of dissatisfaction, the Western manufacturers decided to withdraw, and had actually formed new associations. These things had all been righted more than a year ago by the retirement of Mr. Murray and could not have had the remotest connection with the article in THE FINANCIAL POST saying that Mr. Parsons no longer spoke for the C. M. A.

Mr. Parsons further said I had come to him soon after he was elected president and denounced Mr. Murray. I said this was untrue, that I thought I had Mr. Parsons' own letters to prove it, and that I would answer for the benefit of the members generally in THE FINANCIAL POST. I am able to do so. The letters show that it was Mr. Murray who went to Mr. Parsons, and Mr. Parsons had come to me just as Lloyd Harris, T. A. Russell, Mr. Sherrard, and others had come to me on the same errand. I said I could not take the matter up until a libel action I had brought was disposed of. The file shows that Mr. Parsons made his first approach to me on Mr. Murray's behalf through the editor of THE FINANCIAL POST, October 24, 1917. Next he writes, November 2, saying that Mr. Murray had spoken to him and says he wants to bring us together. On December 31 he writes respecting this and saying that Mr. Murray was anxious to meet me, and so he goes on.

This evidence is surely sufficient. Mr. Parsons' own letters, signed by himself, prove that he stated what was untrue to the annual meeting. These are only part of his misstatements. More exposure of Mr. Parsons and the Sam Harris clique and their petty politics are to follow, which I hope will speed up the reorganization of the C. M. A., overcome the mistrust and antagonism that is hampering all Canadian progress. One has only to read the newspapers right across Canada to fully understand the very unfair attitude, due to an entire misunderstanding of manufacturing and business problems.

I cannot do better than quote from a letter received from a well-known financier: *"The explaining Mr. P. in F.P. of 21/6/19. First Class! Inflated heads and pneumatic tongues are doing the country more harm than inflated prices! Keep it up!"*

The man to keep it up is a good general manager or salaried president. We will help him with constructive publicity among those interested in manufacturing problems.

In this article Col. Maclean contends that certain of the statements publicly made by S. R. Parsons, late president of the Canadian Manufacturers' Association, were lacking both in wisdom and correctness.

Especially does he challenge the statement made by Mr. Parsons that the place to look for profiteering was among the wholesale and retail trade.

In the present position of Canada the interests of the manufacturer are the interests of everyone, and therefore this article, which aims to improve conditions that have militated against the best interests of the manufacturing fraternity, should be of interest to everyone.

NEW ZEALAND FIRM WANTS AGENCIES

Bradfield McPherson. manufacturers' representatives, 34 Water St., Dunedin, New Zealand, desire to secure agencies for firms who are not represented in New Zealand, and wish to establish their goods in that market. They state that they are always prepared to give preference to goods of British manufacture and mention that there is in New Zealand a preferential tariff of from ten to fifteen per cent. extra on foreign goods. They are particularly interested in securing an agency for a wall board of good quality.

ADDITION TO HALF HOLIDAY LIST

Saskatchewan

CANORA.—All stores close on Wednesday afternoons during July and August at 1 o'clock, except fruit stores. On other days at 6.30 in the evening except Saturdays, when they close at 10 o'clock.

EVENTS IN THE TRADE

Business Changes

Flesherton, Ont.—W. L. Wright has purchased the hardware business from the Richardson estate.

Collingwood, Ont.—D. B. Ritchie has purchased the Collingwood Hardware from W. H. Lont, who is moving to Toronto.

New Firms

The Rothschild Hardware Co., Ltd., of Sudbury, Ont., has been granted a charter.

The George Taylor Hardware, Ltd., of New Liskeard, Ont., has secured premises at Timmins, Ont., and plans to open a branch store about August 1. Mr. J. Perreault, of New Liskeard, has been appointed manager.

Fire Losses

Considerable damage was caused by fire in the glue manufacturing plant of Frederic Marquis at Quebec, Que.

The harness shop, furniture store, residence and stables of Colin McMillan at Dromore, Ont., were completely destroyed by fire, which is supposed to have started from children playing with matches.

Obituary

The death occurred at Quebec, Que., of Alfred Leloup, glove manufacturer.

Keith Murray, aged 29, of Hamilton, Ontario, formerly a traveling salesman for the Hobbs Manufacturing Co. of London, Ont., died in St. Jerome's Hospital at Batavia, N.Y., on Monday from injuries he sustained when an auto in which he was riding turned turtle. He was a son of W. Murray, of Hamilton, and recently had been travelling for the Elk Firebrick Co., of St. Marys, N.Y. Besides his wife, Mr. Murray leaves a two-year-old daughter.

Personals

M. Soren, of Soren Bros., Toronto, is spending a month in Muskoka.

E. J. Coyle, formerly of Leamington, Ont., now proprietor of the E. J. Coyle Hardware in Chicago, was a recent visitor with his brothers in the vicinity of Amherstburg, Ont.

Harold S. McPherson, of London, Ont., has been appointed manager of the mechanical rubber goods department for the Dominion Rubber Systems Ltd. of Ontario, with headquarters in Toronto.

N. W. Wickett, who has been chief shipping clerk at the Toronto branch of Brandram-Henderson, Limited, has been appointed travelling salesman and will cover territory in Northern Ontario.

Arthur Speight, who returned recently from France, where he spent 38 months with the siege batteries, has been engaged by Beatty Bros., Ltd., of Fergus, Ont., to cover the Maritime Provinces and call on the hardware trade. Before going overseas Mr. Speight was with the International Harvester Co.

E. D. Ryan, who has been superintendent of the Great Lakes Oil Refinery Co., at Wallaceburg, Ont., for some time has left for Daval, Oklahoma, where he has been appointed general superintendent of the Travis Oil Corporation. Mr. W. Fax becomes superintendent of the refinery at Wallaceburg.

D. N. O'Byrne, manager of Merchants Hardware Specialties Co., Calgary, Alta., was a visitor at the Toronto office of HARDWARE AND METAL this week. Mr. O'Byrne is spending some time calling on firms whose goods are being handled by this company in the West.

Frank Dunham, of St. Catharines, Ont., formerly of Kitchener, has been appointed business manager of the Maple Leaf plant of the Dominion Rubber Systems Ltd. of Ontario, at Port Dalhousie, Ont.

Trade Notes

Mutual Motors Ltd. has moved from Hamilton to Toronto.

The Fillmore Building Co., Ltd., has been incorporated at Fillmore, Sask.

The Imperial Brass and Foundry, Ltd. has been in corporated at Edmonton, Alta.

Dalyte Electric Ltd., of Guelph, Ont., has opened a branch warehouse at Toronto.

P. Lemay & Co., tinsmiths, Montreal, has been dissolved and Joseph Lepage registered.

The Hunter, Strome Electric Co., of Hamilton, Ont., has purchased the E. A. Wark Electric Co.

The Torton Lamp Co., of Toronto, has been dissolved. but the business will be continued by Fred J. Hart.

A voluntary petition for a winding up order has been granted in connection with Techno-Chemicals, Ltd., of Montreal.

J. W. Lyons has purchased the harness business of J. J. Richardson at Markdale, Ont.

The Standard Equipment & Tool Works has been registered at Montreal by Joseph Presner.

The Consolidated Mining and Smelting Co., of Canada, Ltd., has called a meeting to discuss removing head office to Montreal.

The London Concrete Machinery Co., London, Ont., is building a $5,000 addition to its factory.

The One-Minute Mfg. Co., Toronto, manufacturers of washing machines, has assigned to W. S. Ball and a meeting of the creditors will be held on July 23.

The Canadian Consolidated Rubber Co., Ltd., of Montreal, is preparing plans for enlarging its factory at Kitchener, Ont. The expenditure will be about $1,000,000.

The Beaver Wood Fibre Co. is preparing plans for enlarging the plant at Thorold, Ont., and for erecting a new plant at Ottawa. The estimated outlay will be $2,500,000.

The directors of the United Iron Works and Machine Co., Ltd., of Haileybury, Ont., have decided to move the head office of the firm from Haileybury to Toronto.

The Richmond Hill Hardware Company, Richmond Hill, Ont., have disposed of the tinsmithing department of the business to Mr. Frank Teetzel, who has been Mr. Batty's foreman for a number of years.

The Percival Plow and Stove Co., Ltd., of Merrickville, Ont., is negotiating with the council for land on which to erect a new moulding shop and machine shop. Large additions are contemplated by Beatty Bros. to their plant at Fergus, Ont.

The Continental Oil Company, which has operated plants at Winnipeg, Regina, Saskatoon, Calgary, Lethbridge and other Western points has been taken over by a new firm, the North Star Oil and Refiining Company, Limited. The head office will be at Winnipeg.

According to press reports the Smith Saw Works property at St. Catharines, Ont., has been purchased for theatre purposes and the saw company may remove to the premises of the Metal Drawing Company.

A satisfactory settlement of a threatened strike of the molders at Crowe's Iron Works at Guelph. Ont., has been arranged by the men being granted a wage increase of fifty cents a day and their hours being reduced to eight instead of nine.

At a special meeting of the Canadian Union Iron Mines Corporation of Canada, Ltd., Montreal, it was agreed to accept a resolution of the executive committee that the company enter upon the manufacture of fertilizers upon a large scale. In connection with this project the large chemical works at Trenton,

Ont., owned by the British Chemical Company, may be used as it has the largest and best equipped sulphuric acid plant, it is stated, in America. A big demand for fertilizers was formerly supplied by Germans, and it is planned to keep this trade at home.

T. A. Morrison & Co., Montreal, contractors' supplies, has been dissolved and is succeeded by T. A. Morrison & Co., Ltd.

Wm. B. Stewart & Sons, Toronto, have opened a branch office in the Dominion Express Building, Montreal, to serve the wholesale trade in the East in the interests of the Hamilton Cotton Co., Ltd. Harold B. Stewart will be in charge.

The McClary Mfg. Company, of London, Ont., has commenced work on an extension to its uptown plant. The building, it is stated, will be only one storey in height, but the walls and foundation will be constructed so as to carry four stories which may be added later.

Montreal News

H. T. Roden, of A. Schraeder's, Son, Inc., Toronto, was in Montreal this week.

L. B. Wasserstrom, New York, razor strop manufacturer, was a Montreal visitor this week.

R. W. Pain, American Ring Co. representative, Waterbury, Conn., was in Montreal this week.

F. O. Barber of Newton, Mass., was in Montreal this week in the interests of his principals, P. & F. Corbin.

John Richardson of Richardson and Bureau, Montreal, returned this week from a trip to the Maritimes,

Morris Wheeler of Binghamton, N.Y., was in Montreal this week representing Sargent & Co. of New Haven, Conn.

St. John, N.B., News

Martin and Violette of St. Leonards, N.B., are disposing of their general store which they have conducted for thirty-two years.

The general business of W. H. Duffy, at Hillsboro', N.B., has been taken over by a newly-incorporated company, W. H. Duffy Sons, Ltd. William H. Duffy, Karl S. Duffy, and Mrs. Florence M. Duffy are the directors.

John E. Macdonald, of the staff of the Rogers Hardware Co., Ltd., Charlottetown, P.E.I., has severed his connection with that concern and left for Boston recently. He received a complimentary address and a set of military brushes, suitably engraved, from his associates before leaving.

A considerable number of breaks into St. John hardware stores, with the loss of a large amount of goods, has occurred within the last year, with little to show for them in the way of recovery of goods or arrests. A break into W. H. Thorne & Company's premises recently, when more than $300 worth of goods were taken, was followed by an arrest which may put an end to the series of burglaries. The prisoner is now undergoing his preliminary hearing.

T. S. Simms & Co., Ltd., manufacturers of brooms and brushes, St. John, will send their own representatives to Great Britain and France. This step is taken as a result of a survey made by the president of the company, Lewis W. Simms, on his recent trip to Europe. Mr. Simms is convinced that there is plenty of business in Europe for Canadian concerns if they will dig for it. A considerable shipment to Ireland marks the filling of the first of the orders received by Mr. Simms while abroad.

Harry J. O'Neil, manager of the St. John branch of the James Robertson Co., Ltd., met a tragic death in Boston Harbor last week. While on a trip to New York he had stopped at Boston and was on a passenger steamer in the harbor, when the arrival of a transport in port sent all the passengers rushing to one side of the vessel to witness the return of the troops. He was crowded overboard and was drowned before help could reach him. He had occupied the post of manager only a year, succeeding the late Jone Keeffe after twenty-one years' service with the company. E. J. Terry, who has been a member of the St. John staff for several years, has been appointed manager in place of Mr. O'Neil.

Incorporations

Motorlife Ltd., capital $10,000, head office Weyburn, Sask., plans to deal in automobiles and accessories.

Premier Paper Products Ltd., capital $50,000, head office Sarnia, Ont., plans to manufacture pails, cans, cartons, drinking cups, egg carriers, and similar products.

Canadian Type Registering Scale Co., Ltd., capital $24,000, head office Hamilton, Ont., plans to manufacture and deal in scales and type registering machines.

The Canadian Aero Company, Ltd., capital $50,000, head office Brantford, Ont., plans to manufacture and deal in aeroplanes, and also to carry on a freight service by air.

Canada Petroleum and Refining Corporation Ltd., capital $2,500,000, head office Toronto, plans to refine, distribute, and supply oil for light, heat, power, signalling, and other purposes.

T. A. ANDERSON PASSES ON

Thos. A. Anderson, president Merrick-Anderson Co., Ltd., wholesale hardware, Winnipeg, Mann., passed away on Tuesday of this week at his summer home at the Lake of the Woods. Mr. Anderson came to Winnipeg in the early '80's, when the present firm was started in a small way. He was one of the most highly esteemed business men in the city of Winnipeg, and his associations with his executors and staff were of the most congenial nature. Mr. Anderson has been in failing health for the past two or three years following a paralytic stroke. The warehouse and office of the company closed in respect to the memory of Mr. Anderson.

OWEN SOUND MERCHANTS ADOPT THE CASH BASIS PLAN

All retail merchants of Owen Sound, Ont., are now conducting their business on a cash basis. The hardware stores were the last to adopt the plan and as a result, it is stated, have had no trouble at all in educating the public to the idea.

"We are not being asked for credit and the public does not seem to expect it," said Mr. L. Ferguson, manager of T. I. Thomson, Limited, to HARDWARE AND METAL. "The plan has been received by the public well. Other merchants adopted the cash basis system some time ago."

It is stated, that the merchants who have been working on the basis of cash for everything are well satisfied and that many of them would not return to the old plan of carrying credit accounts.

BUYS POCKET KNIFE CO.

It is reported that the Winchester Repeating Arms Company, New Haven, Conn., has purchased the Eagle Pocket Knife Company, Inc., of that city, and will continue the manufacture of the latter concern's products, which have consisted of one and two-bladed steel handle knives.

Maritime Wholesale Hardware Association Meets at Digby, N.S.; Record Attendance

THE annual convention of the Maritime Wholesale Hardware Association was held last week in Digby, N.S., with a record attendance of members from all parts of the three provinces, Nova Scotia, New Brunswick, and Prince Edward Island. There were also a large number of representatives of Canadian and United States hardware manufacturers present. In addition to the consideration of business matters relating to the trade, the members found time to enjoy the attractions offered by this popular summer resort.

Officers Elected

The election of officers resulted in the choice of the following: President, R. P. Dickson, of the Sumner Company, Ltd., Moncton, N.B.; vice-president, I. Lovitt Crowell, of William Robertson & Son, Halifax; New Brunswick. Executive: J. F. Tilton, of W. H. Thorne & Co., Ltd., St. John; R. M. Bartsch, of the S. Hayward Co., Ltd., St. John; H. W. Emerson, of Emerson & Fisher, St. John. N.S. executive: Frank Sutherland, of Thompson & Sutherland, New Glasgow; J. R. Simmonds, of James Simmonds, Ltd., Halifax; A. W. Morton, of A. M. Bell & Co., Ltd., Halifax.

CAUGHT JUST IN TIME

A serious fire was prevented just in time in the hardware store of Russell Bros., at Dundalk, Ont. The first that the employees knew of anything being wrong was when smoke was seen coming from the cellar. Investigations showed that flames were burning briskly close to a large coal oil tank in the cellar. A few minutes more and the blaze would have had a start that would have made checking it a very difficult job. It was caught just in time. It was found later that the fire had worked its way in through a cellar window. A couple of five-year-old lads found some matches and tested them on some rubbish they found in the rear of the store and the flames got into the cellar.

BUFFALO SPECIALTY CO. FOURTEENTH ANNUAL SALESMEN'S CONVENTION

The combined United States and Canadian sales force of the Buffalo Specialty Co. of Buffalo, N.Y.; Bridgeburg, Canada, and London, England, is attending the fourteenth annual convention at company headquarters, Buffalo.

Announcement was made that three new products would be placed on the market this fall: The Liquid Veneer Mop, with "the swab which comes off with a pull"; Neverknock Carbon Remover, a new discovery for quickly removing carbon from gasoline engines; and Holdfast Gasket Shellac, said to be the purest shellac for gaskets ever offered for sale.

Among the many enjoyable events of the convention was a trip to Pine Grove Farms, owned by Mr. Oliver Cabana, Jr.

Most of the salesmen of the company have been with the organization a great number of years, and the annual get-together is looked forward to by all with great eagerness. The company values these conventions very highly, going to ever-increasing expense each year to hold them, but counting the cost but a trifle when compared with the benefit derived.

GOOD ROADS SOCIETY FORMED

Leading citizens of Tokio have recently organized a society to foster the improvement of roads in Japan, but more particularly those in and around Tokio.

NUMBER OF MOTOR CARS INCREASES

The number of motor cars in the Hyogo prefecture of Japan in 1908 was 4, in 1912 there were 14, in 1916 there were 89, and at the end of 1918 there were 282 cars registered. The city of Kobe, which is located in this prefecture, is said to have 182 automobiles.

NEW RUBBER COMPANY ELECTS DIRECTORS AND OFFICERS

At a meeting in Montreal of the incorporators of the United States Rubber Co. of Canada, Ltd., which was recently granted a charter and has a capitalization of $20,000,000, the following directors were elected: Sir Mortimer Davis, W. A. Eden, Sir Charles Gordon, R. E. Jameson, Lieut.-Col. Herbert Molson, Col. S. P. Colt, J. B. Waddell, C. B. Seger, E. W. Nesbitt, M.P., H. E. Sawyer, V. E. Mitchell, K.C., E. S. Williams, J. N. Gunn. At an organization meeting of the board held subsequently, the following officers were elected: C. B. Seger, president; W. A. Eden, vice-president; V. E. Mitchell, general council; W. Binmore, secretary-treasurer. The directors and officers of the United States Rubber Co. of Canada, Ltd., are practically identical with those of the Canadian Consolidated Rubber Co., Ltd., and this indicates, it is believed, that close working arrangements that are contemplated between the two companies.

PAINFULLY INJURED

Edwin A. White, hardware merchant at Bruce Mines, Ont., had several ribs fractured and was badly shaken up when loading some barrels of gasoline at the dock a barrel fell on him.

Encouragement For Steel Industry

Contract for 250,000 Tons Ships' Plates Awarded by Government Should Boost Industry and Cement Confidence—Is a Big Forward Step

THE announcement made at Montreal by the Hon. C. C. Ballantyne, Minister of Marine, concerning the awarding of 20,000 tons ship plate business to the Dominion Steel Corporation, should restore confidence among Canadian business men. This will mean the resumption of work at Sydney in a big way and will ensure work for a small army of men. The work is so extensive as to ensure about five years' work. When finished, Canada will at last have one of the most up-to-date and complete plants on the continent, it is expected.

Ensures Shipbuilding

The announcement made by the Minister gives assurance that Canada is not going to relinquish her shipbuilding program. This is very welcome news. Extensive building has already been undertaken at widely-separated points, and the Maritime nature of her geographical location permits of the intensifying and enlarging of plans for the building of ships on a large scale. Just at this time, such an announcement must be taken as a welcome augury in assisting settlement of labor unrest.

The plans, HARDWARE AND METAL understands, are very much more extensive than those at first outlined and planned, and involve the production of five times the tonnage called for at first—50,000 tons. Delays were occasioned through signing of the armistice last November and the Government negotiated for lower prices. The above arrangement means that the difficulties as between the Government and the contracting company have been dissipated.

President Workman Speaks

President Mark Workman of the Dominion Steel Company gave out an announcement after the above contract extensions had been announced. Through the negotiations that had been proceeding it was arranged that 50c per ton should be clipped from the original price of $4.15 per hundredweight and making the contract basis $3.65.

Work is to be resumed at once on the plate mill and it is expected that rolling of plates will be possible by the first of January next. It was stated by Mr. Workman that the price agreed upon is quite satisfactory, even though it is a considerable reduction in the original price. Mr. Workman stated that his company was very desirous of assisting in every way possible to get shipbuilding in Canada under way with a big stride.

In addition to the expenditure for the new mill of about $5,000,000, it is stated that the Government order for the 250,000 tons of plates will amount to around $20,000,000, this to be spread over five years.

Thus will Canada be able to produce at home, not only the necessary plates for her ships to be built, but also a large additional tonnage for other industrial purposes, such as steam locomotives, bridge materials, etc.

HAD RIBS FRACTURED

Albert Taylor, of the George Taylor Hardware Ltd., Cochrane, Ont., had two ribs fractured and was badly shaken up when his auto overturned. He was trying to pass a horse and buggy on the road and got too close to the edge and the car upset. Mr. Taylor jumped, but stumbled. and the car fell on him. He did not think at first that he was hurt, but later it was found necessary to consult a physician, and he was removed to the hospital at Haileybury.

M-D TOOL CO.

The M-D Tool Co., Danielson, Connecticut, Campbell Agencies, McKinnon Building, Toronto, Canadian representatives have issued a catalogue of the tools manufactured by them. Various sizes of insulectric screw drivers are listed, also pocket screw drivers, adjustable valve grinders and the M-B silent salesman is shown. The catalogue is profusely illustrated. All readers of HARDWARE AND METAL who desire copies may obtain them upon request.

THE CLERKS DEPARTMENT

Stirring Adventures, Then Fortune

Edward L. Doheny's "Wild Western" Experiences Eclipse the Fiction Stories

By C. B. FORBES

Reprinted, by Permission, from Hearst's Magazine.

A STRANDED mining prospector one day noticed a wagon going along a street in Los Angeles loaded with dark brown material. He took a handful. It was tarry and greasy.

Instinctively he knew he had found the pot of gold at the end of the rainbow he had chased through incredible hardships.

For twenty years he had followed the quest with little to show by way of reward save a terrible scar, which marred half his face and a mangled wrist, which had been crunched in the mouth of a mountain lion one of the thousands of nights he had slept out in the open in wild, uninhabited fastnesses.

On his fortieth birthday the prospector had not forty dollars. Since then he has waxed rich at the rate of perhaps a million dollars every year. Now, at sixty-two he is one of America's foremost multi-millionaires.

More! His fingering of that handful of oozy, sticky, smelly substance led to America's being incalculably strengthened to wage war and gain victory. Joffre stopped the first fierce Teutonic onrush upon Paris by impressing every motor vehicle in the city into service to rush troops to the Marne. Germany's command of superior railroad facilities might have proved fatal to the allied line at one of the many points during the war had not motor transportation gone to the rescue. In the air, too, one essential to supremacy was an abundant supply of liquid fuel—gasoline. And what of the seas? Without American fuel oil the combined British, French and American fleets could not have "ruled the waves," driving the enemy into his lair, and thus keeping the international highways of commerce and travel open for the succoring of the British Isles and the continent with munitions, materials and man-power.

For by the time the death grapple of nations came the examination of that tarry handful had led to the production of oil by this single intrepid prospector at the rate of twenty-five million barrels a year—a volume greater than produced by any one Standard Oil company. The total output of oil in the United States approximates one million barrels a day. This man's properties yield upward of one hundred thousand barrels every time the sun rises.

Yet he blithely declares that he has only begun to produce; that the whole oil industry is only in its formative stage; that the motorization of the world has scarce begun, and that ere long oil-driven machinery will enable man to conquer the air, till the soil, utilize the seas and accelerate communication on land on a scale and with an ease and speed and economy not even dreamed to-day by you or me. We are, affirms this man of vision and achievement, about to enter the oil age—the age of motorization. The nineteenth century was the century of coal and steam-power; the twentieth is to be the century of oil and motor-power.

To those of us not possessing fortunes the romance and the glamor of this man's record lie in the fabulous wealth he has earned.

To him money always has meant so little and appeared so weakly that whenever he discovered a valuable property and had overcome all the difficulties incidental to its development into a profitable, smooth-going, money-earning concern, he quickly gave it up. Once, before he had attained great wealth, he, with a partner, developed one property which was netting him a clear profit of half a million dollars a year. Instead of remaining to scoop in the cash he promptly sold out. "The difficulties had all been solved. It no longer attracted me," was his simple comment in explanation. "Achievement, not money, yields satisfaction."

How this wrestler with difficulties turns even the worst of misfortunes to profitable account may be illustrated by one incident. Once, in his prospecting days, he fell down a 120-foot shaft and broke both legs. While lying on his back in the hospital he threw himself enthusiastically into the study of law, graduated in six months, and was immediately admitted to partnership in a law firm.

Again, when his wife and a party of friends expressed a desire to see a certain spot in Mexico the circumstance that there was no road to it did not deter him. He simply gave orders to have a road, fit for the passage of automobiles, cut through the heart of the intervening forest at lightning speed; and it was done.

When the mountain lion sprang upon him as he lay on his open-air bed of twigs and seized his right arm in its mouth, quick as a flash he pulled his hunter's knife from his belt with his left hand and plunged it into the lion's throat. The beast recoiled; then with an angry, frenzied yell it again sprang at him with its full fury. But, with a presence of mind sharpened by many adventures, the prospector had grabbed his trusted rifle and, though his wrist was torn and crushed, aimed a bullet which caught the lion during its fateful spring. Its paws and head reached him, but they were the paws and head of a dead animal.

This man who, through toil and peril, endurance and adventure, has graduated from a mining prospector to the foremost American oil producer and the creator of uncounted wealth for the benefit of us all: this man who cares nothing for money, but everything for adding to the sum total of civilization's resources; this man whose titanic achievements hastened victory in the war and are destined to play an even greater part in the coming victories of peace—this man is Edward L. Doheny.

You never heard of him? That's because he is no self-advertiser; because he never courts the limelight; because he is too busy doing things to find time to talk much about them. I have had to camp on his trail for months to dig information out of him; and time and again as I tried to ferret out his story I likened myself to a prospector. He persisted in describing what others had done, leading me off along a trail I didn't want to follow, and it was only by adroit manœuvring that I occasionally got him to admit his part in the things he described. I could now tell you far more about any one of a half-a-dozen other prospectors and Western characters than I learned about Mr. Doheny from himself. But others have helped me to piece out the story. It is thrillingly, throbbingly American. Its early chapters are set and steeped in the "wild westernism" that has succumbed to civilization.

Edward L. Doheny came of venturesome, pioneer stock, both his father (an Irishman) and his mother's father (an Irish-Canadian) having hunted seals and whales in the icy regions of Labrador. The Doheny family later settled at Fond du Lac, and here Edward was born in 1856. His parents—working people—sent him to school almost as soon as he could walk, and although he had to work for the greater part of each year as he grew up, he graduated from high school at the phenomenally early age of fifteen. Like so many men of mark, his forte was arithmetic, particularly mental arithmetic. Curiously neither geology nor chemistry, through which he was destined to earn fame and fortune, appealed to him. He studied them because he had to. The nomadic blood in his veins moved him to accept eagerly an opportunity to accompany a governmental party which was to survey Oklahoma. The outdoor, carefree life so charmed him that he later proceeded into New Mexico with a Government mule buyer. And although he was not yet seventeen he encountered exciting experiences with Indians, who were conducting very successful scalping expeditions.

The Government troops, having captured many steeds from marauding Indians, announced a sale of them, and young Doheny saw a chance to undertake his first business venture. He had saved enough to buy ninety-two head at $5.35 each. The next job was to tame the horses, not one of which had been broken. He became so expert at handling ponies that he attained quite a reputation as a jockey at the horse races, which the pioneers of those days delighted in getting up. When he sold out his profits exceeded $2,000.

Unlike the dare-devil Westerners portrayed by writers of juvenile stories, young Doheny did not drink, did not play cards, did not even smoke. He early realized that only the fittest could survive the life he planned to lead in rugged, unsettled regions overrun with wild animals and wilder men.

The wilderness, the mountain-side, the forest kept calling to him, holding out prospects of untold gold. When a famous fortune-seeker—Charlie Quidero—organized a party to invade the Black Hills district of Dakota to prospect for placer gold Ed Doheny gladly enrolled. Black Hills was destined to become famous, but not through his expedition. The Government created a reservation for Blackfeet Sioux, ordered all prospectors out, and soldiers confiscated the whole Quidero outfit.

But this inglorious end to his first gold-seeking venture did not daunt Doheny. An ambitious expedition was being organized by several notable prospectors, well financed, tenderfoot along Ed Doheny was picked. and as it was considered lucky to take a Their activities were rich in exciting experiences, but poor in fortune.

The tenderfoot decided to become something more than a rule-of-thumb prospector. He procured books on metallurgy and geology, and when snowed in devoured their contents until he had learned them almost by heart. His early smattering of chemistry and geology and his aptitude for mathematics stood him in good stead. His mental activities were of benefit to him in other ways. For example, he and a companion undertook a journey of 800 miles to Arizona and met during the entire trip only one white man, who, having married a squaw, had settled at Navaho, in the Red Desert. On this long trail life had to be sustained by vigilant use of the gun to bring down deer, wild turkeys, elks, jack rabbits, etc.

In Arizona Doheny, by then a keen-eyed, trained prospector, who could spot a likely stain on a rock with the best of the veterans, struck his first rich find. By building a crude stone mill to crush the ore he won gold in paying quantities. But the wanderlust shortly repossessed him, and off he went to blaze new trails and seek other El Dorados. After much wandering, and not a little hunger and more than one hair-raising escapades. he finally, in 1890, discovered the Blank Range mining district in what is now Sierra County, New Mexico, and in less than three months a town of 5,000 people sprung up, a railroad was run in, telegraphic communication was established, and Ed Doheny became a bonanza king.

Once again, however, having set things in motion, instead of remaining to pile up a huge fortune, he pulled up stakes and moved on. He was then worth about $30,000, but he had made a vow that he would clean up $100,000 as a prospector or leave his bones on the mountains. Several others had made that amount, and Bill Greene (subsequently of Greene-Cananea fame) made nearer $1,000,000.

His next strike was a unique silver placer-mine on the spot which, thanks to Doheny's enterprise. developed into Kingston, N.M. Stories of how chunks of silver could be picked up with little trouble spread like wildfire, and soon 6,000 people, mostly daring gentlemen of fortune, were camping all around the wealth-strewn ground. Riches poured into Doheny's lap by tens of thousands of dollars. Although only twenty-four he blossomed as an important mine owner and operator. He formed a partnership with C. A. Canfield, who had such a keen "mining sense" that he could discover valuable mines with greater ease and certainty than the expert diviner can locate water with his rod. For a number of years all went well. Then came the leg-breaking incident already mentioned and his spell as a lawyer. His next mining venture—the shipping of rich fluxing ores from Mexico into the United States—rolled up riches until it was knocked on the head by the McKinley tariff bill, which imposed half a cent a pound duty on such ores. Once again Doheny found himself dead broke.

Again into strange, unpeopled regions—this time the Mojave Desert. Here Doheny and Canfield operated mines rich in gold, but with ore so refractory that it was virtually impossible to work it. From South Africa had come reports of a wonderful cyanide process which had been installed on the Witwatersrand mines with revolutionary success. Doheny hied himself to Denver, where a demonstration was to be given, analyzed the process, found it satisfactory, bought from its Scottish inventors the right to use it, and set up the first cyanide plant in that part of the world.

Days and years of ups and downs followed. Rarely did Prospector Doheny sleep under other ceiling than the wide heavens. Each night he lay down with his faithful rifle at his side, his six-shooter ready for action and a hunter's knife at his belt.

"Wasn't it sometimes eerie when you knew wild animals were prowling around? And wasn't it cold in the winter?" I asked.

"There is no more comforting feeling imaginable than to wake up at night and feel your well-tried rifle snuggling warmly at your side," he said. "The warmest bed I ever slept in was under a foot of snow. It took me a long time to become used to beds and bedrooms. I felt choked. No feather bed can compare with one made of leafy branches and pliant twigs." The recollection of them brought a gleam to his eyes. "Of course, you often flirt with death when leading such a life; but I have seen persons run over in the streets of New York. I still prefer the habitations of nature to the habitations of man."

After twenty years' search for Ophir he found himself, in the fall of 1892, in Los Angeles minus more than $90,000 of the $100,000 he had set as his goal. But although his pockets were empty his heart was still full of hope, his body was full of health and his spirt was full of fight. The rainbow's end would not always elude him.

He discovered it where he least expected to find it—right where he was in Los Angeles. The pot of gold had been blindly passed and repassed by thousands, including learned geologists. The dramatic incident which opened the portals of millionairedom to the dogged prospector is worth recounting in his own words.

"I was living," he narrates, "at a small hotel in the western part of Los Angeles. One day I noticed a wagon-load of brown material that looked like the manganese ores I used to mine in New Mexico. I took a handful and found it was tarry and greasy. I asked the negro driver what it was. 'It is breer,' he replied. That was his crude way of pronouncing 'brea,' the Spanish word for pitch. Yes, I had, of course, learned Spanish. 'Where does it come from?' I asked. 'From near West Lake Park,' he told me.

Discovers Oil in Los Angeles

"I immediately jumped on a street car. I found the place without difficulty. Examining it I discovered tar exudes which, mixing with the soil on the surface, made a tarry product, which, I learned, was being used in lieu of coal in several small manufacturing plants.

"My heart beat fast. I had found gold and I had found silver and I had found lead, but this ugly-looking substance I felt was the key to something more valuable than any or all of these metals. Domestic coal sold in California at $20 a ton. No more ideal place could be found to develop a substitute for coal. Without ever having seen an oil district or an oil derrick, as I had never been east of Chicago in my life, my natural prospecting instinct told me that these tar exudes bore the same relation to the petroleum below that the resin on the outside of a pine tree bears to the more limpid sap within. I felt sure that by drilling to the source of these exudes I would develop a supply of petroleum. The only damper on my feeling of elation over my discovery was the reflection that these exudes were in the midst of a city of 100,000 population and less than thirty miles from where successful oil wells were being worked by three well-known companies. It was almost incredible that the possibilities of this spot had not been recognized by people connected with these nearby companies. The whole thing seemed too good to be true; yet I felt it was true.

"I hurriedly hunted up my associate, Mr. Canfield, and took him to the place. We spent several days tracing out the different oil exudes in and near Los Angeles with a view to selecting the most likely spot to make an experimental development. We finally selected a spot more than a mile from the first one and bought the plot for $400, a price which taxed our joint cash resources. Engaging one man and a boy and a horse we started to sink a shaft five feet wide by seven feet long through the shale formation, this being the only way we knew of to prospect for oil, so ignorant were we of the whole oil business. Never did men work as we two worked digging and shoveling the stuff into buckets to be hoisted to the surface and carted away. In thirty-eight days we had sunk the shaft 155 feet, an almost superhuman achievement considering our ridiculously crude appliance. Through great good fortune we did not reach oil."

I looked at him puzzled.

"Because if we had found what we were looking for it would have meant our certain death," he explained. "If we had struck oil in commercial quantities we would have been instantly overcome by gas and asphyxiated before we could have scrambled out of the shaft. Even before this we had come upon oil-soaked shale, which emitted considerable quantities of gas and crackled like pop-corn, releasing little pockets of oil; enough to smear the shaft with black tar and to almost choke us.

"We began to realize the danger. Dimly recollecting having seen artesian wells being sunk in Wisconsin during my boyhood days I cut down a eucalyptus tree sixty feet high and made a pole, and began laboriously to worm its point down through the bottom of the shaft. The process would have discouraged any one not possessing the sublime faith that we possessed that a few inches or a few more feet at the most would tap for us incalculable wealth.

"Suddenly gas spewed out and oil flooded the shaft to a depth of ten or fifteen feet in a few moments.

"I arranged for the building of a wooden tank to hold about 100 barrels, and found by baling that the well yielded about seven barrels a day. I felt like a millionaire."

Alas, the thick fluid was not salable. Its like was not being used anywhere in the state. Doheny succeeded in inducing a pipe manufacturer to dip his pipes in the oil to coat them. For eighteen months Doheny and Canfield labored heroically in developing other small wells by crude methods. Then Doheny recalled an old-time friend who had drilled oil wells in Pennsylvania and Ohio, brought him to Los Angeles, purchased the up-to-date machinery he recommended, and in ten days the new plant drilled a well 600 feet deep, which yielded forty-five barrels a day.

He won converts to the use of his product by guaranteeing a saving of 25 per cent. in fuel bills by its use as a substitute for coal in factories, etc., and began to roll up wealth. Each barrel brought $1.78.

Penniless on Fortieth Birthday

Meanwhile these explots became known, and within five years more than 200 companies were organized and 2,300 wells were drilled within the city limits of Los Angeles, notwithstanding that houses had to be knocked down on many of the plots utilized. From an area of about 300 acres over 75,000,000 barrels of oil were extracted. Many of the wells drilled a quarter of a century ago are still producing.

The price of oil tumbled to thirty cents a barrel, and Doheny, with his customary faith, contracted to buy up every barrel produced. Then he went ahead and made contracts to supply thousands of barrels a month to consumers. Again fortune dealt Doheny a body blow. The producers failed to furnish the quantities agreed upon, and Doheny had to buy additional supplies from

A good window display of tools will always increase sales. Just now when building is brisk all over the country is an especially good time to put in a display of this kind. Don't forget. your price cards.

other sources at much higher prices to fill his contracts. This obliged him to obtain bank loans. When Bryan started his bimetalism campaign in 1896 Doheny energetically supported the movement; was cautioned by the bankers that it would be a very bad thing for him and everybody else if free silver were introducd; and as Doheny would not recant his political convictions he promptly, to avert involuntary bankruptcy through the calling of his loans, prepared a plan to turn over all his property to a trustee. On the tenth of August, 1896, Doheny's fortieth birthday, he remarked to his friends that he had not forty dollars to his name.

Within two years he had regained all his Los Angeles property and was making hundreds of dollars a day from a new property he developed in the now famous Fullerton District of California. As usual, he sold out (for $156,000) when he had got the thing running, and resumed activities he had already begun in the rich Bakersfield District until he was netting there an income of fully $500,000 a year. Then he sold out when there was nothing to do but count the receipts.

This renunciation of the income of an emperor proved a new turning point in Edward L. Doheny's career. His greatest fame; his greatest achievements; his greatest wealth, have sprung from the daring step he then took. The urge of the pioneer, the prospector, the explorer, coursed strong as ever through his blood. Conquest, not money, was his dominating aim. He had had a hand in every big oil strike throughout the West; but the West at the opening of the twentieth century had become a different land from what it was when young Ed Doheny hunted Indians, rode bareback at horse races. treked 800 miles without meeting more than one white human being and had to depend on his markmanship for his daily food. He must needs find other worlds to conquer.

Invades Mexico in Search of Oil

He has not had a single dull day, a single hour of ennui, a moment's dearth of difficulties ever since! At the moment I write there stares from the morning newspaper headlines, proclaiming that the wrangles between oil producers and the Carranza Government are waxing warm, and that a meeting was held in New York the previous day under the presidency of E. L. Doheny to seek a solution of the dispute concerning the right of the Mexican Government to impose confiscatory legislation upon owners of oil properties south of the Rio Grande.

What lured Doheny to Mexico?

"I knew," he answered me, "that it had no intensively developed coal regions and no known oil properties whatsoever." With his associate, Mr. Canfield, he set out on a novel prospecting trip of several thousand miles, not driving a burro with cross-tree pack-saddle and rawhide alforpas, but in a private car furnished by the Atchison Railway (with whom he had done much business), and accompanied by an expert cook and porter, both now in Mr. Doheny's employment. Through deserts and mountains and valleys they traveled six days and nights until they reached the Gulf Coastal Plain of Mexico, with its great sea of jungle and thick blanket of fog.

At Tampico, nine miles from the Gulf, their prospecting sense warmed up. An Indian guide, answering their inquiries, offered to conduct them into a dense jungle, and lo! they discovered what looked like the crater of an active volcano filled with thick tar, through which great bubbles of gas were escaping, giving it the appearance of an immense boiling cauldron. Instantly the prospectors visioned oceans of oil, the erection of huge plants, the creation of a new city, the winning of millions upo millions of barrels of oil and, ultimately, a vast export trade to all parts of the world. Forthwith they purchased 280,000 acres and arranged to acquire a total of almost half a million acres.

The Indian conducted them to anothe place, ten miles away, and here they found a boiling spring of lighter oil. The owner of this land repeatedly raised his price $25,000 each time the Americans agreed to his figure, but finally a deal for 280,000 acres was consummated. Through jungle paths on horseback, up shallow waters in canoes and along large rivers by steamer, Doheny and Canfield explored for several months, adding constantly to their holdings until they had acquired a miniature empire.

The Mexican Petroleum Company, capitalized at $10,000,000, was formed in the fall (1900). Drilling machinery was hurriedly shipped from Pittsburg to Tampico, thence by rail and finally hauled through the jungle. In two weeks a well was sunk, which began to produce fifty barrels of very heavy oil daily. This confirmed their already confident hopes of giant success. The Mexican Central Railway agreed to use the oil for fuel purposes at a price slightly in excess of one dollar per barrel. But again bitter disappointment overtook them, for the railway directors refused to endorse the agreement, thus leaving the Yankees high and dry without a single customer for their product.

"Nil desperandum" was Doheny's motto. He went ahead developing more and more wells; built a refining plant; formed an asphalt paving company, which did a large business and is still in existence; finally convinced the Mexican Central Railway that it could not afford to operate without oil fuel, and established a thriving, profitable business. Then, as always, Doheny looked for something new and bigger to tackle. He bought a whole region some seventy-five miles south of Tampico. The fact that the nearest railway was seventy miles distant from the property did not daunt him. Without a quiver he spent $1,500,000 in building a pipe line, with five pumping stations, before any oil to transport had been tapped so sure was he of his ground. Just before the pipe line was completed the initial well was finished and gushed forth 14,000 barrels a day.

Became Mexican Oil King

Edward L. Doheny thus became the oil king of Mexico and the largest producer of oil in any country. The assets of the Mexican Petroleum Company, of which he is president and the controlling spirit, exceed $3,000,000. From a single property 122,000,000 barrels of oil have been marketed. Investors have clamored for the $100 shares at prices ranging from $150 to nearly $200 each. In addition Mr. Doheny formed and controls the Pan-American Petroleum & Transport Company, which owns among other things a large fleet of tank steamers, of which no fewer than twelve were devoted to th service of the British and American Governments in the war zone. The Doheny interests embrace gigantic storage plants in Mexico, refining plants, distributing stations at half a score of ports in the United States, in Panama and Brazil.

"Success is not to be measured in money," Mr. Doheny replied very emphatically to my questions on this subject. "Success is to be measured by worthy achievements, achievements which add to the wealth of the world, provide employment at good wages, help the onward march of civilization and make the world a better place to live in. How can a young man succeed? Why, that is the simplest question in the world to answer. He should make himself so necessary to his business that his employers will succeeded, the monetary reward will take necessary to keep him.

"Don't put money-making first. Devote yourself and all that is in you doing what you set your hand to and when you have succeded, the monetary reward will take care of itself."

All through the years of uprisings and shootings in Mexico, the Doheny properties were shown exceptional good-will by the Mexican people. Mr. Doheny from the start had treated everyone, from the humblest and most illiterate to the highest Government officials, with scrupulous fairness and consideration. Not only so, but the Mexicans realized that he had been one of their real benefactors in that he had turned his attention to a vast area of unhealthy, uninhabited jungle and had transformed it into

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

OIL BURNING MACHINES

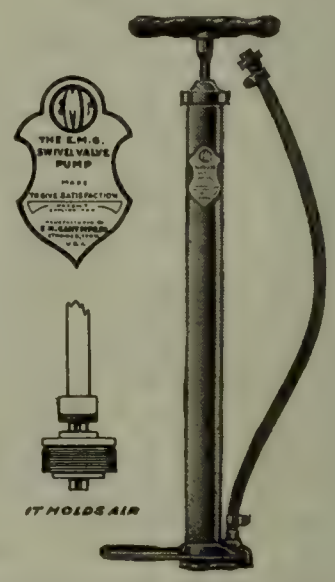
The Clayton & Lambert Mfg. Co., 1370 Beaubien St., Detroit, Mich., is manufacturing a new line of oil burning machines. The makers claim that their oil burning machines are fitted with burners made on a new scientifically correct patented principle, whereby perfect combustion is obtained, consuming less fuel and compressed air and using more free air than any other make. It is claimed that these oil-burning machines will soon save their cost in the saving of fuel and time, and are widely used for preheating before welding, for annealing, melting metals, straightening large frames, girders and rails, annealing armor plate and chains, shaping sheet metal work, brazing, heating and drying large ladles and skin drying molds and cores, lighting cupolas in grey iron, malleable and steel foundries, etc.

Oil Burning Machine

These machines are in general use, it is stated, in large industrial and shipbuilding plants, boiler and coppersmith shops, steam and electric railway shops, etc. The fuel used is crude fuel oil, kerosene or distillate, and the machines can be operated by either compressed air or steam.

ELECTRIC DRILL

The Black & Decker Mfg. Co., 105 S. Calvert St., Baltimore, Md., have recently added a new size to their line of portable electric drills. This is a drill with a capacity of 0 to 9-16 in. in steel, and is provided, it is stated, with a No. 1 Morse taper socket, and will drill a 9-16 in. hole through a machine steel at a rate of 1½ in. per minute without overloading the motor. In tests, pressure up to 500 pounds has been applied without stalling the drill, it is claimed. This drill is similar in construction to the other sizes. The housing, it is stated, is of magnalite, an aluminum alloy of great tensile strength. Gears are packed in grease in a separate grease-tight compartment like an automobile transmission, and the drill spindle, it is stated, runs in a long bronze bushing and against a ball thrust bearing. The motor is air cooled, and in testing, these drills have run continuously, it is claimed, for fourteen weeks, day and night, including Sundays and holidays, stopping only to renew brushes. The weight is 21 pounds; no load speed, 600 r.p.m.



A feature of this tool is the attachment of the Morse taper socket. This, it is stated, is in the form of a separable sleeve secured in the drill spindle by means of a large knurled nut. By unscrewing this nut the entire taper socket, it is stated, is easily removed from the spindle. The drill shank protrudes slightly beyond the end of the taper socket, and a little tap on the end of the protruding drill shank, it is stated, frees it from the socket. This makes the drill unusually compact, it is claimed, and gives it great strength and wearing qualities, as otherwise it would necessarily be at some distance from the bearing in order to leave room for the drift pin slot. This drill has a patented pistol grip and trigger switch.

EMO TRANSFORMERS

"Emo" transformers, manufactured by the Emo Laboratories, 2255 N. Illinois St., Indianapolis, Ind., the Franco-American Equipment Co., 402 Power Building, Montreal, Canadian agents, will, it is claimed, increase power, add fuel mileage and protect the ignition system for autos, aeroplanes, trucks, tractors, motor cycles, marine and stationary engines burning gasoline, kerosene, distillate petrol, benzol or benzine. It is claimed that by the use of this device the ordinary slow, faint spark is transformed into an intensive blue white blaze or flame, which instantly explodes all the vapor even in the lowest gravity fuel, thereby insuring greatly added power and mileage. This intense flash, it is stated, keeps the spark plug points free from carbon, soot and oil, prevents "bucking" or "loping," insures easy starting, quicker acceleration and a sturdy, uniform flow of power at all speeds. They will, it is claimed, save many times their cost in fuel and spark plug economy. They may be attached, it is stated, in either a horizontal or vertical position to suit wiring conditions under the hood. Emo transformers, it is stated, are handsomely finished in polished brass, nickel and enamel and are practically indestructible. The insulation, it is claimed, cannot be broken, cracked or burned from the motor's heat.

SWIVEL VALVE TIRE PUMP

The "E G" swivel valve tire pump, put on the market by John E. Chumbley & Co., 1008 Stahlman Building, Nashville, Tennessee, has a cylinder which,

Swivel Valve Tire Pump

it is stated, is made of sixteen gauge steel tubing, 1¼ in. diameter, 20 in. long and screws into a heavy malleable iron base with a folding foot rest. The plunger rod, it is stated, is of cold rolled steel with detachable handle, 24 in. reinforced fabric rubber tubing with screw connections to fit standard tire valves. It is finished, it is stated, in baked green enamel and is 24 in. over all. It is stated that it has extra heavy oil treated leather cup, and that a special air valve on side of plunger rod insures full pump load at each stroke. The plunger head, it is stated, rides straight from top to bottom regardless of any turning movement of the handle when making the stroke.

NEW STOCK FOODS

The Prairie Chemical Co., of Winnipeg, is putting on the market an extensive line of chick foods, stock foods, etc., under the name of The Mickelson Blue Cross Farm Remedies.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

OF outstanding importance this week is the substantial advance which has been recorded in oil paints and kindred lines, including varnishes. All regular lines of oil paints are up 50c per gallon, inside floor and flat wall paints are up 25c, shelf goods, including auto enamels, are up 15 per cent. and varnishes are up from 25c to 50c per gallon. Roof, barn and bridge paints have also been affected, in addition to colors in oil. This revision follows the remarkable advances which have been made in linseed oil, resulting in some lines of paints being advanced about three weeks ago and this general change now.

Linseed oil shows a nominal advance this week, bringing prices up more in line with quotations on seed. There was some reaction early in the week but losses have been pretty well recovered and it seems as though high prices will be maintained.

Turpentine has advanced another 10c per gallon this week and high price records have again been smashed in the South. Overseas buying and the small crop are factors which have contributed to this upward move again.

Roofing shows an advance averaging about 10c per roll this week with the position of the market considered very strong. Horse clipping and sheep shearing machines and attachments have undergone a revision upward, effective immediately.

Ingot metals seem to be gaining remarkable strength, copper showing up particularly in this respect in another two-cent advance this week. Lead, spelter and antimony are also stronger with advances being reported.

MONTREAL MARKETS

MONTREAL, July 17—Tendencies in the hardware markets are decidedly firm and there have been advances for several lines with every prospect of upward revisions being made on others. Padlock prices have been withdrawn, pending a change. Felt, or rather prepared roofings are up 10c per roll. Horse and sheep-shearing machines are higher and also the attachments and plates. Certain lines of springs are likely to advance, door springs in particular. Coal oil is up one cent per gallon all around. Old materials are much higher. Copper and tin are up. The declines of the week are those for wood handles and this applies to the Dee and straight and bent long handles.

It appears now that there will be a tendency to firmness on many lines. The entrance of former enemy countries into the market will have an immediate effect, it is expected, on prices, and increases are looked for in many lines. There is a splendid undertone, and much business of a staple nature has been transacted.

Clippers Are Up; Handles Are Down

Montreal.

HORSE CLIPPERS, HANDLES.—Advanced prices are announced for horse clippers, sheep shears and attachments. Stewart power clipper, No. 1, is now on a list of $16 each, making a net advance of 25c. No. 2 is quoted at $20.75 list; No. 8 sheep-shearing machine, $21, and No. 9, $24. S. S. attachments are quoted at $14.75, and horseclipper attachments at $10 each. Top plates, No. 90, are $1.35 each, as are also No. 360. Bottom plates, Nos. 99 and 361, are quoted at $2 each.

All wood shovel handles are reduced in price from $7.50 to $6.25 per doz. This applies to the Dee and also long bent and straight styles.

Roofings Are Higher; Advance of 10c Roll

Montreal.

ROOFINGS.—Increased prices to the extent of 10c per roll have been made for various felt roofings. The new prices apply to the following lines, which are now selling to the trade as follows:

Goodluck, one ply, $1.80; 2 ply, $2.10; 3 ply, $2.45. McCombe Special, 1 ply, $1.70; 2 ply, $1.95; 3 ply, $2.30. Black Cat, 1 ply, $2.05; 2 ply, $2.35; 3 ply, $2.70. Amazon grade is on the same basis. Panamoid is quoted the same as McCombe Special.

Grinders Are Higher; Padlocks and Springs

Montreal.

GRINDERS, PADLOCKS, SPRINGS.—Increases are in effect for Niagara grinders and the advance amounts to approximately 25 per cent. New prices of advanced nature will be in effect for padlocks it is also thought, prices having been withdrawn by the makers. There also is expected to be a revision upward for door springs. Other lines of hardware may also be revised upward.

One Cent is Added To Coal Oil Price

Montreal.

COAL OIL, GASOLINE.—One cent per gallon has been added to the prices of coal oil. This makes the range 21c to 24c per gallon, according to grade. There has been a good movement. No change is made in the price of gasoline, which remains at 33c per gallon.

Wares Are Quieter But Stoves Booked

Montreal.

WARES AND STOVES.—While there is no definite immediate change, prices on wares are holding with a considerable firmness to the basis. It is pointed out that demand for various lines will continue to increase and lower prices are not probable at this time, viewing the labor outlook.

Stoves are still being booked for fall

delivery and there have been no price changes.

Rope Has Held; Market Unsteady

Montreal.

ROPE AND CORDAGE.—While there has been no change locally on rope, the feeling at primary points is unsettled on Mexican sisal. A decline is reported of around 3c per lb., and whether this will be maintained is rather undefined. At present the quotable basis here remains at 34c for pure manila and at 30c for British manila, while sisal is unchanged at 27½c per lb.

Movement Continues For Nails and Wire

Montreal.

NAILS AND WIRE.—There has been dearth of orders for nails. It is really not a big trade, in point of large single orders, but the aggregate tonnage is satisfactorily large. Prpices remain at $4.75 base for both wire and cut nails. Wire products are steadily firm and the base of $5 per cwt. still obtains on smooth steel wire.

It is apparent that there will be a full maintenance of values for the tendencies at primary producing centres are firming.

No Declines Likely For Iron and Steel

Montreal.

IRON AND STEEL. — Seasonably there has been quite a satisfactory trade in steel and iron bars, but no outstanding feature is manifest. There is a general feeling that, in view of the larger requirements for various materials throughout the world, markets will not be easier. As a matter of fact, the latest advices indicate an early buying movement, which will, in all probability, firm the market. Advances are even spoken of at outside points.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond too steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Bigger Selling of All Kinds Sheets

Montreal.

SHEETS AND PLATES. — Demand has really been better for sheets of late and there is manifestly a better tone all around. Prices are rather inclined to narrow to a less spread basis, and there are now available large supplies and a bigger range of grades and sizes. The outlook is much better.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$5 75
12 gauge	5 30	5 80
14 gauge	5 35	5 85
16 gauge	5 45	5 90
18 20 gauge	6 00	6 10
22-24 gauge	6 05	6 25

GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	7 50	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

A Firm Basis For Lead Products

Montreal.

LEAD PRODUCTS.—While there has been no actual change for lead products the basis holds and there is a reasonably good demand. It is apparent that there will be no declines at this time for the pig lead market has picked up some strength within the past day or two.

Lead pipe	....	0 12½
Lead waste	....	0 13½
Lead traps and bends	....	15c

All Round Advances For Old Material

Montreal.

OLD MATERIAL.—Increased prices are being paid for old materials, and there is a decidedly better undertone and a brighter outlook. Prices have been revised upward for nearly all lines, brass and copper and iron scrap being particularly strong. There is at present a good demand for these, and it is thought that the heavier buying of Germany and Japan will have the effect of advancing prices here more. Old rubbers, overshoes and tires are bringing higher prices, too.

Dealers' Buying Prices—		
Pipe scrap, ton	....	12 00
Stove plate, ton	....	15 00
No. 2 busheling	7 00	8 00

Heavy copper	0 17½	0 18½
Wrought iron, No. 1, per gr. ton	....	14 00

Copper is Soaring; Tin and Spelter Up

Montreal.

INGOT METALS.—Trade interests are more concerned this week over the copper situation than over any one item in the ingot list. There has developed of late a very increased interest in this commodity and buying is developing on a large scale. Tin and spelter markets are firmer. All through business is better.

COPPER.—With Japan a big buyer and enquiries already coming from Germany for copper, the market undertone is very firm and daily advances are made at primary points. Even the scrap metal is scarce. Prices are nominally quoted here at 25c per lb.

TIN.—Local prices are advanced 2c per lb. to 56c. There has been some movement here, while in the States there is little new business reported as between New York and London.

LEAD.—The trust price advanced slightly on the other side of the line, but here there has been no change and the basis is still held at 7¼c.

ANTIMONY.—At 9½c to 10c per lb. there has been a fair amount of trading. The market is steady.

ALUMINUM.—This is rather quiet, but the basis holds and 35c per lb. is quoted.

SPELTER.—Some strength is manifest for this line, and the basis is advanced to 9¾c per lb.

PIG IRON.—Tendencies are firming on this and there may be an advance at any time. Price, $48 per ton.

TORONTO MARKETS

TORONTO, July 17—A higher list price has been established this week on Stewart horse-clipping and sheep-shearing machines and attachments with discount remaining unchanged. An advance in clothes bars, ironing boards and stepladder chairs is also apparent, with children's wagons, sleighs and coasters advancing 15 per cent. Bull rings, grinders and some lines of pruning shears have moved up also. Greater activity is apparent in practically all ingot metals with copper leading in point of advanced prices, though spelter, lead and antimony all have gone to higher levels. Business is considered very good and outlook seems encouraging.

Power Clippers Show Substantial Advance

Toronto.

POWER CLIPPERS.—There has been a revised price list established on Stewart horse clipping machines. On the new basis the No. 1 is now listed at $16, each replacing the former list of $13. The discount from this list remains the same, that is 25 per cent. Revised quotations are also apparent on sheep shear-

ing machines, the No. 9 now being listed at $24 each as against the former price of $19; the No. 8 is now listed at a price of $21, and the new model at $22.25. The discount applying to these is the same as that on horse clipping machines, that is 25 per cent. Sheep shearing attachments are now listed at $14.75 each, which is an advance of $2.75 over the former list. The discount here is again 25 per cent.

Clothes Bars, Ironing Boards Up

Toronto.

CLOTHES BARS, IRONING BOARDS.—Revised prices have been issuedby manufacturers of clothes bars and ironing boards and other lines. The new prices which have gone into effect show quite a substantial advance. The new prices which have been named on clothes bars are for the No. 1, $9.60 per dozen; for the No. 2, $12 per dozen, and for the No. 3, $9.60 per dozen. Ironing boards, No. 1, are now being quoted at $21, and a revision upward is also noted in step ladder chairs. Quotations on this ladder line have been changed from $27 to read $33, an advance of $6 per doz. Higher production cost is a big factor in bringing about this revision in prices and there is no sign of any easing away of raw material quotations.

Higher Prices on Bull Rings, Pruning Shears

Toronto.

PRUNING SHEARS, BULL RINGS.—Jobbers advise that they have been notified of advances in pruning shears and pruners.

Another line which has followed the upward trend is bull rings, which, along with other copper products, are reacting to higher levels.

Sisal Hemp Down; May Affect Rope

Toronto.

CORDAGE, TWINE.—An important feature of the situation this week is the decline which has been reported in sisal hemp, which is down 3c per lb. This has not yet resulted in the manufactured products being affected, but it seems quite possible that a change will be made affecting rope, and should this price be continued it will mean cheaper binder twine next year. No immediate effect on binder twine will be apparent, owing to the fact that binder twine business for this year has been practically completed. There is nothing new in regar to manila hemp, but reports from the Philippines indicate that a serious drought is noticeable there and may seriously interfere with the production of this product. Whether this will be a factor to maintain prices at their present level it is hard to determine. In the meantime there are no changes reported in rope prices, pure manila selling at a base of 34c per lb.; British manila selling at a base of 30c per lb.; New Zealand hemp, 30c; sisal 27½c, and sisal lath yarn 27½c. There is a very good demand for all grades and manufacturers report that the movement of hay fork rope has been particularly good.

Big Cement Trade; Plaster Paris Active

Toronto

CEMENT, PLASTER OF PARIS.—In talking with one large factor relative to volume of business being done on cement this year, HARDWARE AND METAL was told that at the present rate July, 1919, would eclipse all previous records for the corresponding month extending back over a period of 20 years. This would indicate that there is some building activity apparent, and outlook seems to be splendid.

Optimistic reports have been given out on plaster of paris as well. This month's business exceeded any similar period since 1913. Prices on both above lines show no change, the figures in current market quotations holding steadily.

Wares Are Firm; Stoves Hold Steady

Toronto.

STOVES, WARES.—The market on copper products which advanced last week about 10 per cent., are ruling with a very firm undertone. There has been no change reported this week, and there seems to be no immediate prospect that one will be made. All lines of tinware and enamelware are holding quite steady with a very good demand in evidence

In regard to stoves the situation continues to be a better one on all Summer lines. Sales have been very heavy, and even to-day manufacturers are having difficulty in making up goods fast enough. Stove business for Fall is coming along nicely, but with labor conditions as they are, manufacturers are not disposed to commit themselves to any great extent. The market is very firm and prices are very well maintained.

Oils Remain Steady; Gasoline Active

Toronto.

OILS, GASOLINE.—The situation in regard to coal oil and lubricating oil is without any change whatever during the week. The heavy demand which has been apparent during the past three or four weeks shows no signs whatever of letting up. Coal oil is being quoted from 20½s to 23½c per gal., according to grade, prices being in line with the advance which was made last week.

In regard to gasoline, activity continues to be the main theme. with prices ruling at the unchanged figure of 32c per gal. There is a splendid demand reported from all quarters and supplies are ample to meet the demands of the trade.

Copper Wire Shows Marked Strength

Toronto.

COPPER WIRE.—The low point on copper wire. electrical basis, was reached around the first of March, and since that time the undertone has been one of strength and prices have shown consistent advances. The situation as it exists to-day is that quotations named yesterday bring prices to a level which is 9 cents over the prices which were prevailing Mar. 6. This is an advance of almost 50 per cent., and from the outlook in the copper markets, the peak has not yet been reached.

Wagons, Sleighs, Etc. Move Up 15%

Toronto.

WAGONS, SLEIGHS, ETC.—It is understood that manufacturers have issued new lists on wagons, sleighs and coasters. These reveal an advance in these lines amounting to 15 per cent. Higher production costs plus continued high cost of raw material figure largely in these advances, it is said.

Electrical Goods Very Active; Firm Market

Toronto

ELECTRICAL GOODS.—Manufacturers and jobbers report great activity in all lines of electrical appliances. Electric fans, toasters, grills and irons are represented in this increased turnover, and a greater interest is manifest in electric vacuum cleaners. One U. S. firm reports an advance in this latter line amounting to about $2.50, which will give some idea of the underlying strength in the markets.

Bolts Hold in Firm Position

Toronto.

BOLTS.—Reports from U. S. points indicate that there has been an advance named in stove and fire bolts, amounting to 5 per cent. The market on other lines is very strong as well, and a reaction to higher levels seems possible. No change from discounts shown in current market quotations is apparent locally but the outlook is one of much firmness.

Firmness Marks Nails and Wire

Toronto.

NAILS, WIRE.—The nail market is one in which strength seems to be the underlying feature. Sales are better and some factors speak of an early advance. in the meantime, the base price holds at $4.70 for the wire nails and $4.75 for the cut nails.

Wire is in much better demand and there is a decidedly firmer tone to the market. The base locally remains unchanged at $5 for smooth steel wire.

Firmness Shown in Iron and Steel

Toronto.

IRON AND STEEL.—Firmness is shown in iron and steel bars, reports from U. S. centres stating that even in view of substantial orders being placed, there are no price concessions being named. The volume of business being done is distinctly better than it was lo-

cally. Prices range around following levels:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 00
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Pipe Firm; Boiler Tubes Too

Toronto.

WROUGHT PIPE, BOILER TUBES.—A firm market rules on wrought pipe and an increasing demand is being met from ample stocks. It seems possible that higher prices may be the outcome of the present stuation. Prices are shown in current market quotations.

Boiler tubes are held steady without any price change. There seems to be a slightly better movement at quotations shown herewith:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Lead Holds Firm; Solder Unchanged

Toronto.

LEAD AND ZINC PRODUCTS.—There has been no further change in the prices on manufactured lead products this week though the strength shown in the metal will be a factor to at least hold present basis.

Solder is without change and the prospect seems to be that the market has steadied down fairly well. Business is good and outlook considered promising. Quotations follow:

Lead pipe	....	0 12½
Lead waste	....	0 13½
Lead traps and bends	....	15%
Lead wool, lb.	....	0 13
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	....	0 10½

50-50	....	0 40¼
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Sheet Market Strong; Trade Better

Toronto.

SHEETS, PLATES.—Indications are that the market is even stronger than the prices show to-day. Buying is improving but not to the extent that had been hoped for. There is still the policy of dribbling. Some years ago a firm would make up a list covering its requirements in plate, tubes, iron, bars, etc. The sales agent would have a trip and a good busy session. He would either get the year's business in a lump or he would lose it. Now these same places are nearly all buying in small lots. However, warehouse business has taken a turn for the better and the outlook is better than it has been for some time. No change in following quotations is shown:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 4	7 00
GALVANIZED SHEETS—		
10¾ gauge	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Slight Lull in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—A slight lull in the demand is apparent, a seasonable condition, but business is considered to be in a very healthy state. The range of quotations shows no change and bigger sales are anticipated when the harvest has been completed.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Volume of Business Shows Improvement

Toronto

OLD MATERIALS. — No further change from advances noted last week has been made. A good amount of business is going through the scrap yards at present, and buying is fairly liberal, but prices are staying about where they have been for some weeks. There is more material coming on the market now than for some time past, and shipments out are correspondingly larger. Range of prices follows:

Dealers' Buying Prices—		
Tea lead	....	0 03½
Heavy lead pipe	....	0 05
Pipe scrap	....	8 00
Stove plate, per ton	....	12 00
No. 2 busheling	....	8 00
Yellow brass	....	0 08½

Light brass	....	0 06
Scrap zinc	....	0 05
Heavy copper	....	0 16½
Wrought iron, No. 1, per gr. ton	....	15 00
No. 1 machinery cast	....	16 00
Heavy melting steel	....	12 00
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots	....	0 06
Bicycle tires	....	0 03
Automobile tires	0 03½	0 04

Chain Prices Under Revision

Toronto

CHAIN.—It is understood that there is a new price out on proof coil and electric weld chains which shows a reduction all round of one cent per pound. The reason is that chain did not come down along with other lines after the war. In fact it stood pat during the several reductions that were announced in steel. New prices are not yet available but should be out soon.

Copper Continues Up; Lead, Spelter Higher

Toronto

INGOT METALS.—Another 2c has been added to copper prices this week, and spelter and lead have also stiffened somewhat. Trade is considered very good,

COPPER.—Further advances are shown this week, the price going up to 24¼c per pound, which is an increase over last week's figures of practically 2c per pound.

TIN.—New developments are lacking in this metal. Prices are well maintained and a fair demand exists. Quotations for the week are from 55c to 56c per pound.

SPELTER.—An advance is shown in price of spelter this week, 9½c per pound being figure reached. Greater buying interest is apparent.

LEAD.—The continued heavy buying has resulted in a slight revision upward amounting to ¼c per pound, quotations for the week being 6¾c to 7c per pound.

ANTIMONY.—A firm market is shown in this metal this week, and a slight advance is revealed in the price of 10c per pound which is now being quoted. There is a fair demand and ample stocks.

ALUMINUM.—There has been no change in the price which holds at 35c per pound. A greater interest is shown in this metal, but buying is still somewhat restricted.

LONDON MARKETS

LONDON, Ont., July 17—Builders' hardware is moving so briskly that it will soon regain its place as one of the most important lines in the local field. A number of price changes are in effect this week. Stepladders are selling at new quotation issued recently. Stewart horse-clipping machines have advanced, also Royal Purple calf meal. Safety gate hooks and hammock hooks are higher, also cotton wrapping twine. An advance of fifty cents per gallon has been made in prepared paints. Business in general is excellent in spite of the fact that farmers are very busy saving an excellent harvest.

Higher Quotations on Step Ladders

London, Ont.

STEP LADDERS. — The new quotations on step ladders which were announced recently are now in effect, the prices being as follows: Shelf lock 24c per ft., Ontario 29c per ft.

Advance is Made in Horse Clipping Machines

London, Ont.

HORSE CLIPPING MACHINES. — The new list of prices on Stewart horse clipping machines are now effective, and show an advance. Quotations are as follows:

Horse clipping machine, No. 1, $16.00 each.
Horse clipper attachment, $10 each.
Clipping head complete, $4.70 each.
Top plates, No. 90 or No. 300, $1.35 each.
Bottom plates, No. 99 or No. 361, $2.00 each.
Sheep shearing machine—No. 9, $24.00 each; No. 8, $21.00 each.
Sheep shearing attachment, $4.75 list.
All above prices subject to a discount of 25%.

Higher Price Named on Royal Purple Calf Meal

London, Ont.

CALF MEAL.—New and higher prices named on Royal Purple Calf Meal are as follows: 25 lb. bags, $5 per 100 lbs.; 50 lb. bags, $4.95; 100 lb. bags, $4.90.

Wire Nails, Rope Show No Changes

London, Ont.

WIRE NAILS, ROPE. — Wire nail prices are holding firmly, with a brisk demand developing as the building season progresses. Prices are: Wire, $4.70 base; cut, $4.75 base.

There is a steady demand for rope. Prices are unchanged and are as follows: Pure manila, 34c, base, per lb.; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Advance is Shown in Cotton Wrapping Twine

London, Ont.

COTTON WRAPPING TWINE. — Higher quotations are now being made on cotton wrapping twine, the figures being 3 ply, 71c per lb.; 4 ply, 75c per lb.

Lower Price Named on Shoe Thread

London, Ont.

SHOE THREAD.—Lower prices which are named on shoe thread will average about 35 cents a pound less than those which have been in effect. New quotations are not yet available.

Safety Gate Hooks, Hammock Hooks, Higher

London, Ont.

SAFETY GATE HOOKS, HAMMOCK HOOKS.—New prices on safety gate hooks are higher as follows: No. 100 x 5, $2.25 doz.

Hammock hooks have also advanced, the prices being: No. 138 plate, $1 doz., to screw No. 128, 90c doz.

New Discounts on Scoops and Shovels

London, Ont.

SHOVELS, SCOOPS.—Net prices on polished spades and shovels as figured on the new discount of 45/5 per cent., as quoted last week are as follows:

Spades and shovels—Black Cat and Star, $13.50 dozen; Fox and Olds, $14.07 dozen; Bulldog and Jones, $16.16 dozen; Bulldog and Jones, post hole and drain spades, $16.16 dozen; Jones' moulder shovels, $16.16 dozen.

Black Cat or Crescent scoops—No. 2, $16.72 dozen; No. 4, $17.22; No. 5, $17.47; No. 6, $17,72; No. 8, $18.22; No. 10, $18.72.

Moose or Jones scoops—No. 4, $18.54 dozen; No. 6, $19.04; No. 8, $19.54; No. 10, $20.04.

Brisk Demand For Scythes and Snaths

London, Ont.

SCYTHES, SNATHS.—There has been a brisk and steady demand for these lines. Prices are as follows: Scythes, cast steel, $15; Clipper, $16; Little Giant, $17; Brush, $15.50. Snaths: No. 2-0, $13.75; No. 1, $13.20; No. 2, $12.65; No. 3, $11.55.

Rubber Lawn Hose is Selling Well

RUBBER LAWN HOSE.—There has been a good demand for rubber lawn hose. Prices show no change and are as follows:

	3 ply.	4 ply.	5 ply.
½ inch, ft.	11½c	13c	14½c
⅝ inch, ft.	13½c	16c	17½c
¾ inch, ft.	15½c	17½c	19½c

Corrugated—½ inch, 17½c; ⅝ inch, 20½c; ¾ inch, 23½c; 1 inch, 35c, less 5 per cent. in full reels of 500 feet.

Prepared Paints Jump Fifty Cents a Gallon

PREPARED PAINTS.—The advances which have been predicted in HARDWARE AND METAL in paints are now effective and advances have been made as follows. All regular lines of oil paints, including marine and railway paints, advance 50c a gal.; inside floor and flat paints go up 25c; roof, barn and bridge paints increase 15c; all shelf goods, stains, auto enamels, etc., advance 15 per cent. over former list prices; oil colors advance 3c per lb.; varnishes costing up to $2.50 are advanced 25c, and varnishes costing over $2.50 advance 50c.

White Lead in Oil Remains Unchanged

London, Ont.

WHITE LEAD IN OIL.—With a fair volume of business being handled prices for white lead in oil are holding steady as follows: Pure, tons, $16.35 per 100 lbs., less tons, $16.70.

Turpentine Market Showing Strength

London, Ont.

TURPENTINE.—The turpentine market continues to show strength and prices are very firm. Quotations are as follows: 1 bbl. lots, $1.60 per Imp. bal.; 2 to 4 bbl. lots, $1.59; 5 gal. lots, $1.70.

Linseed Oil Prices Are Holding Firmly

London, Ont.

LINSEED OIL.—The linseed oil market continues firm with high prices prevailing. Quotations are on the following basis: 1 to 2 bbls., raw, $3.12 gal., boiled, $3.15; 3 to 5 bbls., raw, $3.11 gal., boiled, $3.14; 6 to 9 bbls., raw, $3.10, boiled, $3.13; less bbls. add 10 cents per gallon.

WINNIPEG MARKETS

WINNIPEG, July 17—Price changes during the week are again numerous and affect many of the staple lines, and show both advancing and declining markets. Among the lines which advance appear: copper rivets, leather belting, grease cups, leather tap soles, cotton rope and cotton clothes lines, while lines showing declines are as follows: agricultural wrenches, files, Star safety lifts, Penberthy valves and Stillson pipe wrenches.

Business in all lines is reported very brisk, despite bad crop reports from some districts. Many wholesalers are working overtime to get out their orders.

Copper Rivets Move Up 5 Cents a Pound

Winnipeg.

COPPER RIVETS.—Following the recent arvances in the copper market new prices have been named on copper rivets, which move up 5c per lb., making to-day's selling prices as follows:

Copper rivets and burrs, assorted, No. 8, 57c; No. 10, 61c lb.; copper rivets only, No. 8, 51c; No. 10, 55c; copper burrs only, No. 8, 51c; No. 10, 55c; No. 12, 59c lb.

Higher Prices For Steel Grease Cups

Winnipeg.

PLAIN STEEL GREASE CUPS.—Plain steel grease cups in both regular and ratchet types have undergone a general revision, the smaller sizes showing little change while the larger sizes advance approximately 10 per cent. To-day's ruling prices are given herewith:

Regular top, No. 000, 5c; No. 00, 6¼c; No. 0, 8c; No. 1, 10c; No. 2, 14¾c; No. 3, 22c; No. 4, 25c. Ratchet cover, No. 000,

8½c; No. 00, 10c; No. 0, 12c; No. 1, 15c; No. 2, 19c; No. 3, 29c; No. 4, 37c.

Leather Belting Again Advances

Winnipeg.

LEATHER BELTING.—Leather belting prices have again been advanced due to the shortage caused by heavy exports to Europe and even higher prices are anticipated. To-day's ruling discounts are given as follows:

Extra leather belting, 20 per cent.; standard leather belting, 20-10 per cent; No. 1 or shoulder stock, 20-10-10 per cent.

Leather Tap Soles Revised Upward

Winnipeg.

LEATHER TAP SOLES.—Leather tap soles are also affected by the recent advances in the leather market, this week's prices showing another 10 per cent. increase, making 20 per cent. in the past month, while higher prices are predicted in the near future. Prices now ruling on a few of the more familiar sizes are as follows:

Top Soles: Men's—No. 122, $4.85; No. 123, $4.60; No. 126, $2.80; No. 127, $2.65; No. 128, $2.40; No. 5, $12.30; No. 6, $11.45; No. 7, $10.35; No. 8, $9.35; No. 9, $11.45 dozen pair. Boys'—No. 26, $9.05; No. 27, $8.20; No. 28, $7.40; No. 129, $2.70; No. 130, $2.45; No. 131, $2.20. Women's—No. 32, $7.25; No. 33, $6.60; No. 36, $5.75; No. 37½, $2.85.

Top Lifts—No. 62, $4.45; No. 63, $4.15; No. 64, $3.70; No. 50, $2.20; No. 51 $2.00; No. 52, $1.75 dozen pair.

Cotton Rope Shows Advance of 3 Cents

Winnipeg.

COTTON ROPE.—Cotton rope shows an increase in price during the week following recent declines, moving up 3c per lb. over former prices and is quoted to-day at the following figures: 3-16, 70c; ¼ and over, 69c lb.

Lower Prices Named on Agricultural Wrenches

Winnipeg.

AGRICULTURAL WRENCHES. — Based on new factory prices just to hand lower prices have been named on all sizes of agricultural wrenches. The new discount is 40 per cent. off the list or a drop of 10 per cent., making to-day's net prices as follows: 6 in., $6; 8 in., $7.20; 10 in., $8.40; 12 in., $10.80; 15 in., $14.40.

Reduction is Made in Penberthy Valves

Winnipeg.

PENBERTHY VALVES. — Penberthy valves show a reduction during the week, new discounts from manufacturers showing a drop of from 10 to 15 per cent., making to-day's discounts as follows:

Penberthy regrinding valves: Globe, angle, horizontal and vertical check, 7½ per cent. off list: swing check, horizontal, check, net list; Penberthy compodisk valve, all kinds, 10 per cent. off list. Net prices on the above lines will appear in next week's issue.

Star Safety Lifts Are Slightly Lower

Winnipeg.

STAR SAFETY LIFTS.—Star safety lifts show a slight drop in price, based on revised factory discounts, new prices being about 5 per cent. below former quotations. To-day's prices on the various sizes are as follows: No. 1, $2.10; No. 2, $3.25; No. 3, $6.35; No. 4, $9.10.

Globe Brand Files Register a Decline

Winnipeg.

GLOBE BRAND FILES.—Prices on Globe Brand files, which have held firm for the past year, have been revised to lower levels during the week, showing a drop of approximately 12½ per cent. below former prices, making to-day's selling discount 50 per cent. off the standard list.

Stillson Wrenches Revised Downward

Winnipeg.

STILLSON WRENCHES.—Following a further drop in prices by manufacturers new prices have just been issued covering Stillson wrenches and parts, which show a decline of approximately 5 per cent., making to-day's discounts as follows: Stillson pipe wrenches, 55 per cent. off list; Stillson pipe wrench parts, 50 per cent. off list. Net prices on the above line will appear in the next issue.

Higher Prices For Cotton Clothes Lines

Winnipeg.

COTTON CLOTHES LINES.—Prices on cotton clothes lines have advanced during the week, due to higher cotton prices, and are now selling as follows: Cotton clothes lines, 40 ft., $3.20; 48 ft., $3.84; 60 ft., $4.80.

Turpentine Prices Are Holding Firmly

Winnipeg.

TURPENTINE. — Turpentine prices show no change during the past week, holding firm at former prices with only a moderate demand. To-day's prices are confirmed as follows: barrel lots, $1.65 gal.; ½ barrel lots, $1.68; 5 gal. lots, $1.70 gal.; 1 gal. lots, $1.70 gal., plus the usual extras for containers.

Linseed Oil is Still Very High

Winnipeg.

LINSEED OIL.—Linseed oil prices still continue to soar and with the price of flax seed at $6.50 a bus. higher prices are imminent. To-day's market prices are as follows: Raw linseed oil, $2 95 gal.; boiled linseed oil, $2.98 gal.

PITTSBURGH MARKETS

PITTSBURGH, Pa., July 17.—The report of steel ingot production in June makes an even more favorable showing than was expected. All observers recognize that there was much better mill operation in June than in May. With increasing operations during the month, even at the close of June few mills estimated their operations at over 70 per cent. of capacity, and as May had shown an average operation of 54 per cent., a fairer estimate for June appeared to be about 60 per cent. The official report since made, however, indicates an operation during June averaging 67 per cent. of capacity. The first four months of the year showed rates as follows: January, 87 per cent.; February, 85 per cent.; March, 77 per cent.; April, 65 per cent.

A little analysis of these figures will indicate how great an improvement there has been. It will be observed that the 54 per cent. average for May was far below the rates for April or June, and thus it is clear that at about the middle of May the rate must have been lower, probably not over 50 per cent. On the other hand, with production steadily increasing during June, and an average of 67 per cent. for the whole month, the rate at the close of the month must have been about 70 per cent. Accordingly there was a rate of about 50 per cent. at the middle of May and a rate of about 70 per cent. at the end of June, only a month and a half later, showing an increase in tonnage output of 40 per cent. in that short space of time.

The computation of percentages of operation are based on the monthly reports of the American Iron and Steel Institute, giving the output of 30 companies which in 1918 produced 84.03 per cent. of the total steel ingot output. The production of the 30 companies was 2,219,219 gross tons in June against 1,929,024 tons in May.

Production for the first six months of the year was at the average rate of 35,500,000 gross tons a year, for the whole industry, or at about 72.4 per cent. of capacity, which can be estimated at 49,000,000 tons a year.

Steel Corporation Business

The monthly report of unfilled obligations of the Steel Corporation shows that in June there was more contracting for forward deliveries of steel products than was reported at the time. It was well known that there was a continuous increase in the booking of actual shipping orders, comprising specifications against contracts together with new orders, specifications attached, but it was not supposed that there was much contracting for forward deliveries. For months there had been practically none at all, and some sales agents were remarking that they had forgotten how to fill out contracts, as the business received was all in the form of shipping orders.

The Steel Corporation report, however, showed 4,892,955 tons of unfilled

obligations at the close of business, June 30, this including contract obligations as well as shipping orders. The increase during June was no less than 610,545 tons, whereas each of the preceding six months, beginning with December, had shown a large decrease, these decreases averaging 640,000 tons a month. These monthly reports are not a reflection of the rate of booking orders on which the mills actually operate. A month may begin with a certain volume of unfilled obligations and the mill may ship heavily, merely upon specifications against the contracts, whereby at the end of the month the unfilled obligations would be found to be decreased by the volume of the tonnage shipped. On the other hand a mill might book a large volume of contract business in a month but have very little tonnage of shipping orders on which to operate. Thus the main thing the Steel Corporation report shows is that contracting in steel products is now in vogue again.

Lake Ore Movement

Shipments of iron ore down the lakes in June amounted to 7,980,839 tons, against 9,921,860 tons in June a year ago. The season total to July 1 is 16,008,419 tons against 18,949,730 tons for last year's season up to July 1. While there is a falling off of 2,940,000 tons the showing as to trade prospects is by no means unfavorable for the reason that there has been a large surplus of ore to liquidate. Last year's ore shipments were sufficient to carry the blast furnaces with full supplies up to about June 1 of this year, but as the war ended the production of pig iron declined very materially and not as much ore was used as had been provided. Indeed, the ore movement up to July 1 was almost wholly by the producer-consumer class, very little merchant ore being moved because the furnace interests that buy ore had not taken hold as to purchases for the season. Some had declared that they would not buy until about August 1, expecting the market to decline. Several weeks ago it became evident that ore prices would be held strictly and so there has been buying in a moderate way in the past two or three weeks, and the ore movement for the remainder of the season will probably show a picking up. The basis price for the season is $5.55, for Mesabi non-Bessemer ore at Lake Erie dock. An advance of 25c went into effect Oct. 21, 1918, under the auspices of the War Industries Board, making the price $5.75, but there is a 20c reduction for this year due to the lake carrying rate declining from $1 to 80 cents.

Railroad Buying

One of the chief things the steel industry now needs is a fair volume of railroad buying. Some departments of the finished steel trade that do not make materials used by the railroads are doing very well, while the branches that furnish railroad material are at the bottom of the list in point of activity. About three weeks ago it was reported in the inner circles that the Railroad Administration was about to place orders for 300,000 tons of rails, but nothing has come of this to date. It is surmised that possibly the Railroad Administration sees its way clear to returning almost complete control of the railroads to their owners at an earlier time than expected, though of course the earnings guarantee will run to the end of this year in any event. Thus it may be that the individual railroads will soon be in a position to place orders on their own initiative and responsibility. Another thing the steel industry needs is more construction work by way of large jobs, including bridges, large buildings, factories, etc. The erection of dwelling houses promises to be heavy the remainder of the year, judging by reports from various centres, and the fact that the nail departments of the wire mills are practically filled up for the next two or three months is concrete evidence of this activity, but that does not help the structural mills, which have a very light operation, in keeping with the rail and plate mills.

The pig iron buying movement is not altogether over, as it was thought at the end of June it might be. While there has not been much activity in the past week or two there has been some, and with the furnaces now in operation well filled for the third quarter, some of them practically through the year, the market is quite steady. Predictions of price advances in the near future do not seem to be well timed, however, as when idle furnaces see improving business ahead they generally hasten to get into blast and they are not very particular as to the prices obtained by the "back log" business they generally take before they blow in. Rarely does a furnace blow in to make up stock.

PUSH ROOFING AND HELP CONSERVATION

Continued from Page 44

may be imparted to the contractor or to the owner, although the contractor will have been already posted on the best insulation plans for a given building. In any case, interest should be manifest to the extent that all parts of the walls, windows and door frames, sills, etc., be fully provided with a good heavy insulation of proper sheathing materials.

At this time, when so much advice is being handed out by the authorities regarding the conservation of coal, the dealer has an opportunity to use arguments in the best interest of his customers as well as of the country. If buildings are put in order, as far as roofing and sheathing of them is concerned, before the winter cold comes, then profit will have been made by the dealer and conservation practised by the owner.

It is no time to defer work in anticipation of lower prices. Demand has been greater for available supplies of old rags for felt-making. In this respect, Mr. Munn states that the conditions have been somewhat unusual, Canadian manufacturers going into the United States market sometimes and on other occasions the United States makers come to Canada and pick up large supplies. Manufacturing costs are constantly high and there is no prospect of these lowering.

Altogether, this is an opportune time to speed up sales.

One of the most prolific fields for cultivation as far as the hardware merchant is concerned is that pertaining to the outbuilding development of the rural communities. And it is because this very principle of proper insulation can be carried into the construction of even the quarters erected for pigs, cattle, sheep, etc.

Mr. Munn recalled a conversation which he had recently had with a successful hog breeder. His pens had been planned and built with due regard to warmth. Insulation with building paper had been as fully carried out and as carefully planned as it usually is in the average house. And it has already justified the care and expense involved.

The points are these. With hogs, sheep or cattle housed in a properly-constructed building they are, in the first place, made very comfortable. Why should a dumb animal not be afforded protection from the rigors of Canadian winters? This is but humane. But, aside from this, it will take less feed to fatten the hog, the sheep or the steer if the housing quarters be made suitable. In these days of excessive costs for all kinds of feeds there is much to ponder when one is laying plans. Here is an added opportunity for the hardware dealer to get out and advise his farmer friend—there is no question about it. In the plans that he will be making right soon for wintering his various stock, he will unquestionably want to conserve every hundredweight of feed that can be conserved. Then, the first step in this programme will be that of insulating the buildings, which he will erect with due regard to the severe climatic conditions which will come as surely as day and night re-appear.

DECLINES NOT LOOKED FOR ON GLASS

While there is no definite indication of change in the glass market, there will be no decline, in the opinion of W. R. Hobbs. If a change comes it will rather be in the nature of an advance.

In speaking with HARDWARE AND METAL, Mr. Hobbs referred to the immense quantities of plate glass which are being used in automobiles. There is a demand of exceedingly large proportions for new cars, and then there is the replacement. This has been so great as to have made plate glass somewhat scarce from time to time, although, considering the demand, there is no reported serious shortage.

Price tendencies are upward, largely because of the increased outlay for labor. Wage lists have greatly increased and there is no question but that labor will continue to receive increased wages for some time to come. There is no probability of lower prices.

Get Customers to Examine Buildings

"Close-Up" View Will Reveal Many Reasons Why Paint Should be Used—How Soon "May" I Paint, Not How Soon "Must" I Paint—Will Reach Other Lines as Well

WHEN you find a customer showing any inclination towards painting, yet who seems inclined to delay the matter for superficial and trivial reasons, ask him to examine his buildings closely.

Too many property owners stand across the street, look over their property and say: "Oh, I guess it looks good enough, I'll let it go another year." When he takes this attitude, you lose money in paint sales and he loses money in depreciation.

Make Close Examination

A "cross-the-road" examination fails to reveal the little beginnings of rot and decay. He cannot see the little naked spots and cracks where moisture creeps in and begins its deadly work.

Advertise to your customers the necessity of examining their buildings closely. The closer they can get their noses to the surface, the more they will see the need for care, for repairs, and for paint.

Tell them to rub their hands over the surface to get a feel of the condition of the wood. Get them to examine the property in this way at least once a year, better still twice a year or still better, every four months.

The general condition of his property may look good to a man who sits on his neighbor's doorstep and talks about peace, baseball or the high cost of living. But to reveal the high cost of doing without paint let him get right up against it with his fingers and his eyes.

When paint is applied for appearance a man can stand off and be pretty well satisfied with his home, but when it is used for protection then he must get as close as possible in his examination to find the tiny weak spots where the insidious, constantly working, destroying forces of nature get in their fine work.

How Soon May—Not How Soon Must

Close examination of property will soon get a man into the habit, of asking himself, "How soon **may** I paint?" instead of the stand off question of "How soon **must** I paint?"

Protective Against Decorative Effect

Keeping constant scrutiny on his buildings will get a man painting his property a long time before the fellow that paints because he feels he must, purely from the decorative standpoint.

"Painting costs nothing" is a proverb amongst the thrifty Hollanders who have learned by long experience that it costs more to pay for repairs than to avoid the necessity for them by the liberal use of paint.

Painting Saves Money

By anticipating the ravages of moisture in property and preventing its inroads with a timely coat of paint, a man will be money in pocket. No better example of saving at the bung and losing at the spigot can be furnished than by the man who argues that he saves money by not painting.

A great many property owners realize this and paint regularly. The paint dealer can forget these people. They come to him anyway. It's the fellow that doesn't realize it that we are concerned about, and with whom the hope of increased paint trade lies. He is the fellow that is responsible for the tremendous losses that are taking place on property every year as well as the fact that the paint business of every paint dealer in the country is by no means what it ought to be.

Get the "Lost" Ones

The shepherd doesn't worry about the ninety and nine that are in the fold, he scurries over the hillsides after the hundredth one that remains outside.

And this applies pretty much to the problem of increasing paint and varnish sales for every paint dealer.

Get after the chap that has not acquired the painting habit. Get after the fellow that doesn't paint for preservation and protection. Get after the fellow that only paints for shame's sake to keep up their appearance in the community.

Encourage these people to examine their buildings and tell them why they should examine them.

Need Will Become Apparent

Teach your clerks to encourage closer examination. It will pave the way to larger paint sales.

Not only will it encourage paint sales but a property owner that becomes on more intimate terms with his property through closer examination will find the need for improvements which will lead to the sales of hardware, tools and other household necessities. Painting will lead to the sale of these as well as brushes. And improvements and repairs will lead to the sale of paints and varnishes.

Dealer Can Start It

Hardware and paint dealers are frequently brought into conversation with property owners in their homes or

The Brush Department

Linking Up Brush and Paint Sales

Need of Paint Apparent Throughout Country Presents Opportunities for Increasing Sales of Brushes—Kalsomine Brushes Prove Good Sellers—Sell Quality Line

ONE often sees the slogan "Use More Paint," but how many dealers push the sale of paint and brushes?

Delegates going to a convention from United States Eastern points to Western, had to pass through a good portion of Ontario and remarked, in the course of conversation, at the lack of paint on buildings and barns. How much better they would look if painted! Farmers lack good business sense in lots of ways.

Saving in insurance could be effected if buildings were put in proper, up-to-date appearance, also if put on the market for sale they would bring a much better figure.

Occasionally, you will see sides of barns painted with an advertisement of some modern brand of merchandise, then lots of others which had been done with some dope, which washed off in the first rain storm.

Interested in Brushes

The writer is not trying to sell any particular brand, nor has he any interest in any make of paint. What he wishes to impress on the trade and clerks, when they paint, is to see if the purchaser does not want a few brushes to put it on with. Very often this is overlooked in making sales. A good brush is just as essential as good paint. A customer may be going to do a job on a fine day, go home with the material, and find an old brush, hard from neglect. The writer was in an Eastern town a few weeks ago, where a dealer sold a customer 10 gallons of assorted colors of paint and never even asked him if he had any brushes, or tried to show him what kind they had in stock. Of course, not all dealers are alike; the above is an average case.

Kalsomine Brushes Prove Sellers

Ask the majority of dealers to stock kalsomine or whitewash brushes for painters' use and the first thing they will say, would be that they could not sell them without giving them a trial.

The writer impressed one dealer, not far from Toronto, to stock a few good whitewash brushes, and if not sold by the end of the season, he would have the privilege of returning them, provided they were not soiled. The dealer not only sold these, but wrote in for more, which shows what one can do. Others should do even better.

The quality is remembered long after the price is forgotten, so sell good brushes, made by reliable manufacturers, which are guaranteed to dealers and consumers.

STIRRING ADVENTURES, THEN FORTUNES

Continued from page 53

a sanitary, industrial area, giving well-paid employment to many thousands and bringing about a transformation in living conditions in Tampico and elsewhere. They saw in Mr. Doheny, therefore, a genuine friend and an invaluable contributor to their welfare and progress.

Mr. Doheny's outstanding characteristics are his out-and-out honesty, his superhuman industry, his illimitable courage, his perennial cheerfulness and optimism, his breadth of vision, his untrumpeted generosity, and his modesty. His knowledge of oil is matched by his knowledge of literature. I know no business man who uses better conversational English or who habitually coins more brilliant metaphors.

When I asked him if he could single out one thing more than any other to which he owed his success, he smiled very broadly as he replied, "Yes, let's go through the other room, and I'll show you." And he introduced me to Mrs. Doheny! "This," he said with a characteristic touch of knight gallantry, "is the greatest find I ever made."

PAINTS AND VARNISHES ADVANCE

Continued from page 39

Putty and Lead Hold

No changes have been made in the basis for white lead in oil or for putty. There are reasons for this which manufacturers explain, and one of these, as far as white lead in oil goes, is that of there being less content of oil in the manufactured product—far less, indeed, than there is in mixed or prepared paint. The net difference in cost to the producer is relatively so much less than an advance has been deferred for the present. Supplies of lead bought at the basis obtaining last winter have also continued to last fairly well.

In respect to putty, there has already been an advance for pure linseed oil grade as reported on June 28. Beyond this it has been thought unnecessary at the present time to advance prices. This is a somewhat quiet selling season and no advance was effected, even though some manufacturers predicted an increase.

SAYS ADVERTISING DID IT

George Wenige, proprietor of the Bicycle and Motor Sales Company, London, Ont., whose advertisements and sales methods have been copied all over the United States and Canada, was asked at a banquet recently to tell about plans.

"I owe all my success to one thing, and can tell you the reason for it in just one word," he said. "That one little word that is the name of the wonder-worker is 'Advertising,' judicious and truthful. Every one of us the minute we enter this world start to advertise the fact that we are here, and that we want something. From that day to the day we die we are advertising—some of us, truthfully and judiciously—others, well, I won't say how the others advertise themselves. Actions speak louder than words."

HARDWARE PICNIC TO BE HELD AT CREDIT GROVE

The annual picnic of the Toronto Retail Hardwaremen will be held at Credit Grove, Port Credit, Ont., on Wednesday afternoon, July 30. Previous arrangements were made to hold the picnic at Long Branch, but it has been decided to change the location to Credit Grove. The hardwaremen, with their autos, will meet at Sunnyside at 2 p.m. sharp. Radial cars will also leave Sunnyside at the same time for the picnic grounds, which are located opposite the starch works at Pt. Credit. A long list of sports has been arranged, and dancing will be held in the evening. The committee in charge is as follows: W. C. McFadden, chairman; Jno. Caslor, treasurer; O. F. Morrison, secretary.

BICYCLE DEALERS ASKING FOR EARLY CLOSING

Bicycle dealers at Ottawa have signed a petition to be forwarded to the city authorities requesting the closing of bicycle stores at 6.30 every night except Saturday. It is expected the city council will pass a civic by-law to ths effect.

Similar laws in other cities would afford much relief to bicycle dealers who at present are required to be at their shops during practically all of their waking hours. The only practical remedy is an early closing by-law, as there is always someone to break an agreement and the force of the law is necessary to secure early closing by all.

Experience has demonstrated that just as much business can be done in fewer hours, providing these hours are uniform in all shops.

GET CUSTOMERS TO EXAMINE BUILDINGS

Continued from page 64

standing near the house. A discussion about paint can be brought about by the dealer himself going over and closely examining the property and calling attention to the necessity of paint. The store staff can also be coached to carry on the same method of personal sales promotion as they move about, amongst their friends and acquaintances in the town.

Will Reach Other Lines

For advertising purposes, the slogan "Examine your house" or any other simple sentence conveying that idea can be adopted for the spring and fall advertising campaign. Don't fail to tell the reasons why the property should be examined. It may be for paint, window screens, door knobs, window glass and a host of other articles that can be used in the up-keep of property.

Paints and varnishes could be used as the leading theme for such an advertising campaign. The other lines could be taken up as the dealer saw fit.

Fall Good Time to Start

Try this idea out in preparation for your fall advertising. The fall painting idea would provide many excellent reasons why a man should examine his property in readiness for the winter months.

Get your trade into closer touch and interest with what has cost them real money and what will cost them real money unnecessarily if they do not bestow proper attention on it in its upkeep.

This may seem a simple idea. The simpler it is the more reason why it will bring trade. How often we hear exclaimed over even an advertisement, "Isn't it funny that I never thought of that before?" Men and women are alike in this respect. And they have a great deal of regard for the store that has been thoughtful enough to bring the suggestion home.

Now Mr. Paint Dealer, let it be also said to you, "Examine your trade," get in closer intimate touch with them and see if this homely advice advertised frequently, and driven home forcibly, can be made a profit-producer for you.

Get your nose down to the job of getting property owners more intimate with the needs of their property. Too often one takes a too general view of things and draws general conclusions that are more or less wide of the mark. This may be said regarding retail merchandising as well as of paint.

See what you can do to boost your paint and varnish sales this fall by getting close to the needs of your trade, and thereby devising some means of getting property owners closer to a realization of the needs of protection with paint.

Aylmer, Ont.—C. A. Brown, of Ridgetown, Ont., has purchased the hardware business of John H. Glover.

What the Customer Thinks of the Store Service

Guelph Board of Trade Sets About Finding What is Needed to Improve the Service of the City's Stores—Citizens Asked for Suggestions, and Many Are Received

THE Guelph, Ont., Board of Trade, with the idea of getting some information that will be of use in bettering the service of the city's stores, and consequently of service in building up the city, recently sent out a circular to every home in the city, asking for a frank comment on the service rendered by the stores. The circular read as follows:

The Enquiry Sent Out

"The retail merchants of Guelph want to improve their store service. They want to make trading in Guelph the best within fifty miles. They want every buyer in Guelph always to be sure of unequalled store opportunities.

"They want their customers to suggest how this may be done.

"Please help the Guelph merchants to give you better service by filling out the lines below and returning to Retail Merchants' Division, Chamber of Commerce, 30 Douglas street, Guelph, Ont."

Here followed a blank for the receiver's comment.

The replies, while not always particularly novel in viewpoint, did present some suggestions that indicated that the customers of stores are aware of some of their shortcomings, and are alive to the possibility of improvement. Some of the suggestions for improvement were as follows:

Sundry Suggestions

"Have prices just and reasonable, combined with prompt service."

"Have clerk telephone or call customer for their order on stated days each week."

More "Pep" Needed

"Have clerk show 'pep' in attending to customers. This applies to 95 per cent. of all stores in Guelph."

"Grocers and confectioners ought to make war on the fly. (Woefully required in some stores.)"

"'Dress up' windows more frequently."

"Make a 'gift day' once a month. Give about a $10 article, to be drawn by number."

"Have a record of sales made daily, and give a bonus to the clerk making the largest monthly sales. (Try this out and get a surprise.)"

More Advertising Advised

"By exhibiting more enterprise in advertising and demonstrating their wares. Consider the working classes and keep prices on a level with other places."

"By a little faster movement on the part of the clerks."

"By a perfect willingness to show merchandise, whether you buy or not."

"To smile and say 'Good morning' or 'Good afternoon' to customers, as the case may be."

"Have uniform set of prices."

"In some instances prices are much too high in comparison with other cities."

"Why not try a Friday bargain day once in a while, and also have more competition. It's competition that will develop trade."

"Put on a sale once in a while. Advertise it well and you'll get a pleasant surprise."

BENJAMIN MOORE & CO., LIMITED

The employees of Benjamin Moore & Co., Ltd., Toronto, and their friends held their first annual picnic at Niagara-on-the-Lake on Thursday. More than 150 people were in attendance. The programme included sixteen events besides a baseball match. The firm furnished everything in connection with the outing, including transportation, and all arrangements were made under the personal direction of Mr. Fred Moore. The outing was a splendid success in every way and was so thoroughly enjoyed that it will likely be held each season. A very hearty vote of thanks to the management was tendered.

BRANDRAM-HENDERSON, LIMITED, 11TH ANNUAL PICNIC

The annual picnic for the employees of Brandram-Henderson, Limited, was held at King Edward Park on Saturday. George Henderson, the president, distributed the prizes won for the various sporting events and expressed his pleasure at the good sportsmanship shown by the very large number of entries. A splendid list of events was run off and music and dancing were among the attractions of the day.

GILLETTE SAFETY RAZOR SALES SALES FOR 1919

In the issue of HARDWARE AND METAL for June 28th, an omission from the Gillette advertisement made it somewhat difficult to understand.

The artist had drawn Gillette razors in sizes to represent the growth in sales of the Gillette since the first year of the war. The 1919 razor was some eight times the size of the 1914 one. Of course, the figures for the complete year 1919 could not be given and the following note should have appeared alongside the large razor representing this year's sales:

"Estimated Sales for 1919 based on actual figures for first six months."

The Painters' Good Word

THE painters' cordial endorsement of the merit of Berry Brothers' Varnishes, Enamels and Stains is one of the reasons why they are so favorably known and easy to sell. Sixty-one years' adherence to fixed quality standards has established the confidence of varnish buyers in all "Berry" products.

No varnish stock is complete without Berry brands, and it pays to push them because there is a permanent and increasing demand for them.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 16. — Prices have advanced for all prepared oil paints, specialties, flat wall colors, carriage paints, marine and dory paints, enamels, roofing paints, colors in oil, and colors in japan. In addition to these changes an advance of 25c per gallon for all varnishes costing $2.50 per gallon or less is made, while varnishes priced in excess of $2.50 per gallon are advanced 50c. The usual differentials apply. Reference is made to these changes in detail elsewhere. Advances have been made of a slight nature for linseed oil, and turpentine is steadily firm with the probability of advances becoming effective with primary conditions stiffening.

Slight Advance On Linseed Oil

Montreal.

LINSEED OIL.—A small advance has been made for linseed oil, the law basis being $2.95 per gallon. Few firms are quoting. It is necessary for the manufacturer of paints to keep himself protected on oil to meet his needs which are still large. There is a high flaxseed market, over $6 being the basis at this writing. No relief in the matter of supplies is in sight just now.

Raw—	Imp. Gal.
1 to 4 barrels	$2 95
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$2 97½
5 to 9 barrels	....
10 to 25 barrels	....

No Low Turpentine; Primary Advances

Montreal.

TURPENTINE. — Actual stocks of turpentine here are moderate. There has been a steadier condition, with the minimum price basis held at $1.55 per gallon. It will not be surprising if higher prices prevail soon, however, for the primary market is again firming. Demand from abroad is again developing.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 55
Small lots	....

(Packages extra.)

Putty is Firm But No Changes

Montreal.

PUTTY.—Contrary to the expectations of some manufacturers and jobbers no price changes have been made for putty. There has been but little movement of late, and the matter of price consideration did not meet with any definite change. Prices remain as follows:

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead Holding And Rather Quiet

Montreal.

WHITE LEAD IN OIL.—Changes were anticipated on white lead in oil when the new schedules were considered for paint. In view of the fact that pig lead prices have been maintained and also owing to the rather smaller content of linseed oil that is required for grinding, it was deemed best to make no change. Consequently the present business obtaining is done on the following basis: Five-ton lots, per 100 pounds, $15 50; ton lots, $16, and small quantities, $16.35.

Fifty Cents Added To Prepared Paints

Montreal.

MIXED PAINTS, VARNISHES, ETC. —It was most definitely forecast in the columns of HARDWARE AND METAL last week that mixed paints were firming and likely to be advanced. A change was made on Friday afternoon, late, and the increase amounts to 50c per gallon on first and second quality paints, and to 25c on some other varieties. Full particulars will be found elsewhere in a special article and the changes are given in detail in panel. Manufacturers point out that they have deferred making any advance as long as possible. Buying linseed oil in the open market to-day around $3 per gallon, as is necessary under present conditions, makes it impossible to continue selling on the old basis.

Varnishes have been advanced as referred to elsewhere, 25c to 60c per gallon being added to the previous prices. Specialties such as carriage paints, enamels, etc., have all been advanced. Flat wall colors are up 25c per gallon and the new prices are at once effective.

TORONTO

TORONTO, July 17.—While flaxseed quotations to-day are $6.01 or 3c beliw last week's figures, the linseed oil market is advancing as a result of the manner in which export business is developing. It is understood that crushers have been offered $3 in carload shipments for export. To-day's quotations range from $3.05 to $3.20. Turpentine has taken a sharp turn with quick advances and has moved in Southern markets to the highest price on record. This has resulted in higher quotations all around, and with large shipments going overseas the market is very firm. Rosins are in steady demand, and at very firm prices. Turpentine is quoted to-day at $1.65.

Further Advances In Linseed Oil

Toronto.

LINSEED OIL.—Linseed oil continues to show great strength as a result of the demands from overseas, and the general depletion of stocks in primary market. While flaxseed is quoted to-day at $6.01, as against $6.04 a week ago, this has had no effect on prices of oil, and has been more than offset by overseas inquiries for carload shipments on a basis, it is stated, of $3. Stocks are so low that some dealers will not sell locally in more than barrel lots. Crushers state that it is impossible to get anything like the shipments of seed they require. One man who wanted 20,000 bushels stated that the most he could secure was 7,000. Reports show that the American markets are bare and that the supplies from the Argentine are continuing to move overseas. Crushers state that no improvement in the general situation is likely until the new crop comes in. The quotations for oil range from $3.05 to $3.20.

Linseed Oil —	Raw	
1 to 2 barrels, gal.	$3 05	$3 20
3 to 5 barrels, gal.	3 04	3 19
10 barrels and over	3 02	3 17
	Boiled	
1 to 2 barrels, gal.	$3 08	$3 23
3 to 5 barrels, gal.	3 07	3 22
10 barrels and over	3 05	3 19

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Quick Advances Made in Turpentine

Toronto.

TURPENTINE.—Heavy buying by overseas firms and the fact that with a

Nearly Two Centuries Old

Brandram's Genuine B-B White Lead

Do they not mean something to you,—these pictures? Look at them. A long and honorable history is behind them.

Canada was largely a wilderness when Brandram's Genuine B-B White Lead was first made. Napoleon has come and gone. The United States has come into being—and now Germany has fallen. Steam power, electricity, telephone, telegraph, wireless, submarines, airplanes—these have all come into being since the Brandram process was discovered.

1919 is using out of the same pail as 1745. Exactly the same process was used in making the white lead (Brandram's Genuine B-B) of 1745, as is used in making that of 1919. In the world competition which has been waged all these years, the Brandram process is the only survivor of all the patented white lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English" Paint, and in all other Brandram-Henderson paint products employing a white base.

Your guarantee lies in that two centuries of history. No one else can give a guarantee of the same character.

Write us for our attractive Agency proposition.

resumption of trade with Germany there will be an additional market to supply are responsible for turpentine prices reaching the highest prices on record at Southern ports. There has been a heavy movement to Europe, one ship alone taking out more than 7,000 barrels. Just how important a buyer Germany is of turpentine and rosin may be gathered from the information that before the war that country was one of the largest buyers in the southern market. As a result of the advances made in the South local prices are climbing again, and today's quotations range around $1.65 .

Turpentine—	Imp. gal.
1 barrel (barrel included).....	$1 65
2 to 5 barrels (barrel included)	1 64
5 gallon lots	1 75

All Paint Prices Revised Upward

Toronto.

PAINTS.—The advance predicted in last week's issue of HARDWARE AND METAL is now effective and covers all lines. A fifty cent advance is shown in all regular lines of oil paints, including marine and railway paints. Inside floor and flat wall paints increase 25 cents; roof, barn and bridge paints 15 cents; all shelf goods, stains, auto enamels, etc., fifteen per cent. on list prices; oil colors two cents a pound. Varnishes have also been revised, and those costing up to $2.50 per gallon go up twenty-five cents, and those costing over $2.50 advance fifty cents. Manufacturers state that business remains excellent and that a large number of repeat orders are coming in.

No Change Shown in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Prices are holding steady, and a good volume of business is reported. Quotations are as follows: Five-ton lots $15.85 per 100 pounds; one-ton lots $16.35; in smaller quantities $16.70.

Window Glass, Putty, Remain Unchanged

Toronto.

GLASS, PUTTY.—A steady increase is noted in the demand for window glass as the building season develops. Prices show no change. Putty prices are also holding without revision.

Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron ...	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons..	6 70	6 95	7 30
Bladder, in barrels...	7 10	7 35	7 50

Pure putty advance $2.50 per 100 lbs. over above.

TO BUILD IN LONG ISLAND CITY

It is stated that Pratt & Lambert, Inc., have bought, for $50,000, a plot of ground in Long Island City, N.Y., fronting 200 feet on Fourth avenue, 100 feet on Fifth avenue, and 200 feet on Freeman avenue, upon which will be erected at once a warehouse and office building.

What Sort of a Reception Will German Goods Get In Canada?

Views Among Those in the Trade Vary—Some Declare That Price Will Soon Overcome Prejudice—Others Look For No Large Business to Develop Because Germany Has No Ships

CANADA is upon the eve of a resumption of commercial relations with Germany and for the first time since trade came abruptly to an end in August, 1914, German goods will be permitted to be shipped to this country. By an order-in-council Canada was enabled to act the minute Great Britain renewed relations with Germany. England and the United States acted in close co-operation. In view of the removal of all restrictions against trading with Germany there is a good deal of interest being taken among merchants all over the country and opinion is greatly divided as to what may happen.

Many Different Views

"As far as our firm is concerned," said the buyer for a large Toronto firm, "I am satisfied that we will make no effort at all to buy German products. Even taking into consideration the fact that we realize fully that if Germany is to pay the billions she owes, she must sell her goods, we do not want any of them. I do not know what attitude the public will take, but it seems to me that anyone who has lost anyone over there will not knowingly buy German made goods."

Price Will Count

"Price will count a whole lot with the great mass of people," said another dealer. "If German firms can produce goods that are of fair quality and are cheaper than those made by others it will not be long before they will find markets. Before the war we handled a lot of German goods and we found them to be of good quality. I think that it will be only a matter of a very short time before the sentiment that exists against German goods now will be forgotten largely. In one way I think German competition would be a splendid thing in that it will help to bring down prices and that is something that has got to come about in some way or another sooner or later. Things cannot keep on going up the way they have been. The whole system so far has been a circle, one thing hitting the other and prices going up all around. It has got to end some time and if German goods check this tendency, which I believe is bad for business generally, it will be a good thing."

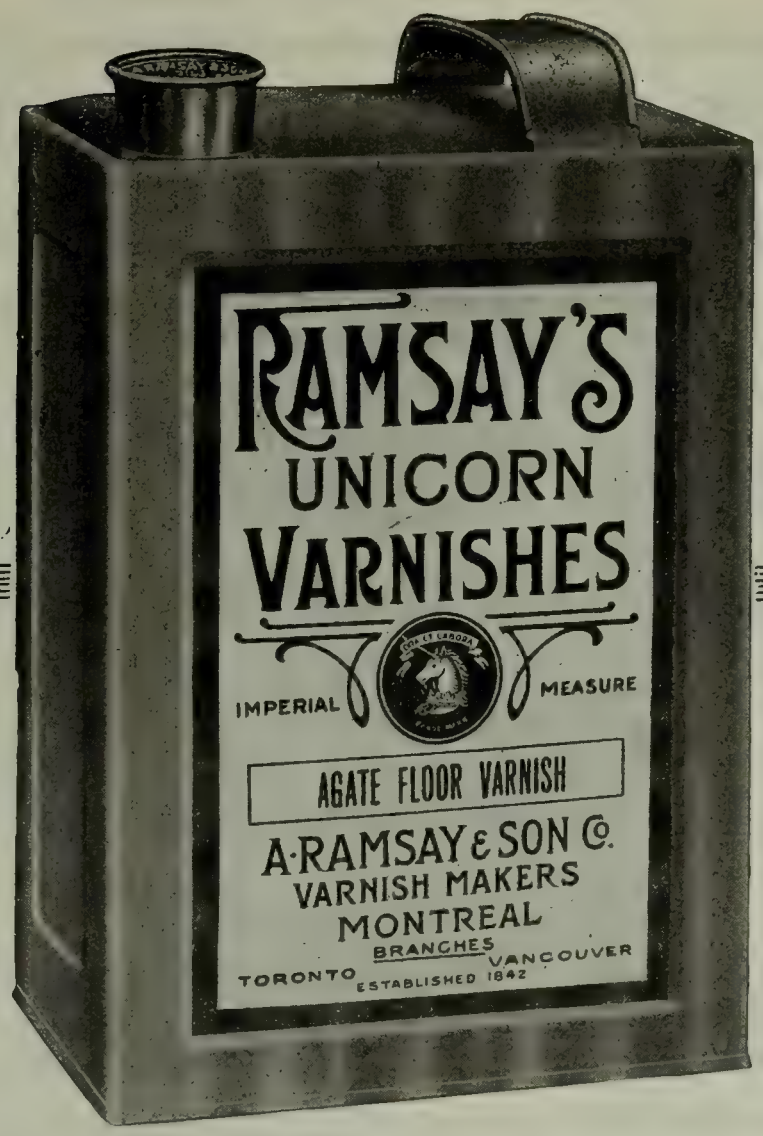
Should Be Careful

Another merchant gave it as his opinion that German goods should not be allowed into Canadian markets until Canadian manufacturers are in good shape to meet the competition. He referred also to the high prices now prevailing, and declared that they are injuring trade and especially export business.

"Many Canadian firms cannot sell outside of Canada now," he said. "because production costs are so high here now that the manufacturers cannot produce goods on an equal footing with those in other countries, let alone meet their prices and also pay freight rates."

Sees Little Business

Another factor in the situation, he pointed out, is the change in shipping conditions. Before the war German goods were brought to this country in German boats. Now Germany will have few if any ships and there is such a scarcity of steamers of all kinds that German firms will for some time have considerable difficulty in obtaining shipping sufficient to handle any extensive trade.



Would be Dangerous

"I would not like to take any chances right now of offering German goods for sale," said a Toronto retailer. "I am afraid that if I put in a window full of German cutlery and people knew it was German that I would lose a lot of trade even if the window was not smashed by returned soldiers or their friends. It is hard to know just what to do in this matter. If everybody refuses to trade with Germany the Germans will never be able to pay the indemnity. British and American officials may help arrange this matter by encouraging trade, but public opinion is bound to be divided. A lot of people who lost sons or relatives will certainly not want to buy German goods. On the other hand there will be a lot of people with whom price will be a consideration, and if German goods are the cheapest they won't mind buying."

PRESIDENT HENDERSON TELLS MASTER PAINTERS ABOUT SAVE THE SURFACE CAMPAIGN

At the annual convention of the Master Painters and House Decorators' Association held in Hamilton, Ont., George Henderson, of Montreal, president of the Canadian Paint, Oil and Varnish Association, and chairman of the "Save the Surface Campaign" Committee, delivered an address on "The Canada Save the Surface Campaign." He dealt at length with the need and purpose of the campaign and told all about how it was carried on and the results obtained. He also spoke of the Master Painters' part in the campaign.

Ernest T. Trigg, of John Lucas & Co, Inc., Philadelphia, the father of the Save the Surface campaign, also spoke at the meeting.

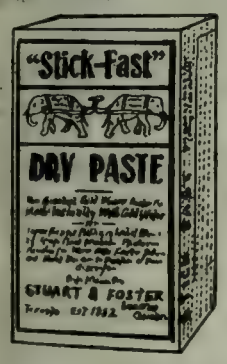
W. G. HARRIS, President

There was a little Man
And he had a little Gun
And his Bullets were made
Of LEAD, LEAD, LEAD.



Our Four Plants are full of **LEAD,**

COPPER, TIN, SOLDER, BABBITT METAL LEAD PIPE and SHEET LEAD

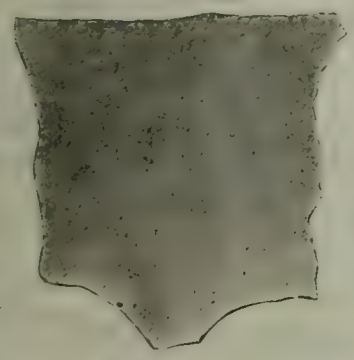
We can serve Hardwaremen anywhere in Canada

Factories at : TORONTO MONTREAL WINNIPEG and VANCOUVER

THE CANADA METAL COMPANY, LIMITED

" Stick-Fast "

Made instantly with cold water.



For **all purposes** where Paste is used.

A Great Seller.

Order some to-day—phone your Wholesaler.

Manufactured only by

STUART & FOSTER Ltd.
TORONTO, CANADA

Chamois Skins

With a few exceptions

we have in stock a limited quantity of all sizes from 8 x 10 to 28 x 30.

EVANS & COMPANY, Limited
Coristine Bldg. **Montreal, Canada**

We represent two of the largest factories in the world.

Prompt Service

The C.C.M. factory is now in a position to promptly meet almost any demand that may be made upon it.

When nearly eight hundred extra were wanted quickly in Toronto on the outbreak of the street car strike, they were delivered the same day as ordered.

Orders for Accessories are also being filled promptly. Practically all orders are now filled same day as received.

For prices, catalogues, agency terms, etc., write either Head Office or nearest Branch.

Convenience Makes Quick Sales

The new Bread Box No. 02 is especially designed to fill the need for small apartments, flats and bungalows. Where home space is limited and cupboards small, this compact box, two-thirds the regular height, fits between standard shelving.

Japanned in French Grey: neatly labeled and striped. The real demand for these, coupled with our constant advertising, assures your sales.

With protected hinge, a feature in all our Bread and Cake Boxes.

Our Canadian soldiers made Canada famous by winning great victories in Flanders. The Canadian Arrow Head Vanadium Steel Saws are making Canada famous, by winning the battle of popularity throughout the world.

ARROW HEAD SAWS

Write for Catalogue
T. F. SHURLY CO., LTD.
St. Catharines, Ont.

Our "Wanted" page is the place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

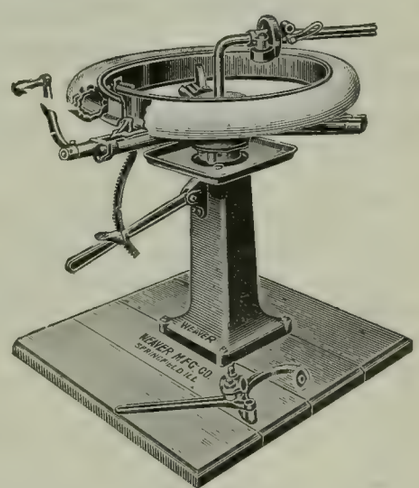
WEAVER GARAGE AND SHOP EQUIPMENT



The requirements of the garage and repair shop have been carefully studied and diagnosed by the manufacturers of this line with the result that the various difficulties and contingencies that arise in the handling and repairing of automobiles can now be disposed of

Quickly and Economically

and with a minimum of labor.

Each device in this very complete line is an article of real merit and a practical necessity to the garage or repair man.

Ask for a copy of the WEAVER BOOKLET and also a copy of our 1919 ACCESSORY CATALOGUE.

GREAT WEST ELECTRIC CO., LTD.

WINNIPEG

Distributors of LACO TUNGSTEN and NITRO LAMPS.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

Advertising

Advertising is the education of the public as to who you are, where you are, and what you have to offer in the way of skill, talent or commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service." — Elbert Hubbard.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings as is gladly undertaken, but does not become part of any advertising contract.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

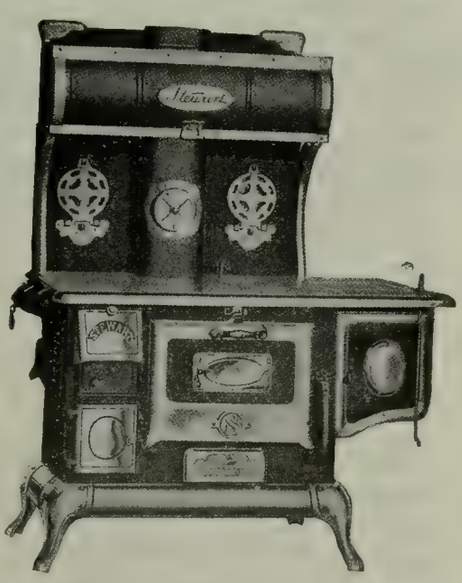
The Largest Wholesale Hardware Dealers in Canada

THREE LEADING RANGES

THE DIAMOND "A" MALLEABLE, SUPERB AND THE HOME PRIDE

Diamond "A" Malleable

Diamond "A" Malleable



The Diamond "A" Malleable Range has a Steel Body, the Oven has Malleable Angle Iron Frame Front and Back. Braced Full Length. Nickel Parts Double Plated on Copper Base.

Coal and Wood Grate

Malleable Three-Panel Top, Highly Polished. Front Panel Hinged. Firebox Linings Extra Heavy. Reservoir—Cold Rolled Copper, Tinned Inside. Thermometer in oven door.

We know the Range is Right.

We Fully Guarantee The Diamond "A" Malleable Steel Range

Superb

Superb

The Superb Range is a new, attractive model which is a valuable addition to the Stewart Line. With its wide range of sizes, square ovens, full nickel trimmings and up-to-date plain design, it fills the demand for an attractive well-built range.

The Home Pride

The Home Pride Range possesses many good features which will appeal to the housewife. They are quick and perfect bakers and use a surprisingly small amount of fuel. All materials are the best, and they offer the greatest value for a modern-priced range.

The Home Pride

Ford Car Parts

There are no Substitutes for Dairy Foods

You can't have a Speedometer on your arm

Even if you could, it would not make you turn at a certain speed every time you used a separator. Own a separator that you do not have to coddle by turning at a fixed speed or by using speedometers and other contraptions. Do the sensible, practical thing and buy a Sharples.

American ingenuity has perfected a principle in the Sharples that enables you to turn the handle fast, slow or "as you like it." You can loaf along, or speed it up—and you do not lose a cent's worth of butterfat nor change the thickness of your cream. From a straight, money-making standpoint alone, the Sharples is the only separator you can **afford** to buy.

AFTER READING THIS SHARPLES AD--- PUT YOURSELF IN THE FARMERS' PLACE

Would you buy a separator that was as contrary as a fixed feed separator—that had to be coddled? Or would you do what thrifty farmers **have done**—invest in the Sharples Suction-Feed that "Skims Clean At Any Speed?" Why not apply the same logic to the line of Separators you handle—and follow the line of least resistance—with the Sharples. Not all dealers can qualify for a Sharples Contract, but correspondence is invited from progressive dealers. Address nearest office.

From Railroads To Roofs

Armco Iron is a universal sheet metal. Its pure iron base insures rust-resistance whether it is made into high grade polished sheets for passenger locomotive jackets or just plain galvanized sheets for the gutters and down spouts of the modest homes.

Always -- it gives the greatest service for the cost because of its purity, evenness: rust-resistance and long economical dependable usefulness.

The American Rolling Mill Company
MIDDLETOWN, OHIO

The trademark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mil Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Buy "BON-TON" Cream

Canada's National Metal Polish
Has no superior.
Polishes in **half the time** with less labor.
Retains its brilliancy.
Contains **no acid** or injurious chemicals.
Order a case **to-day** from your wholesaler.

Manufactured only by
Stuart & Foster, Limited
Toronto, Can.

Trade with Gt. Britain

Extract from the "Times," London, May 2nd, of cable sent to Ottawa by Canadian Mission:

"Canadian manufacturers should realize the advantage of having representatives in England, they should not overlook the British market, where a great variety of commodities is needed, and the market is favorably open and worthy of individual effort."

The Opportunity Now Before You.

An influential British firm is prepared to represent up-to-date manufacturers of Kitchen Utensils and Household Woodenware, etc., on commission basis or would purchase for own account. Space is available at the **British Trade Exhibition.** Enterprising manufacturers should not delay in communicating with Sidney S. Freeman, c/o Messrs. Snows, Ltd., 17 Battery Place, New York City.

RAZOR PASTE

Every man appreciates a good cutting edge on a razor.

Sell your customers **King Cutter Razor Paste.** They will be more than satisfied. Our display stand creates sales. Write for it.

IF YOU CONVINCE

a prospective buyer that she should have a washing machine and wringer—one point is settled.

To satisfy her and uphold the reputation of your store you must supply absolutely dependable goods.

The first point is up to you—the second up to the manufacturer.

So choose a line that is favorably established.

Such a line is made by Dowswell, Lees & Co., Ltd. The name has a real sales value—because for thirty years it has represented the best in washing machines and wringers.

Arrow Brand Wringers.

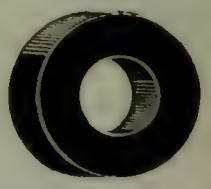
FORSTNER BITS

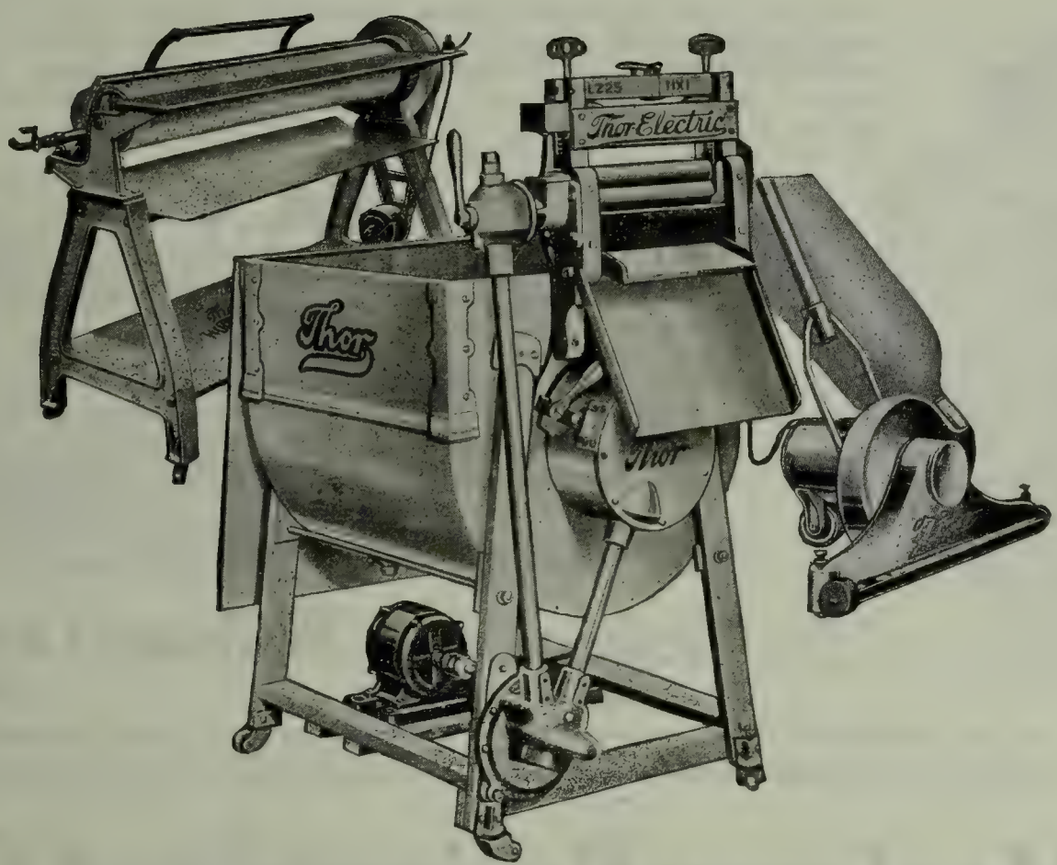


bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

THE BEST H. P. VALVE DISC

in the markets of the world. 100 per cent. efficient. Stands the strain of high pressure steam and superheat.

STRONG'S I. O. P. Valve Discs



give years of service under the most exacting conditions. Demonstrated in hundreds of thousands of valves and in the country's greatest industrial plants.

Test them yourself. Sample disc free.

Thor

Sell the Machine You Know is Right

Combine Profit and Customer Good-Will

The field before Thor distributors this year is an important one.

The factory behind Thor distributors is an equally important consideration.

The reliable service that centres in the Hurley sales plan is the third factor that sells the three Thor specialties—

Better look into this—Ask for the Thor selling plan now.

THE HURLEY MACHINE CO., Limited

NEW YORK TORONTO CHICAGO

Here's a Dependable Electric Washer That Sells at a Popular Price

There is a big, responsive market in Canada to-day for a dependable electric washer that sells at a nominal price. It will not be long before an electric washer will be found in every enterprising home. As yet the demand has only got nicely started. RIGHT NOW is the time for dealers to get in.

The "AJAX" ELECTRIC WASHER

is an easy washer to sell because it is both highly efficient and moderately priced. **It is the best washer in its class on the market to-day.** It is strongly built in every part so that it will stand up for years under the heaviest kind of work. Once it is installed there are no complaints or "come-backs" from customers. In fact, every "AJAX" Washer is fully guaranteed by us, so that you take no risk in selling it. And we help you get customers by supplying you with attractive advertising literature.

Let us send you complete information about the "AJAX," and the handsome profit you can make in your own territory selling it.

Makers of Dependable Electrical Appliances

McDonald & Willson, Limited

347 Yonge Street **TORONTO**

If the "Ajax" Vacuum Cleaner is not represented in your territory, write for our Dealer's proposition.

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 15 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING of Can. (Est. 1910)
CANADIAN MOTOR, TRACTOR AND IMPLEMENT TRADE JOURNAL (Est. 1919)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 150-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

The "1900" Cataract Electric Washer

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

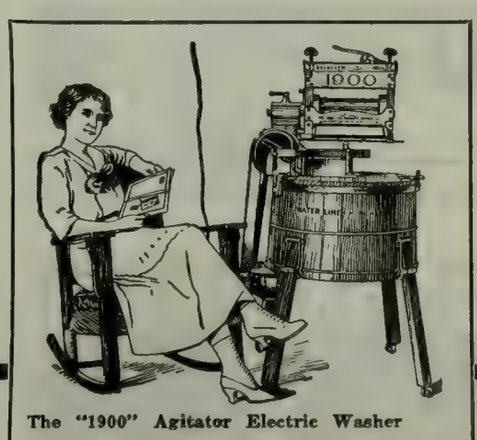
It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

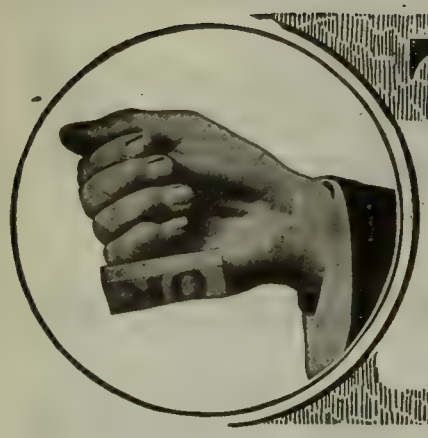
With the addition of our two newest and greatest models, the "1900" line is complete.

The "1900" Cataract Electric Washer



These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers — are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900"' dealers as have proven their worth in their different territories.

The "1900" Agitator Electric Washer



If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the wholesale department.

Use this page—the page that is never overlooked—from time to time to put efficiency in your service, and watch it for opportunities.

Everything is classified under appropriate headings, so that you can, at a glance, find what you are looking for. Quite often the want ad page is consulted as a guide to conditions.

Anything used or of interest to the Hardware and Metal trade can be located by an advertisement on this page. HARDWARE AND METAL reaches thousands of the best hardware men in the Dominion—the kind you want to speak to.

The cost of this service to you is very small—2 cents per word first insertion, and 1 cent per word for each subsequent insertion of the same advertisement. If you do not wish your name to appear in the ad we have a Box system whereby everything is strictly confidential, for which we charge 5 cents per insertion extra.

Kindly enclose remittance with ad so as to save unnecessary bookkeeping, etc.

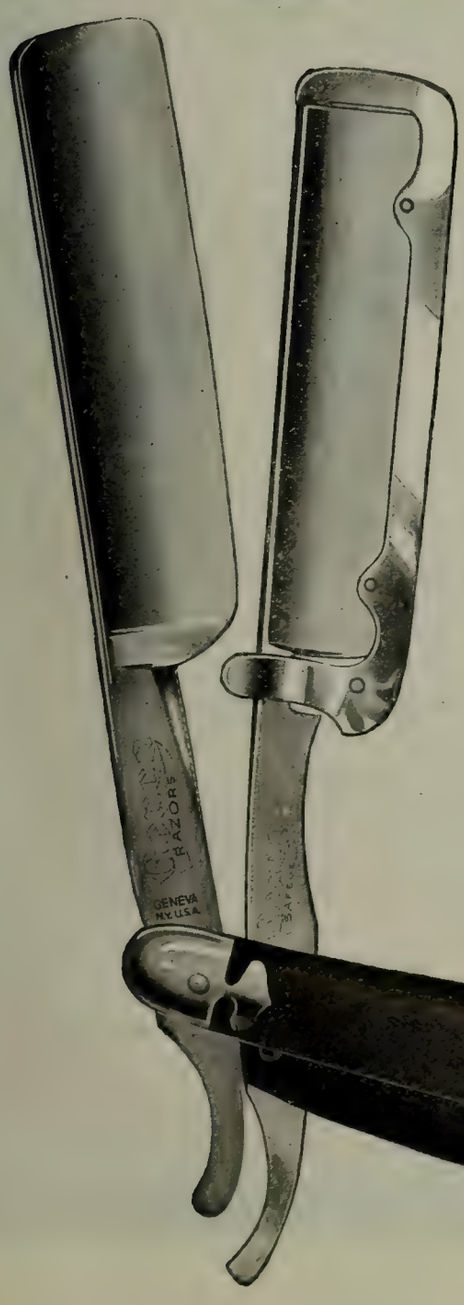
THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

1969

When you sell a customer a GENCO Razor, you sell him a razor he *can* still shave with 50 years from now.

You sell him a razor he can strop. It has a professional blade of the type every barber uses. Its broad back, concave grinding and slight bevel just behind the edge make it meet the strop at the scientifically correct angle to get back the famous GENCO edge as often as necessary. And this with as few strokes as a barber uses on his pet razor.

Tell men these facts. Have our handsome GENCO Display Cabinet on your cutlery counter to interest more men in razors. It can be had free with your first order.



That Cabinet and these facts lead to quick sales, good round profits and satisfied customers, because "GENCO Razors must make good or we will."

Dip Your Hands Into Our Treasure Chest of Advertising Material

THE various advertising features supplied by us to all B-H agents are such valuable aids to paint selling as to constitute a veritable treasure chest for the dealer who avails himself of the opportunity which our line of Paints and Varnishes affords.

Included in this treasure chest are such valuable advertising features as the Annual Spring Mailing Folder which we send to a list of your customers; color cards that are new and very attractive; window cut-outs that are bound to attract attention; newspaper advertisements of the highest character; posters so good that they invariably become the talk of the town in which they are posted.

All this backing is supplied to our agents without cost.

But the strongest feature of the B-H proposition is the manner in which the product backs up all that is said about it in the advertising. Those who know B-H Paints and Varnishes as a result of having used them are aware that our products have superior spreading qualities, finest of finish and greatest durability.

"Save the surface and
you save all" *Paint & Varnish*

For full particulars of the B-H proposition, write

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

"A Satisfied Customer is the Merchant's Best Advertisement."

THAT was the belief on which Timothy Eaton, Marshall Field and W. J. Wanamaker founded their business careers. They insisted that the customer must be satisfied.

Personal investigation—to find out whether the goods have merit and give satisfaction—is time well spent by the dealer. We urge all merchants to investigate O-Cedar Products—those who do so will never offer a customer a substitute for O-Cedar Polish or the O-Cedar Polish Mop. They will find that while there are various oils that make pretension to merit, there is only one polish good enough to offer with certainy of satisfying the customer—only one O-Cedar Polish.

Since it depends for its sale largely upon "repeat" business, there is a certain indication of the satisfaction it gives shown by the ever-increasing factory output.

We make known the merits of O-Cedar Products through advertising. The margin is fair and the prices are maintained.

We are always willing to co-operate—may we have your co-operation, with a view to increasing your O-Cedar sales?

THE CHANNELL CHEMICAL COMPANY, LIMITED

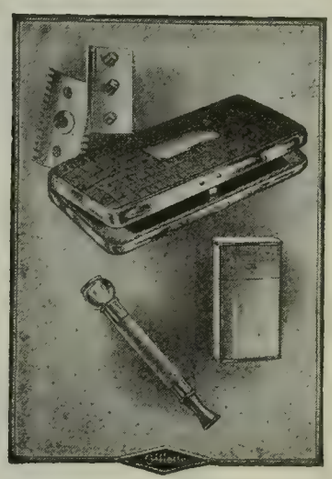
O-Cedar Polish



HARDWARE AND METAL, July 26th, 1919. Volume XXXI., No. 30. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

The "Safety" is fast making the barber an unnecessary luxury

There was the time when the man who did not go to the barber for his semi-weekly shave was considered very much out of it.

To-day there's a change. The man who must go to the barber to be shaved is pitied. This is all brought about by the "Safety" Razor.
It has popularized the "daily" shave and raised the standard of men's toilet.

Are You Selling All the Safety Razors You Can?

Are You Selling the "Gillette?"
Are You Pushing "Auto Strop?"
How About the "Gem?"

We carry a most complete range of

"Gillette" Safety Razors

Every style to meet the demand of male Canada. If it's the standard style, we have it. We can supply the Khaki Set or the real Xmas gift type. In fact, we carry everything in Gillettes.

THE "AUTO STROP"

is more popular to-day than ever before. No display case of razors is complete without it. It is sold on a money-back guarantee. Sold on thirty-day trial.

THE "GEM DAMASKEENE"

This is a popular-priced line which is most efficient in operation. Gives real service. In many sections the "Gem" is a very big seller. Write for prices.

THE "TWINPLEX"
Razor Blade Sharpener

Makes a good shave possible every time. Extends the life of a Gillette blade from days to months. A money-saver for the user. The "Twinplex" makes daily shaving a real pleasure. Sharpens all sides at one turning. Write for prices.

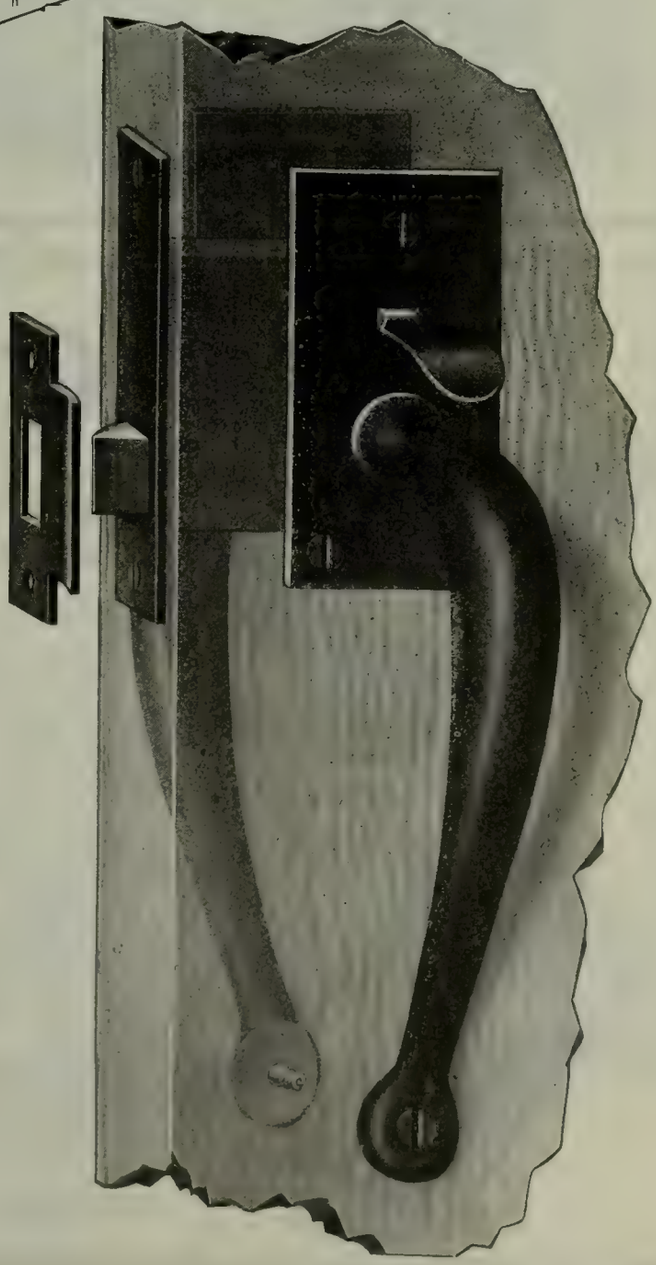
The Aristocrat of Garage Door Latches

The long, graceful lines of the handles, one on either side of the door, suggest the higher grade door locks. It is fittings such as these that in the aggregate give the garage that intangible quality-appearance.



It's not all appearance, however. This National Latch (No. 27) has no complicated parts to get out of order. The mechanism is simple and does the work easily and effectively.

Reversible for right or left-hand doors. Adjustable for thickness of doors 1⅛ inch to 2¼.

Finished regularly as follows: Japan, Dead Black Japan, Sherardized and Dead Black Japan; Sherardized and Plated any finish.

Packed **the National Way**; one complete latch with screws in a neat, strong box. One dozen in a case. Weight 36 pounds per dozen.

These latches are sold the instant you unwrap them. Not only do they sell, but like all National goods, they are profitable and satisfactory.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

MILLERS FALLS TOOLS

Over Seventy Years' Experience

The dealer with a complete stock of McClary's many lines has no fear of consumer censorship.

To-day McClary's stand in the vanguard of cooking and heating appliance and kitchen utensil manufacturers in the British Empire. This position of pre-eminence has been won through over seventy years' of fair dealing with the public.

"McClary's must be the best we can produce" has been the ideal that has governed this institution's operation and spelled its prosperity through the past three-score years and ten.

The public has learned that in every one of McClary's lines of ranges and utensils this principle has been carried out. McClary's lines always were, and always will be the best that can be produced.

Any dealer can recommend the largest McClary's range with the same feeling of confidence as he can recommend the smallest McClary's sauce-pan. The reliability and dependability that your trade demands is there.

Get in touch with our nearest branch. Write for our booklets and catalogues.

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

There are other "Taylor-Forbes" Lawnmowers besides the little old "Woodyatt"

"EMPRESS" LAWNMOWER

The "Woodyatt" enjoys popular fame. It stands among lawnmowers where the Ford stands among automobiles.

But if you were in the automobile business and you sold only Ford cars you would miss the custom of the man who wanted a limousine.

And you will be missing a lot of lawnmower business unless you have the "Empress" or the "Adanac" to show the man who has an idea "he will go something better."

Ball bearing lawnmowers—they sell just as readily and mean more on the turnover.

WILT
HIGH SPEED AND CARBON TWIST DRILLS

Introducing

Williams' "Agrippa" Turning-Tool Holders Set Screw Pattern

TO provide increased and abundant variety of selection in Williams' "Agrippa" line of Tool Holders, we offer this Set Screw pattern of Turning-tools primarily for those who use Cutters made of steel which has been hammered or rolled with greater variation in size than is common to usual mill practice. But for the majority of users who purchase Cutters of accurate size, we recommend the original "Agrippa" Turning-tool of Cam Pattern as being stronger, more reliable and more generally satisfactory than any other method of Cutter-fastening. Both patterns are illustrated above.

The Screws, made of a fine grade of Alloy Steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong and give the maximum efficiency obtainable from this extra type of Cutter-fastening.

Right and Left Hand Offset and Straight Shanks in stock at same prices as Cam Pattern of corresponding size.

Our Machinists' Tools Booklet will be sent on request.

Your Customers Will Decide

YOU need only show our twines to your customers. Let them be the judge.

Let them compare our four brands with any others on the market.

They will buy

BRANTFORD BINDER TWINE

Because--

1—Our twines have the length. Our brands are 650 feet, 600 feet, 550 feet and 500 feet respectively. The length is guaranteed. Your customers know what this means.

2—They are of the highest quality—the firmest, strongest, most uniform twines made. They have no thick or thin places, no fuzzy, bunchy knots.

3—They are made from the longest, cleanest fibres obtainable.

4—They are submitted to a special preserving treatment to make them insect-proof. They keep perfectly from year to year.

5—They are strictly Canadian-made goods, unprotected by any tariff.

These are the selling points of Brantford Binder Twines.

Our great national advertising campaign makes your customers acquainted with these facts.

The Big 6-in-1 Tool

That Thousands will Buy---

The Stewart "Handy-Worker"

The pictures tell the story of the Handy-Worker itself. But they give only a hint of its multitude of uses—

On every Farm and Ranch
In every Private Garage
In every small repair shop
In thousands of Home Workshops
In countless other places.

So many need the Handy-Worker RIGHT NOW that you should order a stock and make a "Drive" on them both in town and among farmers.

The fine profit on each sale makes this "Big 6-in-1 Tool" worth pushing.

And the splendid **performance** of the Tool **wherever** it is sold makes each sale a "nest-egg" for several more.

Retail price $27.00, with a handsome margin for dealers.

Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner

PEERLESS POULTRY FENCE

The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

The Secret of the Strikes

Most Canadians are asking "What is the cause of the 'Great Unrest' "? Is it the fault of labor—or of capital?—or is it the result of German propaganda? Do you know of the real reason for the labor disturbances in Canada, and elsewhere? Are YOU thoroughly familiar with the ins-and-outs of the plans which threaten a world-wide "tie-up?" This is something that should be understood by every Canadian. And every Canadian should read "The Secret of the Strikes," by Lieut.-Colonel J. B. Maclean in the August issue of MacLean's Magazine. It is brimful of startling and authoritative information regarding this great problem. Read it carefully. It starts on page 33, August MacLean's.

"The Lecturer At Large"

Stephen Leacock is one of the continent's greatest humorists. "The Lecturer at Large" is one of the best humorous sketches that he has written. It is made up of what he terms "a few painful reminiscences of the platform" in the course of his lecturing up and down Canada. Get your family around you and read the sketch aloud—it's a rare treat.

Other Big Features

"A Party in the Making." By J. K. Munro. Illustrated by William Casey. An article on the political situation, giving a great deal of inside information with reference to recent developments at Ottawa.

"Solving the Problem of the Arctic." By Vilhjalmur Stefansson. The fifth instalment of his story of the five years' explorations that he conducted for the Dominion of Canada.

"The Unspoiled Country." By Harold C. Lowrey. A descriptive article of a part of Canada which is little known to Canadians generally, Temagami.

"Petite Simunde." By Arthur Beverley Baxter. Illustrated by E. J. Dinsmore. A charming romance of the war. The author will be remembered favorably for his "Mr. Craighouse of New York, Satirist."

"The Seven Blue Doves." By W. A. Fraser. Illustrated by Charles L. Wrenn. The fifth of the Bulldog Carney series and in some respects the best. It is a mystery story.

"His Majesty's Well-Beloved." By Baroness Orczy. Illustrated by C. F. Peters. The second instalment of this splendid romantic novel of the colorful era of Charles II.

"Use Ball Bearing Butts for Permanence"

STANLEY

FEATURES

BALL BEARINGS. The wearing surfaces of Stanley Ball Bearing Butts do not grind together when the door swings—they roll over their bearings easily and quietly.

Between the joints of these butts are ball bearings set in raceways of case hardened steel. Due to the downward pressure of the weight of the door, each raceway moves or remains stationary with the joint next to it. This shifts the wear and friction upon the bearings, which means that both are reduced to the mechanical minimum. Each bearing is tested to carry a weight of one-half ton.

Ball Bearings are only one of the many features which have been built into Stanley Ball Bearing Butts in our effort to make them the very best butts you can offer your customers.

Go-Getter Methods Sell Phonographs

Western Merchant Attributes Large Measure of Success in Handling Phonographs to the Fact That He Delivers Machines to Farmers' Doors — Developing Large Sale of Stoves by Similar Methods—Canvassing Farmers For Business bringing Results — How This Trade is Handled by W. E. N. King, Neepawa, Man.

General View of the W. E. N. King Store at Neepawa, Man. Inset is the "Go-Getter" Proprietor.

MANY hardware merchants throughout the country are taking on phonographs as a side line, but the case of W. E. N. King, one of the leading dealers of Neepawa, Man.. is vastly different from the rest. It affords a striking illustration of the success that awaits the man who goes out after business. A two-seated flivver with a square platform built over its rear wheels has a prominent place in the story, for, with a load of four cabinet phonographs, Mr. King sallies out into the country every day or so, and seldom comes back with any of them. Instead of waiting for the customer to come to him he goes out after business and produces results by the sheer force of salesmanship. In like manner he sells ranges, and claims to have outsold any merchant outside of Winnipeg in his particular line last year. Orders for gasoline, oils, drive belts and other goods are taken in a similar manner.

"Go-Getter" King

Mr. King has built up a reputation as a "go-getter" that is the talk of the surrounding towns. Despite all the difficulties of present-day trade, his business is hopping along. He is always several jumps ahead of the mail-order houses. In the meantime competent clerks keep the regular store business running.

When the representative of HARDWARE AND METAL went over to see Mr. King he came in contact with his aggressive methods as soon as he came in sight of the store windows. They were artistically dressed with seasonable spring merchandise, attractive display cards being used to good advantage.

Wide Range of Goods

The interior of the spacious, well-stocked store presented an unusual sight for the whole of the centre floor was taken up with an orderly array of goods that included bicycles, gasoline engines, steel ranges, pianos, cabinets, gramaphones, some enamelled beds, together with the usual run of shelf hardware. Back of one of the counters prominently displayed was an elaborate assortment of gramaphone disc records, of which the store boasts the greatest stock in the province outside of Winnipeg.

Vigorous Type

Mr. King is the vigorous type of Westerner, stockily built, with clear, fresh complexion and a mouth and chin that are the embodiment of determination. Sitting in his little back office he unfolded a story of methods that have made his business a remarkable success in the seven years he has been located in Neepawa.

How Idea Originated

"I first got the idea of going out after business about three years ago," he said, "when I found it expedient to go out into the country to sell oil to busy farmers who were using tractors. Out of this experience grew my plans for an outdoor selling campaign which would embrace ranges, pianos, gramaphones, safes and other articles. I have never been able to get a man who could handle this outside business but have had no difficulty in securing efficient men to take the orders of those who come to the store to buy. I find that the only way I can meet mail-order competition is to go direct to the farmer and get his order before he sends it away. We do not wait for people to come to us..

The Tip and Straight Canvass

"I have two methods of going after outside business. One of these is to take advantage of every tip we can get of where goods can be placed, and the other is by literally going out and taking the business by the throat, that is to say, by a straight canvass.

Getting Action

"In the former case I find that quick action is essential. As a case in point, on the Saturday just before last Christmas a farmer came in to my store to buy a few articles, and I noticed him examining the cabinet gramaphones. I did not press him to buy, but asked him

if he was thinking of making a purchase.

" 'You know me,' he said. 'My name is ———, I live out by Arden. If you are out that way sometime I will look at your machine.'

"On the following Monday morning," Mr. King stated, "I was out at this house about breakfast time, and I had driven eleven miles. The farmer helped me to carry in the machine and did not seem surprised at my visit. I made a sale, and also disposed of thirty records. When I had made out a lien note payable after threshing, the farmer surprised me by making a heavy cash payment on account.

"I enquired about his brother who lived across the road. "No use to see him,' he said, 'the last thing he would look at is a gramaphone. I was thinking of passing up the brother, but the gate was open, and I drove in. He came outside the door as the team drew up.

"I'm Santa Claus," I said, "help me in with this machine, I want you to hear it. He helped me in and we placed the machine in the cosy big kitchen. In five minutes they were all laughing with Harry Lauder, and after we had heard a few more snappy records I noticed the farmer's wife begin to divide the records into two piles. I knew right then that I had made a sale, and so I had. After that I sold another brother a machine, taking part payment in cash, and all told brought home an empty sleigh and $450 in cash. That evening after supper I went out and sold a piano.

Prompt Service Pays

"Speaking of speedy action. I might also say that I find that prompt service pays in all branches of my business. In the fall for instance when a farmer is threshing and telephones in from say 25 miles to know whether he can get a drive belt, I tell him to go right ahead with his work and I will bring it out to him.

Big Credit Business

"But to revert to gramaphones." Mr. King continued, "I do my heaviest canvassing business during the winter months, when I often drive 20 or 30 miles a day. I run up against the same hard obstacles that all salesmen encounter, as for instance an unreceptive coldness at first, followed later by indecision, but my offer of long term credit usually wins out. I do a large credit business, have done so for several years, and I find it pays me well. I would not go back to the cash business so long as I am making my present success under the credit system. Just yesterday I went out and placed a machine. At first they demurred and said they did not want it, but they finally allowed me to leave the machine there until I called for it. I will go back to-morrow. They will tell me that they cannot buy the machine because they cannot pay for it. They will likely tell me to come back in October. My answer will be that in order to make a sale I will let them purchase the machine on fall terms. I will tell them that I will be crowded with business in October, and that they might just as well have the use of the machine as having it stored in my warehouse. I will make a sale.

View of the store front of W. E. N. King's establishment at Neepawa, Man. Mr. King is a consistent canvasser for business, and the story of his success as a result of "go-getter" methods is told in the accompanying article.

Sells Stoves and Safes

"I have had unusual success with ranges and small safes, which are being purchased by farmers. I carry them out to the country on the back of my runabout, and scarcely ever bring them back. Often when I am at the farmer's homes I receive unexpected orders for hardware supplies. I learn that the farmer contemplates building a new house or barn the following year, and I am, therefore, constantly getting new prospects as well as making friends. It pays me well. I remember when the influenza epidemic was at its height, and business was shot to pieces in this town I maintained my regular average sales by my outdoor selling methods. During the epidemic last January I drove in the country twelve days, averaging two sales a day of articles selling over $100.

"Last year we sold over 100 cabinet gramaphones, together with thousands of records. So far this year we have put out 45 machines and 2,000 records."

Systematic Saving

Mr. King gives a large share of the credit for his success to his wife, who in the days of their early struggles patiently endured forced economy until they could get their start. Back in 1905 when he was working as a tinsmith in Brandon, they put a stipulated amount of money in the bank every pay day until they had saved $1,500, when they went into partnership in the hardware business at Wawota, with a former school teacher of Mr. King, who put up a similar amount. Later he purchased a business at Gainsboro, Sask., on his own account, at 90c on the dollar, and on which he cleaned up $6,000 in 16 months. Two months after he sold out the Gainsboro store he purchased his present business at Neepawa, giving as part payment the notes from the Gainsboro business. He was only in business in Neepawa two months when the man to whom he had sold out at Gainsboro failed, and he was obliged to meet the payments out of the Neepawa business, losing $4,000, from which severe blow he was only able to recover by his aggressiveness and fighting spirit.

"In the course of my business experience I have tried many side lines," said Mr. King. "I did not have much success with some of these, as they took me too much away from my legitimate work, and there were too many second hand deals. When I took over the Neepawa business I had a stock valued at $6,000, it now runs close to $25,000. I am a believer in the tithe system and give 10 per cent. of my profits to the church and to charity. I always pay spot cash for my goods and always did from the first day I went into business. If I did not have the money I went to the bank. In buying goods I buy as close as possible and look for the big discounts."

GREAT EXPANSION IN AUTO BUSINESS

The Financial Post says:

"Among industrial developments of the day, which are a direct outcome of the extension of imperial preferential tariffs, none are of more importance than those connected with the automobile industry. The preference has been the means of bringing to Canada several of the largest automobile and truck manufacturers, already they are building their huge new Canadian factories, partly to take care of existing Canadian business, but chiefly to supply the export trade they are developing in other parts of the British Empire.

"Thus Canada suddenly finds herself an important centre for the manufacture of cars for the whole world. It means that Canada must also become a tire producing country on a big scale—for those thousands of new cars to be made here must be fitted with tires of Canadian make, the Canadian tariff effectually prevents the importing of them from the U. S. in any considerable quantity.

"The tire business of Canada has a future certainly as great as that of the motor car industry of the Dominion. No one can foretell what heights of production and profit may be reached. The only certain thing about the rubber business seems to be the fact that for many years to come, it must have an expanding market."

Roofing Prices Likely to Advance

Prices of Raw Materials Have Been Climbing Steadily and Manufacturers Expect to Have to Revise Their Quotations—Outlook for Business Was Never Better—Manufacturers' Views on the General Situation.

THERE is every indication that prices of roofing materials will be advanced shortly. The situation at present centres around quotations on raw materials, and as these have been soaring and show no indications of coming down, manufacturers state that there is little doubt that prices of the finished product are due for a rise.

They state that the business outlook was never better. In addition to the large volume of business that is being handled at home as a result of the building activity all over the country, a very satisfactory export trade is being handled. This is likely to increase as reconstruction in various parts of Europe progress. Reports from England state that enormous quantities of materials will be required there.

Lots of Business

"If present conditions are a barometer of the future, the only trouble the roofing manufacturers will have in Canada is producing enough material to supply the demand," said C. S. Jackson, general manager of the Canadian Roofing Mfg. Co., Limited, of Windsor, Ont., to HARDWARE AND METAL. "Domestic business is exceptionally good, and enormous quantities of roofing are being shipped by the Canadian manufacturers to Europe.

"As to prices, I would have no hesitancy in saying that they will advance in the next few weeks, and unless there is some change in the raw material market, they will continue to advance for the balance of the year. The possibilities of any decline are so remote that they are not worth mentioning.

Americans Cut Prices

"It may be of interest to you to have an outline of what has happened in the roofing business since the first of the year," Mr. Jackson continued. "January and February were exceptionally poor months, not only for Canadian companies, but American companies as well, and the American companies finding themselves facing a very depressing period very foolishly started a price-cutting campaign in order to stimulate trade. This was an absolute failure and resulted in practically the entire industry, including the producers of dry felt, having to shoulder a loss, which only months of prosperity can overcome. During this period the Canadian producers of dry felt refused absolutely to reduce their prices, and I might say they were quite right in doing so. This, you no doubt can appreciate, prevented the roofing companies from reducing their prices, and, therefore, their advances from now on will not be as keenly felt by the trade as they would have been had the Canadian companies cut prices in the same manner as the American companies.

Has a Bad Effect

"During business depressions in the United States," Mr. Jackson said, "the American companies take the opportunity to dump into Canada a great quantity of cheap, low quality roofing, which has a very bad effect on the Canadian trade. Please do not misunderstand me in this statement as I do not wish to leave the impression that American companies do not produce high quality materials, for this is not the case; they do, in addition to their high qualities produce lower grades than are required by the Canadian trade, and as these lines of roofing are very unsatisfactory, and do a great harm to the roofing business, it has been the desire of Canadian companies to prevent Canadian trade from handling such lines. Canada has always consumed a better class of roofing than the United States.

No Second Grades

"To more fully explain the statement made above, I would say that the Canadian companies produce one grade of asphalt shingles and surfaced roofing, and have never gone into second grades of this material as they are practically worthless. It was, therefore, a great disappointment to the Canadian manufacturers to find that Canadian distributors of roofing materials had, during the spring, brought in and sold in Canada second, and even third grades, of these materials, owing to the fact that they were very low priced. This condition also applied to the regular roll roofing business, and several American manufacturers who produce a number of lines of roofing sold and shipped into Canada many cars of material, which will have the effect of discrediting the better grades. I say this because the impression is general that 'roofing is roofing,' and there never was an idea so utterly ridiculous as that one. Anyone familiar with the manufacture of roofing knows that the cheapest and most economical roofing is the best grade.

Conditions Changed

"I am very glad to say that conditions have changed considerably in the United States, and the roofing manufacturers are beginning to get a great volume of domestic business, and therefore, will not be so anxious to dump their overflow into Canada during the balance of the year, and if the Canadian buyers could only be shown what a great mistake they have made during the past few months, I do not believe there will be a recurrence of this thing.

"Dry felt is the one big factor in determining the price of roofing, and in the United States the price of this article has jumped from $70.00 to over $100.00 per ton during the last thirty days.

"The advance in Canada has not been so great, owing to the fact that there were no reductions earlier in the year, but the price of felt has very sharply advanced this month, and felt manufacturers advise that it will continue to advance for some time to come.

"I learn on good authority that even with foreign rags again coming into the country there is a very grave danger of a shortage, and this, of course, will affect the price of felt."

Outlook Promising

"Never in our experience has the outlook for business been any more promising than now," said Mr. M. Canfield, of Bird & Son, Ltd., Hamilton, Ont., to HARDWARE AND METAL. "The reasons for this confidence are many. It seems but a few years ago the general opinion was that prepared roofing was a material quite satisfactory to use for use on temporary buildings. This condition has gradually changed, due perhaps largely to the persistent publicity and sales efforts of the manufacturers, and to-day prepared roofing is considered as being a material quite satisfactory for use on any kind of construction."

Since the material for this article was secured an advance has been named by some manufacturers in ready-roofing prices amounting to 10c per roll. That this will be general is quite likely and even at new prices it seems doubtful if the peak has been reached. The views of these men are right in line with the trend of to-day's market, and much of value to the trade will be gathered in a careful perusal of the accompanying article.
—EDITOR'S NOTE.

Business Has Developed

The prepared roofing business has developed in a great many ways. The most recent development is that of slate surface roll roofing and slate surface shingles. These materials make very handsome roofs and appeal to the owner of the better class of buildings. Not only because a roof of this kind gives the appearance of a genuine slate roof at a very much less cost, but also because it is fire resisting to the highest degree and is composed of materials that give years of roofing surface. Asphalt shingles are developing very rapidly indeed and we do not hesitate to say that in the near future the majority of residences will be roofed with material of this kind.

The Shingle Situation

"This statement is made," Mr. Canfield went on, "fully realizing all the various types of roofing there are on the market. The more prominent of these is wood shingles, the quality of which is very much inferior to what used to be procured. Shingles will each year be more difficult to obtain, especially those of good quality. The revival of all building throughout Ontario, after a very quiet period during the war, has speeded up the roofing business. As an instance of this we cite the several housing commissions that are taking advantage of the Government grant throughout Canada. A great many of them have already started building operations. Combined with this local demand are the possibilities of export trade and there has already been placed in Canada and the United States large orders for prepared roofing.

Prices are Firm

"The prices are very firm and have every appearance of advancing. The present demand in Canada and the United States for prepared roofing is such that raw materials are becoming scarce and high in price. As one instance I would cite that roofing rags, which are the basis of roofing felt, are today costing on an average of $30 per ton more than the price two months ago. This is only one product of the many that go into the manufacture of roofing and the writer is not aware of any one other product that is declining, and the labor conditions are such that I feel warranted in saying that the manufacturing cost, if anything, will be higher rather than lower.

Go After Business

"The roofing manufacturers work closely with the distributor. In any event such is our sales policy, and the present difficulty that we experience is to impress upon the hardware dealer the great possibilities there are for increasing his business and profits by going after this business. It seems hard, in many instances, for the hardware men to talk shingles, and we will be very sorry if, through lack of energy, the hardware dealer will allow this business to drop to the lumber yard because ready roofing is generally thought of as a hardware product, and now that the opportunity presents itself for shingle business, there is no reason why it should not be handled through the hardware trade.

"Regarding the methods of going after and stimulating trade, I have nothing to say other than that we, as manufacturers of ready roofing, have every facility in the way of advertising matter together with samples, etc., that we are pleased to supply the distributor with, and providing we are favored with a prospect, it is followed very closely from our office or directly by a salesman. Our suggestion to the dealer is that he have a man outside the store working up such prospects. This is the only real way of developing roofing business.

Cost of Living Commissioner Alleges That Combine Advances Prices of Plumbing Supplies

DR. McFALL, the Cost of Living Commissioner at Ottawa, has made recommendations that action be taken to investigate an alleged combine which he states is responsible for advancing prices in all kinds of sanitary and plumbing supplies. In an interview at Ottawa he is reported as saying that "by means of this combine practically all plumbing supplies are forced to go through the hands of jobbers who frequently take as much as 25 per cent. or even higher for themselves, in spite of the fact that the plumbing trade, which is now attempting to free itself from this burden, considers the jobbers to be an unnecessary factor in the trade."

Discussing the situation with HARDWARE AND METAL, Frank R. Maxwell, of Toronto, president of the Dominion Association of Domestic Sanitary and Heating Engineers, declared emphatically that he would welcome such an investigation. In his opinion, he said, there was absolutely no justification for the prices that were being asked to those in the trade. He mentioned as an instance range boilers, which before the war were selling at $3.75 and are now quoted at above $11.

"Take another example," he said, "enamelware. Why the manufacturers had any reason to advance prices recently I cannot see. It is the same with other things the men in the trade require. The installers and the men who work for them are not getting the prices. There is profiteering somewhere, and it should be investigated. I hope the manufacturers may be able to clear themselves and the jobbers too, but I do not see how they can."

Mr. Maxwell stated that the men in the trade would be willing to give the authorities at Ottawa every assistance in probing the situation.

Mr. Maxwell stated that in his opinion there is less production to-day, not only in plumbing supplies but in other goods because of manipulation.

"Why," he asked, "should producers try and produce twice as much as they are producing now when they can sell their present output for as much as they would get for twice as much goods?"

"There are too many profits before commodities reach the retailer," he said. "There are too many profits going to commission houses. The jobbers encourage buying piecemeal instead of buying in bulk because they can charge more by selling that way. They deliver the goods to the job and that costs money. My idea is that all goods except such stuff as baths and heavy goods should be delivered to the shop. This would mean a saving for the master plumber as he would assemble all the materials required and send them to the job instead of having goods arrive at different times as it does now, and workmen who are being paid high wages standing waiting. It does not take long for half an hour to roll around, and if a man and a boy are waiting that long for some material, 75 cents is gone."

Mr. Maxwell stated that he and other men in the trade courted the fullest investigation of their own business.

"I shall be glad," he said, "at any time to have anyone who is interested, come in and look over my books and my shop. The man who is a genuine man and not a shark is not getting what he is entitled to. Any reasonable person will admit that the installer is entitled to a fair profit on his work, and that is all our books will show."

Mr. Maxwell is the representative of the Toronto Society of Domestic Sanitary and Heating Engineers on the Joint Industrial Council of the Toronto Building Trades, and stated that two months ago a communication was sent to Ottawa urging that an investigation be made of all prices of building materials as prices were exorbitant.

James Hardy, asked by HARDWARE AND METAL for a statement regarding the allegations of Dr. McFall, stated that there was no jobbers' association. There had been one, but at a meeting held on November 21, 1916, it was dissolved, and it was decided that its interests would be looked after by an association, of which he is secretary.

Asked if it were correct that two weeks ago the association had its agreement considered by a solicitor and changes made, Mr. Hardy stated that what really occurred was that it came to the notice of the association that certain jobbers were allowing an advantage of ten per cent. to certain men in the trade. This matter was taken up with the legal adviser and it was suggested that this was not the proper thing for the jobbers to do. The jobbers had then been advised that all those in the trade must be placed on an equal footing and no ten per cent. advantage or any advantage allowed.

Plan Your Work, Then Work Your Plan

Consistent Policy of Attractive Advertising, Attractive Window Displays and Attractive Store Arrangement is Behind Steady Growth of Cowan's Colossal Hardware at London, Ont.—Manager Tells of Results Obtained.

Based on an Interview by C. E. Parsons With Thomas Jones, Manager of Cowan's Colossal Hardware at London, Ont.

ATTRACTIVE advertising backed by window displays and a store display that is second to none in its territory is the combination which has produced splendid results for the Cowan Hardware Co., of London, Ont. Few firms in Canada perhaps have featured these three plans in connection with merchandizing more consistently. Cowan's store enjoys an advantage that many business places do not, in that it is almost twice as wide as the average store. This gives the firm the opportunity to have an attractive entrance and two unusually wide show windows. Merely stating that the firm makes the best use of its large windows does not begin to give any idea of their real value in keeping stock turning over.

Get Quick Results

"I think I am safe in saying that no firm inour territory pays more attention to its windows," said manager Thos. Jones to HARDWARE AND METAL. "We have always realized their value and because of this never neglect them. No matter how busy we are the windows are always carefully looked after. We have never failed to get results. We have worked on the plan that it is best to concentrate our efforts on a single seasonable line rather than to fill our windows with a dozen or more lines. For instance we will maybe put in one window containing nothing but tools. In the other window will be perhaps nothing but paints and brushes. We have found that we get the best results by following out this plan. No matter what we are showing prices are always given. This is a rule that is never broken and we have proven time and again that giving prices and giving them in good plain figures is good business. People want to know just how much an article is going to cost. That is the very first thing that comes into their minds when they see the thing in the window or read about it in one of our advertisements. We always tell them.

Start to Move

No matter what we show in the windows there is an immediate and appreciable jump in the sales. We find that the goods start to move as soon as shown. If we have arranged a window of tools there is an immediate call for tools. If it is glassware our glassware turnover starts to increase, and so on. I cannot place too much emphasis on the importance of window displays or speak too highly of the results we have obtained. They are one of the very finest helps we have in stimulating sales.

As stated above Cowan's have always been consistent users of newspaper space. Long ago they learned the value of keeping their store and their stock constantly before the public. In this connection they have found that it pays to have their firm name indelibly impressed in the minds of the buying public, so instead of merely being known as "Cowan's Hardware" their slogan is "Cowan's Colossal Hardware." They have made it a point to try to live up to all that the word colossal implies. Manager Jones says that the name was a happy selection, as in the minds of thousands of people, not only in London, but for twenty or thirty miles around, the firm is known, and the "Colossal" gives people an impression of service quality and a big stock from which to make a selection. One of the endeavors of the company has always been to see that people were never disappointed in the impression they got of the store, its goods or its service.

Doubled Their Space

So much for the advertising value of the firm's slogan. Keeping it constantly

Note the prominent place given to auto accessories and the neat but effective display arrangement. Note also the display table and the silent salesman. All these have not only helped make the store attractive but have increased sales in a most satisfactory manner. This is a view of Cowan's Hardware, London, Ont.

Displays of this kind kept right up at the front of the store and backed by timely advertising have resulted in sales of cutlery and glassware passing the $10,000 *mark each season. Everything is kept spotless and in perfect condition in the Cowan Hardware store at London, Ont.*

before the people though has made it even more valuable and effective. Cowan's were never pikers when it came to advertising but in the past year and a half they have doubled their space.

"We are using twice as much space now," said manager Jones, "as we ever did and we are getting splendid results. We try to keep our advertising copy full of 'pep' and to have a real message that carries something of interest to the people."

As may be seen from the illustration of a Cowan advertisement reproduced on another page the firm aims to brighten up its copy by making free use of cuts. People like to see what they are going to buy and the use of cuts is an inexpensive and thoroughly practical and effective method of giving them a mental view of whatever is offered that they will carry with them right into the store. It will be noticed also that prices are given of everything.

Attractive Arrangement

Special care is taken in laying out the advertisements to keep the arrangement attractive. This has a big value. If you study the methods of some of the best merchants you will find that they aim to keep their stores attractive and work on exactly the same plan with their advertising. In order to get this result the ad must not be loaded down with a whole lot of big, high-sounding words. Thet message that gets across and gets across quickly is that which is told in the simplest language and in the fewest possible words. People like to read this sort of stuff and if the price is given and an illustration the copy has a "pull" that makes it worth a dozen ads loaded down with unnecessary verbiage.

Tries Editorial

Recently the firm has introduced a little novelty into its advertisements in the shape of a newsy little editorial. The stunt, according to manager Jones, is decidedly valuable.

"We have found that the little editorial section we have been running with every advertisement is widely read," said manager Jones. "We have people come in and tell us about them and frequently hear people on the streets or on the cars talking about what was said. I am satisfied that many people have come to look for the editorials. They don't know what we are going to hit next, and they are afraid they miss something. This all helps in keeping our advertising message and our store before them and I think it is working out well. It means some work sometimes to keep the editorials snappy and timely but it is worth the trouble."

Store Arrangement

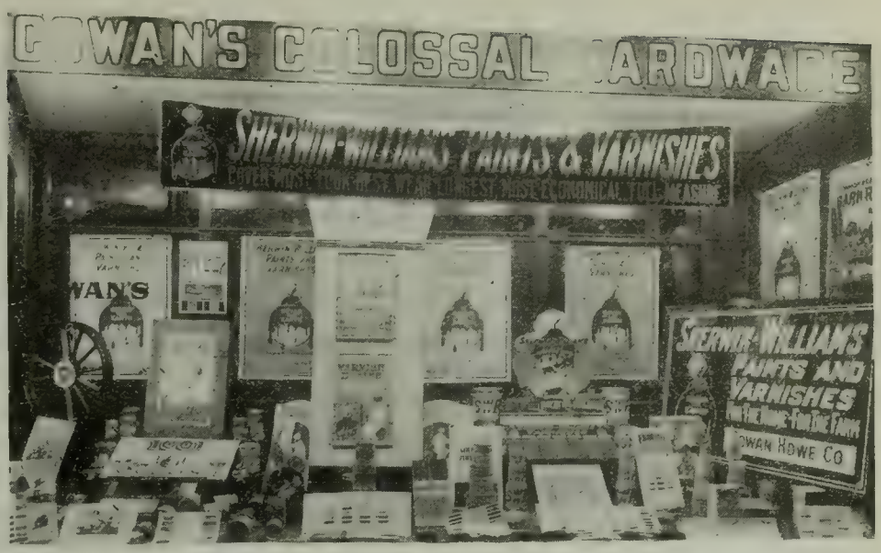
In addition to the wide store, giving the firm the advantage of having two excellent windows, it enables them to make a store display that would not be possible in a narrow store. The large space across the front is used to good purpose and the incoming customer finds himself facing a most attractive showing of merchandise of all kinds. From silent salesmen thousands of dollars worth of cutlery, pocket knives, tools, silverware, cut glass and other lines that attract with all the lure that such articles have when well displayed. All around, but not in disorder, may be seen seasonable lines, kept right up in the front where they cannot help being seen. No matter where the prospective buyer looks he finds himself confronted with stock, stock, stock. Not only stock, but stock that is kept in perfect condition. The cutlery and silverware and cut glass is shining as when it left the factory. If it should happen to be a dull, rainy day the effect is not lost in any way because concealed electric lights in the show cases bring out all the beauty of the goods.

People Like This

It is a well known fact that displaying in bulk has a most distinctive sales value. People like when they go into a store to see lots of goods, and if they are well arranged and kept in good condition the general effect is increased. Such an arrangement puts people in a buying mood. Not only this, it helps them in making a better selection and in doing this helps make them more satisfied. In a great number of cases it also results in their buying things that they never thought of buying when they came into the store.

"Certainly our store display helps us to make any number of sales that we would not make otherwise," said manager Jones. "People get an idea that we have a big stock and that it is a complete stock. Take our pocket cutlery display for instance. I think I can say without any doubt that we sell more pocket knives than any other firm in the district. Our display is a large one

and people talk about it. We know that from the things people tell us when they come in to buy. For instance a man will perhaps come in thirty miles and will tell us that a neighbor told him that he could get some special kind of a knife he wanted at Cowan's if it was to be had anywhere. We can nearly always supply needs of this kind and it gives us a reputation. People talk about us and that is what we want as long as we can keep them talking favorably. That we get results from having a reputation of this kind is shown by the fact that we are now selling more than three thousand knives a year."



Increasing Turnover

The same principle applies to sales of other lines of cutlery, silverware and glassware. One of the big troubles recently has been to get enough of the kinds of cutlery desired to meet the demands.

"Our sales of cutlery have been running over the $10,000 mark," said manager Jones, "and we have turned over about the same amount of silverware and glassware. One of the big seasons, of course, is at Christmas. During the past six weeks we have had splendid sales owing to the great number of summer weddings. We keep these lines moving, though, more or less all the year round, and it is a very satisfactory trade."

Auto Accessories

Just behind these goods and well up to the front of the store on the left is a display of auto accessories. Manager Jones states that this line has been showing rapid development and that each season sees a splendid increase in the amount of goods handled. In addition to the display downstairs on the main floor there is another section upstairs on the second floor and also a special department in which upholstering and repairs are looked afte. In going after the auto accessory trade the Cowan Co. adopts the same policy as is used in other lines. They are not afraid to let the people for miles around London knew that they can get auto accessories at the Colossal Hardware. Sometimes special auto accessory advertisements are run. At other times a section of the regular advertisement will be given over to this line. The advertisements are always well illustrated and the prices given.

This window display proved a retail business-getter and backed up by special advertising was a factor in making the Cowan Hardware Company's paint sales among the best it has ever had. Note the free use made of manufacturers' helps.

Do a Big Farm Trade

Through their persistent advertising the firm has built up a farm trade that is perhaps one of the largest in Western Ontario. The store is especially well lo-

(Continued on page 62.)

"You can't keep too much stock out where people can see it," says the manager of the Cowan Hardware, London, Ont. The firm has a number of display tables which are constantly changed and a whole battery of silent salesmen which, the manager says, have paid for themselves many times over. Working men's gloves and mitts are a big seller.

EDITORIAL COMMENT

NEW TRADE POLICY

APROPOS of the article which appeared in the last issue of HARDWARE AND METAL giving the views of those in the trade as to the status of Germany in Canada now that the trade door is open to her again it may be of interest to note that from a manufacturing standpoint Germany's wings are clipped, as it were, by the terms of the peace treaty. Germany loses much of her coal and iron territory by the settlement and it was on this to a large extent that she built up the enormous steel trade which she enjoyed before the war. The rich coal and iron districts go back to France from which they were taken. This should eventually give France a big advantage. With all the Allied countries seeking to expand their trade to help pay war debts it will be necessary for Germany to do some very skilful manœuvring to make any headway. Reports indicate that the Germans are preparing to do a great deal of shipbuilding and as Germany has forty-two shipyards it should not be a very long time before her vessels are again on the high seas. In the meantime, however, other nations, even though their tonnage has been tremendously depleted, have a large number of boats actually in the trade and are competing keenly for the new markets. It looks as if there was a very great deal in the prophecy that the trade war which is now on will be even more bitter than the war just ended.

CONCERNING INSURANCE

HAVE you enough insurance on your store? This does not mean that HARDWARE AND METAL is trying to sell insurance, but the question is prompted by what those in close touch with many retail merchants tell us about the small policies held by many firms. Many serious losses are constantly occurring because merchants do not adequately protect themselves. You have a good store and a good stock and a business that has taken time to establish. You probably reckoned the replacement cost when you put on the insurance and acted accordingly. But have you ever stopped to think what your replacement cost would be now? The buying price of many lines of hardware has greatly increased. Has your insurance kept pace? You may say you are willing to take a chance and be covered on your initial investment. Well that is your own affair, but there is a real situation here that cannot be overlooked. A stock that has been in only a short time could not be replaced now for a good deal more than it cost. Many lines are still advancing. You can figure out everything for yourself and it may surprise you to find out how much the difference is. The point is, if a fire should wipe out your store to-night, would your insurance policies protect you? This is a point that should not be overlooked.

HENRY FORD IN COURT

IN a large number of the daily papers there have appeared editorial comments, some at considerable length, concerning what Henry Ford has said and admitted in the witness box in his suit against the Chicago *Tribune*. No doubt Ford has told enough to make it certain that he is not a keen student of political science nor historical matters.

These articles for the most part are concerned in taking a fall out of Henry Ford, largely because he admitted he did not know at times what he was talking about.

Are there never occasions when the same daily papers discuss subjects in a way well calculated to make the informed reader see they do not know what they are talking about?

Many Canadian editors discuss the problems of the British navy, and many of them have never sniffed salt water.

They pile into long-distance discussions at times of semi-technical matters in a way that shows how barren they are of even the fundamentals of their subject.

Why not take Henry Ford in his own back yard, namely, as a manufacturer and an organizing genius?

Why not take him as an employer who long ago put in a $5 per day wage, then a $6 and $7?

It is somewhat of a knot-hole vision to size up a successful man entirely on a matter and in a field where he is admittedly not a specialist.

THE BUYING POLICY

RETAIL merchants generally, throughout the Dominion, are asking themselves should they or should they not resume normal purchasing. A careful survey of the situation based on conditions as they actually exist to-day warrants the belief that stocks should be replenished and kept up with-

out regard to present prices. This does not in any way mean reckless buying. Every good merchant will use a normal amount of caution in making his purchases, but there is no doubt that a great many firms in the past two months have lost a great deal of business because they did not buy sufficient goods to handle the business that offered. The man who is prepared to handle the business usually gets it and there has been a splendid volume of trade to handle. There is every indication that business is going to be good in Canada.

For some months after the armistice was signed, a wave of pessimism swept over the entire commercial world and as a consequence a desire to gradually reduce stocks was introduced as it was felt that war time values would gradually decline. However, a condition arose that had been overlooked, that was "wages." It was generally thought that with the return of the army to civilian life, labor would become plentiful and that men would be looking for work in such numbers, that a reduction from the high wages prevailing would be imperative. This condition has not arisen, nor is it likely to arise for some time. Consequently the cost of living has not come down and for reasons with which everyone is acquainted. Instead, even higher wages are being paid in order that the wage earners may be able to buy the necessities of life, plus some comforts, which it is claimed they are entitled to. Money was never so plentiful. People have it to spend and are spending it. This has resulted in such a rush of business that stocks have become depleted. In a great many lines it is being found difficult to replenish them.

The housing problem is another important factor, not only of special importance to hardware men, but of wide interest generally. The building boom which has started in England and in the United States has reached Canada. Already some manufacturers, who only a short time ago reported that business was quiet, state that they are booked ahead for many months with orders. The building that is under way is apparently only a fraction of what is to come. There is no question about the scarcity of homes and it must be met sooner or later. Merchants should be prepared, as this means a lot of good business for them. Approximately 50,000 Canadian boys are bringing home brides. All this means an increased demand for goods in which hardware men are particularly interested. No merchants carry more lines of goods which home makers must have as the hardware men. While the hot weather has caused some crops to be lighter than usual the farmers of the Dominion as a whole are right now saving harvests which will be worth millions of dollars. Not only this, they have right along been selling at exceedingly high prices every bit of farm produce they had to offer. Will the farmers be bigger buyers than ever? There is little doubt that they will.

With conditions as they are and are likely to remain mechanics' tools, farming tools, household requirements, in fact every line which hardware merchants handle, are likely to be very active. The merchant who wants to make the most of his business must have the stock to meet the requirements and while we say again that a normal amount of caution should be used in buying, stocks should be replenished and kept up to meet requirements of the buying public.

THE OUTGOING ALIENS

FEW people, according to manufacturers, realize the effects that the steady stream of emigration from this country back to Europe is going to have on production. Ever since it became possible for these men to get boats home they have been leaving in hundreds. Because little was known about them or the work they did no attention was paid to them in ordinary times. Now, however, with business resuming normal conditions and factories endeavoring to speed production to supply markets that are bare the alien is getting conspicuous by his absence. A large manufacturer of sanitary appliances stated to HARDWARE AND METAL that he did not know what he was going to do to get unskilled labor. Scores of the men who have gone home to visit relatives from whom they have not heard for five years, did all kinds of hard, heavy jobs that Canadian workmen will not touch no matter what wages they are offered. It is quite true that they were unskilled, but even so, their work was very necessary. Not a few firms requiring manual labor are looking over their thinned ranks and wondering just how they are going to handle the orders that are coming in with every mail. From a hardware dealer's standpoint the situation indicates that production may be greatly delayed and that orders are likely to remain unfulfilled because manufacturers will not have the unskilled help to get the work out as fast as usual. No trades will be hit harder, it is stated, than the metal trades, because of the large amount of heavy work involved. The exodus of aliens from the United States is hitting Canada in another way also. Because among the thousands who have left, there were more than 40,000 coal miners, the output of coal is many millions of tons short. This is a situation also that is causing manufacturers who have not been able to get any large supplies in food for thought. All these things affect all business, and especially the hardware business.

LOTS of hardware dealers declare that business has been coming so fast and so steady that it begins to look as if they will not be able to take any vacation for quite a while yet.

EVENTS IN THE TRADE

Business Changes

Paisley, Ont.—S. M. Davidson has purchased the hardware business of W. H. Davidson.

Southampton, Ont.—J. A. Aitchison, of Elora, Ont., has purchased the hardware business of Robert McVittie.

Trade Notes

According to newspaper reports from Chatham, Ont., the Wolverine Brass Co. may locate its plant in Toronto.

The McClary Manufacturing Co., of London, Ont., is starting work on a four-storey concrete addition to its factory, to cost $50,000.

Peter Sheills, hardware dealer at Kincardine, Ont., is giving up the plumbing and steamfitting end of his business and will devote all his time to hardware.

Robert McVittie, of Southampton, Ont., who has sold his hardware business to J. A. Aitchison, of Elora, Ont., will remain at Southampton and conduct a coal and wood business.

The annual picic of the employees of the McClary Mfg. Co. of London, Ont., held at Port Stanley, was a great success. A splendid programme of sports and games was enjoyed.

Personals

Homer Van Patter has resigned from the staff of E. Miller, hardware, Aylmer, Ont., to accept a position at Windsor, Ont.

J. S. Hawthorne, who has been in charge of the hardware business of Clement & Co., at Milton, Ont., during the absence overseas of R. M. Clements, has returned to his home in Toronto.

C. H. Turnbull, formerly with the Hamilton Whip Co., and the Reliance Harness Co., is now in charge of the Toronto district for the Royal Canadian Specialties, Hamilton.

J. Gus Major, who has been connected with the head office of the Royal Canadian Specialties, Hamilton, is temporarily in charge of their Montreal office at 53 St. Francis Xavier.

C. C. Falconer, hardware merchant, Winnipeg, visited Toronto this week on his way to the Maritime Provinces, where he will spend a short holiday. In conversation with HARDWARE & METAL, Mr. Falconer was optimistic regarding the outlook for fall business, although Western trade was badly disorganized temporarily by the Winnipeg strike.

Elected as Director and Vice-President

At a meeting of the directors of the Imperial Oil, Ltd., Toronto, Victor Ross was elected a director to succeed W. W. Oswald, of Montreal, who resigned. Mr. Ross was, until a year ago, financial editor of the Toronto Globe, and resigned

VICTOR ROSS
Elected Director of the Imperial Oil Ltd., Toronto, and Vice-President of the International Petroleum Company, Limited.

that position to become assistant to the president of the Standard Oil Co., of New Jersey.

At a meeting of the directors of the International Petroleum Co., Ltd., held in Toronto, Mr. Ross was elected a director and vice-president, filling the vacancy created by the death of Hon. W. J. Hanna.

Fire Losses

Fire, which may have had its origin in a greasy pile of sawdust, caused a loss of $2,000 in the basement of the H. W. Marshall hardware store at Kingston, Ont. The fire spread to oil stored in the basement and was a difficult one for the fire department to handle, owing to the dense smoke.

Montreal News

Alphonse B. Blais, hardware merchant, Thetford Mines, Quebec, was in Montreal this week.

W. T. B. MacDonald, of MacDonald Bros., Granby, Quebec, was in Montreal during the week.

L. B. Wasserstrom, New York, was represented in Montreal this week by A. A. Seeley.

M. Dannenberg, with J. Wiss and Sons Co., Newark, N.J., was a Montreal visitor this week.

A. Birmingham was in Montreal this week in the interests of John H. Graham and Co., hardware specialties.

A. D. Westman, Chatham Malleable and Steel Mfg. Co., Chatham, Ontario, was in Montreal this week.

C. C. Falconerm, hardware merchant, of Winnipeg, was in Montreal this week and called on the jobbing trade.

W. S. Sutton, manufacturers' agent, Winnipeg, was in Montreal this week.

Fred R. Velt, of the Justrite Mfg. Co., Chicago, was a Montreal visitor.

The Gillette Safety Razor Company of Canada, Ltd., Montreal, this week entertained the sailors in the port of Montreal at the Catholic Sailors' Club. These entertainments from week to week are meeting with popular approval of the sailors visiting this port.

BICYCLE DEALERS TO MEET IN TORONTO SEPTEMBER 3 & 4

At a meeting of the executive of the Canadian Bicycle Dealers' Association, held in Toronto, it was decided to hold the third annual convention of the association at Toronto on September 3 and 4. A very attractive program was outlined for the convention. Several stunts will be staged, including the sale of a bicycle by two officers of the association, this having been planned as a result of the challenge. Secretary George Wenige, of London, is expected to sell a new wheel to vice-president A. E. Treadgold, of Kingston, each of whom is rated highly as a salesman. Another stunt will be a demonstration of window dressing before the delegates, the work to be done by two expert window trimmers. A mechanical demonstration will also be presented.

There will be practical talks on "Service," "Guarantees," "Bicycle Week" "Bicycle Racing," "Early Closing," "Bicycle Prospects," "Advertising and Publicity," "Time Sales in Small Towns," "Business Systems," "Collections" and other features.

Incorporations

The Battery Engineering and Supply Co., Ltd., plans to manufacture and deal in electrical appliances.

Routley Braund, Ltd., capital $50,000, head office Peterborough, Ont., plans to manufacture footwear and sporting goods.

Chase Tractors Corporation, Ltd., capital $2,000,000, head office Toronto, plans to manufacture and deal in tractors of all kinds.

Automatic Gauge and Supply Co., Ltd., capital $100,000, head office Montreal, plans to manufacture and deal in gasoline indicators.

United Portland Cement Co., Ltd., capital $200,000, head office Brantford, Ont., plans to manufacture and deal in cement.

Continental Storage Battery, Ltd., capital $50,000, head office Ottawa, plans to manufacture and deal in batteries, automobiles, motorcycles and equipment.

SAILS FOR ENGLAND

W. H. Cunningham, manager Kasement Skrene Dore Co., 183 Church St., Toronto, has sailed for England on the Corsican, and will visit England and Scotland for the purpose of conferring with firms who are represented in Canada by W. H. Cunningham & Co. During Mr. Cunningham's absence the business will be in charge of W. S. Hill.

BURNS RESULTED FATALLY

Oscar Bickford, of Wheatley, Ont., who, as stated in the July 12 issue of HARDWARE AND METAL, was badly burned in a fire and explosion in the oil house of L. Charlesworth, hardware dealer, died after suffering intensely for some days. Mr. Bickford and Mr. Charlesworth were emptying roofing paint from a leaky barrel into another in the oil house. A match was lighted to see if the paint was all out and an explosion and fire followed which partially destroyed the oil house and burned both men painfully.

FARMERS' CO-OPERATIVE STORE MAY BE OPENED AT PETERBOROUGH

At a meeting of the Peterborough Farmers' Club the question of starting a co-operative store in Peterborough, Ont., to handle hardware and groceries was discussed, and a number of those present agreed to subscribe for shares. The store, if established, will be controlled from Toronto by the Central Co-operative Co., the executive of which is trying to establish a chain of stores throughout Ontario. T. P. Loblaw, of Toronto, general manager of the United Farmers' Co-operative Co., Ltd., spoke at the Peterborough meeting.

COLLINGWOOD SECURED ROLLING MILLS

Collingwood, Ont., is now assured that the steel plant will commence operation on a "peace" basis. The by-law which was voted on, on Monday, July 14, passed with an overwhelming majority

ARTHUR J. HAYES

Former sales manager of the Ford Motor Co., London, Ontario, who has resigned to go to Windsor where he becomes sales manager of the Champion Spark Plug Co. of Canada, Limited. Notice of Mr. Hayes' change of activities appeared in the June 28 issue of Hardware and Metal.

in favor of continued operation. The steel plant was taken over by the Wm. Kennedy & Sons, Ltd., of Owen Sound, Ont., in 1916, and manufactured munition steel until the time that the armistice was signed. An amalgamation has been made with the Collingwood plant and the Canadian Western Steel Co., Ltd., with rolling mills at two Western points. The new firm have incorporated in the name of the Canadian Western Steel Corporation, Ltd., and it is proposed to start the idle rolling mills at Collingwood and also start up the open hearth furnaces. Construction will begin within a few weeks. This new corporation will have in operation before long three rolling mills, located at Collingwoodwood, Ont., Medicine Hat and Redcliffe, Alberta, also a bolt and nut factory at Medicine Hat, which, it is said, will enable them to supply to the trade, both East and West, bar iron and steel, small angles and channels.

TAKING AUTOMOBILE TRIP THROUGH EAST

W. E. N. King, Neepawa, Man., was a caller at the Toronto office of HARDWARE AND METAL Thursday of this week. Mr. King is on an extended automobile trip through Eastern Canada and plans on visiting the Eastern States prior to his return. Mr. King, who is accompanied by his wife and family, left Neepawa just four weeks ago and touched at Winnipeg and Emerson, Man., St. Paul, Minneapolis, Milwaukee, Chicago, Toledo, and Detroit, on his way through the North-western States. Mr. King reports crop outlook through the States as very promising and comments favorably on the majority of the roads over which he travelled. His Canadian trip so far has embraced Windsor, London, St. Marys, Hamilton, and Toronto, and other centres which will be visited are Montreal and Quebec City. From Quebec, Mr. King plans on visiting many of the large cities in the Eastern States, including New York, and will return home by way of Philadelphia, Pittsburgh and Chicago.

Wood Bungs

R. T. Holman, Ltd., Summerside, P.E.I.—Kindly give us names of manufacturers of wood bungs for casks?

Manufacturers of these are the Freyseng Cork Co., Ltd., Toronto, and the Canadian Cork Cutting Co., Montreal.—Ed.

Flour Milling Machinery

The Plessisville Foundry, Plessisville, Que.—Can you give us names of manufacturers of flour milling machinery in the United States?

United States firms manufacturing flour milling machinery are: Beall Improvement Company, Decatur, Ill.; Barnard & Leas Mfg. Co., Moline, Ill.; Great West Manufacturing Co., Leavenworth, Kan.; W. E. Caldwell Co., Louisville, Ky.; Strong-Scott Mfg. Company, Minneapolis, Minn.; Alsop Process Company, 600 South Picton St., St. Louis, Mo.; Thomson Mfg. Company, Belleville, N.J.; Richmond Mfg. Co., Lockport, N.Y.; Huntley Mfg. Co., Silver Creek, N.Y.; J. H. Day Company, 1144 Harrison Ave., Cincinnati, Ohio; C. O. Bartlett & Snow Company, Cleveland, Ohio; Bauer Brothers Co., Springfield, Ohio; Wolf Co., Chambersburg, Pa.; C. K. Bullock, 1361 Ridge Ave., Philadelphia, Pa.; Southern Engine & Boiler Works, Jackson, Tenn.; Allis-Chalmers Mfg. Co., Milwaukee, Wis.; Filer & Stowell Co., Ltd., Milwaukee, Wis.; Prinze & Row Mfg. Co., Milwaukee, Wis.

McClary Manufacturing Co., St. John, N.B.—Will you tell us where we can procure solder for soldering aluminum ware?

This may be obtained from the British Aluminium Co., Ltd., 265 Adelaide St. W., Toronto.—Editor.

VISITS WESTERN BRANCHES

W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited, is in Western Canada on a tour of the Western branches of his firm. Mr. Fallis will visit the important points there, including Winnipeg, Regina, Calgary, Edmonton, and Vancouver, and will be away for several weeks.

Test Case May be Made Out of Charge Laid at Stratford

Hardware Dealer is Convicted and Fined Nominal Sum for Breach of the Plumbing By-Law—Fine is Paid, But Under Protest

A CASE which has aroused considerable interest in Stratford, Ont., was heard before J. A. Makins, P. M., in conection with an alleged breach of the plumbing by-law.

The Stratford "Beacon" says:

In the police court this morning Mr. B. F. Kastner was convicted and fined $1 and costs for a breach of the Plumbing By-law. Mr. Kastner, who conducts a hardware store on Wellington street, sold a washing machine and coal oil stove to a Mrs. Vipend, Caledonia street. One of his employees who looks after any repairs, delivered the articles, and as the coal oil stove was to replace the coal stove, to which the hot water pipes were attached, Mrs. Vipend asked John Redding, who worked for Mr. Kastner, if he could change the pipes, from the coal stove to the furnace. This, Mr. Redding consented to do, not thinking it was a breach of the plumbing by-law. Building inspector Dixon was advised of this and investigated the matter with the result that Mr. Kastner was prosecuted.

Several witnesses were examined, including Harry Peter, who is a plumber and gave evidence that the work done by Mr. Redding came under the head of plumbing.

Mr. Redding was called and stated that this was the first job of this nature which he had done, but he did not believe it to be a plumbing job.

Mr. Kastner was the only witness for the defence. He stated that he was not a plumber, and he knew nothing about the job in question. "Mr. Redding," he said, "had charge of the repair work, but I gave him instructions not to do any plumbing work."

In summing up the evidence, Magistrate Makins came to the conclusion that the case was a breach of the by-law, but believed that it had been done unintentionally. The Building Department did not wish a heavy penalty imposed, but merely wanted a ruling on the case. The Magistrate therefore imposed the above fine.

Mr. F. H. Thompson, K.C., who appeared for the defendant, asked for a certified copy of the evidence as he intended to test the case further. The fine was paid under protest.

W. G. Owens, city solicitor, represented the city.

Asked, following the case, whether he intended to take out a plumbing license, Mr. Kastner replied, "No, if I am going to be brought to police court for the business I am running, I am going out of business."

When You Sell Bicycles on Time Get a Substantial Cash Payment Down

One Dealer Who Sold 500 Wheels on Very Small Payments Found That Collecting Expenses Ran Away With All His Profits—Buyers Should Pay at Least One-Third or Better Still, One-Half If He Wants Credit

FEW bicycle dealers realize how quickly the cost of collecting payments on time sales runs away with the profit on the transaction.

One dealer who had adopted an easy payment plan of $5 down and $1.10 per week on bicycles, and had sold approximately five hundred bicycles on that basis, recently got out his pencil and did a little figuring. His surprise was very great when he found he had not made a single cent after all his effort and time. In fact he was not sure that he would have quite broken even after paying the collector and finally settling up the season's business. The entire profits had been eaten up and probably a bit more as well.

Get Good Payment Down

That dealer now strongly favors the plan of securing at least one-third, and if possible one half of the selling price of the bicycle as a cash payment. He is also thoroughly convinced that weekly payments should be considerably larger than one-tenth.

The above experience simply bears out what has been emphasized many times, that if time business is done at all, a substantial cash payment and weekly or monthly payments of good size should be insisted upon.

Reduce Collection Charges

The dealer who really knows what it is costing him to do business soon realizes that if he is to make any money he must obtain a fair price for his goods, reduce collecting charges to the minimum and by one means or another increase the volume of his sales and thus reduce the selling and other overhead charges on each bicycle.

The dealers who cuts prices, gives ridiculously easy terms and is content with small sales is usually the one who has very little idea what it costs him to do business. He may imagine he is making money when in reality he is paying himself very low wages.

Bicycle dealers who do considerable business in bicycles on which time payments are allowed may be interested in forms used by Ketchum & Co., Ottawa. These are printed on cards about the size of post cards and blanks are provided for filling in particulars. When payment is not made promptly a past due notice is sent which reads:

Past Due Notice

Your monthly payment on bicycle is now past due. You are requested to provide for same before .....

Ketchum & Co., per

If this does not bring a response of some kind within a reasonable time the debtor is served with a

Confiscation Notice

Having notified you that monthly payment is past due, we will be obliged to confiscate bicycle if payment is not made before.....

SALES STAFF OF T. S. SIMMS & CO., LTD., AT ANNUAL CONVENTION

The annual convention of the sales staff of T. S. Simms & Co., Ltd., St. John, N.B., held at the head office, lasted throughout a week, and splendid reports of the year's business were made at the various sessions. L. W. Simms, president of the company, presided. Co-operation and the splendid results to be obtained by working together was the keynote of the convention. Addresses were given by J. L. Brown, secretary of the firm; H. Champelovier, of Winnipeg; Messrs. Finney, Lewis. L. W. Simms. S. B. Purdy and A. L. Foster. The salesmen who gathered for the annual convention were entertained at a banquet and to a motor trip up the river. Those at the convention were H. B. Agnew, London. Ont.; J. T. Gifford, Hamilton. Ont.; H. Champelovier, Winnipeg; F. M. Baker and K. C. Baker of Toronto; J. R. Meloche, Quebec; W. Turnbull and R. C. Lewis of Montreal, and W. J. McDonald and G. F. A. Anderson of the Maritime Provinces.

KINGSTON RETAIL CLERKS FORM UNION

An association known as the Kingston Retail Clerks' Protective Association has been formed in Kingston, Ont. At present it has a membership of forty and is rapidly growing. The local association has become affiliated with the Retail Clerks' International Protective Association.

The following officers have been appointed: President. W. H. Hall: 1st vice-pres., I. Wiley; 2nd vice, Fred. Somerville; corres. financial secretary, J. M. Anderson; corresponding secretary. Miss Jennie Baxter; treasurer, Miss M. Mitchell.

THE CLERKS DEPARTMENT

The Man Who Gets Out the Goods

Stories of C. K. Lassiter—Who Has One of the Biggest and Hardest Jobs in the Whole Range of Business.

By MARY B. MULLETT, in the American Magazine.

NOT long ago, I was one of a group of persons to whom the chief salesman of a big concern was relating some of his selling experiences. They were good stories, too; some of them actually held a thrill. But finally one of the men said:

"Yes, salesmanship is a great game. But there are two ends to business; and in the case of a manufacturing plant, you salesmen have the smaller end. The man who does the big stunt is the one who produces the goods you sell. Where would you be if it were not for him?"

"I can answer that," said another man, himself the head of a manufacturing firm. "If the production man didn't keep up his end, all of us, from the presidents and managers down to the office boys and apprentices, would have to hunt another job. He is the keystone of the arch. If he fails, the whole thing falls down."

"That's so," admitted the salesman. "He has ten problems to our one."

"Then a great production man ought to have a good story to tell," I said. "Where can I find one?"

The second speaker looked up quickly.

"Ever hear of Lassiter?" he asked. "There is a man with one of the hardest jobs in the whole range of business. He turns out one of the most difficult things there is to manufacture. He has to keep six plants, with thousands of employees, running smoothly. He knows every detail of the machinery in these plants. He handles the labor. He has to see that one of the vital products in industry is turned out on schedule time, and he must follow its shipment literally to the ends of the earth, and make sure that it reaches the buyer, and that it works all right when he does get it. That's Lassiter's job."

"What does he make?" I demanded.

"Iron horses," was the laughing reply. "He is the vice-president in charge of manufacturing with the American Locomotive Company."

That was how I came to be sitting, a week later, in an office high up in the Hudson Terminal Building in New York, talking with the man whose job is "one of the hardest in the whole range of business." Forty years ago, when that man was a thirteen-year-old boy in Virginia, his father died, and the youngster quit school and went to work as an apprentice in a blacksmith shop.

From the beginning, he loved tools and machinery, studied them and mastered them—although he lost the ends of some of his fingers in the process. He had the creative instinct which is at the foundation of manufacturing. He liked to make things; and to make them better and more economically. In other words, he was a born "production man."

Boy that he was, however, he did not realize this at the time, and after a while he turned his back on the shop and went into office work with a flour concern. In a few years he was head buyer; and when he was only nineteen he became manager of the business.

Having to leave school at thirteen, he had only the beginnings of the education he wanted, so he put in his evenings at night school.

"And when you have to work for an education that way," he said to me, "you are pretty sure to value what you get. My memory is to-day my greatest asset in business. And I can trace it straight back to my night-school experience. I wanted to know things. I was bound I would know them. And I learned to work for knowledge, and to hold on to what I gained."

Before he was twenty he married. Just as he knew what he wanted in education, so he knew the girl he wanted for his wife. And, as is so often the case with successful men, he says with pride that she is "the one wife in the world for him." He put her confidence in him to the test before they had been married a year.

He had not been satisfied with the flour business. He wanted to be creating something. So when he saw, one day, a baking and confectionery plant advertised for sale he promptly bought it, and before long was making two hundred and fifty dollars a month out of his venture.

But he was twenty years old by this time. At that age most young men are only big boys. But with seven years of work and business experience behind him, Lassiter was a man; and he looked into the future with all a man's keenness of vision. What he saw, so far as the business he was in was concerned, did not measure up to his ambition. Again he knew what he wanted. And again, with the same decision and courage he had shown before, he went after it.

Giving up his two hundred and fifty dollars a month, he went to the Richmond Locomotive Works and took a job as timekeeper at sixty dollars a month! His wife's father was a man of wealth and could have come to his assistance; but neither he nor "the one wife in the world" wanted this. They wanted to go ahead "on their own"; and with the money Lassiter had saved, sixty dollars looked all right to them for a starter.

Of course, with a man like that, the sixty dollars grew pretty rapidly. He was moved from one position to another and, in the course of these changes, was set to checking up the cost estimates on a hundred locomotives for Egypt. He discovered that if the bid had gone in and been accepted as figured, it would have bankrupted the concern. No less important an item than driving wheels had been omitted from the estimates. So had various other things. Incidents like this made the head of the plant regard young Lassiter with interest.

"How do you, working here in the office, happen to know so much about machinery?" he demanded.

"Because I'm a mechanic."

"Why didn't you say so?"

And with that, they put him where he wanted to be—in the manufacturing end of the business. From that time his progress was one of steady growth up to the present holding down of "one of the hardest jobs in the whole range of business."

What is involved in such a job? What are the problems of a production man? What qualities must you have if you want to play a part in this end of the business game?

Putting it briefly, here is the answer: The production man must know where he can buy the materials and parts he needs, and what they will cost. He must oversee the designing of new buildings. He must plan them so that he can expand his production as the business grows. He must design them so that, from the time the raw materials are unloaded at the doors, the whole process of making them up will go along from one step to the next with as little loss of time and power as possible. He must understand every machine in his plant, know just where to place it, and be able to adapt it to making different kinds of product. He must keep the work of his plant properly balanced, or it will turn out too much of one thing and too little of another. He must know where to get his workers, and must keep them contented, healthy, and enthusiastic after he gets them. He must be everlastingly on the lookout for new ideas and improved methods. He must understand costs and see that he operates at a profit. He must expect to be caught in a pinch at any moment, and he must be so resourceful that he will always find a way out. He must have vision, courage, initiative, and be a confirmed optimist.

I could make that list a longer one, but those are the main points. It sounds like a pretty large order—and it is. The big manufacturer plays a hard game and an exciting one. Take the question of buildings, for example.

A few years ago Lassiter was sent to Schenectady to rebuild the American Locomotive Company's plant there. It was then able to turn out forty locomotives a month. But they were one hundred-ton locomotives, and the tendency has been constantly toward larger engines. So he had to design a plant that would build bigger engines, and also that could take care of a greater volume of orders when they came. He made a plant which was intended to turn out, if necessary, eighty-five 100-ton locomotives a month, or their

equivalent in larger engines. But the designing was done with such foresight that it has actually produced a tonnage equal to one hundred and forty-seven 100-ton locomotives a month.

That is where genius in planning comes in. There would be no use in having salesmen get a mass of orders if a plant couldn't handle them when they came in. If a plant has to be rearranged, or rebuilt, every year or two to take care of the increase in business, it eats up all the profits. Lassiter rebuilt five of the company's works. That was part of his job as production man. It involved spending millions of dollars. And it also required foresight and courage, and thorough knowledge of all the technical problems.

Lassiter not only knows every machine in the works, but he himself has designed many of them. He has invented dozens of improvements. On his desk, when I talked with him, lay a pile of Patent Office papers. When I asked him how many patents he had taken out altogether, he shook his head hopelessly. They are too many to count. In some of the buildings at their plants every single machine has been designed by him.

"There are sixty-eight acres of buildings at the Schenectady plant," he said; "and if you should blindfold me and take me through those buildings, I could lay my hand on any machine there, and tell you just what it is, just where it is placed, and just the amount of output it is capable of. Not only that, but I could do the same thing at all of our works. Taking them all together, we have about three hundred acres of buildings; and I know every machine in them.

"That is why a production man should know his machinery. If he doesn't, he will get into all sorts of trouble. I can look over the specifications for a locomotive and tell immediately whether our machines can meet the requirements of those specifications.

"You know, building locomotives is very different from making almost anything else. Making automobiles, for instance, is child's play in comparison. An automobile plant builds only a few designs of cars. They adapt their machinery to making those designs, and then go ahead, repeating one operation over and over. But every railroad sends in its own specifications for the kind of engines it wants. There is, for instance, what is called the Mikado type. But there are a hundred variations of that type.

"The New York Central, with low grades and easy curves, wants one kind of design. The B. & O., with the grades and curves peculiar to a road through the mountains, wants another. The designers for the different roads have their own ideas about every detail of construction: wheels, pistons, cylinders, valves, rods. They work out their own plans about everything, and we have to follow them.

"Any man in charge of manufacturing has his work cut out for him. But if he is making a standardized article he can keep a stock of made-up parts on hand. Then, when a rush order comes in, all he has to do is to assemble these parts. If the thing he manufactures is not too bulky, he can have a reserve of the finished product in storage all ready for shipment. It is then up to the salesmen to get enough orders to take care of the output. But we don't make locomotives first, and sell them afterward. We can't make a single one until we get the order for it; because each order comes in with its own specifications. The only things we can keep on hand are certain raw materials, like pig iron and steel billets.

"But every production man has his problems. Back of almost every act of your life is a story of wakeful nights and anxious days through which some such man has gone in order to produce the articles, big and little, which you take as a matter of course.

"Last year, when coal was scarce, weather bad, and railroads almost hopelessly congested, I put in many of these anxious days and nights. We buy from other manufacturers a good many of the parts we use in a locomotive. All the time, shipments of these parts were on their way to us, sometimes a whole carload, sometimes a small quantity of some special thing. Every one of them is vitally important. A great engine costing seventy-five thousand dollars might be held up for lack of a few valves, or a piston rod, or a cylinder.

"To guard against this, we had men at every junction point on the lines. We had men riding the cars. That is, one man would stay with a car from one end of a division to the next, where another man would take his place. It was up to these men to keep the car moving, to see that it was cut out where it should be, and promptly started on the next leg of its journey. Of course they had no authority with the train crew. They had to use persuasion; had to make friends of the men they dealt with, so that these men would help them and not work against them. They were liberally supplied with cigars to distribute. But they had no definite orders to follow—except to get those shipments through.

"If in spite of their efforts, a shipment was sidetracked, or started astray, they called us on long distance and we went after the officials of the road concerned. In cases where Government orders were involved, we even took the thing up with the powers in Washington if necessary. For a production man must stop at nothing! He must move heaven and earth and the powers of the earth to get his goods out on time.

"When I saw that a locomotive was going to be held up for the want of some small parts, I would send a man after them, two or three hundred miles, sometimes more. He would personally see the box put into the express car and go with it himself. Or he would put the things in a suit case, take it in a taxi to the train, shove it under his berth in the Pullman, and bring it that way. I didn't care how I got it. The only thing necessary was that I should get it.

"I know of a man who needed certain small parts for the completion of some big machines he had to get out. These parts were made in a city about sixty miles from his plant. But if they came by express they would have to travel by two roads and, as conditions were then, they were likely to be at least two days in reaching him. There was an airplane factory near him, with machines making test flights every day. He got one of these machines to take him to the town where he wanted to get the missing parts. They made the flight in less than an hour, he got what he wanted, and, inside of another hour, had handed them to the superintendent of his own plant.

"I know of a case where, in an emergency, the rear frame cradle of a locomotive was shipped from St. Louis to Philadelphia in a 'palace car,' the kind used for thoroughbred horses. Not because the huge castings needed such luxurious quarters, but because that car was the only one available in the St. Louis yards at the hour when the cradle was ready.

"To a man without will and resourcefulness, that car would not have seemed available. There were horses in it, for one thing. And, for another, special permits had to be obtained for its use, as it was classed as a fast express carrier. But the permits were obtained. The horses were dispossessed. And the big iron casting made the trip in state.

"Motor trucks have been resorted to dozens of times in the past year or two by worried production men when the railroad congestion threatened to hold up their supplies. As I said before, the production man must be able to think quickly, to decide instantly, and to stop at nothing to get what he needs.

"Someone told me the other day of a curious example of this resourcefulness. You would not class an editor as a production man, I suppose, but that is really what he is. He has got to get his paper out, and do it on time. One night the foreman of the press-room rushed into this editor's office and announced that the water main had broken and that there was no water for the boilers. That looked as if the paper would not be got out on time. But the editor was either a man of inspiration, or, what is more likely, he had figured that this very emergency would come some time, and he was ready for it. Without a moment's hesitation, he took up his telephone and called:

"'Give me the fire department.'

"He asked to have an engine sent around, had it hooked up to another water main two blocks away, had the boilers filled—and the paper came out on time.

"That reminded me of one of my own experiences. The fire pan in the heating pan at one of our works had to be replaced, a thing which meant that there would be no heat at all while that work was being done. But it was winter, and

If You Aren't a Salesman, Maybe You Are a "Production Man"

FOR the last two years, states the Editor of the *American Magazine,* a certain man has been telling me his troubles. He represents the "selling end" of a business. His partner is supposed to stay at the factory and produce the goods. But he doesn't produce them! He is way behind. Consequently, the concern is not making the money it should.

Lots of emphasis has been placed on the salesman—his forcefulness, imagination, his knowledge of human nature. But somewhere in the background there is a man who also has energy and imagination and everlasting problems, the production man. He must not drop far behind the salesman. And many of them are so able that the selling force has all it can do to keep ahead of him. The great "production men" in business are just as wonderful as the great salesmen. Their stories are just as fascinating. Yet almost nothing has been written about them.

Get this point, too. Many a young man knows in his heart that he isn't cut out to be a salesman. He lacks the knack—and also lacks interest in trying to become a salesman. Yet he might work up to be a great "production man." Who knows but the story of Lassiter may stir a lot of rather discouraged men to look at a side of business which they have overlooked, and to which they may be better suited?

we simply had to have heat. So I told the men to run a locomotive up to the building. We hooked it up with the heating system, and that took care of us while the repairs were being made.

"Meeting an emergency calls for quick thinking and energetic action, and you never know when the test is coming. But, after all, these emergencies are only the high lights in the picture of production. The big things are there day in and day out. Your whole plant must be right to start with. So many plants have 'just growed,' as Topsy did. An addition has been put on here, a wing there, a new building stuck in where there was a vacant space. The result is that material is being dragged back and forth, and up and down, jamming the place and causing serious loss in power and time and labor.

"I have heard of a plant where big steel plates were taken 1,900 feet, from the point where they were unloaded, to the furnaces; and then carried back 1,700 feet over the same route in order to reach the next step in manufacture. As these plates were twenty or thirty feet long, you can understand the waste of labor and of power involved in these unnecessary trips of over a quarter of a mile each.

"You must arrange your plant so that there is a perfect system of routing the work. The process of manufacture must flow evenly through it. But the man who thinks that this is all there is to the job is going to miss a lot of tricks. You never can sit back and say:

"'There! That's perfect!'

"Things change too fast. There are always new methods coming up, new ideas to be introduced. And you will always find among the men around you a certain proportion of pessimists, men who can give a dozen reasons why a new thing is inadvisable, or impracticable, or something. To that type of man the new thing is always the impossible.

"Never let anyone tell you, 'It can't be done.' Maybe it can't—but you don't know until you have tried it. When we introduced motor trucks at the plants there were pessimists who said that wouldn't work. It was quite true that they were not practicable on the roads as they were at the works. But when we built concrete roads, the motor trucks were so much better than the old, slow, horse-drawn ones that even the pessimists had to admit it.

"Last autumn we received an order for one hundred and fifty locomotives for Italy. Fifteen were to be delivered in November, twenty-five in December, and so on. It was a rush order, and time was at a premium. They were to be made at our Montreal plant and the steel was to be shipped there from Pennsylvania. Mr. Fletcher, the president of the company, asked our traffic department if these steel shipments could not go by a shorter route than the one specified. They explained that the steel men owned some of the roads over which the shipments were going, and that naturally these steel men wanted to send them that way. There was a more direct route, but not over roads owned by the mill interests.

"Well, Mr. Fletcher said that he did not think the steel people would be so narrow as to insist on routing the material by their roads, and to take it up with them. This was done; and the result was that we saved from four days to a week on each of those shipments. That is an example of what can be gained by being willing to try a thing.

"I believe the getting out of those first fifteen locomotives for Italy was about the hardest thing I ever did. The order came through from Washington, and we had to work hard to get it, because the Government said we wouldn't be able to do the job. All our plants in this country were rushed with work for the Railroad Administration and naturally they didn't intend to have interfered with. But I wanted that order. So I told our foreign salesman to get it.

"'You get the order,' I said, 'and I'll make those engines.'

"Our own men told me I couldn't do it. I was going to make them at our Montreal plant, and they said I couldn't get an export license to ship the materials to Canada; that I couldn't get the necessary priorities papers from the War Industries Board; that, even if I could get this red tape adjusted, I couldn't get the boiler plates rolled by the mills in time, and so on. I said:

"'Never mind. Get the order! I'll build those engines.'

"Well, the order came to my desk October 10. We had to make all the drawings for the foreign type called for. Then we had to order the special parts made. And there was the question of the boiler plates. I knew I couldn't get them made in time; but I also knew what I was going to do. At our Schenectady plant were some boiler plates for another order. We were ahead on that, so I simply took those plates. They were too large, but I cut them down. They were a little too heavy, but I got the Italian agent to accept them for the first fifteen locomotives. I had them shipped to Rouse's Point. When the priorities papers arrived I telegraphed the numbers to Rouse's Point, had them accepted by the railroad agent there, and the plates went to Canada. The papers were sent to the railroad agent by mail, but I saved a day by not waiting for that.

"Some of the brass bolts were to be made in this country; but I saw that there would not be enough turned out in time. So I had part of them made in Canada. I sent men to 'ride the cars' with all shipments, and got them through promptly. I sent other men to carry special parts in handbags or suit cases. I shipped tires—engine wheel tires—by express. I did the same with the big steel springs. But we got those locomotives out on time! Twenty-nine working days after the order was laid on my desk the first one was completed, a record of which any company has a right to be proud.

"If the war has not developed good production men, then nothing else could. For the great purpose of the country was to get out the goods! The building of so many new plants gave designers an opportunity they would not have had in ten years of normal business. The spirit of patriotism spurred the workers to show what they were really capable of doing. They surprised themselves by the records they made. And to men on a piece-work basis, as thousands are, this was a lesson which is going to be of permanent advantage to them.

"The drafting of several million men into the army forced employers to find labor in unexpected quarters. And they did it. They took women, country boys, thousands of people who never had been in a machine shop in their lives. Incidentally, it was a revelation to these new recruits. They found that they liked the job, and that they could make good money at it. It was a surprise to some of the older men, too; skilled workers who had prided themselves on their ability to tend a complicated machine. Having these new but enthusiastic workers come in and show up so well put the older hands on their mettle. When they found that women could learn in a few weeks to run a machine which it had been supposed only a skilled mechanic could handle, it created a healthy spirit of rivalry which was good for production. It was good for the workers, too, for the more they turned out the more they earned.

"The problem of labor is one of the most serious the production man has to meet. He knows where he can get raw materials and machines. He can make his plant as perfect as possible. But it is a dead and useless thing without a force of live and enthusiastic workers in it. If he is the right kind of a boss, he wants his men to be well in body and happy in mind. So one of the most important traits he must have is the ability to handle men. When Charles M. Schwab took hold of the Government's shipbuilding work his greatest asset was not his technical experience, nor his business ability. It was his power to stimulate men to whole-hearted endeavor. The production man should never forget that in the last analysis every worker in his plant is also a 'production man.' The real production man, the one who has the title, may be the wheel; but the others are the cogs, without which the wheel could not turn.

"Last, but not least, there is the question of costs. You may run your plant and get out your orders; but if they cost more than you sell them for, you might better close down. The production man must know in detail every expense of manufacture, and must watch it like a hawk to see that every item in the estimate is kept at the proper level. Everything must be figured exactly in advance. Allowances must be made for depreciation, overhead, repairs, labor, materials, tools. Every contingency must be thought out beforehand, and reckoned with.

"Not only that, but the production man must be constantly trying to devise ways of doing the work more economically. He knows that his competitors are on the alert to find better and cheaper ways of making his product, and that they will cut the ground out from under him if he doesn't match his wits and skill with theirs. To do this, he ought to know his work from the bottom up. That is why most successful production men are those who have begun as workmen. If I did not know my machinery to its last bolt, I couldn't meet the problems that come. It is the same with other men.

"Most of the managers and other men holding big positions in our plants have come up through the ranks. It is the best way. Years ago, when I was a beginner in the office of the Richmond works, some of these men were boys there. I kept their papers. To-day they hold big positions with the company. Why? Because they had energy and ambition. You take a boy who really works, who turns out half again as much as the boys around him do, who is always trying to learn things, who is always, figuratively speaking, on the heels of the man above him, and you can put him down as a winner. Especially if, in addition, he has good habits. I don't smoke and I never touch liquor. I don't say that this is necessary for all men, but I am sure it is best for me, and I believe it is the safest course for most young men. And you know the saying, 'It's better to be safe than sorry.'

"The two essential things, if you want to have a hand in this great game of production, are force and knowing your business. I have seen a good many men who had the knowledge. They could tell you just how the thing is done. But they will never make good production men, because they haven't the force and initiative and resourcefulness to get it done.

"You can cultivate that. You can begin on your own job, I don't care what it is. Learn to put things through. And in doing that you will learn to make the men or boys under you put their own work through. Never let anything stop you. Set your teeth, and go after the result you want. Study human nature and try to win the confidence and enthusiastic help of others.

"Know everything you can possibly find out about how your product is made. And don't be content with that. Try to figure a better and cheaper way of doing some one part of the process. When I was a young chap at Richmond, working in the office on costs, I told them that the bolts were costing them too much—fifteen cents apiece for a 15-inch bolt. They said it couldn't be done any cheaper. I knew it could. So I studied the machine, and designed one with which four men did the work which had required one hundred and twenty men. That was my first patent. It reduced the cost of bolts from $15 a hundred to 55 cents a hundred.

"When you know your job thoroughly, it gives you a sense of mastery which makes you able to say, 'I can do that thing.' When

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

FACE PLATES

Wood cold air faces are a special feature of the face plates manufactured by the A. H. Power Furnace Co., 1 Hayden Street, Toronto. Sizes are carried in stock ranging from 12x16 to 30x30. The oblong mesh, it is claimed, makes a

Wood Face Plates

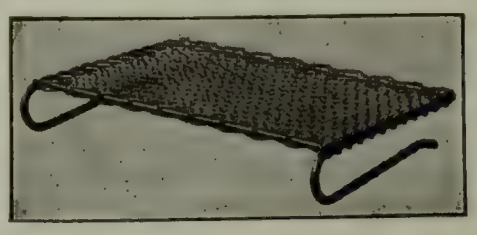
perfect face plate, and the legs of chairs or small articles, it is stated, will not pass through. Customers, it is stated, may be supplied with the best oak faces suitably finished to style of floors. These, it is stated, are the strongest and most perfect faces made and are, it is claimed, clean and sanitary.

HOT WATER FURNACE

The "Victory" hot water furnace, manufactured by the Murphy Victory Furnace Co., Limited, 390 Somerset St. W., Ottawa, will, it is stated, save money in cost of installation, operation and repairs. It is claimed that it will deliver more heat quickly with less fuel than any other furnace. It is made in many sizes. One model is a hard coal type, and, it is stated, has a solid iron magazine, water-jacket and combustion chamber between the outer and inner jackets. The combustion chamber may be used for coal, it is stated, by simply removing the flange on top of the magazine, thus causing burning coal to be both inside and outside the magazine and in direct contact with the water-jacket of the furnace. This arrangement, besides giving, it is claimed, maximum heating efficiency, minimizes difficulty of cleaning. Another model intended for burning low grade coal, garbage, etc., has the magazine formed, it is stated, with pipes, in spaced relation to each other, forming a basket magazine in the centre and combustion chamber between the tubes and the outer water-jacket. These tubes, it is claimed, contain no dead end, each pipe having a baffle wall. The water, it is claimed, makes a complete circuit down one side of each pipe and up the other.

MOTO VIM

The Powerlight Co., Ltd., 52 Gertie Street, Winnipeg, are putting on the market a new product called the Moto Vim. This, it is indicated, is a highly concentrated composition of volatile and essential oils of well-known solvent qualities, compressed into tablet form, which readily dissolves into gasoline or kerosene with immediate action, making either more volatile, which admits of more air and less gasoline, and is particularly good in an old or carbonized motor, quickly removing every particle of carbon. In new or any kind of motor, it is said, it prevents the formation of carbon.



The manufacturers state that Moto Vim improves the fuel and carburetion to the motor, improves lubrication, lessens odor and smoke, gives uniform combustion, perfect ignition, easier starting, quicker "pick-up" and a quicker acting motor under the most unfavorable conditions of cold weather.

Uniform combustion reduces noise and vibration—the freedom from carbon eliminates valve grinding and similar troubles, diminishes wear and tear and gives your motor longer life.

Moto Vim, it is said, gives an increase of 25 per cent. in power and speed on hills or on the level by giving at all times a perfect mixture that flows freely and constantly. It increases the speed, the flexibility, the mileage, and the all round efficiency of any automobile or gas engine.

AUTOMOBILE MATS

"Ideal" automobile mats, manufactured by the Port Hope Mat Manufacturing Company of Port Hope, Ont., are made, it is stated, of galvanized steel wire and are strong, sanitary and efficient. They are easily attached, it is stated, without screws or bolts, and will not rattle or become detached. It is claimed that by their use all mud and snow is kept out of the car. The mat shown in the illustration is for the running board.

Automobile Mat

VICTOR GIANT TRAP

Oneida Community, Ltd., Niagara Falls, Ont., has developed a new game trap, which it is stated is a culmination of years of effort towards making a trap that will combine a high grip with lightning action and strong holding power. The new trap is known as the No. 1 Victor Giant. This is not, it is stated, an ordinary trap, with larger jaws, but is built proportionately stronger. Among its best features are claimed: High catching qualities which will prevent the animal from gnawing or twisting out; large pan which insures catch as the animal cannot step between jaws of the trap and pan; light weight yet strongly made; spring highest on side of flying jaw which insures springing of trap when latch is released and enables placing spring cross-wise with jaws when setting small coop-trail or den without interfering with front jaw; one of the best features, it is claimed, is space between jaws where they fit into bed piece. This, it is stated, allows the jaws to come together when dirt, gravel or twigs get across the trap.

Victor Giant Trap

While the spring of the Victor Giant No. 1 trap is said to be strong enough to easily hold fox, coon or fisher, it is designed more especially for smaller animals like skunk, mink, marten or muskrat.

CORRECTION

In the advertisement of the American Pad and Textile Company, Chatham, Ont., on page 12 of last week's issue, the cut of a horse collar showing a pad, appeared upside down. It would be quite obvious to most of our readers that the cut did not show up properly. This was due to misplacement of the cut.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

COPPER is one of the most active lines in the market these days and the metal this week shows still further advances with best-informed authorities predicting even higher levels. The result of the strength in the metal is being reflected in many manufactured lines, copper rivets and burrs showing a substantial advance along with copper rods, sheets and tubing. Copper wire, electrical basis, is also up another 2c per pound over quotations named one week ago.

The ingot metal market all the way through is showing greater activity and consequently a stiffening of the prices is noted. Lead and spelter move up ½c per pound with a splendid volume of business reported in the former. Spelter is in fair demand and undertone to trading is one of strength.

Linseed oil has moved up from 7c to 15c per gallon in different quarters this week, establishing new high levels for this commodity. When the peak will be reached is hard to determine, though the flaxseed market seems loath to get very much above the $6.00 mark. Conditions tend to firmness at the present level, however. Business in linseed oil, though generally restricted to needs of the trade, is considered very good.

Turpentine continues to soar and new high record prices are being established in the markets to the south almost daily. Locally, prices show a sharp advance of 17c per gallon and even higher quotations are looked upon as probable. Conditions contributing to the present advances are the shortage of the crop with the heavy overseas demand.

Ready roofing shows an advance this week, prices going up 10c per square in some quarters. Decided strength is apparent in the market and export business, which has been placed with the manufacturers, is keeping the factories humming.

Padlocks, cotton gloves, sausage stuffers, lard presses and food choppers are among the lines to register a higher level of prices. Hay wire has eased away in some quarters, competition being a factor in this situation. Scrap prices have undergone a general revision upward this week, coppers leading the way. Much improved business has developed and outlook is considered the best since the signing of the armistice.

MONTREAL MARKETS

MONTREAL, July 24—Hardware in manufactured form is quite active and the tendencies of price are rather upward than lowering. Some lines of builders' hardware, however, have been reduced and this applies to transom goods, ceiling hooks, knobs, pulleys and other lines manufactured by Sargent & Co., and on which the reductions average from 5% to 10%. Ingot metals show much strength and there is likely to be higher prices still for copper and probably for lead and spelter as well as antimony. The demand from Europe is large and price does not seem to debar actual selling. Copper rivets are again advanced through a change of discount. Soft fibres are firming still and other advances in twines may be made. Old material is active and the buying prices better.

Hay wire is lower, in coils, and this is done to meet competition, it is stated. Window shades are down 75c per dozen.

Window Shades Down 75 Cents a Dozen

Montreal.

WINDOW SHADES.—Prices are reduced on window shades 75c per dozen. Some of the new prices are as follows: Plain 3 ft. by 6ft., Dominion, $8.60; Regal, $10.95; dado 3 ft. by 6 ft., $9.75; Dominion, $12.10; Regal No. 55, fringed, $9.75; Dominion. The following relative prices are quoted for 3 ft. by 6 ft. Dominion and Regal respectively: No. 856 fringed, $11.20 to $13.50; No. 17 fringed and insertion, $14.05 to $16.40; lace, $11.20 to $13.50; insertion, $11.45 to $13.80; lace and insertion, $14.05 to $16.40; No. 550, scalloped lace, $14.35 to $16.70.

Various Hardware Less; Hay Wire; Rivets Up

Montreal.

VARIOUS LINES.—Various kinds of builders' hardware of Sargent make are reduced in price from 5 per cent. to 10 per cent. The lines include ceiling hooks, knobs, transom lifts, pulleys, etc. Hay wire is also down and the price of coils is as follows: No. 13, $4.60; No. 14, $4.70, and No. 15, $4.80. Copper rivets are advanced in price through a change in the discount to list plus 5 per cent.

No Weakness Shows In Iron and Steel

Montreal.

IRON AND STEEL.—A seasonable movement of iron and steel bars is being reported and there has been considerable strength of undertone. The basis is still unchanged and better business is confidently looked for. The general trend of prices is upward in some United States centres.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	6 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65

Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond too steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Coal Oil is Held; No Gasoline Change

Montreal.

COAL OIL, GASOLINE.—The movement is very satisfactory on coal oil and gasoline, and lubricating oils are coming in for repeats to some extent. The basis is held without change and the tendency is a steadied one. Coal oil prices hold at the advance made last week, the prices being 21 to 24 cents per gallon. Gasoline is 33 cents.

Rope Slow Seller; Twines to Advance

Montreal.

ROPE AND CORDAGE.—A fair sale has been secured for various sizes of rope but this is a rather quiet time and the movement is therefore only seasonable. The basis is unchanged with pure manila still selling at 34c and British manila 30c. Sisal is 27½c per pound. There is still a strong tendency to higher levels on soft fibres and twines and soft manufactured products will probably be higher within a few days.

Stoves Are Booked And Wares Selling

Montreal.

WARES AND STOVES.—Excellent business has been coming forward for various wares and the manufacturers are well pleased. From a seasonable standpoint there has been no complaint. Prices are decidedly firm and likely to hold, if not to advance, though there is no suggestion of advances now. The stove situation is held and the undertone quite firm, but the market is unchanged. Orders are still coming to hand for fall shipment.

Good Round Orders But Sheets Held

Montreal.

SHEETS AND PLATES.—While there has been no great change in the situation, the basis for sheets and plates is quite firmly held and sales of considerable quantities have been made. The undertone is likely to be more steadied now with outside enquiry likely to improve.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 4	7 00
GALVANIZED SHEETS—		
10¾ gauge	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles; an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Trade Demand Good For Lead Products

Montreal.

LEAD PRODUCTS.—Changes have not been made in the price basis for lead pipe, sheet lead, lead wool, etc., but the basis is firm. If lead should advance much further there is likely to be a revision of the basis upward. A good demand has been reported from the trade.

Lead pipe	....	0 12½
Lead waste	....	0 13½
Lead traps and bends	....	15%
Lead wool, lb.	....	0 13
Lead sheets, 3 to 3½ lbs., sq., ft., lb.	....	0 12½
Lead sheets, 4 to 8 lbs., sq. ft.	....	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	....	0 35½
Solder, strictly, lb.	....	0 31
Solder, commercial, lb.	....	0 29
Solder, wiping, lb.	....	0 27
Solder wire (8 gauge)—		
40-60	....	0 35
45-55	....	0 37½
50-50	....	0 40¼
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Higher Buying Price For Old Materials

Montreal.

OLD MATERIAL.—Scrap copper and particularly heavy is the centre of interest, and upon it most of the other metals now hinge. The demand is exceedingly good for the heavy product and there has been an advance of price to 20½c to 22c per pound. Red and light brass and scrap zinc are also marked up. Wrought iron is up to $15 per ton.

Dealers' Buying Prices—		
Pipe scrap, ton	....	12 00
Stove plate, ton	....	15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08
Overshoes, lumbermen's rubber boots	....	0 05
Overshoes, etc. (trimmed)	0 05	0 06
Bicycle tires	....	0 03½
Automobile tires	....	0 04
Yellow brass	0 09	0 10
Red brass	0 17	0 18½
Light brass	0 07½	0 08½
Scrap zinc	0 07	0 08
Heavy copper	0 20½	0 22
Wrought iron, No. 1, per gr. ton	....	15 00

Big Copper Demand; Most Ingots Firming

Montreal.

INGOT METALS.—Of all the metals, copper is that upon which interest centres, and the tendency continues to be upward. Not only is the price advanced repeatedly in the States but also in London. It would seem that the old war-day levels may be reached. There is a fair business passing in the various lines.

COPPER.—Despite the unfavorable trading situation brought about through the exchange difficulties, there is much movement of copper. The price here is up and quotations are made at around 27 to 28 cents per pound.

TIN.—A higher price basis obtains in London but the quotation made here last week still holds, 56c per pound.

LEAD.—Higher prices are being asked in outside points. There is some movement here and the quoted price is higher at 8c per pound.

ANTIMONY.—Some further strength is noted and the trade here is quoting prices at 10½ to 11 cents per pound.

ALUMINUM.—Without change in this market and quiet at 35c per pound.

SPELTER.—Outside markets are continuing to buy and this has greatly stimulated the outgo from shipping points. The local basis is also higher at 10 to 11 cents per pound.

PIG IRON.—With the exception of a rather firm tone and better enquiry there is no change and the price remains at $48 per ton.

TORONTO MARKETS

TORONTO, July 24.—Firmness is generally apparent in the market this week, with copper perhaps standing out in the advances recorded. Copper rivets and burrs have been revised upwards again. Sisal hemp is weaker, and a revision in the manufactured products seems to be imminent. Roofing prices have come in for an advance this week of 10c per roll and market is very firm at new levels. A change has been recorded in padlocks, all lines moving up 10 per cent. Cotton gloves, sausage stuffers, lard presses, valves and copper wire have all followed the upward trend. Business is very good, and outlook considered very satisfactory.

Sausage Stuffers; Other Lines Up

Toronto.

SAUSAGE STUFFERS.—There has been a revision made in many of the lines manufactured by the Enterprise Manufacturing Co., and new prices which are now available provide for an advance. The lines which are affected, it is understood, include sausage stuffers, bung borers, food choppers, lard presses and kindred lines. The new prices will average about 10 per cent. higher than those formerly in effect.

Copper Rivets and Burrs Go Higher

Toronto.

COPPER RIVETS AND BURRS.—The continued strength which has marked the position of the primary markets on copper is being reflected in various manufactured lines. This is shown again this week in an advance which has been made in copper rivets and burrs. The discounts which are now prevailing, or rather the advance on list which now prevails, is shown below along with the previous price which was in effect. It

will be noted that the change is a substantial one.

Copper rivets with usual proportion of copper burrs, that is to say, weight of copper burrs not exceeding 1-3 of combined weight of copper rivets and copper burrs, new list plus 5 per cent., before, discount 10 per cent.

Copper rivets with copper burrs where the burrs are more than 1-3 of the combined weight of the copper rivets and copper burrs; copper rivets, now list plus 5 per cent., before discount 10 per cent. Copper burrs up to 1-3 of combined weight of copper rivets and copper burrs, list plus 5 per cent., discount 10 per cent. Copper burrs in excess of 1-3 of combined weight of copper rivets and copper burrs, list plus 40 per cent., list plus 25 per cent.

Copper burrs only, list plus 40 per cent., list plus 25 per cent.

Ten Per Cent. Advance in Padlocks

Toronto.

PADLOCKS.—There has been an advance made during the week on all makes of padlocks. This includes the Eagle, Yale, Miller, etc., the advance amounting to 10 per cent. It is understood also that door checks have been advanced a similar amount.

Cotton Gloves Reach Higher Figure

Toronto

GLOVES.—Following the continued strength of the cotton market there has been a change made in the price of cotton gloves, which register an advance approximating 10 per cent. Prices are firm at the new level and there is no immediate indication that any change in the level just established will be made.

Change Recorded in Shovel Handles

Toronto.

HANDLES.—There has been a revised price issued in spade, scoop and shovel handles. these now being quoted to the trade at $6.25 per doz.

Sisal Hemp Goes Still Lower

Toronto

CORDAGE, TWINE. — The primary market on sisal hemp has shown a further decline during the week, and indications are that it won't be long before a revision downward is effective in the manufactured products. This may also affect the low grade manilas, for whereas the outlook for manila hemp in the Philippines is none too good, still the percentage of low grade stock will very likely be equal to requirements. The drought which is being experienced in that territory and which may be expected to curtail the output of quality hemp, is not likely to interfere to such an extent with the low grade. There has been no change reported locally in the situation on rope, although the demand has fallen off slightly. Pure manila is still being quoted at a base of 34c per lb.; British manila at a base of 30c per lb.; New Zealand hemp at a base of 30c per lb.; and sisal at 27½c per lb. Sisal lath yarn is quoted at a base of 27½c per lb. also.

BRIEFS FROM THE WEEK'S MARKETS

Copper rivets and burrs show a sharp advance in new quotations issued this week.

* * *

Competition has been a factor to reduce prices on hay wire in Montreal.

* * *

Scrap prices have been revised upward with copper leading the way.

* * *

Padlocks have undergone a revision upward, new prices showing an advance of 10 per cent.

* * *

Sausage stuffers, lard pressers, food choppers and many kindred lines are on the upward trend.

* * *

Brass and copper sheets, rods and tubing show further advances this week.

* * *

Linseed oil advanced from 7c to 15c per gallon in different quarters this week. Supplies are none too heavy.

* * *

Turpentine jumped 17c to $1.82 per gallon this week in Toronto. Other markets are higher too.

* * *

Door checks have advanced 10 per cent. this week, it is understood.

* * *

Cotton gloves have moved upward in price again.

Valves Move Up; Copper Wire Too

Toronto.

VALVES, COPPER WIRE.—There has been a revision made in some quarters on globe and check valves which undergo an advance amounting to 10 per cent.

New prices issued this week on copper wire, electrical basis, also show a further advance over those of last week of over 2c per lb. Reports from primary points indicate that brass manufacturers and a number of smaller consumers of copper, as well as the large smelters, including wire drawers and electrical machinery makers are prominent purchasers.

Oils and Gasoline Maintain Position

Toronto.

OILS, GASOLINE.—New developments are lacking in regard to market changes on coal oil, lubricating oil, gasoline or kindred lines. There is a splendid volume of business coming to hand, however, and refiners are experiencing one of the best seasons in their history. Prices have shown no change whatever during the week, coal oil being quoted at from 20½c to 23½c per gallon, according to grade and gasoline remaining at the unchanged figure of 32c per gallon.

Stove Business Better; Wares Active

Toronto.

STOVES, WARES. — Business has proved remarkably good for all lines of summer stoves, and, whereas there is a slight easing away of the demand, the orders continue to come in fairly good volumes. Manufacturers are watching the business on stoves and ranges quite carefully for fall, and indications are that there will be all the business which it is possible to handle. The outlook for material and capacity production is not considered any too encouraging.

There is a very fair volume of business being handled on the various lines of wares, and manufacturers indicate that they have no reason to complain along this line. Markets are holding very firm with copper goods showing a particularly strong undertone. Prices during the week have been maintained at levels shown in current market quotations.

Indications are that retailers are not buying ahead for fall any too freely and there is a feeling amongst the manufacturers that this may result in considerable delay in getting orders away promptly when they all pile in later. However, stocks are being accumulated in an effort to minimize any shortage later, and everything points to a splendid fall trade.

Nails and Wire Holding Firmly

Toronto.

NAILS, WIRE.—There is no disposition on the part of the manufacturers to make any special statement in regard to wire nails. The market is unquestionably ruling with a firm undertone, but whether business has been developed to a point where an increase would be considered justified is the question. Quotations are maintained for wire nails at $4.70 for 100 lbs. base, and cut nails are quoted at $4.75.

Business which is being done in the various wire products is steady with the undertone to the market firm. The base locally on smooth steel wire remains at $5 per 100 lbs., which is an unchanged figure.

Iron and Steel Bars Moving

Toronto.

IRON AND STEEL.—Jobbers seem to be satisfied that the business which is being done to-day on iron and steel bars represents a pretty satisfactory volume. There is no difficulty being experienced in getting a sufficient volume of stock to take care of the business offering, and in this respect they are quite happy. There has been no change in the base quotations, which are shown herewith:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Pipe Holds; Boiler Tubes Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—There have been no startling developments in the markets this week on wrought pipe. Business appears to be satisfactory and outlook generally shows improvement. Prices shown in current market quotations are without change.

Boiler tubes maintain a steady position and rule at the following unchanged figures:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Lead and Zinc Products Steady

Toronto

LEAD AND ZINC PRODUCTS.—The market remains without change. The lead outlook seems to be gaining strength but this has not affected manufactured products as yet. Solder shows no change from levels which have been prevailing for sometime past. Quotations follow:

Lead pipe, list, per lb.		$0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 8 inches, list, per lb.		0 14½
Above subject to discount of 10%.		
Lead traps and bends		15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.		0 17

Sheets Very Firm; Business Brisk

Toronto.

SHEETS, PLATES.—There is a much firmer tone to the market on sheets and the possibility of either a strike or a scale of increased wages in the mills the first of the month provides an element of uncertainty hard to gauge. In the first case it will mean deliveries will be slowed up, and in the second probably higher prices. Business has been showing decided improvement and the possibility of being tied up for material by a strike is not a pleasant outlook. In the meantime prices are well maintained with a move upward a possibility.

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Market Holds on Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—The market holds firm and without change. The volume of business gives no reason for complaint according to the manufacturers. The possibility of a carpenters' strike may mean a tie-up on the first of the month, but hopes are entertained that the troubles will be settled before then.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Old Material Prices Up; Active

Toronto

OLD MATERIALS.—A general revision in prices is again in evidence this week with the tendency upward. It has been months since there has been such a forward movement in the prices of what dealers will pay for material as is announced this week. Some of the more noticeable increases are, of course, taking place in the coppers, which are very strong for the moment. In fact it is not possible just now to contract for fourth quarter under 26. Light copper is marked up from 12 to 13¾, crucible from 15 to 18. Similar increases are noticed in heavy copper and copper wire. According to one dealer there is a much better feeling in the market, no matter how you look at it. There seems to be a conviction that things have definitely turned for the better. Business is good, and when we say that we mean just exactly what we say. We are both buying and selling in good volume. Foundries and mills in this country are taking on material more than for some time past. As far as the increases in copper are concerned there is a feeling that Germany will be in the market for a lot of this material and there is no danger of her dominating the situation. "The scrap metal market is better right now than it has been for a long time past," he concluded.

Dealers' Buying Prices—		
Tea lead		0 03½
Heavy lead pipe		0 05¼
Pipe scrap		6 00
Stove plate, per ton		13 00
No. 2 busheling		11 00
Yellow brass		0 09
Red brass		0 16¾
Light brass		0 07
Scrap zinc		0 06
Heavy copper		0 18
Wrought iron, No. 1, per gr. ton		14 00
No. 1 machinery cast, per net ton		18 00
Heavy melting steel		13 50
Old rubbers, boots and shoes		0 07
Overseas, lumbermen's rubber boots		0 04½
Bicycle tires		0 02½
Automobile tires		0 03¾

Copper and Brass Sheets, Rods Up

Toronto.

COPPER, BRASS RODS, SHEETS.—Strength is apparent in the market on copper and brass sheets, rods and tubing as evidenced in new prices established this week. Brass sheets are being quoted at a base of 41c per lb.; brass rods at a base of 39c per lb., and brass tubing at a base of 46c per lb.

Copper sheets, 16 oz., soft, are quoted at 43c per lb.; 14 oz., 44c.; 12 oz., 46c; 10 oz., 48c, with hard 1c per lb. extra on each gauge. Copper rods are quoted at a base of 42c per lb., and copper tubing at a base of 47c per lb.

Most Waste Prices Show Revision

Toronto.

COTTON WASTE.—A decline has been recorded in cotton waste prices in some quarters this week, the new prices effective being named as follows: White, XXX Extra, 19c lb.; XX Grand, 17¾c; XLCR, 16½c; X Empire, 15½c; X Press, 14c; Colored: Fancy, 15c; Lion, 13½c; Standard, 12c; Poular, 10½c; Keen, 9c; Cream polishing, 21c per lb.

Roofing Prices Show Move Upward

Toronto.

READY ROOFING.—Prices on some lines of ready roofing show an advance this week amounting to 10c per roll. Lines affected are Panamoid and Everlastic. The market is strong even at to-day's advances and outlook is for continued firmness.

Copper, Lead, Spelter All Move Higher

Toronto.

INGOT METALS. — Practically all along the line one can see how the increased demand which has become apparent during the last month is tending to strengthen the markets. Copper has responded very decidedly to the increased demand, and during the last week or ten days lead smelter and antimony have been ruling with a very firm undertone.

COPPER—The market has moved still higher and quotations here range from

25½ to 26c per pound. Buying has much improved, and it looks as though the accumulation of supplies, which it was feared would prove a drug on the market, will be rapidly absorbed.

TIN.—No new feature marks the position of tin this week with quotations ranging from 55c to 56c per pound, unchanged figures.

SPELTER.—The demand is not exceedingly large, but market maintains a firm position and an advance of ½c per pound is shown in this week's quotations of 10c to 10½c per pound over those prevailing seven days ago.

LEAD.—The buying movement is very pronounced and the market rules with decided strength. An advance is shown in quotations this week, which now range from 7c to 7½c per pound.

ANTIMONY—There has been no actual price change recorded in the quotation of 10c per pound. The market, however, is firm, and a very good volume of business is being done.

ALUMINUM.—Market changes are absent, with the price of 35c per pound still considered good. A little better movement is constantly apparent.

LONDON MARKETS

LONDON, Ont., July 24.—Summer lines are continuing to move nicely, and merchants are beginning to take in fall goods as many lines are scarce, and present indications are that they will remain so. Business in general has been good. Prices remain firm, and in most cases when changes are made they are to higher levels. The farmers are very busy, and many of them are nearly finished saving a splendid harvest. There is every indication that they will be large buyers, and that business from all parts of the country will be steady.

Prices of Nails Are Holding Firmly

London, Ont.

NAILS.—There has been a good demand for nails, and prospects are that it will be even heavier as there is a splendid lot of building under way. Prices show no change, quotations being as follows: Wire, $4.70 base, per 100 lbs.; cut, $4.75 base.

Higher Prices For Blue Ribbon Fencing

London, Ont.

BLUE RIBBON POULTRY FENCE.—Higher prices are in effect now for Blue Ribbon poultry fence for present and spring booking. The quotations are per roll of ten rods: 24 in., $4.86; 36 in., $6.25; 48 in., $7.25; 60 in., $8.60; 72 in., $9.85.

Sisal Hemp Weak Will Mean Decline

London, Ont.

ROPE.—While there is a good demand for rope and prices show no change sisal hemp is very weak and this will mean a decline. This will affect sisal rope and perhaps low grades of manila very shortly, it is expected. Quotations on rope are as follows: Pure manila, 34c per lb., base; British manila, 30c.; New Zealand hemp, 30c; sisal, 27½c.

Copper Bull Rings Have Been Advanced

London, Ont.

COPPER BULL RINGS.—New and higher prices on copper bull rings have been named as follows: No. 22½x2½ in., plain, $3.45 doz.; No. 72½x2½, light, self pierce, $3.85; No. 52½x2½, heavy, $5.50 doz.

Prices of Lanterns Show No Changes

London, Ont.

LANTERNS.—Prices of lanterns for present and fall bookings show no change, the quotations being: Tin, $12.50 doz.; copper wall, $17.75 doz.; search dash, $15.25 doz.

Price of Shells and Cartridges Firm

London, Ont.

SHELLS, CARTRIDGES.—Fall orders for shells and cartridges are now being shipped by jobbers. Prices show no change and are as follows: Shells, black powder, add 10 per cent. to list, smokeless, net list.

Higher Quotations on Wire Root Baskets

London, Ont.

WIRE ROOT BASKETS.—New quotations, which are higher, are in effect on this line as follows: ½ bus., $10 doz.; bus., $17 doz.; 1½ bus., $22.50 doz.

Hand Sleighs Go to Higher Levels

London, Ont.

HAND SLEIGHS.—New and higher prices for fall booking have been named on hand sleighs, Canadian Buffalo Sled make. The new list of prices is less 35 per cent.

No Changes Made in Price of Cow Chains

London, Ont.

COW CHAINS.—Prices of cow chains for present and fall bookings show no change from 20 per cent. off list.

Window Glass is in Brisk Demand

London, Ont.

WINDOW GLASS.—There has been a steadily increasing demand for window glass as many houses and other buildings now under construction are reaching the stage where the glass is needed. Prices are holding firm as follows: single diamond, 25 per cent. off list; double, 25 per cent. off list; cut lights, 10 per cent.

Linseed Oil Sales Are Unusually Good

London, Ont.

LINSEED OIL.—In spite of record prices there is an unusually good demand for linseed oil. Quotations are as follows:

	Raw.	Boiled.
1 to 2 bbls., gal.	$3 27	$3 30
3 to 5 bbls., gal.	3 26	3 29
6 to 9 bbls., gal.	3 24	3 27

Less barrels, add 10 cents gallon.

—"The Bulletin" (Sydney).

The Crown Rabbit—"What did you do in the Great War, papa?"

Mortar Color is Again on the Market

London, Ont.

MORTAR COLOR.—Mortar color or stain is again on the market and is offered at the following prices: Red, $1.55 per 100 lbs.; black, $2.50 per 100 lbs.

Putty Prices Firm But Show No Change

London, Ont.

PUTTY.—Putty is in fair demand and at unchanged prices, the quotations being on the following basis:

Standard, 100 lb. drums, $6.80 per 100 lbs.; standard, 25-lb. drums, $7.05 per 100 lbs.; pure, 100-lb. drums, $9.30 per 100 lbs.; pure, 25-lb. drums, $9.55 per 100 lbs.

Turpentine Market Continues Very Firm

London, Ont.

TURPENTINE. — Turpentine prices are holding very firmly, and there is a good demand. Quotations are as follows: Single barrel lots, $1.82 Imp. gal.; 2 to 4 barrel lots, $1.81; 5 gal. lots, $1.92.

White Lead in Oil is Showing Strength

London, Ont.

WHITE LEAD IN OIL. — Prices are very firm for white lead in oil and the demand brisk. Quotations are as follows: Pure, in ton lots, $16.35 per 100 lbs.; smaller quantities, $16.70.

WINNIPEG MARKETS

WINNIPEG, July 24—Price changes during the past week show revisions in quite a number of the staple lines, such as wrought washers, wrapping twine, soldering coppers, sash cord, awning cord and Stewart horse clippers, turpentine and linseed oil, practically all other lines holding unchanged.

Business is reported very brisk in all lines of trade, and with the recent rains throughout the Western provinces great improvement is reported in the crops.

Power Clippers Move Upward

Winnipeg.

POWER CLIPPERS.—New prices have just been issued by the Chicago Flexible Shaft Co. on their products for the season of 1920, and booking orders are now being accepted by the Winnipeg jobbers for spring shipments. Prices on a number of the lines have been advanced in some 20 to 25 per cent., which is very moderate considering the fact that prices on this line have only averaged about 10 per cent. over pre-war prices up to the present time. New prices do not affect the part. The only lines to be revised are as follows: Stewart horse clippers No. 1, $12 each; sheep shearing machines No. 9, $18; sheep shearing attachment for horse clipping machines $11.05 each; horse clipping attachment for sheep shearing machines, $7.50; automatic knife grinder, No. 3, $10.10; clipper grinder attachment, No. 11, $4.15.

Soldering Coppers Advance 1c *Pound*

Winnipeg.

SOLDERING COPPERS.—Soldering coppers also show an upward trend during the week, based on latest factory quotations, the advance being 1c per pound, which makes to-day's selling prices on the various sizes as follows: ¾ lb., 48c; 1 lb., 47c; 1½ lb., 44c; 2 lb., 43c; 2½ lb., 42c; 3 lb., 41c per lb.

Sash Cord, Awning Cord Up

Winnipeg.

SASH CORD, AWNING CORD.—Following the recent advances in all lines of cotton goods, new prices have been named on sash cord, which advances 4c per pound over former quotations, making to-day's selling prices as follows: Hercules sash cord in hanks or coils, No. 6, 76c; No. 7, 75c; No. 8, 74c; No. 9, 74c; No. 10, 74c. Awning cord, all sizes, net list.

Advance Recorded in Wrapping Twine

Winnipeg.

WRAP TWINE.—Further advances have taken place during the week in the price of wrapping twine, which moves up from 2 to 3 cents per pound following advances in the cotton market. To-day's ruling prices are as follows: Cotton wrapping twine, 3-ply in cones, 68c per lb.; 3-ply in balls, 72c; 4-ply in cones, 72c; 4-ply in balls, 76c.

Wrought Washers Decline Substantially

Winnipeg.

WROUGHT IRON WASHERS. — Wrought iron washers have shown a substantial reduction in price during the past week ranging from $1.40 100 lbs. on the smaller sizes down to 95c 100 lbs. on the larger sizes. Prices on the various sizes are given below.

Wrought Iron Washers—		Full Cases Per 100	Less Than Cases Pounds
Size of Bolt	3-16 inch	$15.00	$15.50
	¼ inch	13.20	13.70
	5-16 inch	12.40	12.90
	⅜ inch	11.50	12.00
	7-16 inch	10.80	11.30
	½ inch	10.40	10.90
	9-16 inch	10.30	10.80
	⅝ inch	10.20	10.70
	¾ inch	10.10	10.60
	⅞ inch	10.00	10.50
	1 inch	10.00	10.50
	1⅛ inch	10.00	10.50
	1¼ inch	10.20	10.70
	1½ inch	10.20	10.70
	2 inch	10.50	11.00

Turpentine Shows 35c *Advance*

Winnipeg.

TURPENTINE. — Turpentine prices have advanced 35c per gallon during the week, making to-day's prices the highest on record for years, and reports from the Southern States would indicate firm prices in this commodity for some time to come. To-day's ruling prices are as follows: Barrel lots, $2 per gal.; ½ bbl. lots $2.03; 5-gal. lots $2.05; 1 gal. lots $2.05, plus the usual extras for containers.

Linseed Oil Moves Upward

Winnipeg.

LINSEED OIL.—Linseed oil prices still continue upward with the price of flaxseed, a further jump of 10c being recorded during the week, which makes to-day's market prices as follows: Raw linseed oil, $3.05 per gal.; boiled linseed oil, $3.08 per gallon.

PITTSBURGH MARKETS

PITTSBURGH, Pa., July 24.—There has been a slight increase in steel mill operations, taking the country as a whole, since the first of the month, when the rate was about 70 per cent. of capacity. That rate had represented a sharp increase, as the low point of the year in operation, about the middle of May, represented barely more than 50 per cent. of capacity.

There have been further gains this month in the volume of orders placed, but these gains are chiefly finished steel lines, upon which mills are already well sold up, and thus the increased buying results more in the piling up of tonnage on books for forward delivery than in an increase in the rate of production. This condition is particularly the case in lap weld pipe and in sheets, though it obtains to a limited extent also in merchant bars.

Unfinished and Finished Steel Capacity

As is fairly well understood in the trade an abnormal alignment exists as to capacity available for the production of steel and capacity for the refinishing of steel, from the ingot or bloom through to the merchantable products, bars, shapes, sheets, pipes, wire, etc. This arises from the steel making capacity having increased 40 per cent. since 1914, largely due to the demand for shell steel, while there was not corresponding expansion in finishing capacity, except in plates. Accordingly it would be difficult for the steel industry to work up to operating at capacity, on the basis of ingot capacity, which is used in figuring the percentages mentioned above, unless the orders for finished steel products were distributed to fit exactly the

capacities in the different finishing departments. Some estimates are that with further expansion in demand between 85 and 90 per cent. of the steel making capacity can be utilized.

Mills that have an excess of steel producing capacity are, of course, considering the matter of adding finishing capacity to take care of the additional steel making capacity. The alternative to abandon some of the steel making capacity is altogether unthinkable. A case of this sort is that of the American Rolling Mill Co., Middletown, Ohio, which increased its steel making capacity very considerably during the war, and furnished large quantities of shell steel. This company has adopted plans for extensive additions to finishing capacity, and is now in the market for the requisite buildings, involving 3,200 tons of fabricated steel.

Heavy Bookings in Some Lines

For the last week for which the compilation is available, the American Sheet and Tin Plate Co. reports the largest bookings it has had for any week in its history, barring only one week in the fore part of last year. The compilation refers not to contracts entered but to actual shipping orders entered, including specifications against contracts. The bookings were heavy in both sheets and tin plates. The National Tube Company booked in the first half of July a tonnage somewhat in excess of its entire capacity for a month. In both instances deliveries on most of the tonnage booked will be deferred weeks or months. In some sizes of lap weld pipe orders now entered cannot be shipped before November or December. Butt weld orders, on the other hand, can be filled promptly, and indeed are being filled to an extent from stocks accumulated earlier in the year.

The extremely heavy demand that has existed for months for line piping and other oil country goods is looked askance by some pipe mills as being due to an oil boom that cannot possibly continue indefinitely. It certainly seems strange that there should be so heavy a demand as to fill the lap weld departments of the pipe mills, when other users of lap weld pipe have been buying very sparingly indeed. The attitude is reflected in the failure of other pipe mills to follow the price advance announced early in the month by the Wheeling Steel & Iron Co., 2½ points on butt weld and 5 points on lap weld, about $5 and $10 per net ton respectively.

Demand Spreading

For several months past the condition as to steel demand has been that of certain lines of consumption being very active and others being very quiet, a natural enough situation when the country is recovering from war time conditions, as some lines of activity can return to normal sooner than others. For several months the leading lines in the matter of buying steel were the petroleum industry and the automobile trade. The sheet mills found a few months ago that they were receiving a moderate volume of business in the aggregate, equal, to what the tonnage was from the automobile trade. If their other customers had bought with corresponding freedom the mills would have been oversold. Now the sheet mills find their orders very much better distributed, as all their customers are buying with more or less freedom. In particular there is now a good demand for sheets involved in the building trades, as for instance for sheets for making metal lath.

A similar spread in demand is observed by the merchant bar mills. For a time the only branch of their business really active was represented by their cold drawn steel customers, who were fairly busy making material for the automobile and associated trades. Now, however, other customers of the bar mills have been coming into the market more freely, including the agricultural implement makers and machinery builders generally, while there is a better demand for concrete reinforcing bars.

Demand for structural steel, however, still lags, although it is improving, and demand for plates is wretchedly small in proportion to capacity. Plate mills attached to pipe works have a fair volume of work in making plates for large pipe, and there has been an active demand from the oil trade, involved in tanks for oil storage and in small boilers for field work, the kind that can be rolled over the ground by a team to a point otherwise inaccessible. Most lines of plate consumption show decided inactivity, and even demand for shipbuilding is unsatisfactory as the shipyards are still drawing from accumulations. As a result of these conditions the regular or official price of plates, 2.65c, continues to be shaded very frequently, generally by $3 a ton or to 2.50c, while other finished steel products show scarcely any deviations from the regular prices, those that became effective March 21.

Decline in Chain

While the producers of finished steel and the producers of most manufactured steel products, such as rivets, bolts and nuts, cold rolled steel, etc., have been doing team work and holding prices quite well, a disturbance has occurred in the chain trade. The American Chain Co., the largest producer, feeling that it was not getting the share of the total business to which it was entitled, recently made sweeping reductions in prices of ordinary or black chain, much to the surprise of other producers. They accepted the reductions, of course, but for a time considered the advisability of rejoining by making other reductions, as in bright chain, for instance, but this idea was abandoned. The reductions on black chain included a reduction in the base price, on one inch proof coil chain, from 6.50c to 6.75c, reductions also in most of the extras for size, and reductions in the extra for BB and BBB quality, whereby the average reduction on an assortment probably runs from $25 to $30 per net ton.

BIG FIELD FOR SPORTING GOODS

As a market for baseball goods, and in fact for all sporting goods, notably tennis, there surely can be no better field than Western Canada. The West this year, more than ever before, is ball crazy. So great is the interest that the Western Canada professional baseball league is in a flourishing condition with big attendances at every game in Regina, Moose Jaw; Saskatoon and Winnipeg. But it is in the amateur field that the greatest interest lies. There is scarcely a town or village in the West that has not got its ball team, and in many cases its junior and senior teams. The big event at all picnics and sport days is the baseball tournament for which prizes of from $100 to $300 are hung up. The keenest rivalry has been developed between towns with the result that there is a constant interchange of matches.

In keeping with the general spirit of the West nothing is too good for the average ball player. He wants the most expensive bats, balls and gloves, and if he cannot purchase them in the home town he sends away for them. The advent of so many United States citizens into the West has given an added zest to the game. On July 4 this year there were baseball tournaments at many points in the West.

In conversation with a representative of the Dominion Cartridge Company, who has been travelling extensively over the West, he stated that the market this year for shells was not so good as in former years, due, he says, to the exceptionally dry weather. With the water in the sloughs completely evaporated the ducks have had to seek the larger bodies of water, and the sportsman sees a poor season ahead, at least this appears to be the opinion of merchants for they are not buying in the same quantities as formerly.

Paint Selling and Boosting

It Always Pays to be a Booster—The Hardware Man Has a Big Opportunity to Increase His Business and Sell More Paint by Co-operating Closely With the Public—Paints and Varnishes Essential to Progress.

SELLING paints and varnishes is a booster's game! The wide-visioned, public-spirited paint dealer, in sympathetic touch with every forward movement in his community, is an asset to himself and the public at large.

When possessed with "get-there" energy, and "come-along boys" enthusiasm, he can be a decided factor in any "step-along" effort that may be put forward in his town.

"Co-operation" is second nature to such men. They don't have to be dragged into the good things of life. They drag others in. They help, they cheer, they whistle, they put a shoulder to the wheel when things get mired.

No communal effort seeking to improve the material appearance of property overlooks the necessity and good offices of paints and varnishes. Here is where the paint dealer has a ready means of putting himself in right.

But it is no job for a grouch.

A Wide Field

There is a wide field for operations that will benefit his community and incidentally his own private paint and varnish business.

Man's social instinct and desire for human intercourse has laid a broad basis for co-operation and has characterized every step in civilized progress.

The more complex human affairs become, man becomes more and more dependent on his fellows, and human events become more and more contingent one upon another.

Merchandising in its present highly developed state can attribute its growth largely to the recognition of this relation and to the contingency of events.

The ability to fully comprehend this inter-relationship of events and conditions, and the inter-dependence of human beings has been one of the main reasons why many of our large merchants have won the success they have.

One Price Idea

The one price idea in selling goods has not only promoted confidence in the retailer who conducts business in this manner, but it has taught his trade to depend upon him for asking what is a fair price, no matter who comes into his store. People learn to rely upon such a merchant's judgment as a standard upon which they can base values.

Foreseeing what will happen as the result of certain trade conditions and linking these with human tendencies has enabled many merchants to plan their successful selling and advertising efforts.

It was mainly because John D. Rockefeller was peculiarly gifted in this respect that he was able to build his immense manufacturing, selling and distributing organization. It is said of Rockefeller that he could see, that by bringing one set of circumstances in one locality in contact with a condition of affairs in another locality that he was able to build up business opportunities that few other men could foresee.

Rockefeller was a strong advocate of good roads.

"What have good roads to do with paints and varnishes?" someone asks.

Are the Bed Rock

Frank C. Sumner, treasurer of the Hartford Trust Company, says: "I believe good roads and paint are the bed rock of perfect civilization. Surely paint suggests the lawnmower, the lawnmower suggests neat yards and good walks, attractive flowers, together with clean buildings."

There is a wealth of suggested sales possibilities for the live paint and hardware dealer in the short sentence of that banker. Sales of paint, lawnmowers, cement, cement tools, seeds, garden tools, hose, window screens and a host of other articles required for the upkeep of a garden and a neat house.

If every householder in the community strove to bring his property up to the ideal of this banker there would be an immense boom in the sales of every hardware store.

If any community started a "buck-up" movement of this nature would it pay the local hardware man to drag behind and grouch about it? Not much, his place would be right up in the front rank helping things along.

Co-operation Essential

To do this requires broad-minded recognition of the inter-relationship of men and events. It requires recognition of co-operation in its broadest sense. A merchant must place himself in contact and sympathy with all the activities and forward movements that take place in his community.

Rockefeller recognized what it meant for the oil business to have good roads, as well as the benefit they would confer on humanity at large. Good roads are merely taken as an example of what may be done to boost things along. There are many other movements of a beneficial

PAINT SELLING AND BOOSTING

(Continued from page 58)

nature which are taking place in our agricultural communities and which the paint dealer should be in sympathy with and active in promoting.

Farmers are no longer contented with a "hay-seed" standard of living. They are surrounding themselves with creature comfort fully up to the standard of their city cousins. Appearances count with them as strongly as with the city dweller and paints and varnishes contribute no small amount to their efforts.

Hardwood floors requiring the best grades of varnishes and waxes are replacing the pine floor and the rag carpet. Color schemes for the suitable decoration of the up-to-date home are concerning the farmer as much as the urban dweller. The up-keep of his automobile requires paint and varnish. Agricultural colleges and courses in improved farming are placing stress on improved farm equipment and barns.

Sooner or later all these movements lead to paint for protection and decoration, and the farmer is learning co-operation in the exchange of these ideas with his neighbors. He is rapidly moving forward and he has the money with which to move forward.

The fact that he is not doing these things single handed, but collectively gives the local paint dealer an opportunity to get in touch and sympathy with much good business.

Boosting good roads is good paint and varnish business. They mean better and easier marketing facilities. They mean that farmer Jones and his family get to town easier and oftener. He doesn't have to want until the roads dry up so that he can sell his produce and spend his money. He can crank up the flivver or six cylinder when he pleases and hop along, rainy weather or dry.

Given good roads and an automobile, John Rogers of one township is quite likely to run over and see Joe Simmonds in the next township more frequently. More frequent hospitality on the part of Joe makes him want to spruce up his property, and Joe's sprucing up means paint sales.

It may not always be apparent at the outset, but any go-ahead idea, whether in city or country, sooner or later involves the use of paint and varnish. Paint dealers cannot afford to overlook them. They cannot be out of touch with them and hope to advance the interests of their paint departments.

Anyway it pays to be a booster—even if it's only for the fun of being in the swim—or for the service that you can render your fellow-man in making the world a better place to live in.

THE MAN WHO GETS OUT THE GOODS

(Continued from page 49)

men come into my office I can not only tell them to do something, but if necessary I can tell them how to do it. And yet all the technical education I ever had I got at night school and through a correspondence course. Any young man has the same opportunities. All he needs is the will to use them. That and the alertness which will make him look around for chances to show his usefulness.

"When we have made our locomotives, got them finished and accepted by the customer's inspector at our plant, you might think that we were through with that job. But we we haven't yet delivered the goods. We still have to see that those locomotives reach the purchaser, and that they run all right after he gets them. We send men out all over the world with these shipments: to Vladivostok, to Tien-tsin, to Rhodesia, to Cape Town, to Chili and Brazil, and the four corners of the earth.

"In this country we used to ship the engines 'dead'; that is, have them hauled by other locomotives. But the present Railroad Administration requires us to send them out under their own steam, hauling tonnage. A locomotive, however, is like the new ship of which Kipling wrote: it has to 'find itself.' All the hundreds of newly-made parts have to get used to working together.

"Even when a new engine is merely hauled as dead freight, it is liable to develop trouble. We always send them out with a 'messenger' who rides on the new engine and watches it. If it is a part of a fast freight train, some of the bearings may get too hot. When that happens, the messenger has the locomotive cut out of the train and sidetracked. And he goes to work on it then and there.

"After the messenger has taken it to its destination, he turns it over to another of our expert men, who then breaks it in to regular service. He goes with the crews who are to run it, and he does not leave until everything is satisfactory. Even after that, if it develops trouble, I send a man to replace parts or make any necessary changes.

"You see, engines have grown to enormous proportions. We recently made some of the Mallet type that weighed six hundred tons. We lined up, alongside one of these monsters, a hundred foremen from the different departments engaged in making it. And that line of one hundred men was shorter than the machine itself. It is a wonderful experience to build things like that. The next time you see a locomotive, just think of all the man-power that is behind it. Hundreds of human beings have put their time and thought and labor into that mass of iron and steel and brass.

"I believe that one result of the war is that people in general are taking a more intelligent interest in business than they ever did before, especially the business of manufacture. The explanation is simple: they have gone into that business themselves! Through the Government, they embarked in the greatest production of goods that the world has ever seen. They put up billions of dollars to finance Uncle Sam—to help him get out the goods. They have learned something of the gigantic problems involved in production on a large scale. And I am glad that this is so. For the more we know about business, and the more we understand that it is the very lifeblood of national health and prosperity, the more we will want to know about it. And that will be a good thing for us, and for business itself."

Lumber Prices May Be Probed Shortly By the Government

Calgary Contractors' Association Charge Profiteering and Discrimination Against Canadian Consumers— Investigation Will Be Welcomed, Says Lumberman.

FROM the very close connection which it has with the building situation hardware men all over the Dominion are interested in an enquiry which may be made by the Government shortly into prices of lumber. The demand for a probe was made by the Calgary Contractors' Association, which at its annual meeting sent a wire to Sir Robert Borden, uging that a prompt and thorough investigation be held into the prices of lumber charged by the British Columbia Lumber Manufacturers' Association. The Calgary contractors charge that there is profiteering, and that Canadian consumers are discriminated against, while American buyers are favored. As a result, they claim, industrial discontent is being increased, work in Western Canada is being held up and business is badly handicapped.

Welcome Probe

"We shall welcome the fullest and most searching investigation into the affairs of the mills comprised in the Mountain Lumber Manufacturers' Association," said H. H. Ross, president of the association, while in Calgary on his way to Waldo,B.C.,where the mills of the Ross-Saskatoon Lumber Co., of which he is the head, are situated.

"The Mountain Lumber Manufacturers' Association want the whole truth known," said Mr. Ross, "and with the facts before the public and before the Government we shall have no apprehension as to the verdict respecting our profits."

Mr. Ross stated that the British Columbia mills had lost money for the last 10 years, and some had gone into liquidation, for example, the Fernie Lumber Co., with liabilities of $200,000. Respecting the charge that the British Columbia lumber manufacturers are discriminating against the prairie consumers, Mr. Ross declared it was untrue.

SIXTH ANNUAL CONVENTION

The Stanley Works, New Britain, Conn., held their sixth annual salesmen's convention during the week of July 14, with addresses by the different officers of the company.

A programme was laid out for each day with sessions from 8.30 until 1 o'clock. During the afternoon of each day the salesmen were escorted through the factory or entertained in other ways.

To conclude this salesmen's convention the entire office force, numbering about three hundred, with the salesmen, journeyed to Lake Compounce by trolley, where they had a dinner and a very enjoyable afternoon.

Western Merchant Will Be Prosperous

No Need For Widespread Alarm Over Crop Situation—Serious Enough in Spots—Much Business Will Be Done—Wide-Awake Merchant Can Beat Order House to It—Travellers Use Cars

AFTER spending between two and three months in the Western provinces, J. E. Penfound, of McArthur, Irwin, Limited, has returned to Montreal. In an interview with HARDWARE AND METAL Mr. Penfound made some interesting references to the Western crop situation and also referred to some matters of importance regarding the retail trade there.

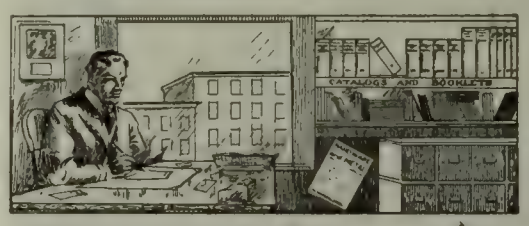
That parts of Saskatchewan and Alberta have been very hard hit is a fact which there can be no disputing. This is particularly disturbing when it comes to sections where there have been several complete or partial failures in successive seasons. Some districts, and especially in the country south of Calgary, have been needing a crop for the past three years and in some instances this is the fourth failure. It makes the situation a hard and difficult one to face.

"It has been estimated that Saskatchewan will have a one-fifth crop failure," said Mr. Penfound. "Even taking these figures, that does not mean that all the farmers in the area affected will be in a bad way. Some of these will not be badly off, for they perhaps have had a crop or several good crops in succession."

This is a very important consideration, and one which is doubtless overlooked to a great extent. Insofar as the hardware merchant is concerned it must mean that he is not to be confronted with so serious a problem as press reports would indicate.

Credits Are Fewer

Asked as to the average condition among retailers, Mr. Penfound believed that the storekeeper has been getting his business gradually upon a better financial basis. The old-time long credits are being curtailed and many are now aiming at a 30-day basis of credit extension. This has been better for all concerned and a great many of the merchants have been working from under their load to the jobbers and are now in the possession of their own goods.



The Western merchant has been in a good position to secure payment for his goods and has done so in many cases. This has worked out to his own advantage and also to that of his customer. With good crop returns at high prices there has been no excuse for long credits being given. Mr. Penfound believes that there will continue to be improvement in this respect.

Mail Orders—Auto Travel

An important observation made was that regarding the wide use of automobiles. Mr. Penfound stated that the average traveler was using a car over his territory, and perhaps a majority of the wholesale houses favor this means of travel for the men. They can make many towns and are in a position to select the town or city in which to stop over night. This has given rise to the necessity of providing good accommodation and suggests the need of the merchant interesting himself in the accommodation to be had in his own town.

Another point which might have the attention of the merchants in a given town is that of providing something of interest for the farmers themselves. True it is that many stay at home and use the mail-order catalogue in making up their wants. But the merchant can afford a better service, and Mr. Penfound believes that he can get the business that goes away if he is aggressive enough. He can very frequently give better service and better goods and should not fear the competition thus presented. It is largely up to the merchant just what the results will be.

Speaking of conditions throughout the West generally, Mr. Penfound believes that there will be little cancellation of placed business and that the Western merchant, already a more careful buyer than he was some years ago, will continue to buy freely of a big variety of merchandise.

Black & Decker Mfg. Co.

The Black & Decker Mfg. Co., 105 S. Calvert St., Baltimore, has just issued a catalogue in which are described in detail the lines of electric air compressors, portable electric drills and electric valve grinders manufactured by the firm. The catalogue is profusely and most attractively illustrated, the pages measuring eight and a half by eleven and a half inches. Complete data regarding capacity, motor, housing, cylinder, valves, piston, piston rings, gearing, cooling, lubrication and finish of each piece of equipment listed, is given. Readers of HARDWARE AND METAL may obtain a copy of the catalogue upon request.

Merrick Anderson Co., Ltd.

A series of bulletins containing general news items as well as items of trade interest are being sent out by the Merrick Anderson Co., Ltd., Winnipeg, to their customers and to their travellers. The bulletins vary in size, ranging from six to ten pages, and are attractively printed and frequently carry illustrations. As might be expected they deal with a wide variety of topics, covering happenings throughout the world. The items are written in a brief, breezy style and carry a simple, direct message regarding whatever is being discussed.

PLAN YOUR WORK

(Continued from page 41.)

cated for handling this business as it has a double entrance. Fronting on the main street it runs right through the length of a block and has a rear entrance that opens out onto one of the busiest sections of the market. London market is one of the most important in the province. There are three market days each week, Tuesdays, Thursdays and Saturdays. While Saturday is the big day, there are many thousands of farmers and citizens at the market on Tuesdays and Thursdays, and the firm aims to reach as many of these people as possible. On Saturdays the market is frequently so crowded that its capacity is tested, and naturally there are large numbers of people in the crowd who are out to shop and with lots of ready money in their pockets to pay cash.

Are Good Buyers

"There are no better buyers than the farmers of this district," said Manager Jones. "They are well to do and their trade is well worth going after. They know what they want and they are willing to pay for it. Some of the farm homes in this district are among the best residences to be found in any country district in Canada. They are well built and comfortablet and well equipped. The farms are well kept and the buildings are kept up. We sell thousands of dollars worth of paints to these people in addition to large quantities of other goods. They thoroughly appreciate the value of painting in protecting their buildings and their machinery as well as in beautifying their homes. We find that the farmers are big buyers of auto accessories also. Every year sees more cars purchased and good cars too. In some sections the farmer who has not an auto is the exception. There is a lot of good business to be had among prosperous people of this kind and they are all ready and willing to pay cash for what they buy. Our sales of harvest tools this season have been splendid and during the spring we turned over a lot of roofing both for new buildings and for repairs.

In Close Touch

Although a very busy man Manager Jones is never so busy that he cannot keep in close touch with his customers. He has a wide acquaintance not only in the city, but among the farmers, their wives and families. He is in very close touch with the builders of the city and lines up a lot of good business through these sources. Also he is the energetic president and one of the most active workers in the London Retail Hardware Dealers' Association. This organization has extended its work out into the district around London, and has been able, through its efforts, to straighten out many of those problems which are constantly occurring and which can only be solved by co-operation.

The Salesman's Good Word

The salesman's finger is always on the pulse of the buyer, and he is, therefore, a good judge of the merit of the goods he sells over the counter. It's pleasant business for a salesman to recommend and sell things that always please, and bring customers back for more of the same.

This is why Berry Brothers Varnishes, Enamels and Stains have won the salesman's good word. There are never any complaints of "Berry" brands, they always satisfy because they are uniformly good and reliable.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, July 24.—The linseed oil situation is harder than ever to define and supplies become increasingly less. Practically all quotations are withdrawn and the basis is decidedly a nominal one, with prices subject to withdrawal when made. The latest flax prices for July option are above $6 and few are buying much seed, except for immediate crushing. The turpentine situation is still a firm one and advanced prices are in effect this week. It is expected that higher prices still will prevail. The rosin basis is also higher this week. Lead in oil and putty are without change. There is an excellent volume of business, especially for prepared paints and varnishes.

Linseed Oil Over $3; May Be Much More

Montreal.

LINSEED OIL.—It is very hard to forecast the probable price trend of oil. Flax markets on July options were well over the $6 mark on Wednesday, with the likelihood of further advances being made. Weather reports have been an influence in firming the undertone and the situation may develop any extreme as far as high prices go. In the nature of things prices are not named in many quarters, and purchasers cannot hope for any but a nominal basis at present. Orders are being filled with difficulty, in some cases. Some further quotations exceed $3 per gallon.

Raw—	Imp. Gal.
1 to 4 barrels	$2 95
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$2 97½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Turpentine Again Up; Rosins, Too

Montreal.

TURPENTINE, ROSINS—A stronger market in the South is assigned the reason for advances in this market and the lowest quotation this week is that of $1.70. It is probable that buyers will have to pay more for the product, for the producers are demanding high prices. Both Savannah and New York markets are higher this week. Small lots are quoted at close to $2 per gallon.

Rosins are very firm at higher prices, $21 per barrel being the ruling price here for "F" and "G."

Turpentine—	Imp. Gal.	
1 to 4 barrels	$1 70	$1 75
Small lots	....	....

(Packages extra.)

White Lead in Oil Strong; Unchanged

Montreal.

WHITE LEAD IN OIL.—A stronger pig lead situation has developed in the United States and this will have the effect of strengthening white lead in oil. There have been no changes and the basis is steadily and firmly held. Business transacted here for standard grade is conducted on the base price of $15.50 per cwt. for five ton lots, $16 for ton lots, and $16.35 in smaller quantities.

ROSINS WILL GO HIGHER

"The prices of rosin are always lowest in the months of April, May and June," said a Montreal importer to HARDWARE AND METAL this week. "From now on they will advance and there will be higher prices right along."

This expression indicates the trend of the market. Prices have been advancing regularly until the quotation now on 280 lb. barrels of "F" and "G" is $21, probably higher than it has ever been and still the end is not yet. Prices seem bound to advance.

One of the most immediate contributing reasons for higher prices comes from the excessive wet weather conditions in the Southern States. This has interferred with production and there will be less rosin to go around. The tendencies are distinctly upward.

No Changes Made But Putty Firm

Montreal.

PUTTY.—There has been a steadily maintained basis for putty, but no changes are made. This is a somewhat quiet selling season and the tonnage sold from week to week is of reduced compass. The basis here remains as follows:

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

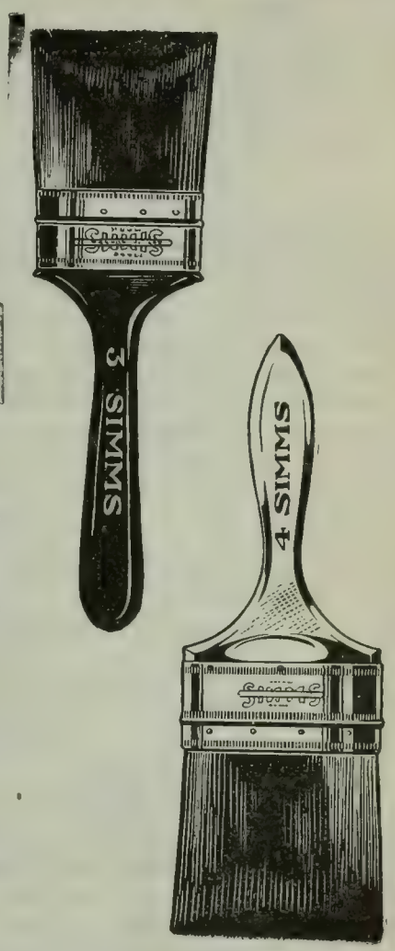
Orders Still Many For Mixed Paints

Montreal.

MIXED PAINTS.—An excellent business is being transacted for mixed paints and specialties and there is a good feeling manifest. "This business is regular and for the various lines and is therefore sound," was the way one large manufacturer put it in speaking this week with HARDWARE AND METAL. It does seem that there has been no interference with trade because of the higher basis reached ten days ago. The paint is being used for regular needs and there is a splendid outlook.

TORONTO

TORONTO, July 24.—Both turpentine and linseed oil have made substantial advances and with the markets very strong and firm still higher quotations are expected. All records for turpentine have been shattered in the Southern markets, and prices to-day are 12 cents higher than a week ago. Local quotations are higher as well. Rosins of all kinds show extensive advances and during the week lower grades have advanced as much as $1.10. Linseed oil quotations range from $3.20 to $3.27. Turpentine is being sold at from $1.80 to $1.82 per Imperial gallon.



Turpentine Soars To New High Records

Toronto.

TURPENTINE.—Latest advices from the Southern markets are to the effect that there is no telling where turpentine is going to stop in its advance skyward. To-day's quotations are just 12 cents higher than those of a week ago, and turpentine is still climbing. Heavy buying for overseas business combined with the fact that this year's crop will not be a large one and that buyers are bidding keenly for it, is responsible for the big jump. Some of those in the trade are looking for $2 turpentine here before long. Rosins are showing great strength. The low grades have advanced as much as $1.10 during the week. While the high grades have also increased in price the advance is not proportionate, indicating that buyers are making the cheaper grades answer their purpose.

TRADE SIMMS MARK
SET IN RUBBER

Simms' Paint Brushes

Sold All Over The World

The demand for Simms' Set-in-Rubber Paint and Varnish Brushes extends all over the world. There are none like them anywhere.

Your customers know this. See to it that you have a full stock on hand.

BRITISH AMERICA PAINT CO., LTD.

VICTORIA VANCOUVER CALGARY EDMONTON REGINA

The range of quotations for turpentine is as follows:

Turpentine—	Imp. gal.	
1 barrel (barrel included) ...	$1 80	$1 82
2 to 5 barrels (barrel included)	1 79	1 81
5 gallon lots	1 90	1 92

Linseed Oil Is Steadily Advancing

Toronto.

LINSEED OIL—Further advances are registered in linseed oil and with a strong and very firm market there seems little prospect of any decline. Overseas buyers are still a big factor in the market and large quantities of Argentine seed continue to go to them. Little relief is expected in the situation on this side of the water until the new crop comes in. Quotations this week range from $3.20 to $3.27.

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 20	$3 27
3 to 5 barrels, gal.	3 19	3 26
10 barrels and over	3 17	3 24
	Boiled	
1 to 2 barrels, gal.	$3 23	$3 30
3 to 5 barrels, gal.	3 22	3 29
10 barrels and over	3 20	3 26

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Prepared Paints In Brisk Demand

Toronto.

PREPARED PAINTS. — While the record business, which has been keeping many firms working overtime for some weeks, is easing off a little, orders are still coming in in large numbers and manufacturers state that the demand is brisk. The new and higher prices, which are now in effect, are likely to hold for some time, it is stated, although linseed oil and turpentine are constantly making new records.

Paint Brushes Will Not Change At Present

Toronto.

PAINT BRUSHES.—Prices of paint brushes, it is stated, are not likely to change now until January. Manufacturers have enough bristles on hand to meet all ordinary demands until that time. Business, it is stated, is very satisfactory, and there is every indication that it will continue so.

Advance is Expected In White Lead in Oil

Toronto.

WHITE LEAD IN OIL—With pig lead prices now advancing and linseed oil at high levels, an increase in the quotations on white lead in oil would cause no surprise. A very satisfactory volume of business has been coming in. Prices show no change and are as follows: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Window Glass, Putty Remain Unchanged

Toronto.

GLASS, PUTTY.—Business in window glass is developing slowly as the building season reaches the stage where glass is required. Prices show no change. Putty prices remain firm.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron ...	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons..	6 70	6 95	7 30
Bladder, in barrels...	7 10	7 35	7 50

Court Preserves Right Of Freedom to Trade

The long recognized right of a trader who is engaged in private business to deal with whomsoever he pleases and to refuse to deal with others is reiterated in the United States Supreme Court's recent decision affirming the view taken by the U. S. District Court for the Eastern District of Virginia, in the case of the United States vs. Colgate & Co.

This case has attracted nation-wide attention since its beginning on account of its bearing on the subject of price maintenance.

Colgate & Co. refused to sell their goods to certain price cutters, persisting in its policy in the face of a warning from the U. S. Attorney General that indictment would result.

An indictment was filed, alleging violation of the Sherman Law.

The issue was made up and presented to the trial court on the defendant's demurrer to the Government's indictment.

The Supreme Court, in review of the case, found that the district court ruled correctly in quashing the indictment.

In the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. And, of course, he may announce in advance the circumstances under which he will refuse to sell."

This decision gives a renewed and unmistakably clear definition of the purpose of the Sherman Act to "prohibit monoplies, contracts and combinations which probably would unduly interfere with the free exercise of their rights by those engaged or who wish to engage in trade and commerce—in a word to preserve the right of freedom to trade."

Goods and Good Will Defined by Courts

The New Jersey Court of Chancery giving its decision recently in the suit of Ingersoll & Brother vs. Hahne & Co., of Newark, granted an injunction against the defendant to prevent the retailing of the Ingersoll $1.35 watch at a price less than that without first removing the manufacturer's name and guarantee.

The significance of this ruling is its distinction between goods and good will.

The United States Supreme Court has decided that one who has sold any article outright to another for reselling cannot legally dictate the resale price, regardless of the character of the article.

The Federal Trade Commission has ordered that the manufacturer must not endeavor even to influence the dealer regarding the resale price and must not refuse goods to a price cutter because he is such.

The New Jersey Court's distinction recognizes the interest which a manufacturer retains in his product that bears his signature.

This decision in part is made under a New Jersey statute which other states do not have, but its applicability in any state is suggested by the court's assertion that the complainant was entitled to an injunction under the common law. So a ruling of this sort would be possible anywhere in the absence of a statute.

SELLING A STICKER

A hardware merchant had a number of tree protectors which he could not move. No matter how eloquently he "talked" them to the trade he was unable to make a sale.

"Why don't you make a window display of them?" asked a department store decorator to whom he was telling his troubles.

"Oh, I have put them in the windows, but it doesn't do any good. People don't look at them!"

"Well, that's just the trouble," commented the decorator, "you don't make them look into your windows!"

So that evening they fixed up a window display adopting the department store style. The next morning, when the shade was drawn, a crowd promptly collected. There was a crowd there all that day and that night less than a dozen tree protectors were left in stock. It worked so well that the hardware man wired for another shipment to be delivered immediately.

And this was what passersby saw:

In the window were about a dozen small fruit trees, such as nurserymen sell. Half of them were protected by the tree protectors which the hardware merchant had for sale, while the balance were unprotected. Half a dozen rabbits were making themselves at home in the window. By nine o'clock they had gnawed the bark off the young trees as high as they could reach; the protected trees were unharmed.

The display spoke louder than a dozen direct sales talks. People saw the four-legged vandals at work before their eyes and they hastened into the store, having their own trees in mind.

But that was not all. Over in a corner of the window there was a small tree and a model of a boy pushing a lawn mower. He had bumped into the tree and skinned off the bark in one place with the mower. A protected tree on the other side of the mower was unharmed.—System.

PEACE—and the "NEW ERA"

At last—the Peace Treaty is signed. Men will now be able to give attention to matters which have for nearly five years been put aside as of small importance.

Buildings have for several years been left without repainting because such expenditure was regarded by many as an undue extravagance in war time. **That is changed now. This is the paint dealer's opportunity! Grasp it!**

"NEW ERA" Paints are made from the best materials which money can buy. THERE ARE NO BETTER PAINTS ON THE MARKET!

Our agencies, established for years, throughout Canada, continue to supply thousands of customers who would have no other brand.

Are YOU in line? Write now for our proposition.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

Your Real Profit

is greatest when selling a high grade line, such as

C·C·M·
BICYCLES

Even if the percentage of profit were higher on a cheaper line, it would soon be offset if the rider had to be constantly demanding adjustments and free repairs on account of faulty construction.

Many a dealer has ceased pushing "bargain" bicycles for just this reason.

"ANTHES" ADJUSTABLE SINK TRAP

Increase your sales and profits with this profitable line.

The "Anthes" Adjustable Sink Trap is the most economical and convenient trap on the market. Cheaper than lead, costs less to instal, and is more durable. This Trap is very neat in appearance, and can be used for either basin or sink. When required for basin connection, we supply a 1½" x 1¼" slip-joint nut.

We also manufacture a line of plain S and P Traps, Bottle Traps, Adjustable Bath Taps, Sink Collars, Sink Brackets, Boiler Stands, etc.

Descriptive Circular sent on application. For sale by all leading jobbers—specify "Anthes" when ordering.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

For months we have looked for the day **The Peace Treaty** would be signed and the event will be marked by thanksgiving and celebrations of various kinds. No celebration will be complete without the **glorious old Union Jack** floating everywhere. Flags are continually wearing out. Stock up for immediate sales and delivery. We have a large stock and our prices are right.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONT.

THE PROGRESSIVE MANUFACTURING CO.
Terrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Moulding, Flooring, Slating, Box. Fence, Barrel Nails, 25c per 100 lbs. over common nail prices. Finishing Nails, 50c per 100 lbs. advance over common nail price. Clinch Nails and Sash Pins, 75c per 100 lbs. over common nail price.

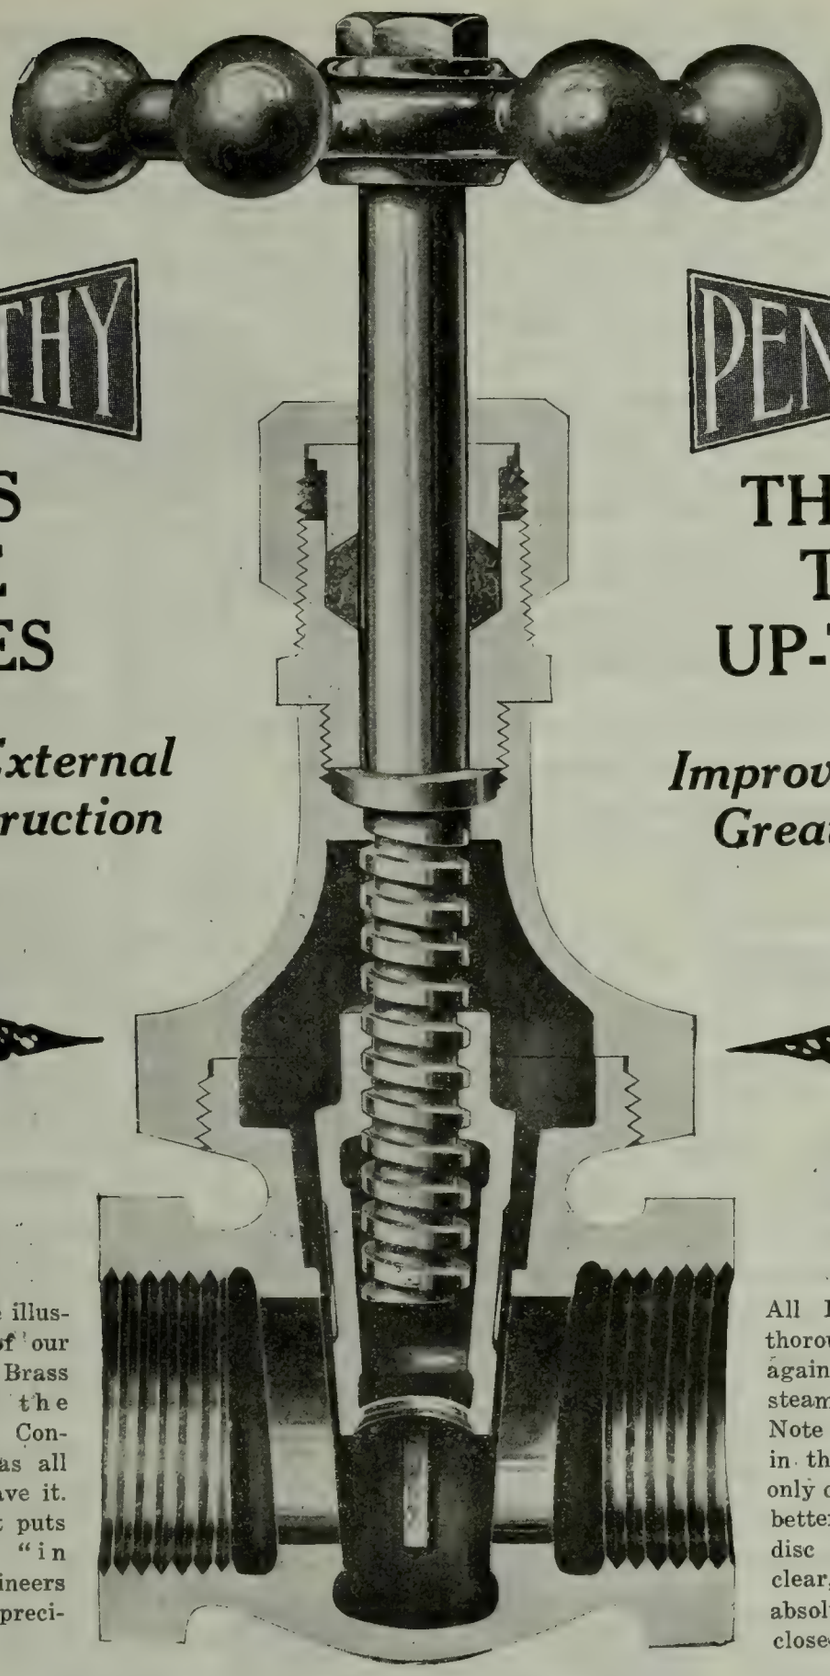
TRADE PENBERTHY MARK



BRASS GATE VALVES

Up-to-Date External Thread Construction

TRADE PENBERTHY MARK

THE GATE THAT'S UP-TO-DATE

Improved Design with Greater Efficiency

The Gate Valve here illustrated is but one of our many types of Brass Valves possessing the "External Thread Construction" feature, as all Penberthy Valves have it. It's the feature that puts Penberthy Valves "in strong" with engineers everywhere who appreciate a good valve.

All Bonnet threads are thoroughly protected against corrosion from steam and water.

Note the solid-wedge Gate in this valve. It's the only correct method. Much better than the Double-disc typs. Allows for a clear, quick opening and is absolutely leak-proof when closed.

Cut No. 567 Sectional Gate Valve

We are pioneers in the manufacture of Brass Goods in Canada. Leading jobbers from coast to coast sell Penberthy Valves. Every valve has the Penberthy Guarantee back of it, and bears the Penberthy Trademark, your proof against substitutes. Our prices are reasonable. If your jobber cannot supply you, write us for information.

Stephen House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

The Eden

Electric Washing and Wringing Machine

THE WASHER THAT SELLS ITSELF

In 1916 the Eden Washing Machine was practically unknown in Western Canada. Today there are thousands of homes that counnt the Eden as one of their most valued possessions.

WHY?

Because it is the one machine that washes well; so as to satisfy the most exacting housewife. Using the proper principle, the revolving cylinder, it is impossible for it to do otherwise, and because

An Eden User is an Eden Booster

ANNUAL FALL DIRECTORY *and* SALES NUMBER

HARDWARE and METAL

ON or about the 23rd of August, in every year for the past 31 years, the hardware trade of Canada has received the Annual Fall Directory and Sales Number of HARDWARE AND METAL. This number is looked upon as a most essential part of the early fall stock in every wholesale hardware buyer's office, and in over 90% of the retail hardware stores from coast to coast. The issue is a real buyer's guide and directory number. Owing to its size and the great amount of practical and valuable information in the editorial and advertising pages, the number is read, re-read, and consulted many times during the fall and winter months. A cord is inserted in the upper left-hand corner, in order that hardware buyers can hang up their copy close beside their desk. The Canadian hardware trade in all its branches naturally expects to find in this number advertisements from manufacturers and wholesalers who desire to do business with the hardware trade.

One manufacturer of planes, etc., received a large order from his ad. in one of our fall numbers, exactly eleven months after the number was issued. This indicated the long life of an advertisement in a number of this kind. Reservations made to date for the "Fall Number" make it quite apparent that this year's number—the first since the close of the war—will eclipse all previous records, and that it will be necessary to close all forms earlier than in previous years.

If you have not arranged for space in this number, drop us a line and we will gladly send complete details regarding circulation, rates, etc.

Letting You Into A Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

THE MACLEAN PUBLISHING CO., LTD.,
Dept. H.M., 143-153 University Ave., Toronto.

Send me THE FINANCIAL POST for

one year at Three Dollars
four months at One dollar

I will remit on receipt of bill in the usual way.

CARTER'S

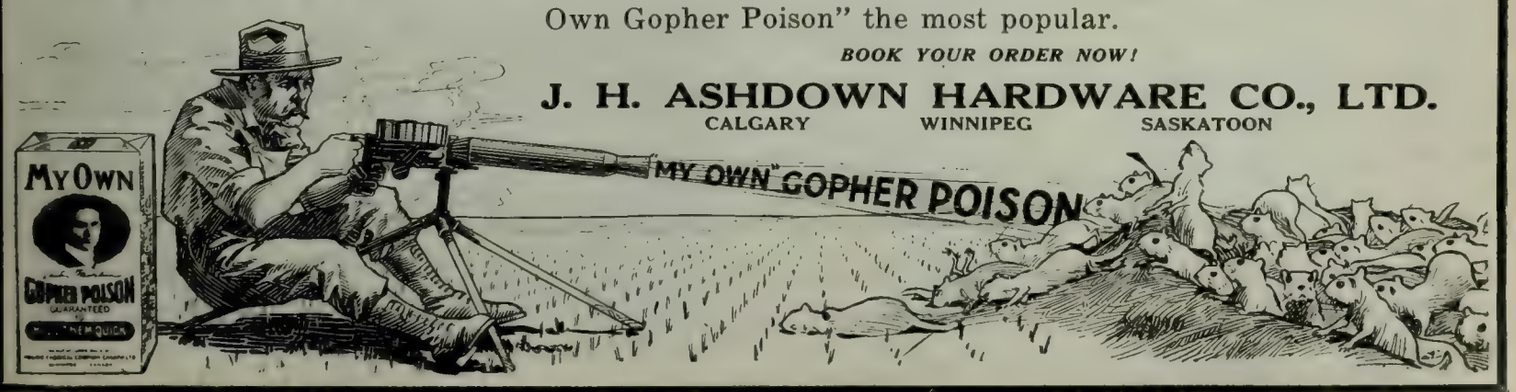
Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.



The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Dealers!

The big Gopher offensive has been stopped on all farms using "My Own Gopher Poison." The advertising we will get from these farmers, along with the new campaign, will make "My Own Gopher Poison" the most popular.

Why the Head Engineer Stands by
"Maple Leaf" Belting

Because it stands a breaking strain 50% greater than light double leather.
Because it stands a breaking strain 25% greater than 6-ply Rubber.
Maple Leaf Stitched Cotton Belting is economical and efficient.
We protect the jobber.

706 Shaughnessy Building - MONTREAL

WHY NOT ALLOW YOUR STAFF THE PRIVILEGE OF INCREASING YOUR SALES?

Making change takes time that might be used to better advantage in the selling of more good. And, too, it diverts the salesmen's mind from his real business. We have a cash carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps. They should not be forgotten.
Write for our four-page leaflet which tells how to obtain a double check on sales, and allow your salesmen in a greater degree, to display their selling ability.

All kinds of Cash and Parcel Carriers.

"Houk" and "House" Wire Wheels

In the Van of Automotive Progress

Motorists everywhere are acclaiming the Wire Wheel, because of its superior lightness, strength, economy, facility and beauty. And, of course, "Houk" and "House" possess those exclusive features which have popularized the Wire Wheel idea.

LIGHTNESS—Requiring less motor power to propel, thus conserving gasoline.

STRENGTH—Since a weight of 3200 pounds can be borne by each spoke—and with "Houk" and "House" triple lacing there are scores of spokes—these Wire Wheels cannot collapse nor break.

ECONOMY—"Houk" and "House" Wire Wheels accomplish a tire-saving of from 25% to 40%. Throwing off the friction tire heat, instead of holding it as does the wooden felloe, they prolong tire life. Again, their many spokes distribute the car's weight evenly over the tire, eliminating the concentrated sledge-pounding inflicted by each of the twelve wooden spokes.

FACILITY—Extremely simple of adjustment. Merely unscrew hub cap, remove wheel, tire and all, and put on spare with tire already inflated. Replace the cap, which tightens as the wheel turns. Four or five minutes' work completes the whole operation. "Houk" and "House" Wire Wheels are exclusive in this respect.

BEAUTY—For that final note of grace and elegance that all true car-lovers desire, "Houk" and "House" Wire Wheels provide the requisite touch.

Being made by the Ajax Wire Wheel Corporation of America, the largest Wire Wheel makers in the world, parts and replacements or repairs for "Houk" and "House" Wire Wheels, although seldom necessary, can always be readily obtained. All the popular cars are being "Houk" or "House" equipped.

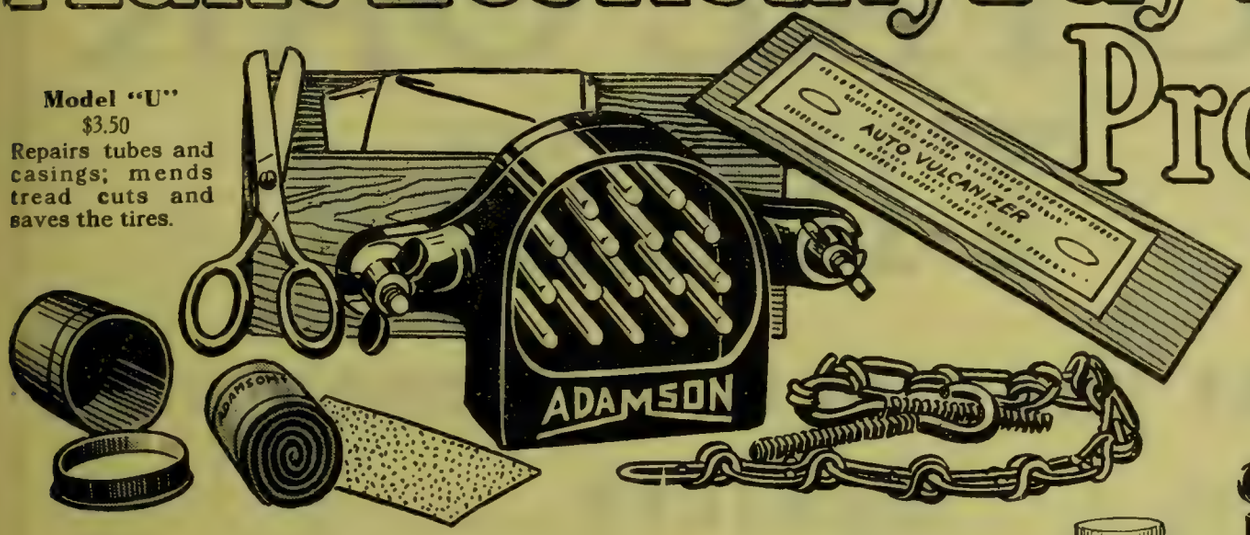
WOOD'S EVERLOC TIRE PATCH

How We Help You Sell Maltese Cross Tires

These and similar ads. are appearing regularly in leading publications from Halifax to Vancouver, and you should cash in on the demand stimulated by these announcements. Our aim is to make a tire that will exceed the most exacting demands of motorists. That we have succeeded is proved by the large number of repeat orders we receive from our dealers.

DISPLAY THESE TIRES IN YOUR WINDOW

You will be well paid for any window displays you may use by the increased business that will come your way. Motorists are realizing the true worth of Maltese Cross Tires, and are demanding them. See that you open your door to this opportunity for INCREASED SALES AND INCREASED PROFITS.



Gutta Percha & Rubber, Limited

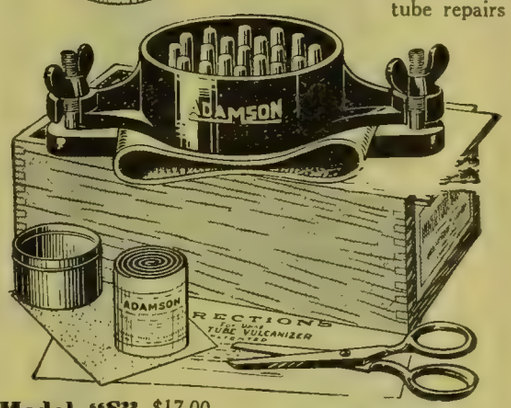
Head Offices and Factory, Toronto

Branches: Halifax, Montreal, Ottawa, Toronto, Fort William, Winnipeg, Regina, Calgary, Edmonton, Saskatoon, Lethbridge, Vancouver, Victoria.

Make Economy Pay YOU Profit!

Model "U"
$3.50
Repairs tubes and casings; mends tread cuts and saves the tires.

Model "E" $1.50
Repairs tube punctures in five minutes. Uses Adamson Dry Fuel or gasoline.

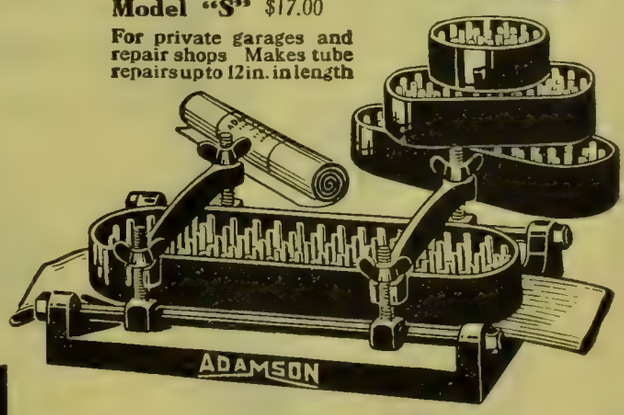


Model "T"
$2.50
For all inner tube repairs

Every motorist is seeking a way to make his casings and tubes last longer, and protect himself against the rising costs and threatened shortage of new tires.

Adamsons best meet this increasing demand because they not only mend *tubes,* but vulcanize cuts and abrasions in the *casings,* and keep moisture and dirt from getting into the fabric and destroying the tire. That means thousands of miles more tire service at the cost of a few cents.

Profit by this opportunity. Display and sell the Adamson line—a vulcanizer for every repair a motorist can make; surest in results and cheapest to buy and use; all models burn common gasoline, the fuel that is always dependable and easy to get.



Model "S" $17.00
For private garages and repair shops Makes tube repairs up to 12 in. in length

Write for Store Displays and Dealer Helps.

ROYAL OAK TIRES

What they actually mean to dealers

IN a few short years Royal Oak Tires have jumped into prominence in the Canadian field.

At the outset Royal Oaks were made good. With owners getting out-of-the-ordinary mileage from them, they soon became known as the real, honest, quality line.

This high quality standard has and always will be the upstanding feature about Royal Oak Tires.

"Mere Mileage and Greater Riding Ease" becomes a fact and a reality with those who equip with Royal Oaks.

"Tougher than Oak"

Profit—good, substantial profit—and highly pleased customers are the results obtained by the Dealers who sell them.

Let us explain our Dealer proposition to you. It is interesting, It will prove profit-producing. Get it now while the selling season is on in earnest. Drop a line to our Head Office about it to-day. Use the coupon for convenience.

Mirrors for Commercial Cars and Trucks

MIRRORS are a useful as well as ornamental equipment for a motor car or truck. New laws are being passed from time to time, making it necessary to carry them. The Ontario Legislature recently enacted a law making it absolutely compulsory for commercial cars and motor trucks to equip with them. There will be an overwhelming demand for mirrors owing to the recent passing of this law. This gives dealers an exceptional opportunity to cash in on a seasonable article that requires a small investment and gives a large turnover.

Special Truck Mirrors

The following amendment to the Ontario Motor Vehicles Act became effective June 21, 1919:—

"Every commercial motor vehicle shall be equipped with a mirror securely attached to it, and placed in such a position as to afford the driver of such motor vehicle, while driving or operating the vehicle, a clear view of the roadway in the rear or of any vehicle approaching from the rear."

The above illustrated mirrors are specially designed for mounting on motor trucks and delivery wagons. These are made in two styles of straight and angle brackets, and are in round, square and oval shaped designs. The angle type mirrors have an adjustable friction ball and clamp at the back, making it possible to set at any angle.

4923	4½" Round, straight bracket.....	$2.50
4924	4½" Round, angle bracket	2.50
4925	5" Round, straight bracket.....	3.00
4926	5" Round, angle bracket	3.00
4927	4½" x 6½" Sq., straight bracket...	3.50
4928	4½" x 6½" Sq., angle bracket.....	3.50
4929	4" x 6½" Oval, straight bracket...	3.50
4930	4" x 6½" Oval, angle bracket.....	3.50

Windshield Attachment Mirrors and Fender Mirrors

Round Reducing Mirrors

No. 3173.

Specially designed for use on small and medium cars. Bracket attaches to windshield, and the 4-inch convex mirror can be set at any convenient angle required. Black enamelled finish.

No. 3173—**Price** **$1.20**

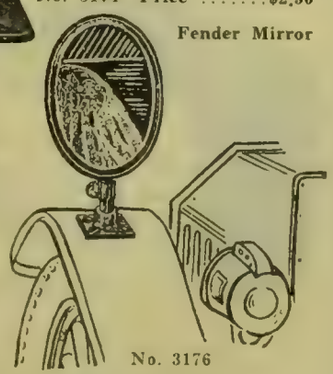
Oval Mirrors

No. 3175

Constructed exactly the same as mirror No. 3174, the only difference being that it is equipped with a 4 x 6½ oval mirror instead of a square one.

No. 3175—**Price, Oval Mirror** **$2.50**

Square Mirrors



No. 3174

French plate, beveled glass; separate frame. Two-piece steel stamped arm with clamp to fit on round, oval, or flat windshield frames; 7½-inch arm connected to mirror-back with adjustable friction clamp, which can be tightened by wing-nut, and enables mirror to be set at any angle desired. Back and rim stamped out of sheet steel; steel parts finished with a double coat of baked black enamel. Size 4½ x 6½.

No. 3174—**Price** **$2.50**

Fender Mirror

No. 3176

Designed so as to be mounted on front mudguard by means of four bolts and nuts which are furnished with the mirror. Equipped with ball socket and adjustment wheel, allowing mirror to be placed at any angle. 5-inch round Convex mirror lens. Black enamel finish.

No. 3176—**Price** **$2.50**

Car Owners—you owe it to yourself—for safety's sake as well as for beauty—to equip your car with mirrors. Order by catalogue number

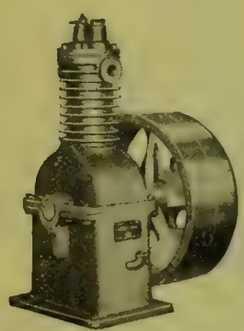
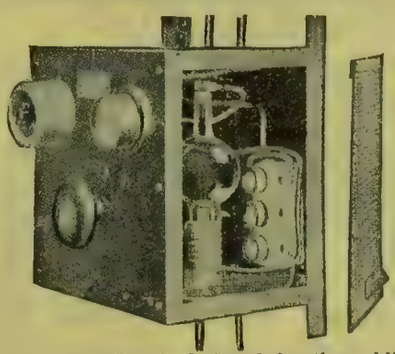
WEAVER AUTO-TWIN JACKS

The Weaver Auto Twin-Jack meets every requirement. As a lifting unit it is preferable to the ordinary type of jack, as the 34-inch wheel base offers an absolutely safe and dependable support for dismantled cars. Brakes can be safely and quickly tested with the rear axle supported on one of these jacks. The long extension handle is also a great convenience.



LECTROFLATER

This inflater has a capacity of 2 cubic feet free air per minute. It will inflate a 34 x 4 inch tire from zero to 70 pounds in 1¾ minutes.



It has a strong, well made ½ h.p. motor, capable of starting and operating compressor against 150 pounds pressure without overloading. It will operate from any electric light socket, either direct or alternating current.

CURTISS SELF-CONTAINED COMPRESSOR

This is an enclosed splash oil machine in which only enough oil is permitted to reach the cylinder to properly lubricate it without any excess being carried over into the discharge line. Fan fly wheel assists in cooling. Valves are of light weight and large area.

TUNGAR RECTIFIER

The Tungar Rectifier is designed for the public garage and battery service station. It will charge from one to ten 3-cell batteries at one time at 6 amperes or less. Overnight charging is safe since there are no moving parts and an interrupting of current simply means that the rectifier ceases operation, to commence again when the flow of current is restored.

We Are Also Distributors for

Atwater Kent Ignition, Dixie Magnetos, Locktite, Weed and Rid-o-Skid Chains, Klaxon Horns, Multibestos Brake Lining, Gill Piston Rings, K-W Magnetos, Pyrene Fire Extinguishers, Boyce Moto-Meters, Mazda Auto Lamps, Holophane Lens, etc.

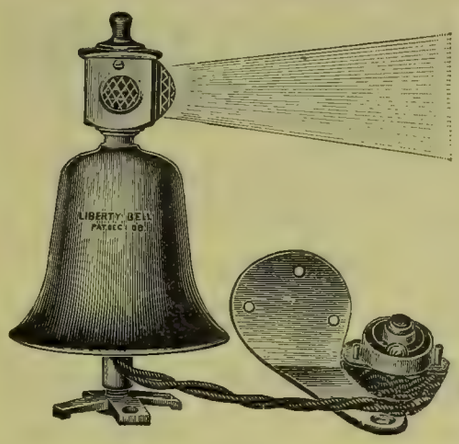
VERY little verbal argument is necessary to effect a sale in the case of

"SPHINX"

England's Most Durable Plug

Interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.



Sole Agent for Dominion: Wm. T. Evans, 1684 St. Urbain St., Montreal

Manufacturers: Sphinx Mfg. Co., Birmingham, England

'SPHINX'

England's most Durable Plug

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS

BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

FOR SALE

TIN SHOP TOOLS AND STOCK FOR SALE; doing a good business; lots of work ahead; three men going steady; a money maker for the right man. Fraser Bros., Bradford, Ont.

Use this page—the page that is never overlooked—from time to time to put efficiency in your service, and watch it for opportunities.

Everything is classified under appropriate headings, so that you can, at a glance, find what you are looking for. Quite often the want ad page is consulted as a guide to conditions.

Anything used or of interest to the Hardware and Metal trade can be located by an advertisement on this page. HARDWARE AND METAL reaches thousands of the best hardware men in the Dominion—the kind you want to speak to.

The cost of this service to you is very small—2 cents per word first insertion, and 1 cent per word for each subsequent insertion of the same advertisement. If you do not wish your name to appear in the ad we have a Box system whereby everything is strictly confidential, for which we charge 5 cents per insertion extra.

Kindly enclose remittance with ad so as to save unnecessary bookkeeping, etc.

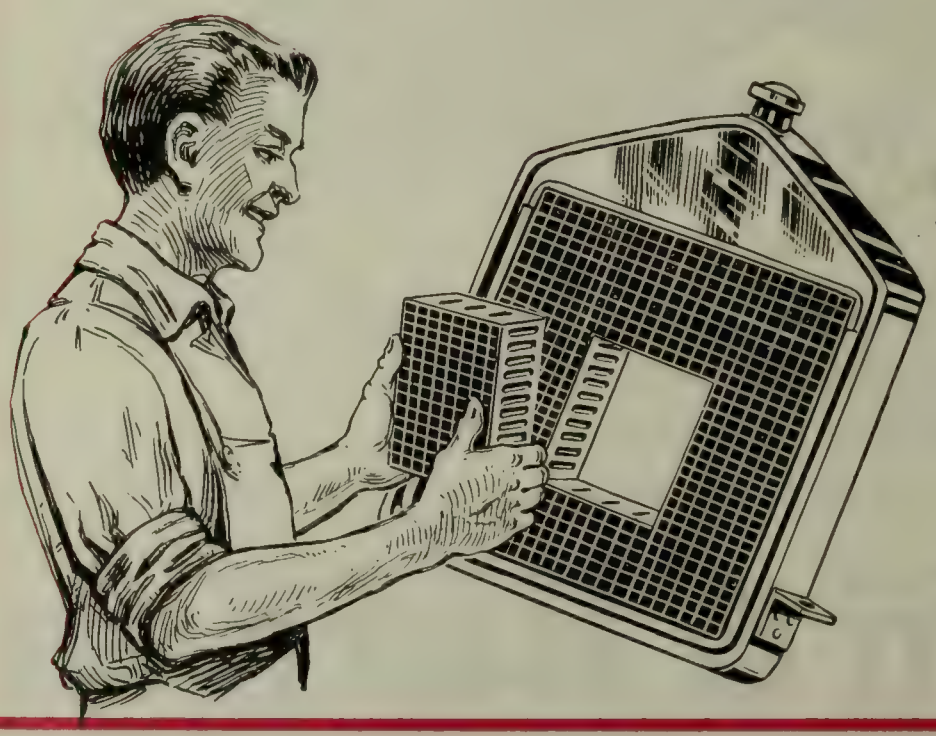
TWIST DRILLS — REAMERS — WRENCHES — HAMMERS

McKINNON RADIATORS

Really Cellular

The very simplicity of the McKinnon Radiator is what appeals to the car owner. He knows that injuries to his radiator can be easily and quickly repaired. He knows that if an accident happens and his radiator is punctured he can still proceed on his way. He merely plugs up the leaking cells with wooden plugs, chewing gum, tire dough or any adhesive substance, and drives on to **your** repair shop.

You quickly cut out the damaged cells, fit in a new cell or two, and solder the outside edges, front and back. You can make these repairs without much delay.



Simplicity of temporary repair and rapidity of permanent repair are good selling points for McKinnon Radiators.

McKinnon Radiators are carefully tinned inside and out to prevent corrosion.

The sides are straight downward and corrugated, thus agitating the water and increasing the cooling power of the radiator.

Every dealer and garage man should carry our "really cellular" radiators.

The most serviceable radiator made.

Demand Is There—
It Is Only a Matter of Supplying It

There, in a phrase, is the sales story of "Famous Five" Files as far as dealers are concerned.

Customers come to buy. You don't have to spend time explaining their qualities. All you need to do is carry stock enough to fill orders and specify "Famous Five" when buying from jobbers. They are:

Gurney-Oxford Pipeless Furnace

Our pipeless furnace is designed for school houses, bungalows, churches and farm houses where a more modern method is required to replace the old base burners.

Owing to the small cost of installation and the absence of large pipes taking up room in the cellar, this furnace is steadily growing in popularity. The heating principles and material used are the same as our standard furnaces. Write for further particulars. There is a certain demand right now in your locality for these furnaces, why not reach out for some of this business.

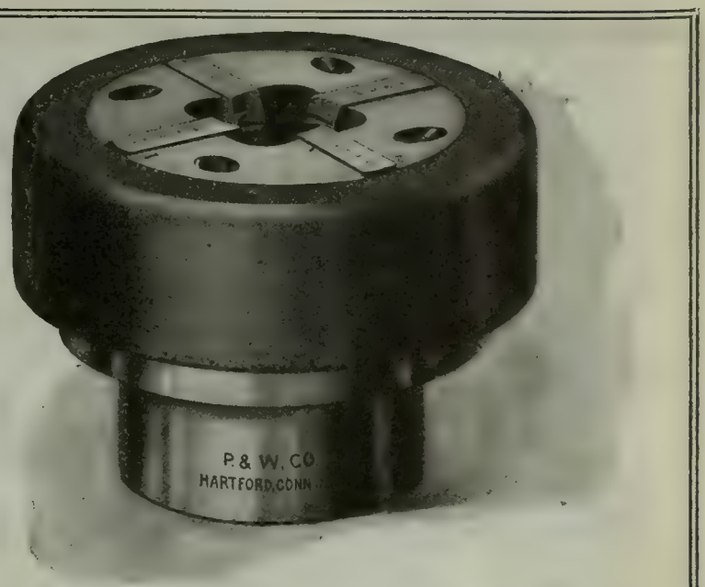
YALE Padlocks—

"The trade-mark Yale helps make the sale."



YALE Padlocks, like Yale Night Latches, Door Closers and Builders' Hardware are quick selling, profitable items in every dealer's line.

Enjoying the complete confidence of the public because of years of satisfactory service.

And being widely advertised throughout the Dominion—are but two reasons why you should stock Yale products.

Made at St. Catharines, Ont.

Williams' Superior Drop-Forged Clamps

CAST clamps may cost less, but they are not cheaper—first cost is not the only factor to be considered. No cast clamp can, or does, stand the constant strain of severe usage.

Williams' Clamps are all drop-forged and are then subjected to a refining heat-process which greatly increases their stiffness and strength. They are thoroughly dependable and render superior service under the hardest and most exacting conditions.

Williams' Lines of "C", Machinists' and Strap Clamps provide a wide range of sizes for all clamping service—"There's a Williams' Clamp for every purpose.

NATIONAL

Garage Door Latch

This No. 27 latch has the appearance, utility and simplicity—that's why it's a prime favorite with garage owners. It is extremely popular and it is sought for whenever a new garage door is hung—that's pretty often these days.

A dealer that has in stock articles which are popular and sought for, is naturally going to make a great many sales. With a good profit on each sale, and a good many sales per year, he will have a nice annual turnover, won't he? How about you?

No. 27 Latch is reversible for right or left hand door; adjustable for thickness from 1⅛ to 2¼ inches. Packed the **Unusual National Way,** one latch complete with screws, in a neat, strong box. Finished in Japan, Dead Black Japan, Sherardized and Dead Black Japan, Sherardized and Plated, any finish. Weight per dozen 26 lbs.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

LET *YOUR* WINDOW SELL

PLYMOUTH ROPE

This picture illustrates what may be easily accomplished in the way of Plymouth Rope window displays. Simple arrangement of the rope itself, together with the Dealer Helps which are free for the asking, will attract attention and stimulate your rope sales.

The following letter accompanied the picture which we reproduce:

"I thought that you would be interested in this because it is Plymouth Rope and the various knots, hitches, and ties were copied from the series of illustrations which you ran in Plymouth Products recently. These various knots were tied and fixed during spare time, but they have been very interesting and attracted considerable attention. Several gentlemen were looking at them and one said that they must have been tied by a sailor, but he didn't know that the work was done by a 'land lubber' who has only seen the ocean a few times during a short visit of two weeks to Boston and vicinity some twelve years ago.

"We are still selling Plymouth Rope because we find it more satisfactory than any other and also we are still selling it by the foot, because that is the only way for a retail merchant to sell it."

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

Sterling Spark Plugs

On Progressive Dealers' Shelves

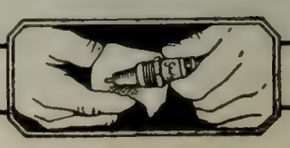
TO put it briefly—this Sterling Spark Plug carton is the mark of progress in your stock of accessories. It builds prestige as well as profits.

For the point is this: Dealers know that the life of Sterling Plugs does not end the FIRST time Sterling Plugs are carbonized.

Sterling Plugs can be renewed over and over again. They are made to be taken apart and it's the work of only a few minutes to wipe off the carbon—then the Sterling Plugs are good as new.

Dealers like to recommend Sterling Plugs to customers. They feel safe in doing so, for Sterling Plugs meet an economy need—their life is longer and you don't throw them away the first time sooted.

And, quite naturally, Sterling customers are satisfied—stay satisfied—profit and prestige business-building for any dealer.



Sterling Spark Plugs are sold by progressive garages and supply dealers everywhere.

Gentlemen—

We take pleasure in expressing our satisfaction in handling your Composite Stove. This stove is something entirely new and in our opinion fills a long felt want in combining a Heater and Cookstove.

We sold a number of these stoves last fall and each of our customers expressed their satisfaction.

We are looking forward to a much larger sale of these stoves the coming autumn.

Yours respectfully,

Tweed Hardware Co.

"BARCALO"

"S" Wrench

STRENGTH

A wrench is as strong as its weakest part.

The Barcalo "S" Wrench is a **unit of strength** made up of few parts. It has a drop-forged, movable jaw—strong enough to stand the hardest strain. The adjustable pin, screw and knurl are made of high-grade materials and properly placed. Every bit of material, every operation necessary to turn out a Barcalo Wrench, passes through the most exacting inspection.

Where other wrenches will not work — in those tricky places so hard to get at—

A Barcalo Does the Trick.

Made in 6, 8, 10, 12 and 14" sizes.

We are so sure of our wrenches measuring up to all we claim for them that we back them to the limit.

Dealers are selling Barcalo Wrenches at a good margin of profit and building up a fine line of business on Barcalo sales.

It's for your advantage to link up with the Barcalo organization. May we tell you why?

Get in touch with us to-day.

Every Wrench is guaranteed.

Every Ford Car Owner Is a Purchaser of

Champion

Dependable Spark Plugs

Champion "X" for Ford Cars, A-15, ½ inch.

Price, 90c

Think what the replacement business of Ford owners in itself means to you—over 140,000 of them in Canada.

You can capture your share of this business if you carry Champion "X" spark plugs. Champion "X" is exclusive equipment on every Ford car that leaves the factory. It's the plug that is absolutely guaranteed by us and recommended by the Ford Company, whose instruction book says:

> **"There is nothing to be gained by experimenting with different makes of plugs. The make of plugs with which Ford engines are equipped when they leave the factory are best adapted to the requirements of our motor."**

Champions are equipped with our 3,450 insulator and patented asbestos lined gasket construction which enable them to take the hardest kind of punishment unflinchingly.

There is a Champion for every type of motor car, truck, tractor, farm engine, motor boat and motorcycle and each is backed by our guarantee: "Absolute satisfaction to the user or full repair or replacement will be made."

Order from your jobber now and get the full benefit of our big business-building, advertising effort and the reputation behind Champions.

Champion Spark Plug Co. of Canada, Limited

Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

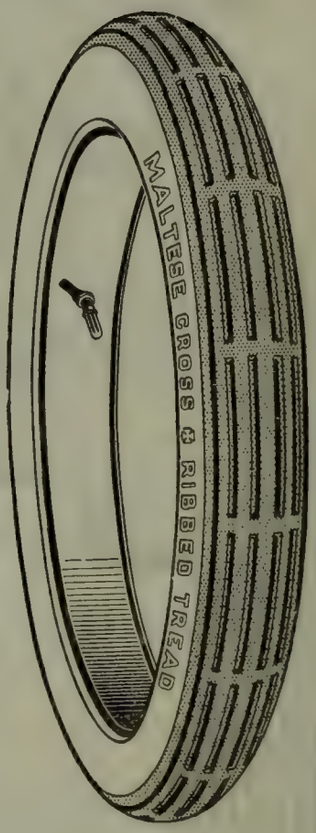
Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner.



To-day is a better day than to-morrow—write.

If you're looking for REAL fire protection, no need to go further.
The EDDY FIRE PAIL is what you want.
Made of our justly famous Indurated Fibreware, it's moulded in one piece. No hoops nor wires.
No leaking nor shrinking.
Always ready. Always right.
Made by

The E. B. Eddy Co., Limited - Hull, Canada

METALS · CHEMICALS · GLASS
B&S·H
Established 1790

We suggest to the trade that this is the advisable time to book contracts for the balance of the year on

Sheet Metal and Tinmill Products

as the mills are rapidly being filled up with tonnage. Delay in booking means slow deliveries.

B.&S.H.THOMPSON
& COMPANY LIMITED
MONTREAL

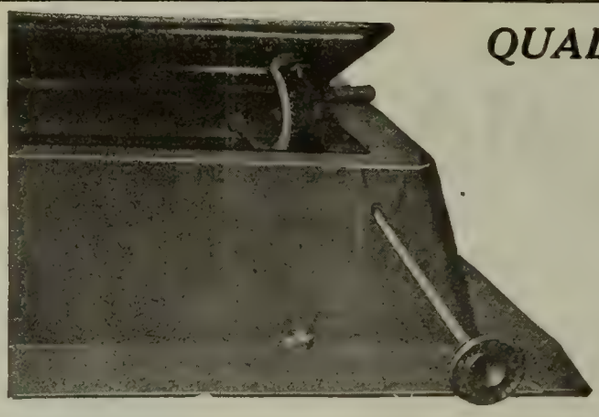
Branches : Toronto, Winnipeg, Vancouver, New Glasgow, N. S.

Selling Agents for Eastern Canada for United States Steel Products Co.
Exporters of the Products of the American Sheet & Tinplate Co.

KEYSTONE BRAND

The Workman Knows

The workman knows the effect of a poor kalsomine or whitewash brush. Now tell him the cause—poor, uneven bristles insecurely fastened.



"KEYSTONE"
Kalsomine and Whitewash Brushes

are made of the best grade of bristles obtainable, and careful workmanship assures your customers of a brush which will flow the color smoothly and finish the job, unmarred by streaks or bristles shed on the surface.

4 Good Reasons --READ 'EM !

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

The Signal of Distinction
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"
DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.
